(877) 559-3621 ciat.edu info@ciat.edu

CIAT reserves the right to update school policies at its sole discretion if it believes that doing so will improve the quality of education and services to our students. New policies will be updated in the latest school catalog but may also be listed on the school website, LMS or in CIAT manuals. We highly suggest you refer to the latest catalog from the CIAT website rather than rely on print or electronic document versions that may be out of date. You can view our latest catalog at https://www.ciat.edu/course-catalog/

Jamie Doyle

Letter from the President / CEO

Welcome to California Institute of Applied Technology (CIAT)!

CIAT's Degree and Certificate programs teach the skills and practical knowledge required to gain employment or advance in the field of Information Technology.

CIAT was established in 2008 and continues to innovate year after year. We strive to provide students with a unique and innovative approach to higher education – one that prepares you with the technical skills to meet the demands of today's competitive workforce.

As a small, fast-growing school, we pride ourselves in providing personalized attention and building thoughtful relationships with students to help you reach your career milestones.

As you are committed to improving your knowledge, skills, and career opportunities, we are committed to supporting you each day. We encourage regular feedback from students. Feel free to reach out to me directly if you have an idea that would support your academic goals or would like to pay a compliment to one of our team members: <feedback@ciat.edu>

Thank you for choosing CIAT! We will do everything in our power to assist you in achieving your goals.

Jamie Doyle

President/Founder

OVERVIEW

Why Choose CIAT?

Our college was built on the foundation of providing quality education and value to the student. Whether taken online or in a classroom, each course is designed to maximize the use of the latest technology to give you a more connected learning experience.

CIAT Mission Statement

California Institute of Applied Technology is committed to delivering innovative educational programs and personalized solutions to empower students for rewarding careers.

Catalog

Any questions a student may have regarding this catalog or the institution, that have not been satisfactorily answered by the institution, may be directed to the **Bureau for Private Post-Secondary Education at 1747 N. Market Blvd., Ste 225, Sacramento, CA 95834, www.bppe.ca.gov, toll-free telephone number 888-370 -7589 or by fax 916-263-1897**.

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement. The Office of Student Assistance and Relief is available to support prospective students, current students, or past students of private postsecondary educational institutions in making informed decisions, understanding their rights, and navigating available services and relief options. The office may be reached by calling (888) 370-7589 or by visiting https://www.osar.bppe.ca.gov/.

Catalog Changes

The information in this catalog is accurate and in effect as of the revision date that is found on the front cover of this catalog. A new catalog is published at the beginning of the January Term and at the beginning of the June Term each year. Catalogs may receive updates and revisions throughout their lifespan. Existing students will be notified when a new revision of the catalog is available. CIAT will notify all current students by means of a group email that will summarize the changes. The revised catalog will be posted to CIAT's website for download by the students and general public. The changes will also be summarized and posted to the Student Portal for a period of no less than 30 days. See the following paragraph for information on the Student Portal.

Eligibility

California Institute of Applied Technology is eligible to administer federally funded programs of aid for education in the form of Pell Grants and the Federal Direct Loan Programs (FDLP).

Statement of Ownership

California Institute of Applied Technology is a State of California Chapter S Corporation. The President/Founder, Jamie Doyle, has legal control of the company.

Bankruptcy

The institution has no pending litigation in bankruptcy, is not operating as a debtor in possession, and has not filed a petition within the past five years or have a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C Sec. 1101 et seq.)

Accreditation, Approvals and Affiliations

BPPE Approval

California Institute of Applied Technology is a private institution approved to operate by the California Bureau for Private Postsecondary Education. Approval to operate means the institution is compliant with the minimum standards contained in the California Private Postsecondary Education Act of 2009 (as amended) and Division 7.5 of Title 5 of the California Code of Regulations.

Accreditation

CIAT is accredited by the Accrediting Council for Continuing Education and Training (ACCET). ACCET is listed by the U. S. Department of Education as a nationally recognized accrediting agency.

Other Approvals and Partnerships

1. Approved to offer VA Education benefits
2. Approved to offer Tuition Assistance (TA) benefits
3. Approved to offer MyCAA (Military Spouses)
4. GSA Multiple Award Schedule Contract GS35F-0364Y
5. Sallie Mae Student Loan
6. Member of Microsoft IT Academy
7. Member of Cisco Networking Academy
8. CompTIA Authorized Academy
9. VMware Academy
10. Member of EC-Council
11. Member of the National City Chamber of Commerce
12. Official Pearson-VUE Testing Center
13. AWS Academy

401 Mile of Cars Way, Suite 100, National City, CA 91950
1717 Louisiana Blvd NE, Suite 208, Albuquerque, NM, 87110

CIAT's has two main campuses, one is located on the ground floor of a three-story office building off of the interstate 5, South of San Diego in National City and the second campus is located off of the interstate 40, Albuquerque in New Mexico. Shopping malls, restaurants, and hotels are within a short drive from each campus. We have large classrooms available, large networking lab facilities and large "quiet study" areas with

private desks for student use. There are offices for the staff. More than adequate parking is available and public transportation stops are located directly adjacent to each campus.

Program / Course Schedules

CIAT's 5-week terms are designed to accommodate students who have full-time jobs and family commitments by balancing the resident and IDL requirements to better suit your scheduling and learning needs. For example, 101A course is 75 clock hours in total. Students in a 5-week term will complete 15 hours per week x 5 weeks = 75 clock hours.

Schedules for courses offered during 2026 can be obtained from an Admissions Advisor by calling 877-559-3621 or emailing info@ciat.edu.

Hours of Operation and Availability

CIAT offers both online and on campus administration hours. Closed Sundays and Major Holidays. Office hours are as follows. All times are Pacific Time.

Online
Monday – Friday: 8:00AM – 6:00PM

Campus (Open only during 5th week of each term)
Tuesday – Friday: 10:00AM to 2:00PM Tuesday, 6:00PM Wednesday, 6:00PM Thursday, & 4:00PM Friday

Degrees and Certificates Awarded

Upon completion of one of our Degree Programs, the student will receive an Applied Bachelor's Degree and/or Associate of Applied Sciences Degree for the program in which they enrolled. Please note that CIAT is participating in ACCET's pilot to approve applied Bachelor's Degree programs in advance of ACCET's application for an expansion of scope. For more information, please see the Degree Programs section of this catalog. The following programs are offered during 2026:

- Applied Bachelor's Degree in Cloud Computing (BACC)
- Applied Bachelor's Degree in Cybersecurity (BACS)
- Applied Bachelor's Degree in Software Development (BASD)
- Applied Bachelor's Degree in Digital Marketing (BADM)
- Applied Bachelor's Degree in Health Information Management (BAHRM)
- Applied Bachelor's Degree in Human Resource Management (BAHRM)
- Associate of Applied Science in Computer Information Systems (AASCIS)
- Associate of Applied Science in Software Development (ASD)
- Associate of Applied Science in Business Data Analytics (AASBDA)
- Associate of Applied Science in Business Administration (AASBUS)
- Associate of Applied Science in Digital Marketing (AASDM)
- Associate of Applied Science in Healthcare Administration (AASHCA)
- Associate of Applied Science in Human Resource Management (AASHRM)
- Associate of Applied Science in Project Management (AASPM)
- Associate of Applied Science in Accounting (AASA)
- Associate of Applied Science in Health Information Technology (AHIT)

Upon completion of one of our Certificate Programs, the student will receive a Certificate of Program Completion for the program in which they enrolled. Please see the Certificate Programs section of this catalog for information on the certificate to be awarded and the courses included in the various programs. The following programs are offered during 2026:

- Certificate in Computer Information Systems (CCIS)
- Certificate as Cisco Network Associate (CCNA)
- Certificate as Cisco Networking Professional, Enterprise (CCNP-ENT)
- Certificate in Software Development (CSD)
- Certificate as Microsoft Office Specialist (MOS)
- Certificate as Computer Technician (CCT)
- Certificate as Networking Technician (CNT)
- Certificate in Cloud Administration (CCA)
- Certificate in Cybersecurity (CC)
- Certificate in Project Management (CPM)
- Certificate in Artificial Intelligence & Machine Learning (CAIML)
- Certificate in Workflow Deployment (CWD)
- Certificate in Database Administration (CDA)
- Certificate in Cloud Infrastructure (CCI)

Upon completion of a Professional Development course, the student will receive a Certificate of Course Completion (with the appropriate number of Continuing Education Units earned) for their course. CIAT Continuing Education and Professional Development in IT, Healthcare, and Business Administration are 40 hours in length and conducted on a five-day, eight hours per day basis, unless other arrangements are made. The CE&P course is charged at the rate of $2,640 per 40-hour course plus associated exam and technology fees. To enroll, request a registration form from a CIAT admissions advisor, complete it and submit form of payment at least 14 days in advance. If you cannot complete the process with 14 days' notice, you can request a waiver by calling 877-559-3621 or emailing us at info@ciat.edu.

Student Portal

The CIAT Student Portal, powered by Microsoft Dynamics, allows students to track their course registrations, grades, and attendance and should be utilized to monitor academic progress throughout the program. Students can access the Student Portal at any time through the internet with a unique user ID and password. Students will be provided with a username and initial password after completing their enrollment. No changes to a student's academic record can be made through the Student Portal. Please email studentservicesteam@ciat.edu or call 877-559-3621 to report any information that you believe is incomplete, inaccurate, or incorrect, or to ask for an explanation of the information presented to request assistance.

December 21 – January 2	Christmas & New Year Break – Campus Closed	Monday – Saturday

ADMISSIONS

Admission Requirements

For enrollment in CIAT's vocational certificate, associate, or bachelor's degree programs, applicants must be at least 17 years of age and must be in possession of a high school diploma or equivalent. CIAT does not accept ability-to-benefit students. For enrollment in CIAT's Continuing Education and Professional Development (CEPD) courses, students must be at least 14 years of age and may be concurrently enrolled in a high school program, with parental consent. Individual pre-requisites, if any, for individual courses are identified in the course descriptions section of this catalog. CIAT must determine with reasonable certainty, prior to the acceptance of the enrollment, that the applicant has the appropriate prior education required to succeed in the program.

The High School Diploma equivalency may be satisfied by either General Educational Development (GED) tests or a United States military Form DD-214 indicating that applicant has completed high school. All applicants must be able to read and speak English effectively and be able to use a computer keyboard and mouse to navigate in the Windows environment. CIAT will accept as a recognized equivalent of secondary education a GED, passing score on the California High School Proficiency Exam, a DD214 that indicates high school equivalency, a degree issued to the student that indicates the high school graduation, a certificate issued for home schooling at the secondary level regulated by the state or documentation of completion of an Associate's Degree, Bachelor's Degree, or Master's Degree.

Admissions Process

CIAT bans high-pressure recruitment tactics for the purpose of securing enrollments. In addition, CIAT prohibits providing commission or bonuses to individuals or entities based on securing enrollment or financial aid.

How to Apply for Admission:

- Complete the CIAT Application for Admission.
- Complete a formal interview with an Admissions Advisor via phone, video call, or in person.
- Submit proof of high school completion or equivalent.
- Complete a financial aid consultation to review all your options for managing your educational investment.
- Submit government issued proof of identity with signature, photo and date of birth (government ID, driver's license, or passport with picture).
- Submit unofficial transcripts for all college level education courses completed or pass a Scholastic Level Exam at the minimum required score or higher (required if you have earned less than six college-level semester credit hours from another accredited institution).
- Sign and submit CIAT Enrollment Agreement.

Identity Verification

We verify the identification of any student utilizing government or employer funding for classes and for all students when taking certification exams. Acceptable forms of identification include passports, driver's licenses, military ID cards and other forms of government issued identification with photo. Additional identification may be required when attempting certification exams. We will advise you of required identification when scheduling your exams.

Student Visas

CIAT does not provide I-20s or any other form of Visa assistance for foreign students.

Language Requirements

All courses are offered in the English language. CIAT does not offer English as a Second Language (ESL). The student must be able to speak, read/write and understand the English language to enroll in any CIAT course. The student's signature on the enrollment agreement signifies that they attest to their ability to be able to speak, read/write, and understand the English language. In addition, CIAT verifies English Language skills through the admissions process. College Transcripts not in English will not be accepted by CIAT.

Test of English as a Foreign Language

Applicants whose native language is not English and who have not earned a degree from an appropriately accredited institution where English is the principal language of instruction must receive a minimum score of 500 on the paper-based Test of English as a Foreign Language (TOEFL PBT), or 61 on the Internet Based Test (TOEFL IBT). For more information on TOEFL, go to their website by following this link: http://www.toeflgoanywhere.org/. Students who desire to register and take the TOEFL online exam may do so through an authorized Prometric Test Center.

CIAT Readiness Course (CRC)

New students are enrolled in a CIAT Readiness Course (CRC) prior to starting their first class. The CIAT Readiness Course is designed to prepare students with the resources to successfully complete their first term. Students who do not complete the CRC may be required to change their start date to ensure their success. Returning students are not required to complete the CRC. Topics in these modules include (but are not limited to):

- Navigating through Canvas
- Submitting discussions posts and replies
- Monitoring your grades
- Ordering your textbooks
- Live class participation

Acceptance Criteria

Scholastic Level Exam

A Scholastic Level Exam (SLE) is required for all students enrolling in our Degree and Certificate Programs, when they have less than 6 college-level semester credit hours or two AP exam scores with 3 or above, to ensure that each and every student at CIAT can successfully meet the challenges found within a college level learning environment. A minimum passing SLE score is 21 for Associate of Applied Science in Software Development and

Associate of Applied Science in Business Data Analytics. For all other programs, the minimum passing SLE score is 17. Students are only allowed to take the SLE a maximum of three (3) times within a 5-week period. Students who fail all three exams will need to wait for the next enrollment cycle. Students enrolling in Professional Development Bootcamps/Seminars are not required to take the SLE even if they do not have prior college-level credits.

We strongly believe that everyone with the right motivation and commitment to building a career deserves a shot at success. However, immediate acceptance is not always guaranteed. Acceptance may be immediate or deferred based on previous academic history.

Immediate Acceptance: A prospective student must comply with one of the following evaluation criteria to qualify for immediate acceptance:

- 6+ completed college credits with a GPA > 2.0
- High school GPA > 2.0

Deferred Acceptance: If a student does not meet the eligibility criteria for immediate acceptance, student may be offered a deferred acceptance with recommended pathway options, such as:

- Appeal to CIAT Admissions Committee with a personal statement explaining prior academic performance and career motivation,
- Elevate their GPA at a community college prior to re-applying,
- Take first industry certification exam on their own,
- Return to previous college to repeat classes for an improved grade.

CIAT Technical Exam

The CIAT Technical Assessment exam is a required assessment for all incoming CIAT students, designed to verify basic computer skills. Students must earn a passing score of 70% or higher with a maximum of (2) attempts per enrollment term. Students may receive an exemption from the technical assessment requirement if the student meets one of the following conditions:

- Active employment in their field of study.
- Prior degree earned from an accredited institution at an associate degree or higher.
- Attained an active industry certification prior to enrollment.

Students with Criminal Records

Students seeking jobs in their desired field of study may be subject to pre-employment screenings such as, but not limited to, criminal background checks, drugs and/or alcohol testing, physical and/or psychological examinations as credit checks. Unsatisfactory screening results may result in denial of an offer for a position in the field. The university does not believe that students should make a substantial investment of time and money if the ability to secure employment in the field of study is unlikely. Therefore, applications by those with felony convictions may be denied; however, exceptions may be warranted for those individuals who can demonstrate to CIAT that their goals, experience, and desire to become employed in the field of study are significant enough to overcome the challenges relating to their criminal background.

Exceptions are given at CIAT's sole discretion. Individuals who wish to be considered shall write a minimum of a 500-word essay explaining their circumstances, what has changed, and how their goals, experience, and desire to become employed in the field are deserving of an exception. CIAT will present the facts to the admissions board and provide an answer within 30 days of submission. In addition, individuals who have been convicted and are subject to an involuntary civil commitment upon completion of a period of incarceration for that offense may have limited eligibility for a Federal Pell Grant or a federal student loan. Therefore, applicants who wish to be considered must also prove they can pay their tuition and living expenses while in the program. To submit your petition:

1. Schedule an appointment and complete an interview with an Admissions Advisor by contacting admissions@ciat.edu,
2. Complete the Pre-Application, and Enrollment Application and sign receipt of Gainful Employment Disclosures,
3. Submit a minimum of a 500-word essay explaining your circumstances, what has changed, and how your goals, experience, and desire to become employed in the field are deserving of an exception,
4. Once all the above steps have been completed, the Admissions Advisor will present the facts to the admissions board. This process may take up to 30 days, Once the decision has been made, the applicant will be notified via email/phone.

Academic Progress Requirement

A grade of **C or better** must be achieved in the first course upon acceptance into the program to remain eligible to continue. Earning a grade lower than a C will result in enrollment cancellation. Reapplication and re-entry into the program may be pursued through the Readmission Process in a future semester. For more information on the readmission process, see details on page 17.

Students with Disabilities

CIAT recognizes and accepts its obligations under The Americans with Disabilities Act (ADA) of 1990 and The Rehabilitation Act of 1973 prohibiting discrimination on the basis of a disability and requiring that reasonable accommodations be provided to qualified disabled students in all programs and activities within the control of the institution, provided such accommodation would not impose an unreasonable burden on the school or other students. The accommodation provided by CIAT is free of charge.

The Vice President of Compliance and Student Services Director manage the process for the determination of reasonable accommodations and compliance with the ADA and Rehabilitation Act for students jointly. No student shall be retaliated against for seeking accommodation under this policy or for participating in good faith and in a reasonable manner in any review procedures regarding The Americans with Disabilities Act of 1990.

Non-Discrimination Policy

CIAT adheres to a strict policy of non-discrimination. We will not discriminate for or against any applicant on the basis race; color; religion; sex (including pregnancy, childbirth, and related medical conditions, transgender status, and gender identity); national origin (including Limited English Proficiency [LEP]); age; disability; political affiliation or belief; or, for beneficiaries, applicants, and participants only on the basis of either citizenship status or participation.

Transfer of Credits to CIAT

CIAT strives to ensure the fair and equitable treatment of students relative to transfer of credit. The following underlying principles guide CIAT's policy on transfer of credit:

1. The best interests of students are served by facilitating the transfer of prior credit earned.
2. The provision of timely, accurate and unambiguous information relative to institutional policies and practices serves the public interest.
3. The evaluation of transfer credits by CIAT must be implemented in a fair, reasonable, and consistent basis.
4. The principal criteria CIAT will use in evaluating transfer credits is the quality of the credits earned relative to comparability and applicability to the CIAT program in which a student seeks to enroll.
5. CIAT's decision to award or reject such credits is to be respected, but the student has the right to question any decision made regarding transfer of credits from their prior training and/or experience.
6. CIAT will establish and implement a fair and equitable policy regarding the transfer of credit. The policy will be written, published in this catalog and other relevant publications, and disseminated to all students and prospective transfer students.

CIAT will only consider for acceptance credit earned at another institution if that institution is accredited by an agency recognized by either the U. S. Department of Education or the Council for Higher Education Accreditation. Credit earned at an institution outside the United States will be considered for transfer only if:

1. The student presents a transcript that is in English or has been translated into English by an official translation service.
2. The school has been recognized, authorized, or accredited, as appropriate by the National Agency responsible for said recognition, authorization or accreditation in the country it is located in, as listed on the Council for Higher Education Accreditation website.

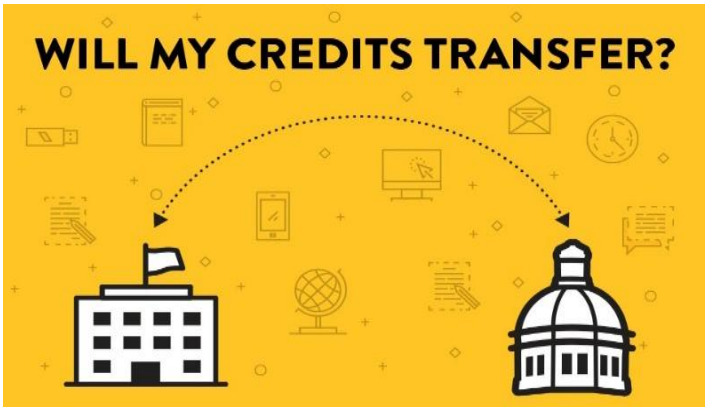

CIAT will accept a maximum of 75% of the credits for transfer credit or a combination of transfer credit and experiential or equivalent credit (including challenge credits). For no student, however, may the credit given for experiential or equivalent credit (including challenge credits) exceed 25% of the credits required for a certificate or degree. CIAT will only consider for acceptance transfer credit from institutions that are accredited by recognized agencies of the U.S. Department of Education and/or provide the current associated industry certification. **Transfer of credit may affect your ability to qualify for Financial Aid.**

Official Transcript Policy

It is the student's responsibility to ensure that CIAT receives an official transcript from all attended colleges where transfer credits are to be provided. Students are required to submit official transcripts within the first term (5 weeks) of enrollment to ensure their course registrations can be accurately planned.

Pending transfer credits provided during the enrollment consultation will be used to support a student's financial projection and course registration plan until official transcripts are received. If pending transfer credits have been applied, and official transcripts have not been received by the end of the first term, the student will receive an updated financial plan with pending transfer credits removed. The updated financial plan must be approved to continue with their enrollment.

Students wishing to transfer credit to CIAT should have official transcripts sent directly from the accredited institution to CIAT. Veterans will be required to provide their Joint Services Transcript or equivalent from the Air Force and Coast Guard, and all transcripts from all institutions for all college-level courses taken prior to attending CIAT. All transcripts received will be reviewed by the CIAT Records Department for transfer credit and will only be transferred from courses equivalent to those offered by CIAT. CIAT Records will provide a written report of the action taken for each transcript or JST submitted. Students have the right to challenge the decision of the Registrar to accept or deny credit. To do so, the student must submit the challenge in writing within 30 days of receiving notice of the results of their transcript review. They must state what they are challenging and provide specific reasons for why they are challenging the decision. The Registrar will review the challenge and reply in writing within 10 business days. In case of a continued dispute of the results by the student, the student will have 10 business days to respond in writing. The dispute will then be forwarded to the Director of Student Services for final review and resolution. The decision of the Director of Student Services is final.

For CIAT courses that lead to one of our Certificates or Degrees, credit will be considered for transfer only if:

1. For all courses:
   a. The student must have achieved a grade of C- or better.
   b. For courses where no letter or numeric grade is given, such as ACE recommendations, a grade of P will be given. Note that a grade of T for transfer is recorded on the students CIAT transcript and transferred grades are not considered for the student's GPA at CIAT.
   c. The course must be a minimum of 3 Semester Hours or 45 Clock Hours.
   d. The course must be equivalent to the CIAT course for which credit will be given.
2. For core classes and technical electives:
   a. The course transferred must be substantially the same as the corresponding CIAT technical course.
   b. The course must have been completed within a seven-year period prior to the student's program start date or the student must request a written appeal and demonstrate technical knowledge and skills that meet the course and certification objectives, or:
   c. Transfer credit may be awarded based on documentation of active industry certification(s) for corresponding CIAT course(s). Transfer credit will not be awarded for inactive industry certifications.
3. For General Education Classes:
   a. In some cases, 3 credit general education courses may be used to satisfy a 4-credit course (e.g. Statistics) if the course transferred meets the substantial learning outcome requirements for the corresponding CIAT general education course.
   b. AP exam scores with 3 or higher within the four (4) year period prior to the student's Program start date.
   c. The laboratory credits may be transferred for courses under Scientific Inquiry and Quantitative Reasoning.
4. Transfer Credit may also be given for:
   a. CLEP Exams
   b. DANTES Exams
   c. ACE Recommended Credit on JST's
5. Degree Bulk Transfer Credit may be awarded in the following cases:
   a. All Associate-level general education course credit requirements will be satisfied if the student has earned an Associate's Degree or higher from an accredited institution.
   b. All Bachelor-level general education course credit requirements will be satisfied if the student has earned a Bachelor's Degree or higher from an accredited institution.

Veterans Students using VA Benefits to pay for any portion of their training are required to submit their JST and all transcripts from all prior training within the first term (5 weeks) of enrollment to ensure their course registrations can be accurately planned.

Tuition and fees will not be assessed for any courses transferred in. CIAT only charges tuition and/or fees for courses taken at CIAT or by online means through CIAT. Any tuition or fees prepaid for courses which were later transferred in will be refunded within 45 days of the transfer being recorded, unless challenged, in which case payment will be made within 45 days of resolution of the challenge.

There is no charge to the student for the evaluation and recording of transfer credits. It is possible that students receiving Financial Aid may have their financial aid reduced by the amount that their tuition and other fees are reduced at CIAT by transferring in credits.

Transfer of Credits from CIAT

CIAT does not in any way guarantee or promise that credits earned at CIAT will be accepted for transfer by any other institutions. It is strictly the decision of the receiving institution to accept or deny transfer of credits. Students desiring to transfer to another institution may ask for guidance and counseling from Student Services concerning their proposed transfer. Official Transcripts must be sent by mail to the Registrar's Office of the receiving school upon receipt of a request in writing signed by the student. Official Transcripts will be forwarded within 5 business days of receipt of an authorized request from the student. Please email, transcripts@ciat.edu to request official/unofficial transcripts.

Transcripts will not be provided to third parties without a signed authorization or request from the student, except as required by law or court order. Similarly, course syllabi and outlines are considered proprietary information and will not be provided to third parties except as required by law or court order. Course descriptions may be found in our catalog and are available to all interested parties.

Experiential Credit

Experiential learning is defined as those skills, competencies, and knowledge (general or specific) that are acquired through work, self-development, training, or volunteer experiences.

Credit is not awarded for life or work experience at CIAT. Credit is only awarded based on measurable learning outcomes. Students with extensive experience are recommended to challenge for credit. See Course Challenge for Credit policy below:

1. College credit will be awarded only for college level learning.
2. Credit will be awarded only for learning that has a balance, appropriate to the subject, between theory and practical application.
3. The determination of competence levels and of credit awards will be made by appropriate subject matter and academic experts.
4. Credit will be appropriate to the academic context in which it is accepted.
5. There is no cost to evaluate experiential credit.

Course Challenge for Credit

Students may challenge up to 25% of CIAT's courses by successfully passing the course final examination on their first attempt. Retakes of tests taken as a challenge test are not allowed. Students taking a challenge test and failing will be required to take the full course to achieve credit for the course. CIAT charges $0.00 per challenge exam. The number of challenge exams will follow the number of industry certification exams required to be certified. For example, for CompTIA A+, there are two parts to the exam (220-1101 and 220-102), therefore you will need to take two challenge exams.

CIAT does not accept hours or credit through transfer of credit achievement tests.

Transfer Credit Appeal

Students have the right to challenge the decision of the CIAT Records Department to accept or deny transfer credit. For technical course transfer credit, a student can petition to request transfer credit for courses taken over 7 years. The student must submit the challenge in writing within 30 days of receiving notice of the results of their transcript review. They must state what they are challenging and provide specifics of why they are challenging the decision. The Registrar will review the challenge and reply in writing within 10 business days. In case of a continued dispute of the results by the student, the student will have 10 business days to respond in writing. The dispute will then be forwarded to the Dean of Education for final review and resolution. The decision of the Dean of Education is final.

Notice Concerning Transferability of Credits and Credentials Earned at our Institution

The transferability of credits you earn at CIAT is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the diploma or certificate you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits, diploma or certificate that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending CIAT to determine if your credits, diploma or certificate will transfer.

Substitution of Courses

Students that have taken a similar course from an accredited institution that is the equivalent of a course contained in their selected Certificate or Degree program, and/or have the current associated industry certification, may elect to substitute an equivalent or higher-level course at no additional cost for the program.

Due to difference in academic curriculum standards, for students that do not have the current associate industry certification but have taken a similar course from an accredited institution will need to demonstrate knowledge by taking the "Challenge for Credit Exam" with CIAT within 90 days from the start date of the first term in the program. Please see Admissions for more information.

Sequence of Classes

CIAT's Programs are designed to provide the student with the skills and knowledge that is in demand by employers. The programs are intended to sequence the student through the basics and then into more advanced topics that build upon the previous courses taken.

Students enrolled in the Bachelor's Degree programs are required to select a concentration track upon enrollment. The concentration track name will not be displayed on your official transcript or diploma. Students are strongly encouraged to remain in the pre-selected concentration to benefit from student cohort support and optimal instruction paths. Certificate and Associate's Degree students do not have concentration track options and will be scheduled to take courses in a predetermined best sequence.

Students must successfully complete all the courses in a program to receive the certificate for that program. Some of the programs offer electives of the student's choice as part of the Program/Degree. These electives will be scheduled for completion after the student has completed the "core" courses of the program.

To switch tracks once during your enrollment period, the student:

1. Must have a valid reason to do so, such as employment needs.
2. Must be making Satisfactory Academic Progress
3. Must have completed their current course, and all prior courses at CIAT, on time with a grade of C or better.
4. Must submit a Schedule Change Request at least one week prior to the end of the current Term.

All requests to take courses out of sequence must be approved by the Student Services Director. Approved changes will take effect at the start of the next regularly scheduled Term.

Leave of absences may be required due to course availability or inability to meet academic performance requirements. Continuous course availability cannot be guaranteed.

Readmission Process

Individuals who have previously withdrawn from CIAT, have been dropped from their academic program, or have been dismissed from their respective program for any reason may choose to petition the institution for consideration of re-enrollment. In order to be considered for re-enrollment, individuals must complete a new application in its entirety.

Requirements for Consideration:

- Schedule an appointment with an Admissions Representative.
- Complete the Pre-Application, and Enrollment Application and sign receipt of Gainful Employment Disclosures.

- The applicant must submit an essay with a minimum of 250 words detailing his/her academic and career goals, how CIAT can assist with attaining these goals, and if any obstacles were encountered during the previous enrollment (i.e. academic, personal and/or scheduling difficulties), how such obstacles to academic success will be addressed and overcome given the opportunity for re-enrollment at CIAT. This requirement is waived for any re-entry students with a previously high academic standing with GPA 3.0 or higher and no SAP violation.
- Applicants are also required to schedule and complete an in-person or over-the-phone interview with the Director of Admissions.

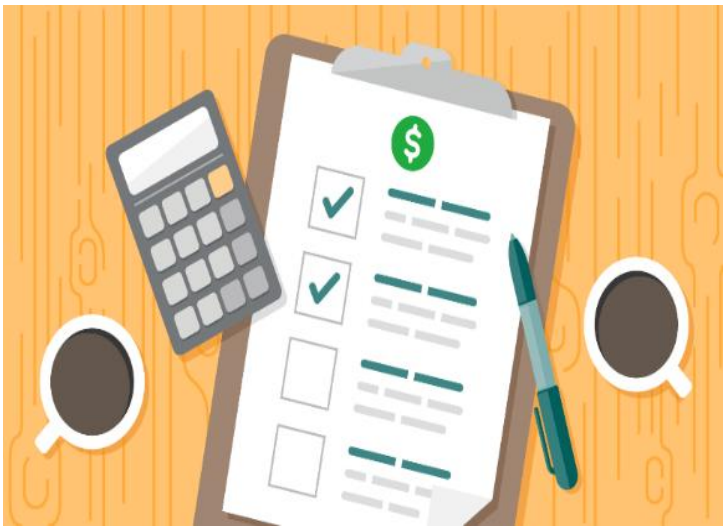

All petitions for reenrollment should be forwarded to the admissions department in person, by mail or emailed to admissions@ciat.edu. Depending on the number of readmission attempts, individuals may need to complete a 3-term waiting period and CIAT Readiness course to be considered for readmission.

Once an applicant has completed all the readmission application requirements, the CIAT management will review the information along with the applicant's previous academic history, attendance, and reason for departure from the last enrollment. Each readmission application will be reviewed on a case-by-case basis. A previous admission does not guarantee admission into any given program at CIAT. The final determination regarding re-admission, including any reason for denial, will be presented in writing via email or mail to the student within ten business days of receiving all the required information.

Upon approval of re-admission, the following applies:

- When a student drops and re-enters into a different program, any eligible completed coursework from the applicant's prior enrollment(s) with a grade of "C-" or better will be transferred to the applicant's current enrollment. Please see the Transfer Credit Policy for more details.
- When a student drops and re-enters into the same program, all course grades from their prior enrollment within that program will roll over and be included in the GPA and SAP (Satisfactory Academic Progress) calculation. This applies only to courses taken at CIAT in the same program they are returning to and applies to students who were dropped, dismissed, or withdrew. This policy does not apply to granted or earned degrees and certificates.

All individuals approved for re-entry must pass the first class with C or better upon return. Final grades of C- or lower during the first class after re-entry may result in administrative withdrawal and there may be up to a 10 term (12 month) waiting period prior to being eligible for consideration of re-enrollment.

FINANCIAL INFORMATION

Tuition and Fees

Tuition

Tuition for CIAT non-degree programs and individual courses is charged at the rate of $660.00 per unit (1 Semester Hour, 15 Lecture Clock Hours or 30 Lab Clock Hours). This cost is the same for all technical courses and does not include any labs or separate lab courses required by the basic course. Laboratory fees per program will be listed under Laboratory/Technology Fees below. The Microsoft Office classes are charged at a flat rate of $1995.00 per course. The cost for each program is different, depending on the number of courses included in the program. The degree program includes General Education courses which are also charged at the rate of $660.00 per Unit. Total program costs are specified in the program description section of this catalog.

Any repeat of the course may be charged with the tuition for the course.

Tuition, fees, and charges are subject to change by administrative, or legislative, and changes become effective on the date enacted.

There are three terms in a semester (15 weeks) and each semester is CIAT's period of attendance. The tuition cost for one period of attendance equals three terms. For example:

- Term 1: 4 semester credit course; $2,640
- Term 2: 4 semester credit course; $2,640
- Term 3: 4 semester credit course; $2,640

Total Charges for a period of attendance: $7,920.00

CIAT does not financially obligate a student for more than twelve (12) months in any current and active enrollment period. A student may not have more than one enrollment active at any time.

Books, Virtual Labs and Other Materials

Textbooks are not included as a part of tuition, and the student is responsible for purchasing the books. The cost of books varies with each course. Book costs approximately from $20.00 to $200.00 per course. Students will receive a textbook list and curriculum which provides all information required to obtain needed learning resources. Some books are only available through an official source such as Microsoft and EC-Council. Those that are commercially available can be purchased by the student in lieu of buying them from CIAT. Book costs constantly change, so, any costs for books mentioned in this catalog are based on the best estimate of actual cost at the time this catalog was created. Please check our website https://www.ciat.edu/textbook-list/ for the latest costs for books.

Software

Any software required for a course will be provided by CIAT. This software is provided under licenses that allow for its use only in pursuit of the course. Any other use by the student is in violation of copyright laws and may subject the student to disciplinary action by CIAT and/or other authorities.

Supplies

Students are expected to provide their own pens, pencils, note-taking materials, calculators, etc.

Tools

Any tools needed during a CIAT conducted lab will be provided by CIAT. Students should not have to purchase any tools during their enrollment at CIAT.

Certification Exams

Certification Exams are an optional additional expense. Students are responsible for any certification exam costs that are not covered under CIAT's Certification Exam Policy and must be paid prior to registering for any certification exam. These fees may change with little or no notice. For a schedule of fees, visit PearsonVue.com.

Technology Fees

Accessing technology is a required component of your course. The technology fee will be applied to the student's account as a one-time fixed cost at the beginning of the program. Tuition and fees will be prorated when determining a refund and follow the Cancellation and Refund policy on page 28.

Equipment Fees

Accessing physical computer parts and delivery for hands-on "Build your own computer" lab project is a required component of your CIS101A/B courses. The equipment fee will be applied to the student's account as a one-time fixed cost at the beginning of the program. Tuition and fees will be prorated when determining a refund and follow the Cancellation and Refund policy on page 28.

Challenge Exam	$0.00	Per Exam

Down Payment Policy

Down Payment: A down payment may be required upon enrollment for students with a personal investment balance after primary funding has been applied.

- **Refundable Portion:** Any down payment applied towards tuition is refundable if the student cancels their enrollment or does not start the program. The refundable portion will be processed in accordance with the institution's cancellation policy.

CIAT encourages responsible borrowing and debt management. This policy ensures that students are committed to their education while providing financial flexibility in the event of cancellation. All students are eligible to enroll in CIAT's in-house financing program; however, conditions for approval may vary based on program selection and personal investment balance.

Payment of Fees

Tuition and fees must be paid in full at least 14 business days prior to the start of class. Tuition includes class instruction and required materials and may be paid using a major credit card, debit card or, check. All students will be informed of available State and Federal grants first before packaging or arranging private student loans or alternative financing programs. If you are using education benefits, funding documentation (such as tuition vouchers, approved purchase orders or other approved forms of payment), are also due 14 business days prior to the start of class. Ultimately, it is the student's responsibility for payment of tuition regardless of whether a third party is funding their education. Once your tuition has been received, you will receive a welcome email with login instructions from your instructor. The tuition for each program is located next to the course description in this School Catalog.

Discounts and Scholarships

CIAT offers discounts and scholarships. Students receiving discounted tuition may not receive any other discounts or complimentary certification exam benefits from CIAT.
For Applied Bachelor's Degree in Computer Information System program, the maximum amount of scholarships and discounts combined cannot exceed more than $15,000.00 per student. The scholarship will be applied evenly in the last two semesters.

For the Associate's Degrees and Certificate programs, scholarship awards will be applied evenly every term depending on the length of the program. For example, a $1,250 scholarship for a program containing 8 classes as does our CCIS program, $312.50 will be applied to each class, totaling $2,500 total.

The discounts and scholarships do not have monetary value and CIAT can only apply the scholarships and discounts to students' accounts. Discounts and/or Scholarships cannot be combined. Students enrolled in Associate of Applied Science Degrees are eligible up to $2,500 per student based on the eligibility criteria. All other certificate programs are eligible for up to $1,250 per student. Please contact a CIAT Admissions Representative for the latest information.

Discounts

Active Military TA Discount

TA discount is available for any active-duty military personnel. Tuition rates are discounted to $250.00 per unit for all IT and General Education courses while the student remains in active-duty military status. Students must show proof of active-duty status by providing LES documentation upon enrollment. Students may be asked to resubmit or re-verify their active-duty status each term to maintain the discount. Students entering a Certificate or Degree program will be required to secure a secondary funding source if a projected tuition balance remains after applying the estimated annual Active-Duty Tuition Assistance funds.

Course Cost Waivers

Course cost waivers are provided as a benefit to CIAT graduates enrolling in the Applied Bachelor's Degree in Computer Information Systems (BACIS). Students may elect to waive the cost of equivalent classes that were previously taken in the Associate of Applied Science Degree in Computer Information Systems. Students are by default opted-in to all eligible course cost waivers. Students may elect to opt-out to support academic, industry certification, or financial goals. All CIAT graduates are required to complete the full credit requirements of the new 2020 BACIS due to curriculum updates.

CIAT Scholarships

CIAT provides merit and need-based scholarships to help make sure your education is as affordable as possible. Eligibility criteria, application procedures, and deadlines may vary. Most scholarship awards will be applied evenly throughout the program. The CIAT Graduate Scholarship and Bachelor's scholarship will be applied at the end of the student's program after all primary funding limits have been reached. The range of scholarship awards varies based on program length.

How To Apply For A CIAT Scholarship

1. Complete the online Scholarship Application,
2. Submit the required documentation for your selected scholarship,
3. Submit a 500-word personal statement covering the following:
   a. Why did you select technology as your career?
   b. How is CIAT going to help you achieve your personal and career goals?
   c. Where do you see yourself in 5 years?

Scholarship application, documentation, and personal statement may be submitted to your Admissions Advisor or to scholarships@ciat.edu.

Transfer Scholarship

CIAT is offering a scholarship for any student transferring from another accredited institution prior to earning an Associate's Degree or higher.

Additionally, if your college or career school closed while you were enrolled, or soon after you withdrew, we can help. The previous school must have been an accredited college for CIAT to accept transfer credits.

If the school is closed, the school is required to make accommodations for you to access your academic records indefinitely. Your school must communicate information about your academic transcripts once the location has been determined.

Scholarship Award: Up to $2,500, depending on the number of credits earned.

Eligible Programs: Associate's Degrees

College Prep Scholarship

College Prep Scholarships of up to $2,500 per person are available to recent high school graduates. Applicants must meet all the eligibility criteria listed below. They must:

1. Be a recent high school graduate and enrolled in CIAT within 12 months,
2. Have minimum CGPA (Cumulative Grade Point Average) of 3.5 from high school,
3. Apply for federal financial aid,
4. Be a U.S. citizen or eligible non-citizen.

Applicants must submit an official high school transcript to scholarships@ciat.edu.

Eligible programs: Students enrolled in Associate of Applied Science Degrees, or Certificate programs with minimum 8 courses, are eligible up to $2,500 per student based on the eligibility criteria. All other programs are eligible for up to $1,250 per student.

Industry Scholarship

Industry Scholarships of up to $2,500 per person are available to those who are working for the company that use business as a tool for positive social change and that employ environmentally responsible processes. Applicants must meet one or more of the criteria listed below. They must:

1. Work in nonprofit company
2. Work in Green Business certified company; or
3. Work in high technology company
4. Be utilizing employer tuition assistance or tuition reimbursement funds
5. Currently employed in an IT position
6. Previously employed in an IT position, unemployed within the last 12 months

Applicants must submit proof of employment (recent paystub), company background and current job description to scholarships@ciat.edu.

Eligible programs: Students enrolled in Associate of Applied Science Degrees, or Certificate programs with minimum 8 courses, are eligible up to $2,500 per student based on the eligibility criteria. All other Certificate programs are eligible for up to $1250, depending on program length.

Women in Technology Scholarship

Women working in science, tech, engineering, and math (STEM) careers currently represent a mere 20% of the job force. This gender gap has been a longstanding issue within the tech community. As a result, CIAT's Women in Technology Scholarship is designed to support students who self-identify as female to help bridge this divide. Women in Technology Scholarships of up to $2,500 per student are available. Let's shatter the glass ceiling together!

Eligible programs: Students enrolled in Associate of Applied Science Degrees, or Certificate programs with minimum 8 courses are eligible up to $2,500 per student based on the eligibility criteria. All other Certificate programs are eligible for $400 – $1250, depending on program length.

Presidential Tuition Scholarship

Presidential Tuition Scholarships of up to $2,500 are available to students depending on the program in at least one of the following categories:

1. Educationally and economically disadvantaged persons who have been historically underrepresented at higher education institutions,
2. Single parents with demonstrated financial need,
3. Persons with a verified disability and financial need

Applicants must also meet all the eligibility criteria listed below. They must:

1. Provide income verification that meets the financial qualification criteria (income criteria varies based on family size),
2. Submit official transcript,
3. Apply for federal financial aid,
4. Be a U.S. citizen or eligible non-citizen.

Eligible programs: Students enrolled in Associate of Applied Science Degrees, or Certificate programs with minimum 8 courses are eligible up to $2,500 per student based on the eligibility criteria. All other Certificate programs are eligible for $400 – $1250, depending on program length.

Bachelor's Graduation Scholarship

CIAT has you covered! The scholarship offers up to $15,000.00 based on the financial need in the last two years in the Bachelor's Degree program. The CIAT's Bachelor's Graduation scholarship is considered a "last money" scholarships and is designed to supplement military educational benefits or loans when those funding benefits are exhausted during the current CIAT degree program. This scholarship is not intended to replace federal and state financial aid, employer tuition assistance, or student income. This scholarship will only be used to help fund up to the last few courses in a student's academic degree program, helping bridge the gap to degree completion. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35 or Active-Duty Tuition Assistance is not allowed. This scholarship will be applied evenly in the last two semesters in the program.

Applicants must also meet the eligibility criteria listed below. They must:

1. Show proof of exhausted benefits/loans
2. Show proof of funding gap during the financial consultation

Associate Graduation Scholarship

CIAT has you covered! The scholarship offers up to $15,000.00 based on financial need in the last two semesters in the Associate's Degree program. The Associate Graduation scholarship is considered a "last money" scholarship and is designed to supplement military educational benefits or loans when those funding benefits are exhausted during the current CIAT degree program. This scholarship is not intended to replace federal and state financial aid, employer tuition assistance, or student income. This scholarship will only be used to help fund up to the last few courses in a student's academic degree program, helping bridge the gap to degree completion. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35 or Active-Duty Tuition Assistance are not allowed. This scholarship will be applied evenly in the final semester(s) in the program.

Applicants must also meet the eligibility criteria listed below. They must:

1. Show proof of exhausted benefits/loans
2. Show proof of funding gap during the financial consultation

Certificate Graduation Scholarship

CIAT has you covered! The scholarship offers up to $15,000.00 based on financial need in the last two semesters of the Certificate program. The Certificate Graduation scholarship is considered a "last money" scholarship and is designed to supplement military educational benefits or loans when those funding benefits are exhausted during the current CIAT degree program. This scholarship is not intended to replace federal and state financial aid, employer tuition assistance, or student income. This scholarship will only be used to help fund up to the last few courses in a student's academic degree program, helping bridge the gap to degree completion. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35 or Active-Duty Tuition Assistance are not allowed. This scholarship will be applied evenly in the final semester(s) in the program.

Applicants must also meet the eligibility criteria listed below. They must:

1. Show proof of exhausted benefits/loans
2. Show proof of funding gap during the financial consultation

Pell Grant Match Scholarship

CIAT will match the amount students would have qualified for in Pell Grants, with the award funds being equivalent for programs eligible for Title IV funding. CIAT's new Pell Grant Match Scholarship is considered a "last funding" scholarship and is designed for students enrolling in upper division Bachelor's Degree programs to supplement military educational benefits or loans when those funding benefits are exhausted. This scholarship is not intended to replace federal and state financial aid, employer tuition assistance, or student income. This financial need scholarship will only be used to help fund up to the last few courses in a student's academic degree program, helping bridge the gap to degree completion. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35, or Active-Duty Tuition Assistance is not allowed. This scholarship will be applied evenly in the last two semesters in the program. Applicants must submit a 500-word essay and required documentation using the application form below:

1. Be registered in a Bachelor's Degree program,
2. Show proof of exhausted benefits/loans,
3. Show proof of funding gap during the financial consultation.

CIAT Graduate Scholarship

The CIAT Graduate Scholarship is eligible for students who have completed one CIAT degree program and are enrolling in a secondary degree program (not eligible for certificate programs) for up to $7,500. CIAT's new scholarship is considered a "last funding" scholarship and is designed to supplement military educational benefits when those funding benefits are exhausted during the current CIAT degree program. This scholarship is not intended to replace federal and state financial aid, employer tuition assistance, or student income. This financial need scholarship will only be used to help fund up to the last few courses in a student's academic degree program, helping bridge the gap to degree completion. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35 or Active-Duty Tuition Assistance is not allowed. This scholarship will be applied evenly in the last two semesters in the program. Applicants must submit a 500-word essay and required documentation using the application form below:

- Show proof of exhausted tuition benefits
- Show proof of funding gap during the financial consultation

Eligibility Criteria: Associate's Degrees

Frontline Heroes Scholarship

CIAT's Frontline Heroes Scholarship of up to $2,500 in tuition assistance is available for students who are working as a part-time or full-time employee in healthcare, police, fire services, or public services. Applicants must submit proof of employment (recent paystub) and current job description. Applicants must also submit a 500-word personal statement covering the following:

- Why did you select Technology as your career?
- How is CIAT going to help you achieve your personal and career goals?
- Where do you see yourself in 5 years?

Eligibility Criteria: Students enrolled in Associate's or Bachelor's Degree programs are eligible for up to $2,500 per student based on the eligibility criteria. This scholarship is designed to support students in financial need after employer tuition assistance and federal grants are applied. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35, Active-Duty Tuition Assistance, and other CIAT scholarships are not permitted.

Academic Achievement & Early Placement "Booster" Scholarship

CIAT's Academic Achievement & Early Placement "Booster" Scholarship of up to $2,500 in tuition assistance is available for the most dedicated students committed to succeeding in their academic and employment goals. CIAT will invest in your success. To be accepted, students must apply

during their initial enrollment. The scholarship will be awarded upon degree completion and will be applied to the final semester of tuition given the student has satisfied the following criteria throughout the program:

- Cumulative GPA 3.0+
- Attendance 90% & GPA 2.5+
- Achieve early IT placement (prior to graduation)

Applicants must also submit a 500-word personal statement covering the following:

- Why did you select Technology as your career?
- How is CIAT going to help you achieve your personal and career goals?
- Where do you see yourself in 5 years?
- What personal strategies do you have in place to ensure your academic success?

Eligibility Criteria: Valid for students enrolled in Associate or Bachelor Degree programs starting April 2023 – November 2023. Students are eligible to receive up to $2,500 and may be combined with one other CIAT scholarship. This scholarship is designed to support students in financial need after employer tuition assistance and federal grants are applied. Concurrent receipt of this scholarship and Chapter 30, Chapter 31, Chapter 33, Chapter 35, Active-Duty Tuition Assistance is not permitted. If a student applies for the Academic Achievement Scholarship and does not meet the criteria upon graduation, the student's financial balance will be updated, and the scholarship will be removed. To satisfy the early IT placement scholarship criteria, the student must complete the CIAT employment verification form and receive confirmation by the CIAT Career Services Department.

ServiceNow Scholarship

The ServiceNow Scholarship provides $6,260 to all students enrolled in the Certificate in Workflow Deployment program to build awareness around our academic partnership with ServiceNow. This scholarship will be provided to all students, regardless of funding source used for the program. This scholarship is eligible for all Certificate in Workflow Deployment enrollments in 2026.

Oracle Scholarship

The Oracle Scholarship provides $6,260 to all students enrolled in the Certificate in Cloud Infrastructure or Certificate in Database Administration programs to build awareness around our academic partnership with Oracle. This scholarship will be provided to all students, regardless of the funding source used for the program. This scholarship is eligible for all Certificate in Cloud Instructure or Certificate in Database Administration enrollments in 2026.

Repayment of Loans

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund. If the student has received student financial aid funds, the student is entitled to a refund of the money not paid to CIAT from the student's federal financial aid program funds held by CIAT.

Collection Policy

It is the normal policy of CIAT to collect all tuition and fees in advance. However, on occasion we may extend credit and set up payment plans for the convenience of our students. The following applies to any such payment plans agreed to between CIAT and the student, or the student's third-party responsible for payment to CIAT:

1. Students are responsible for paying their student account balances in full by the payment deadline, whether they have received statement notification or not. Students should adhere to the billing due to date to avoid having their registration suspended. Students with unresolved account balances will be unregistered.
2. All balance and payment notifications are sent to students' CIAT e-mail addresses. Students are responsible for maintaining their correct e-mail addresses with the College.
3. Student accounts not covered by financial aid, or an approved payment plan may accrue monthly finance charges on the unpaid balance.
4. If a student account obtains a balance later in the semester, a balance hold will be added to the account which will block students from participating in registration for future semesters.
5. Students who leave CIAT with an outstanding balance may be reported to a collection agency and will be responsible for all collection fees and interest charges.

For those students who have taken out student loans (Federal, State, or private), collection of that debt will be in accordance with the lender's policies.

Student Tuition Recovery Fund Disclosures

(a) A qualifying institution shall include the following statement on both its enrollment agreement and school catalog:

"The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program."

(b) In addition to the statement required under subdivision (a) of this section, a qualifying institution shall include the following statement in its school catalog:

"It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, **1747 North Market Blvd., Suite 225, Sacramento, California, 95834, (916) 574-8900 or (888) 370-7589.**

To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.
2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.
3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.
4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.
5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.
6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.
7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of non-collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.

However, no claim can be paid to any student without a social security number or a taxpayer identification number."

FAFSA® Federal Student Aid
An OFFICE of the U.S. DEPARTMENT of EDUCATION

Financial Aid Assistance

Under the direction of Vice President of Compliance, Financial Aid Administrators assess students' resources to determine the best method of meeting their financial obligations. Financial Aid Administrators are thoroughly knowledgeable of all funding sources available and are prepared to tailor plans to meet individual students' needs. Eligible Title IV funding programs are as follows:

- Associate of Applied Science in Computer Information Systems (AASCIS)
- Associate of Applied Science in Business Data Analytics (AASBDA)
- Associate of Applied Science in Software Development (ASD)
- Certificate in Computer Information Systems (CCIS)
- Certificate as Cisco Networking Professional, Enterprise (CCNP-ENT)
- Certificate in Software Development (CSD)
- Certificate as Networking Technician (CNT)
- Certificate in Cloud Administration (CCA)
- Certificate as Computer Technician (CCT)

Only the National City, California Campus is eligible to offer federal student aid at this time. For more information regarding Financial Aid, please contact Financial Aid Department at financialaid@ciat.edu.

To apply for financial aid from the U.S. Department of Education, students must complete the Free Application for Federal Student Aid (FAFSA) http://www.usa.gov/fafsa. The Federal School Code for CIAT is **042598.** The Financial Aid Office is committed to providing assistance to qualified students who would otherwise be unable to pursue the attainment of their educational and professional goals. Most, but not all, financial aid is based on financial need as determined by the Free Application for Federal Student Aid (FAFSA). Some types of scholarship aid do not depend on student financial need. "Need" can be defined most simply as the difference between the total cost of attendance and those resources that the student and his or her family are expected to apply toward that cost of attendance.

The Financial Aid Office coordinates federal, state, institutional, and private financial assistance programs. The Financial Aid Office is responsible for ascertaining that all policies and procedures comply with institutional, state, and federal regulations. There are many restrictions on eligibility for most financial aid programs offered at CIAT. Students are

expected to be aware of their rights, responsibilities, and the restrictions of the aid programs in which they participate. Several publications that describe students' rights and responsibilities with regard to aid programs are available in the Financial Aid Office.

Financial aid funds awarded while attending CIAT are intended to supplement the resources students and their families already have available to them. All aid applications undergo a needs analysis calculation to determine the minimum amount of resources they will need to contribute to the total cost of the student's education. Students should not expect their total financial need to be met by resources available through student financial aid programs.

Students who intend to request financial assistance are expected to arrange an appointment with a financial aid officer as soon as registration has been completed. Financial aid officers are available on a walk-in or appointment basis to provide individual counseling to students who apply for financial aid.

Eligibility for Title IV Aid Programs

CIAT students must meet the following criteria to be eligible for federal or state financial assistance:

- Be a U.S. citizen or eligible non-citizen,
- Be enrolled in a program that leads to a degree,
- Not be in default on any loan under the Title IV programs,
- Not owe a refund on any grant under the Title IV programs,
- Demonstrate financial need as determined by the appropriate agency offering the financial assistance,
- Make satisfactory progress toward an educational objective (See "Satisfactory Academic Progress."),
- Have a high school diploma or recognized equivalent,
- Be enrolled in one of CIAT's Title IV qualified programs.

Dependency Status

Students who apply for financial aid must determine whether they qualify as independent (self-supporting) students or as dependent students. Determination of a student's dependency status is made in the student status section on the Free Application for Federal Student Aid (FAFSA).
If ANY of the following circumstances apply to you, you are an independent student; you will not have to provide parental information. If NONE of the following circumstances apply to you, you will be asked to provide parental information:

- You are 24 years or older,
- You are married,
- You will be working on a master's degree,
- You are serving on active duty in the U.S. Armed Forces,
- You are a veteran of the U.S. Armed Forces,
- You have children, and you provide more than half of their support,
- After you turned age 13, both of your parents were deceased,
- You have dependents (other than children or your spouse) who live with you, and you provide more than half of their support,
- You were in foster care since turning age 13,
- You were a dependent or ward of the court since turning age 13,
- You are currently or you were in legal guardianship,
- You are currently or were an emancipated minor,
- You are homeless or you are at risk of being homeless.

Students who claim to be independent may be asked to provide documentation to verify their dependency status prior to receiving financial aid. Students who want to be considered independent due to circumstances other than those listed should contact a financial aid officer prior to completing the FAFSA.

Dependency Override

To request a dependency override, send a letter to finance@ciat.edu asking for a dependency override. Summarize the circumstances that justify the dependency override. Provide copies of independent third-party documentation of the special circumstances, such as letters from social workers, clergy, doctors, or others who are familiar with your situation. Policy reports documenting domestic violence and abuse can be helpful.

Dependency override are for one year at a time. Financial Aid Administrators will verify that the unusual circumstances that justified the dependency override in a previous year continue to apply.

The decision whether a student qualifies for a dependency override is made by the college's Financial Aid Administrator. This decision is final. There is no appeal beyond the Financial Aid Administrator. Neither the college's president nor the U.S. Department of Education has the legal authority to overturn the decision of the college's financial aid administrator concerning a professional judgment review or dependency override. The authority to perform dependency overrides is specifically restricted to financial aid administrators in 20 USC 1087(d)(1)(I).

Insufficient Justification for a Dependency Override

None of the following circumstances are sufficient justification, even in combination, for a college financial aid administrator to perform a dependency override:

- A student cannot qualify as an independent student because the parents choose to not claim the student as a dependent on their federal income tax return, not even if the student demonstrates total financial self-sufficiency.
- A student cannot qualify as an independent student because the parents refuse to contribute to the student's education.
- A student cannot qualify as an independent student because the parents refuse to provide information on the FAFSA.
- A student cannot qualify as an independent student because the parents refuse to participate in verification.
- A student cannot qualify as an independent student because the student's parents live in another country.

Professional Judgement

Professional Judgement is the process of reviewing an individual student's unique circumstances and exercising the discretion to modify the date elements typically used in the Department of Education's evaluation. Professional judgement changes are made when the Financial Aid Administrator determines that the standards used to calculate eligibility for financial aid, based on the family contribution, are inappropriate due to extenuating circumstances. This can occur when adjusting need analysis, overriding dependency status, and other date elements to calculate Student Aid Index (SAI). The SAI was previously known as Expected Family Contribution (EFC).

Modifications to the Federal Methodology (FM) are exclusively executed via adjustments to individual data elements, conducted on a case-by-case basis. Substitutions of data elements that lead to alterations in the family contribution are meticulously recorded withing the student file. These adjustments are then recalculated and generate a valid institutional Student Information Record (ISIR) through correction in Financial Aid Access to Central Processing System (CPS).

While retaining the flexibility to address unique student situations, the Financial Aid Office aims for uniformity in handling students facing comparable unusual circumstances. In instances of uncommon student cases or appeals against award decisions, a committee review is conducted by the Financial Aid Director. The VP of compliance may be brought into consultation for an appeal if deemed appropriate.

CIAT uses a 3rd party Financial Aid Services, Inc. for both corrections to report data and for adjustments resulting from professional judgement. Consequently, when modifications are made to a student's or parent's financial need analysis due to receipt of corrected, updated or enhanced information' single data element changes are entered; and the revised family contribution is automatically recalculated. This updated Student Aid Index (SAI) is utilized for eligibility assessment across all programs. No disbursement is made for Pell Grants until a valid Institutional Student Record (ISIR) is received.

Potential Reasons for Exercise of Professional Judgement

Professional judgement changes exclusively pertain to adjustments in data elements and are applicable to all Title IV programs.

A. **Change of Dependency Status**

- Students seeking a change in dependency status, from dependent to independent, must furnish documentation clearly demonstrating extenuating circumstances regarding their relationship with their parents. Additionally, students raised by family members other than parents may be eligible for a dependency override. It's imperative that all documentation provided is verifiable. Support letters should be sourced from "independent" individuals not directly affiliated with the student, such as counselors, teachers, social workers, or religious leaders. Each document should include the contact information of the author, including their address and phone number(s).

B. **Drop of Income and Income Adjustments**

- All income adjustments must be handled on an individual basis.
- Income adjustments should be specifically aimed at addressing exceptional circumstances where the data elements on the ISIR, primarily based on income from the base year, no longer accurately represent the family's (or student's) capacity to contribute to the student's education.
- When implementing adjustments, it's pertinent to consider any altered circumstances affecting the student's (or family's) current and foreseeable economic status. Factors like job loss or reduction in work hours can be taken into consideration.
- Projections of earnings can be factored into the adjustment process.
- Third-party documentation validating changed circumstances should be utilized whenever feasible to support requests for professional judgment. Additionally, students (and parents) are required to formally submit a request for an assessment of special circumstances.
- Adjustments on all monetary data elements impacting the Student Aid Index (SAI) are permissible by law, including unemployment. However, these adjustments must be duly documented, accompanied by an explanation for the application of professional judgment.

Participating Programs

Federal Programs

CIAT participates in the following financial programs:

- Federal Direct Loan Subsidized and Unsubsidized
- Federal Parent Loan for Undergraduate Students (FPLUS)
- Federal Pell Grant
- Federal Supplementary Educational Opportunity Grant (FSEOG)

Application Process for Federal Programs

This section applies to U.S. citizens and permanent residents only.

Most United States citizens and permanent resident graduate students may qualify for U.S. federal financial aid programs or for aid from the state of California. In order to qualify, students must complete the Free Application for Federal Student Aid (FAFSA), which provides an in-depth analysis of the financial condition of the student and his/her family. This analysis (done on a yearly basis) determines how much the student/ family is expected to contribute toward the cost of education. This figure is called the "expected family contribution," or EFC. Parents' income and asset information is included in the EFC calculation for dependent students. To determine if you are independent from your parents for financial aid, you will need to answer the questions on the FAFSA application.

Students who received financial aid for the previous year should receive a renewal email from the Federal Department of Education or your Department of Education PIN number sometime in January. Students are encouraged to file their renewal FAFSA applications electronically at FAFSA® Application | Federal Student Aid.

If you do not receive a Renewal email from the Federal Department of Education or if you did not apply for Financial Aid for the previous year, but wish to apply for coming award year, you should do the following:

- **Complete the Free Application for Federal Student Aid (FAFSA).** You may complete the FAFSA online at FAFSA® Application | Federal Student Aid. Regardless of how an applicant completes the renewal FAFSA, the March 2 priority filing deadline applies for undergraduate and graduate students to be eligible for campus-based aid. Applicants should make sure the Institution Code for CIAT (**042598**) is indicated on their FAFSA or Renewal Form.
- It is the student's and/or applicant's responsibility to obtain and file all the forms by the proper deadlines in order to be considered for aid at CIAT. Students selected for verification will have 30 days from the date of notification to turn in all necessary documents.

For entering students, notification of financial aid is given in the form of an estimate letter shortly after admission. Accepted students also receive information and forms concerning application for other available loan programs.

Determining Financial Need

Financial aid eligibility for need-based aid is determined using the following formula:

Cost of Attendance - Expected Family Contribution = Financial Need
Financial need is the difference between what a family is expected to contribute toward the cost of the education and the actual cost of the education. For example, if the cost of education is $20,000 per year including both tuition and living expenses in the local area, and the family is expected to contribute $5,000, then the student's need is $15,000.

The aid students receive from all sources of aid (including non-need-based aid) may not exceed their cost of attendance. Many students may choose only to seek aid for the cost of tuition and fees, since their housing, food, and other basic household costs are supported with ongoing family income.

Course Load & Financial Aid Programs

Full-time
Undergraduate students: 12 units of required coursework toward degree completion

3/4- time
Undergraduate students: 9 units of required coursework toward degree completion

Half-time
Undergraduate students: 6 units of required coursework toward degree completion

Federal Programs
To be eligible for the Federal Direct Loan Programs, a student must be enrolled at least half time in units related to the identified program of study.

Students enrolled less than half time are not eligible for the Federal Direct Loan programs.

Cost of Attendance and Standard Student Expense

Cost of attendance includes the following items:

- Tuition
- Fees
- Books and Supplies
- Room and Board
- Transportation
- Other Educational Costs

Students can meet with a financial aid officer to discuss itemized totals for expenses.

Student Loan Fund Release Policy (Disbursement)

Annual Financial Aid awards will be divided by the number of terms for which the student is enrolled and disbursed by term as long as the student meets the eligibility requirements for the aid.

If all paperwork, Stafford entrance test, verification and loan funds are received, student loan funds may post to the student's school account within the first two weeks of the first day of the term. However, Department of Education rules allow fourteen (14) days from the first day of the term to return excess payments to students. Any questions regarding delay in financial aid refund after aid has dispersed to the student's statement should be directed to the Financial Aid Office.

Loan Repayment

If a student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund, and that, if the student has received federal student financial aid funds, the student is entitled to a refund of the money's not paid from federal student financial aid program funds.

Financial Aid Probation

A student on financial aid probation may receive financial aid despite the determination that he/she did not maintain satisfactory academic progress. However, if it is determined that the student will not make satisfactory academic progress by the end of the semester in which he/she is on probation, a written academic plan must be developed by the Student Services Department and signed by the student. The plan is designed to ensure that the student will be able to meet the standards of satisfactory academic progress by a specified point in time. As part of the academic plan, the Student Services Coordinator may require the student to repeat some or all or the courses in which the student previously

received a grade of "D," "F," or "W" before attempting any other courses in the student's program of study.

In order for the student to qualify for further financial aid, he/she must meet the required Cumulative Grade Point Average (CGPA) and Incremental Completion rate (ICR) standards by the end of the semester in which he/she is on probation or be successful in following the academic plan. If the requirements are not met, the student will be dismissed from the program of study.

Mitigating Circumstances

Mitigating circumstances may include poor health, death in the family or other significant occurrences outside the control of the student. These circumstances must be documented by the student to demonstrate that they had an adverse impact on the student's academic performance. The student is responsible for providing any requested written verification of mitigating circumstances.

Title IV Code of Conduct

The Higher Education Opportunity Act of 2008 requires educational institutions participating in a Title IV Loan Program to adhere to a Code of Conduct which prohibits conflicts of interest between CIAT officers, employees, and agents with any lender, lender servicer, and/or guarantor. Sections 487 (a) (25) and 487 (e) of the Higher Education Act of 1965, as amended, require the development, administration, and enforcement of a code of conduct to govern federal student aid programs. Staff members of the CIAT Financial Aid Department are bound to act in compliance with the CIAT Code of Conduct, the California State Code of Conduct, and the Statement of Ethical Principles and Code of Conduct from NASFAA. Officers, employees, contract employees, trustees, professional organizations, and other organizations directly or indirectly associated with or authorized by CIAT, agree to the provisions of the CIAT Code of Conduct and will refrain from the following:

Revenue Sharing

No officer, employee, or agent of CIAT shall enter any revenue-sharing or profit-sharing arrangement with any lender.

Accepting Gifts, Goods, and/or Services

No officer, employee, or agent shall solicit or accept impermissible gifts, goods, and/or services from a private/alternative lender, lender servicer, and/or guarantor. A gift to any family member of the above mentioned is also not permissible. Gifts, goods, and/or services include: gratuities, meals, travel, lodging, entertainment (expenses for shows, sporting events, or alcoholic beverages), favors, loans, discounts, hospitality (such as private parties of select training or conference attendees), and in-kind services, such as printing customized consumer information for borrowers with the CIAT school logo. CIAT financial aid staff may accept only items of nominal value, certain services, and/or certain materials. Permissible gifts would include pens, pencils, notepads, sticky-notes, rulers, calculators, small tote bags, and other individual office supply items. An employee may accept any general items of value from a lender, lender servicer, and/or guarantor provided that the item is also offered to the general public. CIAT financial aid staff may accept informational brochures and can participate in meals, refreshments, and receptions in conjunction with meetings and trainings that contribute to his/her professional development, as well as conference events open to all attendees.

Accepting Philanthropic Contributions

No officer, employee, or agent shall accept philanthropic contributions from a lender, lender servicer and/or guarantor that are related to the educational loans provided by the lender, lender servicer, and/or guarantor or that is made in exchange for any advantage related to the educational loan. Educational loans here include loans made by CIAT under the private/alternative loan program. CIAT will not accept scholarships or grants from a lender or guarantor in exchange for applications or referrals.

Advisory Board Compensation

CIAT employees with responsibility for any financial aid services will not accept anything of value for serving on or otherwise participating as a member of an advisory council or advisory board for a lender, lender affiliate or lender servicer, except that the employee may be reimbursed for reasonable expenses incurred while serving in such capacities.

Accepting Compensation for Consulting

No officer, employee, or agent shall accept from a lender or its affiliate any fee, payment, or other financial benefit, including the opportunity to purchase stock, as compensation for any type of consulting arrangement or other contract to provide education loan-related services to or on behalf of the lender.

Lender Staff Assistance

CIAT will not request or accept from any lender any assistance with call center staffing or financial aid office staffing. CIAT may accept, from a lender, professional development training and training materials, educational counseling materials, or staffing services on a short term, nonrecurring basis during emergencies or disasters.

Competitive Rates Based on Loan Volume

The CIAT Financial Aid Department shall not request or accept competitive rates on private/ alternative loans in exchange for a specified amount of loan activity or in exchange for endorsing the lender's FDLP loans.

Lender Affiliated Employment

CIAT financial aid staff members shall not accept full time or part time employment with any educational loan lender, lender servicer, and/or guarantor. Staff members who are approached by these entities shall immediately disclose this information to the President. CIAT will not use a Preferred Lender List; however, the financial aid office will make use of a Recommended Lender List. The CIAT Financial Aid Department may request and accept assistance from lenders and/or guarantors to conduct entrance and exit loan counseling. CIAT financial aid staff shall always be in control of the counseling sessions and will not permit the lender and/or guarantor representative to promote in any way the specific lender's products or services. CIAT will make use of the various lender and/or

guarantor's materials and products to aid students in financial literacy. CIAT is committed to providing the information and resources necessary to help every student achieve educational success and will consider the individual needs of each student. The information contained herein has been provided to all CIAT officers, employees, and agents affiliated with this college.

Exit Counseling

Federal regulations and CIAT's policy and procedures require that all recipients of federal student loans to participate in student loan exit counseling upon graduation, change of enrollment status to less-than halftime (6 credit hours), or withdrawal from the institution (official withdrawal, dismissal due to academic suspension or other reasons). The federal student loan programs include the Direct Subsidized Stafford, Direct Unsubsidized Stafford, and Direct PLUS loan programs. The purpose of the student loan exit counseling is to provide the student borrower general information to manage his or her loan debt, to assist in the preparation of loan repayment, to provide for a smooth transition from borrowing to repayment and assist the student in understanding his or her rights and responsibilities as a borrower of federal student loans.

Approximately 30 days prior to the anticipated graduation date the student is advised of the requirements to complete the loan counseling exit interview. Typically, an exit interview is performed via mail, email, in person or phone within a week of the expected cohort graduation date. CIAT offers student borrowers the option to complete the federal student loan exit counseling interview via group sessions or individual appointments at the institution. If a student completes an individual appointment or a group session, the U.S. Department of Education's publication, *Exit Counseling for Direct Loan Borrowers* is provided to the student. If a student is unable to arrange an individual appointment or group session, all federal student loan exit counseling documents are sent via certified mail to the student. All student loan borrowers are advised to utilize the NSLDS website, **www.nsldsfap.ed.gov**, as a reference for any questions regarding their student loan repayment obligations.

Commemorating Constitution Day

September 17 is Constitution Day and Citizenship Day (Constitution Day). This day commemorates the September 17, 1787, signing of the United States Constitution.

Each educational institution that receives Federal funds for a fiscal year is required to hold an educational program about the U.S. Constitution for its students.

CANCELLATION AND REFUNDS

Student's Right to Cancel

Any student may cancel his/her enrollment at any time.
Students have the right to cancel the enrollment agreement and receive a refund of charges paid through attendance at the first-class session, or the last day of the first term after enrollment as a trial period, whichever is later. For refund calculations, after the first term period, the amount of the course completed shall be:

Degree, Certificate and Professional Development students completing at no more than 60% of the required attendance shall receive a pro rata refund based on their percentage of required attendance completed. Students completing more than 60% of the required attendance will not receive a refund.

Students can fill out a drop form which includes the following information with your request:

- Full name
- Address
- Phone number
- Date of request
- Signature
- Reason for Request

Refund requests can be submitted to CIAT via **email** at financialaid@ciat.edu
The following sample table shows the refund amount you would be entitled to after completing a period of instruction:

Program	Tuition	20%	33.3%	60%	75%
CCIS	$23,760.00	$19,008.00	$15,847.92	$9,504.00	$0.00
Single Class	$2,640.00	$2,212.00	$1,760.88	$1,056.00	$0.00

All refunds will be processed within 45 calendar days of receiving your written request for withdrawal.
Example: If a course is 5 weeks and the tuition is $2,640, divide $2,640 by 5 to get the cost per week of $528.00. If you attended 2 weeks, you would owe $1,056.00 (2 x 528.00). Therefore, you would receive a refund of $1,584.00.

Involuntary Withdrawal

Involuntary withdrawal is when the student is forced to drop from the course by the school. This can be due to the student's misconduct, failure to maintain Satisfactory Academic Progress, lack of attendance or cancellation of the course or program by the institution.
For those students forced to drop by the school for misconduct, failure to maintain SAP or lack of attendance, their refund will be calculated in the same manner as a voluntary withdrawal.

No-Starts

Students who fail to attend any classes or complete any assignments within 14 days of their first term date (class start date) shall be considered as a "no-start" and will be issued a full refund of any tuition payments made to CIAT.

Certification Exam Fees

Fees paid by the student for Certification Exams, when no exam voucher has been issued to the student, will be refunded.

Refunds

Refund computations will be based on scheduled course time of class attendance through the last date of attendance. Leaves of absence,

suspensions and school holidays will not be counted as part of the scheduled class attendance. Once the refund has been calculated according to the State of California, ACCET and Department of Education (If Federal Financial Aid was used) **the calculation most beneficial to the student will be used.**

If an applicant never attends class (no-show) or cancels the contract prior to the class start date, all refunds due will be made within forty-five (45) calendar days of the first scheduled day of class or the date of cancellation, whichever is earlier. The refund calculation will be calculated based on the following criteria:

- The Date of Determination (DOD) will be established based off the date of withdrawal or termination request.
- If Federal Financial Aid is used, then a Return to Title IV (R2T4) calculation will be calculated.
- Pro rata refund calculation is a calculation that is based off the total number of days completed in a payment period divided by the total number of days in the payment period and stated as a percentage. If the total number of days completed is greater than 60%, then the school has earned 100% of the payment period (no refund will be granted for the payment period the refund calculation is being processed for). Any leaves of absence (LOA) will be deducted from the payment period the student is currently in.
- If the pro rata refund calculation is less than 60%, then the percent that was earned will be stated in a dollar amount and the unearned amount will be refunded back to the appropriate funding source.
- In California refunds will be processed within 45 days of the DOD.
- The calculation most beneficial to the student will be used.

For the purpose of determining a refund under this section, the student shall be deemed to have withdrawn from a program of instruction when any of the following occurs:

- The student notifies the institution of the desire to withdraw, or the as of the date of your withdrawal, whichever is later.
- CIAT can terminate enrollment for failure to maintain satisfactory progress; failure to abide by the rules and regulations of the institution; absences in excess of maximum set forth by the institution; and/or failure to meet financial obligations to the college.
- Failure to attend class for 14 consecutive days.
- Failure to return from a leave of absence.

For the purpose of determining the amount of the refund, the date of the withdrawal shall be deemed the last date of recorded attendance and / or content access.

If any portion of the tuition was paid from the proceeds of a loan or third party, the refund shall be sent to appropriate agency or student.

Any amount of the refund in excess of the unpaid balance of the loan shall be first used to repay any student financial aid programs from which the student received benefits, in proportion to the amount of the benefits received, and any remaining amount shall be paid the student.

The technology and equipment fees will be applied to your account as a one-time fixed cost at the beginning of the program. **From the withdrawal date of determination, all equipment needs to be returned to CIAT within 30 calendar days for a prorated refund.** If the complete equipment is not returned, the equipment fees will be charged in full, and no refund is due. All tuition and fees will be prorated when determining a refund and follow the Cancellation and Refund policy.

The refund will be calculated in both California BPPE and ACCET policies side and side. Once the refund has been calculated according to the State of California, ACCET and Department of Education, (If Federal Financial Aid was used) the calculation most beneficial to the student will be used.

ACCET Refund Policy

The student may withdraw from the school at any time after the cancellation period (described above) and receive a pro-rated refund if he/she has completed 50 percent or less of the scheduled days in the current payment period in your program through the last day of attendance.

a. During the first week of classes, tuition charges withheld will not exceed 10 percent (10%) of the stated tuition up to a maximum of $1,000. When determining the number of weeks completed by the student, the institution will consider a partial week the same as if a whole week were completed, provided the student was present at least one day during the scheduled week.
b. After the first week and through fifty percent (50%) of the period of financial obligation, tuition charges retained will not exceed a pro rata portion of tuition for the training period completed, plus ten percent (10%) of the unearned tuition for the period of training that was not completed. (See example.)
c. After fifty percent (50%) of the period of financial obligation is completed, the institution may retain the full tuition.

Refund Computation Example

45 weeks of training; scheduled start on January 2nd; scheduled completion on November 11th. Student is financially obligated for the entire program, 45 weeks of training:

- Tuition is $21060.00.
- Last date of attendance is May 19th.
- Number of weeks student attended 20 weeks = 44.4%
- Number of weeks financially obligated 45 weeks
- Pro rata portion completed based on 20 weeks = 44.4%
- 44.4% of $21060 tuition = $9350.64
- 10% of $11709.36 (unearned) tuition = $ 1170.94 (Max. $1000)
- Owed to institution = $10350.64
- Refunded to student by February 28th = $10709.36

When calculating a refund, the percentage of tuition retained by the institution is based on the portion of tuition attributed to the portion of the program the student was attending when the student dropped, not the tuition charge for the entire program listed on the enrollment agreement.

Payment of Refunds

Payment of all refunds will be made to the payer of the initial funds, in the form of a check for payments made in cash or check to CIAT, and by refund to the credit card used, if the original payment was made by credit card. VA refunds will be paid in accordance with VA regulations.

Reimbursement to Veterans and VA Eligible Persons

For information or resolution of specific payment problems, the veteran should call the DVA nationwide toll-free number at **1-888-442-4551**.

Withdrawal and Return of Title IV Funds

Federal regulations require Title IV financial aid funds to be awarded under the assumption that a student will attend the institution for the entire period in which federal assistance was awarded. When a student withdraws from all courses for any reason, including medical withdrawals, he/she may no longer be eligible for the full amount of Title IV funds that a student was originally scheduled to receive. The return of funds is based upon the premise that students earn their financial aid in proportion to the amount of time in which they are enrolled. A pro-rated schedule is used to determine the amount of federal student aid funds he/she will have earned at the time of the withdrawal. Once 60% of the semester is completed, a student is considered to have earned all his/her financial aid and will not be required to return any funds.

The refund of Title IV Funds policy is separate and distinct from the CIAT refund policy. The Federal formula for Return of Title IV funds may result in a larger refund than the state/accreditation refund policy. In that case, CIAT will return the sum resulting in the larger of the two calculations to the appropriate Title IV program. Therefore, the student may, after Title IV funds are returned, owe a balance to the school. The school may also attempt to collect from the student any Title IV program funds that the school was required to return. Federal law requires schools to calculate how much federal financial aid a student has earned if that student completely withdraws or stops attending before completing the semester.

TYPE OF WITHDRAWALS:

A student's official withdrawal date is determined by using one of the following:

- Official withdrawal date on the student's Schedule of Change Drop form.
- The date the student submitted the notification to withdraw to the Registrar's office.
- The date the student was expelled/dismissed from the school.
- The date of the withdrawal determination shall be the date of return from the leave of absence or the date the student notifies the institution that the student will not be returning, whichever is earlier.

A student's unofficial withdrawal date is determined by using one of the following:

- The date the student died if the student passed away during the course.
- The last date that the student attended class.
- The student must inform in a timely fashion, in person or by email if personal appearance is not possible.
- The student failed to attend classes for 14 consecutive days and fail to inform the Academy that they are not withdrawing. The date of determination would be 14 days from the last date of attendance.

NOTE: *When a student has a Direct Loan and fails to return from a Leave of Absence, the grace period starts on the last day of attendance before the Leave of Absence.*

Return of Title IV Funds (Earned versus Unearned Aid)

CIAT determines the percentage of Title IV aid ''earned" by the student and to return the unearned portion to the appropriate aid programs. The calculation will be based upon only the amount of the Title IV Aid for which the student is eligible. CIAT performs refund calculations and will return the funds within 45 days of the calculation. The R2T4 calculation process and return of funds is completed by the Finance Department.

For example, if a student completes 30 percent of the payment period, they earn 30 percent of the aid they were originally scheduled to receive. This means that 70 percent of the scheduled awards remain "unearned" and must be returned to the federal government. Once 60% of the semester is completed, a student is considered to have earned all his/her financial aid and will not be required to return any federal funds.

Withdrawal Before 60%

CIAT performs an R2T4 calculation to determine the amount of earned aid up through the 60% point in each payment period. CIAT will use the Department of Education's prorate schedule to determine the amount of R2T4 funds the student has earned at the time of withdrawal. After the 60% point in the payment period, a student has earned 100% of the Title IV funds he/she was scheduled to receive during the period.

Withdrawal After 60%

For a student who withdraws after the 60% point of his/her program, there are no unearned funds. However, CIAT will still determine whether the student is eligible for a post-withdrawal disbursement.

Calculating Earned Financial Aid

The amount of earned financial aid will be calculated on a daily basis from the first day of classes. The process uses calendar rather than business days. Earned aid will be determined by taking the number of days attended before enrollment ended divided by the total number of days in the term (first day of instruction until the last day of term, excluding winter break). CIAT will notify the student via written notice if he/she is owed a repayment. The student has 14 calendar days from the date the

school sent the notification to accept a post-withdrawal disbursement. If a response is not received from the student within the permitted time frame or the student declines the funds, CIAT will return any earned funds that the school is holding to the Title IV programs. Post-withdrawal disbursement will occur within 120 days of the date the student withdrew. This policy applies to students who withdraw (officially, unofficially) or are dismissed from enrollment at CIAT.

THE SCHOOL'S RESPONSIBILITY IN REGARDS TO THE RETURN TO TITLE IV FUNDS ARE AS FOLLOWS:

- To provide students with the information contained in the R2T4 Policy.
- Identifying students who have withdrawn and will be affected by the R2T4 Policy.
- Return all unearned Title IV Funds in compliance with The Department of Education requirements.

THE STUDENT'S RESPONSIBILITIES IN REGARD TO THE RETURN TO TITLE IV FUNDS ARE AS FOLLOWS:

- Return unearned Title IV Funds that were disbursed to the student where the student was deemed ineligible, based on the R2T4 calculation.
- When possible, the student should notify the school in writing of official withdrawal.
- If the student cancels their decision to withdraw, the student must notify the school in writing within three business days of the date of the original withdrawal.
- All requests to withdraw or cancel a request to withdraw must be delivered to the school's financial aid office.

Student borrowers of the Direct Stafford Loans are required to attend or complete online an Exit Interview before leaving school.

Post-Withdrawal Disbursement

If the student did not receive all of the funds that were earned prior to withdrawing, a post-withdrawal disbursement may be due. If the student is eligible for a post-withdrawal disbursement of a grant, it must be disbursed within 45 days. If the post-withdrawal disbursement includes loan funds, the student must give permission before the funds can be disbursed. Students will be notified within 30 days of the date of the withdrawal determination of any direct loan eligibility, or a parent for a Direct Parent PLUS Loan eligibility. Permission is required to use the post-withdrawal grant disbursement for all other school charges. If a post-withdrawal disbursement from a loan results in a credit balance, the credit balance will be refunded to the student and/or the parent in the case of a Direct Parent PLUS Loan as soon as possible, but no later than 14 days after the credit balance has occurred. The school must return the Title IV funds within 45 days of the date the school determines the student withdrew. *34 CFR §668.22(a) (5) and (6), 34 CFR §668.164 (j) and (h).*

FINANCIAL AID RESOURCES

CIAT Private Financing

A number of private outside agencies offer students alternative sources for financing their education. Unlike federal loans, the terms of private loans are set by the individual lenders. The interest rate and fees are determined by student's credit history, debt-to-income ratio and that of student's co-signer.

Students are encouraged to consider all federal loan options before applying for a private loan. Federal loans generally have better benefits and fixed interest rates. See the Department of Education's Federal Aid First site for more information. You can also contact our office if you have questions.

We chose to list the lenders below based on a review of competitive interest rates and fees, quality of servicing, and borrower benefits. For more information, please contact finance@ciat.edu:

- Credit Climb
- Sallie Mae
- Tuition Options

Financial Aid

CIAT is approved to participate in the U.S. Department of Education Title IV Financial Aid program and offers the following financial aid programs to those who qualify:

Federal Pell Grant

Grant aid assistance does not have to be repaid unless the student withdraws from school and owes a refund. Amounts vary based on the financial need of each applicant. Grants are available through the federal government. All students who are U.S. citizens or eligible non-citizens are eligible to apply if they do not have a Bachelor's Degree. Pell Grants are awarded based on financial need.

Federal Supplemental Educational Opportunity Grant (FSEOG)

These federal funds are awarded to undergraduate students with exceptional financial need who are pursuing their first undergraduate degree. Priority is given to Federal Pell Grant recipients with zero (0) - 200 Expected Family Contribution (EFC) and on a first come first serve basis.

Federal Direct Student Loan Program Subsidized / Unsubsidized Student Loans

These are long-term, low-interest loans borrowed directly from Direct Loan as the lender and loans must be repaid.

There are two types of Direct Loans – subsidized and unsubsidized. Eligibility for subsidized Direct Loans is based on financial need (demonstrated via the FAFSA or Renewal Form) and they are only available to undergraduate students. Students who do not demonstrate (sufficient) need may borrow unsubsidized Direct Loans. Maximum loan eligibility is indicated on each student's financial aid award letter. When students are eligible for a subsidized Direct Loan, the government pays the interest that accrues on the loan while in school. Students receiving

an unsubsidized Direct Loan are charged the interest on the loan while in school, in grace period and in deferment.

The interest rate for a Subsidized and Unsubsidized Stafford loan for undergraduate students is variable with an 8.25% cap.

Parent Loans for Undergraduate Students (PLUS)

Once a FAFSA has been completed by both the student and parent(s), a credit check must be completed on the parent to determine eligibility for a Direct Plus Loan. An origination fee will be deducted from the Direct Plus loans by the Department of Education. Repayment begins 60 days after the loan is fully disbursed. There is a minimum required payment of $50 per month.

Note: It must be made extremely clear to all who do qualify for Title IV Loans that these are indeed loans from the U.S. government and must be repaid per the terms of the loan.

If a student should withdraw at any time during their program the refund policies set forth shall apply. In no way does withdrawal of any kind release the student from their obligation to pay the school for all scheduled attendance or from repayment of borrowed monies.

Federal Loan Interest Rates

The "Bipartisan Student Loan Certainty Act of 2013 amends the Direct Loan interest rate section of the Higher Education Act of 1965. The new rates will be the sum of a uniform "Index Rate" plus an "add on" that varies depending on the type of loan (Subsidized/ Unsubsidized/ PLUS) and the borrowers' grade level. Interest rates for Subsidized/ Unsubsidized loans will be the same for undergraduates, with a different rate for graduate/professional students and for PLUS Loans taken out by parent/graduate/professional student borrowers. The index rate is determined each year as the "high yield of the 10-year treasury note" plus a statutorily defined "add-on". The interest rate, once established, will apply for the life of the loan (fixed rate). Any loans originated on or after July 1 through June 30 will be locked into the established rate. There will be a new interest rate published each year for loans originated from July 1 to June 30.

State Financial Aid

Cal Grant

Cal Grants are for students who are pursuing an undergraduate degree or vocational or career training, and do not have to be repaid. Cal Grant applicants must apply using the FAFSA or CA Dream Act Application by the deadline and meet all eligibility, financial, and minimum GPA requirements of either program. Grants are for students attending Universities of California, California State Universities or California Community Colleges, or qualifying independent and career colleges or technical schools in California.

Timeline considerations when applying for Cal Grant: The deadline for applying for Cal Grant (California Grant) is March 02 of every year upon renewal of the new FAFSA.

Veterans Affairs (VA) Benefits

CIAT is approved to train veterans and qualified dependents that are eligible for Veteran's Administration Educational benefits. Those depending solely on VA benefits should have all paperwork completed with CIAT's Finance office at least two weeks before the first day of class. If you believe you are eligible, contact the VA at 888-442-4551 or www.gibill.va.gov to confirm your eligibility and begin the process of activating your benefits. More information about education benefits offered by VA is available at the official U.S. government website at https://www.vets.gov/education.

CIAT complies with S.2248-Veterans Benefits and Transition Act of 2018 section 103. CIAT will not assess or implement any late fees for at least 90 days from the date of certification, for any covered individuals which are using Chapter 31, Chapter 33 or Chapter 35 VA Educational Benefits.

Covered individuals must provide the school with the following:

- A Certificate of Eligibility (COE) (a printout of the student's summary of benefits page from eBenefits is enough to meet this requirement),
- Application of enrollment (Course Registration Form) submitted to the Certifying Office so that proper certification can be submitted to the VA.

CIAT is approved to offer the following VA Educational Benefits to qualifying veteran students:

- Chapter 33: Post 9/11 GI Bill®
- MGIB-SR/Chapter 1606
- REAP/Chapter 1607
- DEA/Chapter 35
- VOC REHAB/ Chapter 31
- MGIB-AD/Chapter 30
- MyCAA
- Yellow Ribbon Program

CIAT is approved to offer the below programs under VA Educational benefits:

- Applied Bachelor's Degree in Computer Information Systems
- Applied Bachelor's Degree in Software Development
- Associate of Applied Science in Computer Information Systems
- Associate of Applied Science in Software Development
- Associate of Applied Science in Business Data Analytics

This catalog will be updated to reflect any programs that gain or lose approval for VA Educational Benefits.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Website at http://www.benefits.va.gov/gibill.

Yellow Ribbon Program

The Yellow Ribbon GI Education Enhancement Program is a provision of the Post-9/11 Veterans Educational Assistance Act of 2008. This program allows institutions of higher learning in the United States to voluntarily enter into an agreement with the VA to fund tuition expenses exceeding the highest public in-state undergraduate tuition rate. CIAT contributes up to 50% of those expenses, with the VA matching the same amount.

To qualify for Yellow Ribbon benefits at CIAT, students must meet the following eligibility criteria:

- Be entitled to the maximum benefit rate of 100% under the Post-9/11 GI Bill®.
- Be a veteran, dependent of a veteran eligible for the Transfer of Entitlement, or another VA-approved transferee.
- Active-duty service members and their spouses are not eligible for the Yellow Ribbon Program.

General VA eligibility requirements include:

1. Serving an aggregate of 36 months in active duty after September 10, 2001.
2. Being honorably discharged from active duty for a service-connected disability after serving 30 continuous days post-September 10, 2001.
3. Being a dependent eligible for Transfer of Entitlement under the Post-9/11 GI Bill®.

CIAT encourages all students to review detailed eligibility requirements on the VA's Yellow Ribbon Program website. Students enrolled in eligible Yellow Ribbon-approved programs at CIAT may participate. Eligible students will receive up to 50% of the unmet tuition and fee costs per academic year, with the VA matching CIAT's contribution to cover up to 100% of the tuition and fees.

How to apply for Yellow Ribbon Program benefits under the Post-9/11 GI Bill®:

1. Submit your application for Post-9/11 GI Bill® benefits online at https://benefits.va.gov/gibill/.
2. Use CIAT's Facility Code: 21000305.
3. After processing, the VA will issue a Certificate of Eligibility (COE) specifying your potential eligibility for the Yellow Ribbon Program.
4. Submit your COE and CIAT's Yellow Ribbon Application to the Office of Financial Aid for verification and processing.

For assistance, contact the VA Education Case Manager at 1-888-GIBILL1 (442-4551).

Awards are granted on a first-come, first-served basis, determined by the date and time CIAT receives your Yellow Ribbon application. Once the maximum number of awards is reached, no additional awards will be available for that academic year.

Application of Yellow Ribbon Benefits to Your Student Account

CIAT's portion of the Yellow Ribbon award will be applied to your account after all enrollment and disbursement requirements are met. The VA's matching portion will be paid directly to CIAT and applied to your account. Yellow Ribbon awards at CIAT may be renewed annually as long as the following conditions are met:

1. CIAT continues to participate in the Yellow Ribbon Program.
2. The student remains in good academic and conduct standing.
3. The student has remaining entitlement as defined by the VA.

Participation in the Yellow Ribbon Program is voluntary. CIAT reserves the right to modify its participation or contribution levels in future academic years. For more information about the Yellow Ribbon Program and other benefits, please visit https://benefits.va.gov/gibill/. For questions regarding CIAT's Yellow Ribbon policy, please contact the Office of Financial Aid at financialaid@ciat.edu.

Tuition Assistance (TA)

The Tuition Assistance (TA) program funds are a unique, distinct source of financial aid available to eligible Service members. Military Tuition Assistance is a benefit paid to eligible members of the Army, Navy, Marines, Air Force, and Coast Guard. Each service has its own criteria for eligibility, obligated service, application processes and restrictions. This money is usually paid directly to the institution by the individual services. Eligible Service members must receive approval from an Educational Service Officer (ESO) or counselor within the Military Service prior to enrolling. Additionally, active duty members may elect to use the MGIB "top-up" in addition to their service provided TA to cover high cost courses. TA is not a loan; it should be viewed as money the student has earned just like student's base pay.

Tuition Assistance Approval Steps

- Step 1: Inform your command & receive direct authorization from your Educational Service Officer (ESO) or military counselor.
- Step 2: Complete required policy & procedures training.

- Step 3: Define your educational goals through education counseling.
- Step 4: Submit your education plan documents to your college counselor.
- Step 5: Submit TA application in the designed branch Education Portal.

Scholarships

CIAT offers many different Scholarship opportunities for students who qualify. Unlike student loans, scholarships do not have to be repaid. See Scholarships section on page 19 in the catalog for information on eligibility and submission requirements for CIAT scholarships.

STUDENT INFORMATION

Academic Assistance

CIAT provides academic assistance and tutoring services for students experiencing academic difficulties. Instructors are available by appointment to assist with any area of difficulty, and students may be required to participate in extra help or tutoring sessions to maintain satisfactory enrollment. For academic assistance to be beneficial, students must be as committed to their own success as the school is and take the initiative to discuss their difficulties with their instructors and/or Student Services. Special tutoring or Test Preps are available to students experiencing academic difficulty on an as needed basis.

Advising

Staff have an open-door policy and try to be readily available to assist students with any school or personal issues. Faculty is available minimum 30 minutes prior to the start of each class. For additional time, Instructors are available by appointment to assist. If necessary, students are referred to other professional organizations for assistance.

School Staff Appointments

The staff makes every effort to be readily available to any student that wishes to speak with them. Sometimes, however, schedules do not provide for an immediate meeting. Students may arrange a meeting with any administrator through their instructor or via telephone. Every attempt will be made to schedule and conduct a meeting within 24 hours.

Student Orientation

After the enrollment process is complete, Student Services will ensure that the student can attend New Student Orientation. This event will review success strategies, course readiness, and resources available at CIAT. New Student Orientation is mandatory for all students, as well as the successful completion of the CIAT Readiness Course. For those not able to attend the New Student Orientation, there will be a recording available to watch and review.

This meeting is to welcome new students and introduce them to the school's policies and procedures. Attendance and grading policies form a part of the orientation information, which also includes projected graduation dates, holidays, and vacations pertaining to the relevant enrollment period. During New Student Orientation, students get to meet different staff members and activate student ID cards, email accounts, learning management portal accounts, and much more. It is a great way to start the program.

Academic Schedule

Flexible Start Times

CIAT's classroom, guided self-study and online programs offer flexible start opportunities. Classes begin every five weeks. Please see the Academic Calendar in this catalog for actual start dates during the time period covered by this catalog.

Upon enrollment, an Admissions Advisor will work with you to create a schedule that honors your work and family commitments while still achieving your educational objectives in the shortest practical timeframe. If your circumstances change for any reason, your schedule can be revised to meet your needs. Please contact us for more information.

Course Duration – Full Time or Part Time

Full Time students are expected to complete each course within a five-week period (Term). Students will spend 4.5 hours at least two days per week in the classroom attending lectures and getting hands-on instruction. Online students can expect to receive synchronous and asynchronous time in face-to-face interaction with your online instructor. Additional time will be spent each week on homework, discussion questions, projects, quizzes, exams, labs and other types of lectures. For more information on Online, please refer to Interactive Distance Learning (IDL) on this page.

For students who are receiving Federal Student Aids, please refer to Course Load & Financial Aid Programs on page 26. For VA purposes, Part time is considered as half-time attendance and will result in a reduction in the housing allowance you may receive if otherwise eligible.

Bootcamp classes are fast paced intensive courses for those with extensive prior experience and who need a fast track to Certification and/or Licensing for Professional Development. They normally run for 8 hours a day, 5 days per week, Monday through Friday. Students may enroll for no more than four consecutive Bootcamps as a Professional Development student. Professional Development students completing all the required courses, with successful certification, to qualify for a Program Certificate from CIAT, may petition the Registrar for issuance of that Certificate. Upon approval by the Registrar and the President, the student will receive the appropriate Certificate of Program Completion.

Payment Period

There are three terms in a semester (15 weeks) and each semester is CIAT's payment period. Depending on the student's first term date, he/she's payment period will be determined.

Veteran Students using VA Benefits to pay for any portion of their training will be invoiced on a term basis instead of at the beginning of each payment period.

Clock Hours vs. Semester Hours

CIAT uses Semester Hours to measure its degree programs and associated courses. This is in keeping with standard practice of most degree granting institutions. Each Semester Hour is equal to 15 lecture hours or 30 lab hours of class time. Most of the courses in our degree program are 4 semester hours (3 semester hours of lecture and 1 semester hour of lab) and thus represent approximately 75 hours of class time. Conversely our courses when offered as part of a Certificate program are set at 75 clock hours. Clock hours are more commonly used when talking about Certificate programs, especially vocational programs. The courses are essentially the same but utilizing the two different credit accounting methods allows us to more easily compare our courses to other institution's courses when evaluating transfer credits. Most institutions of higher learning expect that their students will spend approximately two hours for each hour of instruction outside the classroom on homework and self-study.

For the purpose of Title IV Federal Financial Aid, CIAT measures our programs in Semester Hours as follows:

Semester Credit hours definition of credit hour: Measures credit hour in terms of the amount of time in which a student is engaged in academic activity (course ware, labs, hands on, lecture, and homework) are 37.5 clock hours:1; that is a minimum of 37.5 hours to award 1 semester credit (divide program hours including homework by 37.5). **34CFR Section 668.8 (1) (2).**

Class Information

Class Location

Classes are currently held at our main campus at 401 Mile of Cars Way, Suite 100, National City, CA 91950, and our second campus at 1717 Louisiana Blvd NE Ste 208, Albuquerque, NM, 87110, and online. You will be advised of the classroom being used when you register for your courses. Onsite classes at your location may be arranged for Professional Development courses. Minimum class sizes may be imposed to cover the expense of providing onsite classes. Please contact an Admissions Representative for further information.

Classroom Facilities and Equipment

Each student is provided with a laptop computer for classroom use and access to lab equipment. There is a media center with access to the Internet, a printer, hardcopy reference books, office supplies and a telephone/fax. The campus has plenty of parking and is located close to public transportation.

Class Size

An average class size for any class or lab at CIAT is 15 students, and maximum 30 students in class.

Interactive Distance Learning (IDL)

Online learning is different from classroom-delivered instruction and there are advantages and disadvantages to each. The advantages of IDL are rapidly gaining as technology enables students learning at a distance to feel more connected than ever before. Students must be self-motivated, have an up-to-date computer, a high-speed Internet connection, and a distraction-free place to study. Faculty and student interaction will be available by online video conference, LMS discussion boards, email, phone, and chat. CIAT classes use a combination of all or some of the following to provide quality distance learning:

1. Online Video Lessons
2. Online Quizzes/Exams
3. Certification preparation software
4. Live instructor available for conferences and personal sessions
5. Online Labs
6. Discussion questions

In our distance learning classes, all interaction with our instructors is via electronic means, primarily the internet, but your instructor will also exchange communications with you via email, texting and telephone. All emails, texts and voice messages will be answered no later than the next business day. Since all quizzes, tests, projects and labs are completed online, you will know your results immediately upon completion. Final course grades are posted within one week of the course completion and may be viewed on the school's Student Portal database. Students may check their progress at any time using the Student Portal. For those classes where written projects are required, such as essays for the General Education English courses, they are also submitted electronically and will be graded and returned electronically within 5 business days of submission. For additional information to see if IDL programs are right for you, contact an Admissions Advisor at 1-877-559-3621 or info@ciat.edu.

Minimum Hardware & Software Requirements

Every student is required to have a personal computer to successfully complete their coursework. To support career readiness, the specified hardware and software requirements are designed to reflect the tools and environments commonly used in the workforce. Successful completion of coursework, virtual labs, certification exams, and coding assignments require access to a personal computer that meets the minimum hardware and software requirements outlined.

ITEM	DEFINITION	RECOMMENDED SPECIFICATION
Hardware	The physical computer on which you will perform the tasks for courses.	• PC Laptop, Notebook, or Desktop with 200GB of free hard drive space • The following computers are NOT supported by CIAT personnel: Macs, Chromebooks, iPads, tablets, or mobile devices
Processor (CPU)	The CPU is the brain of the computer where most calculations take place. In terms of computing power, the CPU is the most important element of a computer system.	• Multi-core CPU equivalent to AMD Ryzen 5 8500G or Intel Core i5 (12th Gen or newer), with a minimum of 6 cores and ~3.0 GHz base clock

Operating System (OS)	The operating system manages all the software and hardware on the computer and is a platform for applications like Microsoft Office, Cisco Packet Tracer, etc.	• Win 11 Pro (Mac OS and Linux are **not supported**)
RAM (Memory)	Random Access Memory (RAM) is the main memory in a computer and provides the temporary data storage place that a computer needs run.	• 16 GB or higher
Browsers	A web browser is a software application for accessing the information on the internet. These browser versions are recommended for accessing your CIAT coursework.	• Students must use a modern, standards-compliant web browser that is actively supported by its developer. The browser must be kept **fully up to date** with the latest version and security patches to ensure compatibility with course materials, virtual labs, and online platforms.
Internet Speed	The minimum speed of your Internet connection when attending live classes, watching recordings, or completing course work.	• Download: 200+ Mbps • Upload: 20+ Mbps

Study Suggestions

The first thing you should do is schedule some time, about 2 to 3 hours every day, to dedicate yourself to online study and reading assignments. You have from six months to three years to complete your program, depending on the program you have chosen. But, with a little time management, you can complete the program in a much shorter period of time. It's up to you! How soon you want to graduate depends on how much time you're willing to invest. Other areas for study can be found in the course syllabus, provided to you by your instructor. The syllabus contains the suggested textbook and course outline.

Certification Testing

CIAT Certification Exam Policy

Many CIAT programs teach the skills employers require on-the-job. To validate these skills, you are encouraged to take any associated industry certification exams. The taking and passing of industry certification exams is not required for completion of your Program but is highly recommended to improve your success at finding employment in the IT industry.

CIAT will provide students with a certification exam voucher per course upon successfully passing the course and completing two Designated Practice Exams (DPE) at a 90% pass rate or higher. Once the certification exam voucher has been delivered, students are encouraged to schedule and take the certification exam within 15 business days. Students have up to 180 days after graduation to request certification exam vouchers and participate in CIAT's Unlimited Certification Attempt policy.

CIAT's Unlimited Certification Exam Attempt policy allows for students to retake most industry certification exams at no extra cost. The following are single-attempt exams and are not eligible for a retake voucher: CEH, CASP+, CISSP, Cisco DevNet, CCNP ENCOR (350-401), CCNP SD-WAN (300-415), and CCNP Enterprise Routing and Services (300-410).

After two failed attempts for the same exam, students are required to attend a tutoring/test prep session before receiving an additional complimentary exam voucher. Signed documentation of the test preparation will be required prior to issuing the certification exam voucher. Each exam attempt will require the above steps.
Certification exam vouchers are not provided for courses where transfer credit or challenge exam credit is applied. Certification voucher benefits and test preparation support terminate immediately upon withdrawal from the program. If a student is granted readmission to complete their certificate or degree program, all certification voucher benefits, and test preparation support will be reactivated.

Students with documented disability accommodations on file in their student record will receive extended time to request and take DPEs, up to 270 days after graduation.

The measures taken to prepare graduates for their optional certifications include:

- Individual courses containing multiple unit exams, a final exam, labs to help students experience practical use of the course materials.
- Test prep materials to test a student's knowledge to better ensure they are prepared to take an exam.
- Test vouchers and test registration for graduates so that each examinee knows when and where their exam will be held.
- Testing is provided on-site at the campus for multiple certifications including CompTIA, Microsoft, and Cisco.

Students forfeit the right to the same complimentary certification exam vouchers for violating the rules for at-home testing and/or missing their scheduled exam for any reason. Students must pay for the missed exam out of pocket before moving onto receiving the next complimentary certification exam vouchers. If you need to cancel or reschedule your exam, you must do so 24 Hours before your scheduled exam time.

Types of Awards

Honor Roll

Students who achieve scholastic distinction in a standard quarterly in a year, as evidenced by a grade point average of 3.80 or higher in at least 12 semester credit hours in a semester, with no grades of "D+", "D", "D-", "F", "W", "I" or "NC".

President's List

Students who achieve scholastic distinction in a standard quarterly in a year, as evidenced by a grade point average of 4.00 in at least 12 semester credit hours in a semester, with no grades of "D+", "D", "D-", "F", "W", "I" or "NC".

Certified Guru

Students who pass one industry certification distinction in a standard quarterly in a year will be recognized as a Certified Guru.

Graduation with Honors Cum Laude

At graduation, Applied Bachelor's and Associate of Applied Science degree candidates with a 3.50 to 3.70 cumulative Grade Point Average (GPA) will receive special recognition as graduating with Honors Cum Laude.

Graduation with Honors Magna Cum Laude

At graduation, Applied Bachelor's and Associate of Applied Science degree candidates with a 3.71 to 3.90 cumulative Grade Point Average (GPA) will receive special recognition as graduating with Honors Magna Cum Laude.

Graduation with Honors Summa Cum Laude

At graduation, Applied Bachelor's and Associate of Applied Science degree candidates with a 3.91 to 4.0 cumulative Grade Point Average (GPA) will receive special recognition as graduating with Honors Summa Cum Laude.

No degree candidate shall be eligible for graduation with any Honors listed above if, at the time of graduation, disciplinary action has been taken against the student by CIAT.

Dual Certificate/Degree

Students pursuing a Certificate or Degree and completing the requirements for a lesser included Certificate (such as a CCIS or AASCIS student completing the first five courses, which completes the Certificate as a Computer Technician Program) may petition the school for issuance of the lesser Certificate. A nominal fee of $50.00 will be charged to cover the cost of issuing the Certificate.

Transcripts

CIAT provides transcripts for our students upon submitting a request to transcripts@ciat.edu. You may print an unofficial transcript at any time by logging into the student portal. Official Transcripts may also be requested at any time and will be printed and signed on Friday but may not be mailed until Monday. Official Transcripts cannot be emailed, they must be submitted to the receiver in a sealed envelope. We must have specific authorization in writing from you to send a transcript, official or unofficial, to a third party, such as a potential employer, current employer, or another school. Contact the Registrar's Office for further information on transcripts.

Changes to Programs and Courses

The world of Information Technology is rapidly and constantly changing. In order to ensure that CIAT students are receiving the best possible education to make them eminently employable in the IT workforce, CIAT reserves the right to change without notice the content of our courses and the courses that are included in our programs. Rest assured that you will always receive training that is in your best interest for pursuing your career in Information Technology.

Career Development

CIAT offers Career Development to all students and graduates, up to 180 days post-graduation, pursuing employment in their field of study. The Career Services Advisor utilizes online job platforms as well as employer partnerships to keep abreast of current employment opportunities to which graduates may be referred. Although no institution can guarantee employment, CIAT makes every effort to help ensure that each graduate is prepared to effectively compete in the job market as they pursue their new career.

Career Services

Policy for Career Coaching and Support

The California Institute of Applied Technology (CIAT) is committed to providing personalized career coaching and comprehensive support to students and graduates in their job search and professional development. While CIAT cannot guarantee employment, our Career Services team is dedicated to equipping students with the skills and resources needed to navigate their career journey successfully. CIAT faculty and staff ensure that no guarantees of employment are made or implied in any advertising, brochures, lectures, or communications with students or graduates.

Career Services Offered

CIAT's Career Services team provides a range of personalized coaching and support to help students and graduates achieve their career goals. The following services are available:

Resume and Cover Letter Assistance: Our Career Services team offers guidance on creating effective resumes and cover letters. Students can utilize our online resume development platform, SkillsFirst, to create or review their document, as well as submit their documents to an advisor for detailed recommendations for revision and improvement.

Job Search Resources: CIAT utilizes several resources to assist students with the job search process, including exclusive access to our online job search platform, Handshake. All students are provided with access to Handshake within their first term and can engage with the platform throughout the duration and graduation from their program.

Interview Preparation: Students can schedule practice interviews with the Career Services team to build their confidence and refine their interviewing skills. Distance learning students can take advantage of this service through scheduled video appointments via Microsoft Teams.

Internship Opportunities: When internships are available, the Career Services team works closely with employers to facilitate these opportunities for students. Information about internships is shared via email or other means of communication to ensure students are informed of relevant opportunities.

Career Development Guidance: Our Career Services team provides insights into current industry trends, career paths, and in-demand skills in the technology field. Students are encouraged to reach out to Career

Services at any time via email or phone for additional guidance and support.

Employment Status Verification: Students are expected to submit their career information to Career Services via email, telephone, or Employment Status submission form within 30 days of graduation.

Annual Campus Safety & Crime Reports

CIAT is committed to providing a safe and secure educational environment for our students, staff, faculty, and visitors. CIAT adheres to a supports federal statute "20 U.S.C. 1092(f) Disclosure of Campus Security Policy and Campus Crime Statistics Act" also known as the "Clery Act". This law requires all colleges and universities that participate in federal financial aid programs to disclose and report campus crimes on an annual basis. Furthermore, the law requires that this information be available to current and prospective students and employees.

Annual Security Report

CIAT publishes the policies and procedures for reporting crimes, as well as the types of crimes that have been committed on or near the campus in the Annual Campus Safety and Crime Statistics Report. This publication is distributed by October 1st annually to all students and employees, available to prospective students and employees upon request, and are published online at Consumer Information & Disclosures - CIAT (2024-2025-Campus-Security-Annual-Report.pdf). Paper copies can be obtained at any time from Director of Student Services/ Title IX Coordinator.

Reporting a Crime

Students and employees should promptly report all criminal actions and emergencies occurring on or around CIAT campus facilities to the Director of Student Services/ Title IX Coordinator, Vice President of Compliance or President either in person or by calling **877-559-3621**. Reporting incidents of sexual assault, dating violence, domestic violence, and stalking is necessary to ensure victims of such conduct receive appropriate services and information, to track incidents or identify patterns, to protect the campus community from future incidents, and to fulfill CIAT's reporting obligations under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act.

In the event of fire or medical emergencies, staff and employees should contact the local police department by dialing **911** and then notify the Vice President of Compliance or President.

Emergency Response

In the event of a report of a dangerous or emergency situation to any staff member, the staff member will contact the Director of Student Services or any other Executive staff member to report the situation. The Director of Student Services and/or executive staff will review the situation, and if appropriate confer with the local law enforcement agency or other first responders to confirm the issue(s) involved and determine if activation of the Emergency Notification system is warranted. In the event of a confirmed emergency situation, the executive staff will determine the appropriate campus population to receive notification and determine the content of the notification, which will then be passed on to the staff members for immediate dissemination to the campus community via blast email and/or verbally to all students/staff present on campus providing the notification would not compromise the ability to contain the emergency or endanger additional students or staff members.

Timely Warning

Timely Warnings, also called "Public Safety Notices", are provided to give students, faculty and staff notification of crimes that are considered by CIAT to present a serious or continuing threat to the campus community and to heighten safety awareness. CIAT will prepare a Timely Warning Notice when a report is received of a violent crime against a person or a particularly threatening crime against property on campus that represents an ongoing danger to the safety of students, faculty, and staff. Timely Warning Notices are distributed by e-mail to all students, faculty, and staff. E-mails are drafted and distributed by the Director of Student Services/ Title IX Coordinator. In some circumstances, Timely Warning Notice fliers may be posted in campus buildings and on the website www.ciat.edu.

Privacy Policies

Student Records

CIAT students have the right to view their personal student records at any time during normal business hours. Should the student require a printed copy of their record, they must request in writing or email that a copy be provided. CIAT will print and provide the copy at no cost to the student if they pick it up in person at the National City campus. Printed copies will be sent to the student only, via a traceable service for a $15.00 fee. CIAT retains student records indefinitely. If a student wishes to review a copy of their record, they should contact the Student Services Department at the San Diego Campus, Tel: 877-559-3621. Student records are confidential; however, we will release information to a third party when required by law or with approval of the student upon written request. The request must be made in writing to CIAT Student Services:

CIAT, Attention: Student Services
401 Mile of Cars Way, Suite 100,
National City, CA 91950

OR

CIAT, Attention: Student Services
1717 Louisiana Blvd NE Ste 208,
Albuquerque, NM, 87110

Unless a release is provided, CIAT limits disclosure of student records to those authorized by law.

Student Addresses

Students have the responsibility to notify Student Services each time their information changes. Student information changes can be made in person or by email to studentservicesteam@ciat.edu.

Social Security Numbers

Social security numbers are collected from prospective and current students, for administrative coordination and record identification purposes only. The social security number is a confidential record and is maintained as such by the school in accordance with the Family Educational Rights and Privacy Act (FERPA) and the Gramm-Leach Bliley Act (GLBA) to safeguard the security and confidentiality of consumer information.

Policy on Student Names

CIAT 's policy regarding student names and name changes require that the name on the student record should be the student's complete and legal name. In evaluating and processing all name change requests, the school reserves the right to require adequate and appropriate documentation as warranted.

Confidential Information

With the exception of directory information listed in the annual FERPA notice, all student records are considered to be confidential and are open only to school officials. A school official is a person employed by CIAT in an administrative, supervisory, academic, research, or support staff position. A school official also may include a volunteer, contractor or externship outside of CIAT who performs an institutional service of function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of personally identifiable information from education records, such as an attorney, auditor, employers or collection agent or a student volunteering to assist another school official in performing his or her tasks. CIAT's notification of rights can be found in this catalog under Family Education Rights Privacy Act (FERPA) Policy. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for CIAT.

Family Educational Rights and Privacy Act (FERPA) of 1974

The Family Education and Privacy Act was enacted by Congress to protect the privacy of student educational records. This privacy right is a right vested in the student. Generally:

1. Institutions must have written permission from the student in order to release any information from a student's educational record.
2. Institutions may disclose directory information in the student's educational record without the student's consent.
3. It is good policy for the institution to notify the student about such disclosure and to seek the written permission of the student to allow disclosure of any educational records including directory information.
4. Institutions should give the student ample opportunity to submit a written request that the school refrain from disclosing directory information about them.
5. Institutions must not disclose non-directory information about students without their written consent except in very limited circumstances.
6. Institutions should notify students about their rights under FERPA through annual publications.
7. When in doubt, it is always advisable to err on the side of caution and to not release student educational records without first fully notifying the student about the disclosure.

Finally, the school should always seek written consent from the student before disseminating educational records to third parties.

Student records will be maintained on site at the administrative site for five years from the last date of attendance. Transcripts are maintained permanently.

SERVICES

Books and Classroom Supplies

CIAT does not operate a "Book Store" and does not sell classroom supplies. We do not buy-back used textbooks.

Computer Lab with Internet Access

CIAT has computers with internet access for classroom assignments, research, and mock employment interviews.

Common Areas

CIAT provides space for students to relax and study, as well as eat and drink. Vending machines are conveniently located for purchasing snacks and refreshments. All students are asked to treat common areas as they would their place of employment and keep the areas clean.

Library and Librarian Services

CIAT has a resource center on-site, and an online library is available to the student for a modest fee. The City of San Diego provides library services at multiple locations throughout the San Diego area, all available free of charge for all CIAT students. Our Student Services also serves as the Librarian for CIAT and is available to assist all students in locating research and reference materials both online and physically.

Housing Facilities

CIAT does not provide dormitory facilities but will assist students in finding accommodation for the duration of the course. Hotel accommodation is widely available locally with an average cost of $100 to $125 per night depending on the season.

Medical Services

No medical services are provided by CIAT.

Parking

CIAT does not charge for parking on our campuses. No parking passes are needed to utilize this parking. However, overnight parking is not permitted, and vehicles left overnight may be towed without notice. There are several marked "Reserved" parking spaces in the front lots. Please do not park in these spaces. Since we share the parking with other complex tenants, the lot may occasionally be full. In that case, parking along the street is available. Do not park in the parking lot for the vacant restaurant east of the school.

Visitors

CIAT welcomes visitors. All students are encouraged to invite parents, friends, and relatives to the school to visit at any time. All visitors must check in at the front desk. Staff will make themselves available to answer questions as they arise.

Services for Students with Disabilities

The Rehabilitation Act

Title V. of The Rehabilitation Act of 1973 is generally regarded as the first civil rights legislation on the national level for people with disabilities. Section 504 of The Rehabilitation Act is a program access statute. It prohibits discrimination on the basis of disability in any program or activity offered by an entity or institution receiving federal funds.

Section 504 states (as amended):

"No otherwise qualified person with a disability in the United States… shall, solely on the basis of disability, be denied access to, or the benefits of, or be subjected to discrimination under any program or activity provided by any institution receiving federal financial assistance." The Americans with Disabilities Act (ADA) is a federal civil rights statute that prohibits discrimination against people with disabilities. There are four sections of the law: employment, government, public accommodations, and telecommunications. The ADA provides additional protection for persons with disabilities in conjunction with the Rehabilitation Act of 1973. The ADA is designed to remove barriers, which prevent qualified individuals with disabilities from enjoying the same opportunities that are available to individuals without disabilities. In relation to Section 504 of The Rehabilitation Act, the ADA states: "Institutions that receive federal funds are covered under Section 504. The ADA does not supplant Section 504, but in those situations where the ADA provides greater protection the ADA standards apply. Therefore, postsecondary institutions must adhere to both the Rehabilitation Act and The Americans with Disabilities Act."

Disability Services Policy Statement

CIAT recognizes and accepts its obligations under The Americans with Disabilities Act of 1990 and The Rehabilitation Act of 1973 prohibiting discrimination on the basis of a disability and requiring that reasonable accommodations be provided to qualified disabled students in all programs and activities within the control of the institution, provided such accommodation would not impose an unreasonable burden on the school or other students. A student is eligible for consideration for accommodations and/or auxiliary aids and services if the student has a disability and the Director of Student Services has met with the student, consulted with the Vice President of Compliance, and determined that the functional limitations of the disability require such accommodation, auxiliary aids and/or services.

CIAT is committed to providing reasonable accommodations including auxiliary aids, language assistance and/or services to qualified individuals with a disability, unless providing such accommodations would result in undue burden or fundamentally alter the nature of the relevant program, benefit or service provided by CIAT. To request language assistance, auxiliary aids, or services, please contact the Director of Student Services at the campus. Students should submit requests with supporting documentation at least six weeks prior to the beginning of the first day of classes or as soon as practical.

The Vice President of Compliance and the Director of Student Services manage determination of reasonable accommodations and compliance with the ADA and Rehabilitation Act for students jointly. No student shall be retaliated against for seeking accommodation under this policy or for participating in good faith and in a reasonable manner in any review procedures concerning CIAT for its alleged noncompliance with The Americans with Disabilities Act of 1990 or the Rehabilitation Act of 1973.

Individuals with visual impairments must be provided with the "Equal Opportunity is the Law" notice and the "Complaint & Incident Report Policy" notice in alternative formats (e.g., by being read aloud and then provided in audio format to be retained by the employee and applicant). A record that such notice has been given to the employee and applicant in an alternative format shall be included as a part of the employee's and applicant's file.

Definition of Disability

According to Section 3 of the Americans with Disabilities Act of 1990 (ADA), the term "disability" means, with respect to an individual,

1. Having a physical or mental impairment that substantially limits one or more of the major life activities of such individual;
2. Having a record of such an impairment; or
3. Being regarded as having such impairment.

Otherwise Qualified Applicant

A student who provides CIAT with sufficient evidence of a disability meeting the standards established by the ADA or Section 504 is eligible for appropriate accommodations and services, provided the student is an otherwise qualified applicant. In order to be considered an otherwise qualified applicant, a student with a disability must be capable, either with or without accommodations, of fulfilling the essential requirements of a program of instruction.

Determining Appropriate Accommodations

Students with disabilities who are seeking accommodations at CIAT should schedule an individual meeting with the Director of Student Services. Once appropriate documentation has been submitted, reasonable and appropriate accommodations will be implemented based on the student's specific disability and the functional impact of the disability on the student's daily activities and academic obligations.

Disability Grievance Procedure

If a student believes any CIAT employee has discriminated against him or her because of a disability, he or she has the right to seek a review of such concerns. Students have the option of pursuing a formal grievance. When filing a formal grievance, the student should first present his or her concern in writing to the Director of Student Services. Upon receipt of this notice of grievance from the student, the Director of Student Services will

undertake a review of the unresolved complaint during which time the Director of Student Services may request additional documentation of the student's disability. Once all the information has been received and reviewed, the Director of Student Services will present the results of this review in writing to the student.

If the Director of Student Services is unable to produce a resolution to the student's satisfaction, the student may submit a formal written appeal to the Vice President of Compliance of CIAT. This written appeal should include a brief description of the disputed decision and/or perceived discrimination, reasons why the student believes the decision was in error and a short description of a proposed resolution to the disputed decision. Once all information has been reviewed, the Vice President of Compliance will provide a written response regarding the determination to the student. This response will state the final determination regarding the requested accommodation and/or discrimination and the specific reasons supporting the decision. Every effort will be made to produce this final determination in a prompt manner.

Complaint Procedures

If a student believes that CIAT is not in compliance, she or he may file a written complaint with the Office of Civil Rights:

U.S. Department of Education Office for Civil Rights
Lyndon Baines Johnson Dept. of Education Bldg.
400 Maryland Avenue, SW
Washington, D.C. 20202-1100
Telephone: 800-421-3481
Fax: 202-453-6012; TDD: 800-735-2922
Email: OCR@ed.gov
To file a complaint online: https://ocrcas.ed.gov/.

COMPLAINTS AND GRIEVANCES

CIAT Grievance Policy

CIAT maintains an open-door policy. If a student has a concern of any kind, it should first be discussed with the instructor. If the student is not satisfied with the result of that conversation the concern should be presented to the appropriate Director or Manager. If the concern is still not resolved the student is encouraged to request a meeting with the CIAT President.

If you have a complaint, we want to hear about it. Please address all concerns or complaints in writing to:

CIAT
ATTN: Student Services
401 Mile of Cars Way Suite 100,
National City, CA 91950

OR

CIAT
ATTN: Student Services
1717 Louisiana Blvd NE Ste 208,
Albuquerque, NM, 87110

Phone: 1-877-559-3621
FAX: 1-858-505-9650
Email: info@ciat.edu

Include:

- Full name
- Address
- Phone number
- Date of request
- Signature
- Reason for complaint or grievance

ACCET Grievance Policy

CIAT is recognized by the Accrediting Council for Continuing Education & Training (ACCET) as meeting and maintaining certain standards of quality. It is the mutual goal of ACCET and the institution to ensure that educational training programs of quality are provided. When problems arise, students should make every attempt to find a fair and reasonable solution through the institution's internal complaint procedure, which is required of ACCET-accredited institutions and frequently requires the submission of a written complaint. Refer to the institution's written complaint procedure, which is published in the catalog. Note that ACCET will process complaints which involve ACCET standards and policies and, therefore, are within the scope of the accrediting agency.

In the event that a student has used the institution's formal student complaint procedure, and the issue has not been resolved, the student has the right and is encouraged to submit a complaint to ACCET in writing via the online form on the ACCET website (https://accet.org/about-us/contact-us). The online form will require the following information:

1. Name and location of the ACCET institution.
2. A detailed description of the alleged problem(s).
3. The approximate date(s) that the problem(s) occurred.
4. The names and titles/positions of all persons involved in the problem(s), including faculty, staff, and/or other students.
5. What was previously done to resolve the complaint, along with evidence demonstrating that the institution's complaint procedure was followed prior to contacting ACCET.
6. The name, email address, telephone number, and mailing address of the complainant. If the complainant specifically requests that anonymity be maintained, ACCET will not reveal his or her name to the institution involved.
7. The status of the complainant with the institution (e.g., current student, former student).

Please include copies of any relevant supporting documentation (e.g., student's enrollment agreement, syllabus or course outline, correspondence between the student and the institution).

Note: Complaints will receive an acknowledgement of receipt within 15 days.

ACCET Address: 1722 N St NW, Washington DC, 20036; **P:** (202) 955-1113

Online Complaint Submission Form

State Agency Grievance Policy

CIAT must provide its students or prospective students with contact information for filling complaints with its State approval or licensing entity. A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the bureau's internet website www.bppe.ca.gov. Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the following:

California
Bureau For Private Postsecondary Education
1747 N. Market Blvd., Ste 225
Sacramento, CA 95834
www.bppe.ca.gov/
Phone: (888) 370-7589
Fax: 916-263-1897

ACADEMIC STANDARDS

Attendance Policy

CIAT's online courses are designed to support regular and substantive interaction between students and instructors, and students to students, synchronously and asynchronously. Students earn attendance credit through timely participation in online course activities, completed by the due dates published in the course syllabus. Each course is comprised of five elements: (1) Instructional lectures, (2) interactive online discussions, (3) hands-on exercises (labs or projects), (4) online assignments, and (5) online assessments. Students receive feedback from instructors through all online course activities to ensure students are provided the academic support needed to complete the course.

What is an eligible attendance activity?

- Student submission or reply to an interactive discussion forum.
- Student submission of an assignment, exercise, or project.
- Student submission of an assessment (i.e. exam, quiz).
- Completing an instructor-approved makeup assignment.

What is not an eligible attendance activity?

- Logging into an online course, or your student portal, without engaging in one or more course activities.
- Logging in to, or watching, a live lecture, without engaging in one or more course activities. Attending live lectures or watching recorded lectures are critical for academic success and aid students in completing the required course activities.
- Homework, including reading or self-study for exams.

Why Attendance is Important

Student engagement is an essential part of the educational experience at California Institute of Applied Technology. Students are encouraged to participate in all coursework activities to facilitate their academic and career success. A student's overall academic performance is impacted by the level and consistency of course participation. Collecting and reporting attendance data is required for CIAT to comply with state, federal, and accreditation regulations, and is required to support students utilizing federal funding, including Title IV loans, grants, or military benefits.

How Attendance is Tracked and Calculated

All interactive course activities completed in Canvas are automatically tracked with a date and time stamp of completion. Students are required to complete a minimum of three (3) eligible attendance activities per week to earn full attendance credits. All eligible attendance activities are assigned one of three attendance values: Present, Tardy, or Absent.

1. **Present:** All eligible attendance activities submitted on or before the due date are classified as "Present".
2. **Tardy**: All eligible attendance activities submitted within 24 hours after the due date are classified as "Tardy".
3. **Absent:** All eligible attendance activities submitted 24 hours or more after the due date, or are not submitted, are classified as "Absent".

One attendance "credit" is awarded for each of the three (3) minimum required attendance activities per week completed by the required due dates. A student can earn a maximum of three credits (or 100% attendance) per week; however, students are highly encouraged to complete all eligible attendance activities. The total course attendance is calculated by dividing the # of attendance credits awarded per week / # minimum attendance activities required (15). The grade point value earned through the completion of assignments does not impact the attendance calculation.

Attendance results are published weekly and available for students to review online through their Student Portal. After each course is completed, students can view their cumulative attendance calculation online through their Student Portal. Students are responsible for complying with the attendance policy and monitoring their attendance records. If you identify an error in your attendance calculation, please submit a support request to the Student Services team by emailing studentservicesteam@ciat.edu.

Minimal Accepted Attendance

Students are expected to maintain a minimum of 80% attendance for each term and are required to reach a minimum of 80% or higher cumulative

attendance throughout their program to remain eligible for graduation. Students must earn a minimum of 12 attendance credits during the term to reach the minimum 80% attendance requirement.

Determining Last Date of Attendance

A student's Last Date of Attendance (LDA) is automatically recorded and recalculated based on the submission date and timestamp of eligible attendance activities.

Makeup Attendance

Students with approved excused absences may be given an option to complete makeup assignments at the discretion of the instructor. Approved excused absences may include, but are not limited to illness, hospital visitation, military deployments, death of a family member, business travel, temporary loss of internet connection, or personal hardships. Makeup activities need to be comparable to the content, time, and delivery of the activity missed. Makeup activities require review, feedback, and facilitation by the instructor. If the makeup activity is approved by the instructor, it is calculated as a "Present" equivalency on a student's attendance record corresponding to the original assignment due date.

Consecutive Absences

A student is in continuous attendance as long as no more than fourteen (14) calendar days exist between the submission dates of eligible attendance activities. A student absent for fourteen consecutive calendar days will be dropped from the course. Students who fail to maintain active participation in their course and do not have an approved leave of absence may be dropped from the program.

Interruption for Unsatisfactory Attendance

Students must maintain a cumulative attendance rate of 80% measured at the end of each semester. A student with less than 80% attendance will receive an attendance warning notice for the next semester. Failure to raise the cumulative attendance rate for two subsequent semesters in a row will require an academic appeal before continuing. Students who do not meet the attendance requirements for three consecutive semesters may be subject to administrative withdrawal.

Leave of Absence

Under certain conditions, a Leave of Absence (LOA) may be granted but must be limited to a maximum of 180 calendar days in any 12-month period. Such conditions may include military deployment, medical leave, and employment orders. Please review the Leave of Absence policy.

Hybrid Attendance Policy

Students enrolled in the hybrid learning format must meet a physical attendance requirement, in addition to the online attendance requirement. Students must complete one course session on campus, during the 5th week of the term, for a minimum of 50 minutes. Hybrid students will be considered Tardy if they arrive more than 15 minutes after the start time of the scheduled in-class session and may not be eligible to participate in the class session unless makeup hours are approved by the instructor. Hybrid students who do not attend the on-campus session will be considered Absent. A Hybrid student who fails to comply with the physical attendance requirement for two consecutive terms will be automatically converted to an online student and will not be eligible to participate in the hybrid physical attendance activities during the subsequent term.

Attendance Accommodation for Students with Disabilities

Federal law requires colleges and universities to consider reasonable modification of attendance policies if needed to accommodate a student's disability that impacts attendance. Determination of eligibility for a disability-related modification to the attendance policy is made on a case-by-case basis through our Disability Support Department. Reasonable attendance modifications are determined through a conversation with the instructor, student, and the Director of Student Services. Students with questions about how their disability may impact course attendance should contact the Disability Support Department by emailing dss@ciat.edu.

Leave of Absence

CIAT recognizes that students may encounter circumstances that require a temporary pause in their academic program, such as medical situations, military service, personal or family obligations, or programmatic or scheduling conflicts. A Leave of Absence (LOA) is a temporary, approved interruption in enrollment that allows a student to pause their studies while maintaining active enrollment status. LOAs are granted under specific circumstances and are designed to provide flexibility without withdrawing from the institution. While on an approved LOA, a student is considered active and enrolled but is not registered for courses during the term(s) covered by the LOA. It is important for students to understand that Federal Student Assistance (FSA) may be negatively impacted if they fail to apply for a LOA or if the application is denied.

Maximum Duration

- A leave of absence must be limited to a maximum of 180 calendar days in any 12-month period.
- A student may be granted one or more LOAs, provided the total duration does not exceed this limit.
- The 12-month period begins on the first day of the initial approved LOA.
- LOA days are counted consecutively from this initial date.
- LOAs exceeding the allowable maximum are not permitted.

To request a Leave of Absence, students must submit a written request to studentservicesteam@ciat.edu prior to the start of the LOA whenever possible and include a reason for the LOA. If unforeseen circumstances prevent advance submission, CIAT may still grant an LOA, provided the reason is documented and required documentation is collected.

An LOA is approved when the request is submitted and reviewed by Student Services and CIAT determines there is a reasonable expectation of the student's return. All LOA requests are considered on a case-by-case basis. LOAs may be approved term-by-term if there is no extenuating circumstance. Term-by-term LOAs are generally granted for personal

reasons or programmatic or scheduling conflicts. If additional time is needed beyond the original approval, a new LOA must be submitted. Extensions require approval and must not exceed the maximum allowable duration within a 12-month period.

Students called to active military duty may request an LOA under this policy. If military service exceeds the maximum allowable duration, the student will be administratively withdrawn without prejudice. Students may apply for readmission according to institutional policy and applicable federal regulations.

Students must resume enrollment on or before the approved return date. Failure to return on time, or exceeding the maximum allowable duration, will result in administrative withdrawal from the program.
All LOA requests must be initiated by the student through their Student Success Advisor via phone, chat, or email. Upon approval, students must acknowledge, in writing, the LOA start date and approved return date.

Grading and Evaluation Criteria

An average of each course grade is calculated to determine your GPA for a program. Please refer to your course syllabus for information regarding the grading criteria for each course. The minimum passing grade to earn course completion credit and progress to the next course is D-. However, students must maintain a cumulative GPA of 2.0 or higher each semester period to maintain eligibility for graduation (see: Satisfactory Academic Progress Policy). Please be aware that all further re-submissions, beyond the first, of an Exercise, an Assignment, and all attempts on a Quiz must be submitted before their due date or they will be marked as late, and deductions will be taken from the total possible points.

Late Coursework Submission Policy

CIAT operates on a 5-week term schedule, requiring students to remain engaged and complete coursework in a timely manner. Falling behind on assignments may negatively impact a student's ability to grasp key concepts, participate in discussions, and successfully complete their program. Late or missing coursework can affect Satisfactory Academic Progress (SAP), which is based on both GPA and maximum timeframe to program completion. Students must maintain satisfactory academic progress to remain in good academic standing and continue receiving financial aid where applicable. Those struggling to meet deadlines should proactively seek support from instructors or academic support services to develop strategies for time management and course completion.

Late Submission Penalty:
Late coursework submissions will incur a **1% deduction per day** from the total possible score, up to a maximum of **28%** within the 4-week submission window. Coursework submitted **beyond week 4** is only eligible to receive a **maximum of 60%** of the total points possible. To encourage timely submissions, the following penalties will apply to each late assignment submission:

- **1 to 7 dates late**: A 7% deduction from the total possible score (1% per day).
- **8 to 14 days late**: An additional 7% deduction (total 14%).
- **15 to 21 days late**: An additional 7% deduction (total 21%).
- **22 to 28 days late**: An additional 7% deduction (total 28%).
- Coursework submitted **beyond 28 days late** is only eligible to receive up to 60% of the total points possible.

Enforcement:
The Canvas Learning Management System will automatically apply late submission penalties in alignment with this policy. Students are encouraged to review the syllabus for each course to ensure they understand submission expectations and plan accordingly to meet deadlines. Adherence to this policy supports the development of strong academic habits that contribute to long-term success both at CIAT and in future professional careers.

Percentage %	Letter Grade	GPA
94-100	A	4.0
90-93.9	A-	3.7
88-89.9	B+	3.3
84-87.9	B	3.0
80-83.9	B-	2.7
78-79.9	C+	2.3
74-77.9	C	2.0
70-73.9	C-	1.7
68-69.9	D+	1.3
64-67.9	D	1.0
60-63.9	D-	0.7
Below 60	F	0
Audit	AU	No Credit
Authorized Incomplete	I	No Credit
Withdrawal	W	No Credit
Pass	P	No Credit
No Pass	NP	No Credit

Audit (AU) –Audit students will receive a designation of "AU" on their permanent record which will not carry any academic credit because there is no measurement of the student's performance.

Incomplete (I) – A grade of "I" may only be issued when a student has attended and completed at least 45% of the course sessions and is unable to complete the requirements due to uncontrollable and unforeseen circumstances. If a student doesn't complete the class, an Incomplete will become a permanent F.

Withdrawal (W) – Approved withdrawal from a course is recorded as a "W" grade if the student has posted attendance during the second through the fourth weeks of the term. The Last Date of Attendance (LDA) will serve as the official date of withdrawal. The withdrawal is a permanent mark with no grade points assigned.

Pass and No Pass (P and NP) – Upon completion of a Bootcamp course, students will receive a grade of Pass or No Pass. Bootcamp courses are NOT applicable toward a degree or certificate programs.

Satisfactory Academic Progress (SAP) Policy

Overview

California Institute of Applied Technology (CIAT) enforces a Satisfactory Academic Progress (SAP) Policy to ensure that students are making consistent, measurable progress toward the successful completion of their academic program. Under this policy, students' academic progress is evaluated using Qualitative measures (cumulative grade point average) and Quantitative measures (rate of completion of attempted coursework and a maximum time frame for program completion), in alignment with standards set by the U.S. Department of Education.

Students who do not meet CIAT's SAP standards may become ineligible for federal funding; however, they will receive formal notification and may be provided the opportunity to appeal and, if approved, follow an academic plan designed to support their return to good standing.

This policy outlines:

- The institution's process for evaluating Satisfactory Academic Progress requirements
- Examples and formulas on how calculations are processed
- SAP stages, communication protocols and student academic expectations
- Implications for students across all funding sources (financial aid, military benefits, private loans, and other funding sources)
- Academic and financial support options

Evaluating Satisfactory Academic Progress

Requirements: SAP is evaluated at the end of each academic semester. At the end of each evaluation period, all students must meet the following minimum requirements:

- **Cumulative GPA (CGPA):** Maintain a cumulative GPA of 2.0 on a 4.0 scale.
- **Pacing:** Complete 67% (2/3) of all cumulative attempted credits.
- **Maximum Time Frame:** Complete their program within 150% of the credits required.

Cumulative GPA Calculations:

Students must maintain a minimum cumulative GPA of 2.0 at the end of each evaluation period. Cumulative GPA is calculated by using the formula: (cumulative earned points ÷ cumulative attempted credits). The points earned are calculated by multiplying credit hours attempted by a numerical point value on a 4.0 scale (A = 4.0, B = 3.0, C = 2.0, D = 1.0, F = 0.0). Term GPA is calculated by dividing the total earned points / the total attempted credits attempted in that term, while cumulative GPA is computed across all terms by dividing the sum of all earned points by the sum of all credits attempted to date, excluding course retakes.

An example of this calculation is illustrated below:

- Semester 1 GPA = 2.45
- Semester 2 GPA = 2.55
- Cumulative GPA at Semester 2 evaluation period = 2.50

Semester 1	Credit Hour	Grade	Earned Points	Term GPA
Term 1	4	B	12	3.0
Term 2	4	B	12	3.0
Term 3	3	D	3	1.0
Semester 2	**Credit Hour**	**Grade**	**Earned Points**	**Term GPA**
Term 1	4	A	16	4.0
Term 2	4	B	12	3.0
Term 3	3	F	0	0.0

*Students may have 3 or 4 terms within an academic semester, based on their enrollment date.

A student may be required to retake courses to evaluate their GPA to meet SAP standards. See Course Repeat Policy for more details.

Pacing Calculations:

Students must maintain a minimum of 67% pacing rate at the end of each evaluation period. The rate of completion of attempted coursework (or pacing) is calculated by using the formula: (cumulative earned credits ÷ cumulative attempted credits) × 100, where earned credits include passing grades (D- or higher), and attempted credits encompass all registered coursework, including withdrawals, incompletes, failures, and repeats. Percentages will not be rounded up.

Scenario	Attempted vs Completed
Passing grade (A → D-)	Attempted + Completed
Transfer Credits	Attempted + Completed
F, W, IP	Attempted
Repeated Courses	Attempted + Completed (if passing grade is earned)

Example A:

In the following example, the student completed 67% or more of the total attempted credits in the first and second semesters. However, in the third semester, the student completed 14 of 22 cumulative credits – yielding a 63% pace of progression. 63% pacing rate does not meet the minimum pacing progress requirement.

Semester	Semester Attempted Credits	Cumulative Attempted Credits	Semester Completed Credits	Cumulative Completed Credits	Pacing %	Minimum Met?
Semester 1	4	4	4	4	100%	YES
Semester 1	12	16	7	11	68%	YES
Semester 3	6	22	3	14	63%	NO

Example B:

In Example B, the student transferred 12 credits into their program of study. By the end of the first semester, the student completed 20 cumulative credits (including the transfer credits), yielding an 83% pace of progression. By the end of the third semester, the student completed 24 credits, yielding a 63% pace of progression. 63% pacing rate does not meet the minimum pacing progress requirement.

Semester	Semester Attempted Credits	Cumulative Attempted Credits	Semester Completed Credits	Cumulative Completed Credits	Pacing %	Minimum Met?
Transfer Credits	0	12		12	N/A	N/A
Semester 1	12	24	8	20	83%	YES
Semester 2	8	32	4	24	75%	YES
Semester 3	6	38	0	24	63%	NO

*Students may have 3 or 4 terms within an academic semester, based on their enrollment date.

Accepted transfer credits count as both attempted and completed credits when determining pace, but they reduce the remaining credits available before reaching Maximum Time Frame. See Transfer Credit policy for more details.

Maximum Time Frame ("150% Rule"):

CIAT requires that all students complete their program within 150% of their declared program, regardless of whether they have received federal funding in all terms. To remain eligible for federal funding, students must complete their academic program within the Maximum Time Frame (MTF) established under federal regulations. All attempted credits count toward the 150% Maximum Time Frame.

Program-Specific Examples:

- Bachelor's Degree Programs Required:
  130 credits → Maximum Attempted: 195 credits
- Associate Degree Programs Required:
  64 credits → Maximum Attempted: 95 credits
- Certificate in Computer Information Systems (CCIS) Required:
  36 credits → Maximum Attempted: 54 credits

At the end of each evaluation period, if it becomes mathematically impossible for a student to complete the program within the 150% Maximum Time Frame, the student will no longer meet SAP requirements and will be withdrawn from their program.

SAP Stages & Communication Protocols

At the end of each semester evaluation period, all students will receive email communication with confirmation of their SAP status. The stages of SAP status progression are:

- **SAP Met:** Student has met the minimum GPA and pacing requirements and is on track to complete their program within 150% of Maximum Time Frame.
- **SAP Not Met:** Student has not met the minimum GPA or pacing requirements during the evaluation period. This status may be assigned upon a student's first semester in their program of study, or when the previous semester's SAP status was assigned a value of "SAP Met". The subsequent semester is immediately assigned the next stage of SAP status progression – "Warning".
- **Stage 1 – Warning:** When a student's SAP status is set to "SAP Not Met" at the end of an evaluation period, the student is placed on a "Warning" for the following semester. A Warning status does not impact a student's academic standing, future course registration, or tuition funding. Rather, it is utilized to remind students about CIAT's academic requirements. During this stage, the student remains eligible for federal funding. The student must improve academic performance to meet minimum SAP standards by the next evaluation point. A registration hold is NOT placed on the student record. The student will be advised to reserve an academic counseling session to receive extra help and support throughout the next semester.
- **Stage 2 – Probation:** When a student has not met the minimum GPA or pacing requirements for two consecutive evaluation periods, the student is placed on a "Probation" status and becomes ineligible for continued use of federal funding. A student may submit a written appeal, and if approved, follow an academic plan designed to support their return to good standing. If the appeal is approved, the student regains federal funding eligibility for one subsequent semester. Failure to meet SAP standards during the probation evaluation period results in financial aid suspension.
- **Stage 3 – Financial Hold:** When a student has not met the minimum GPA or pacing requirements for three consecutive evaluation periods, the student is placed on a "Financial Hold" status. The student becomes ineligible for continued use of federal funding, including government grants, loans, or veteran benefits. A registration hold will be placed on the student's record until a secondary funding source has been arranged. The student may regain eligibility for federal funding once an evaluation period results in a "SAP Met" status.

Summary of SAP Status Progression

An example of how SAP progresses through each stage is illustrated below.

Semester	Semester Evaluation Outcome	Semester SAP Status Assigned	Next Semester SAP Status Progression	Next Semester Title IV Eligibility
Semester 1	All requirements met	SAP Met	N/A (Resets)	Eligible
Semester 2	GPA or Pacing not met	SAP Not Met	Warning	Eligible
Semester 3	GPA or Pacing not met	Stage 1 - Warning	Probation	Eligible with approved appeal
Semester 4	GPA or Pacing not met	Stage 2 - Probation	Financial Hold	Ineligible
Semester 5	All requirements met	Stage 3 - Financial Hold	SAP Met	Regains eligibility

SAP Probation and Appeal Process

A student placed on academic probation must submit a written appeal to continue with the program. This step in the academic support process is designed for CIAT to evaluate your readiness and commitment to continuing with your education and identify areas where our Student Success team can help you get back on track. Your appeal letter will be reviewed by our Student Services Director. If approved, you'll be required to improve your academic performance by the end of the following semester evaluation period. The student will be sent the written decision within ten days of receipt of the appeal. Students reinstated upon appeal

are on probationary status for the next evaluation period, during which time they must meet the terms and conditions set out in the academic advising sessions.

During this appeal process, if it is calculated to be mathematically impossible for a student to complete the program within the 150% Maximum Time Frame, the appeal will not be approved, and the student will be withdrawn from their program.

If the appeal is granted, the student may continue with the program while on probation if they meet the terms of the academic plan until such time as Satisfactory Academic Progress status is regained. At the end of the evaluation period, and at the end of every evaluation period thereafter, the student's academic status will be reviewed to ensure ongoing SAP requirements are met.

If the student does not meet the minimum academic requirements by the end of the subsequent semester evaluation period, the student becomes ineligible for continued use of federal funding, including government grants, loans, or veteran benefits.

Impacts on Student Funding

Satisfactory Academic Progress (SAP) determinations are used to establish a student's eligibility for funding, including government grants, loans, or veteran benefits. Depending upon the stage, students who do not meet CIAT's SAP standards may be placed on a Warning, lose eligibility for federal aid, or be required to appeal and follow an approved academic plan to regain federal funding.

CIAT applies the same SAP evaluation, status designations, and academic expectations to all enrolled students, regardless of whether they receive federal aid, private loans, employer tuition assistance, CIAT payment plans, or cash payments. As a result, SAP stages, including Warning, Probation, or Financial Hold, reflect a student's overall academic standing at CIAT, not solely their funding source, and may affect both continued enrollment and access to current or future financial assistance.

Returning Students

Students who withdrew from a CIAT Certificate or Degree program (by will or by administrative withdrawal) and who are applying for Re-Admission into the same program will be assigned the same SAP Stage (SAP Not Met → Financial Hold) upon their entry previously documented on their student record. If a student was placed on Financial Hold and lost access to federal funding, they may submit a written appeal to regain federal funding eligibility upon re-entry. CIAT will evaluate the circumstances outlined by the student in the appeal letter and determine the students' readiness and commitment to continuing with their education. Circumstances from a prior academic attempt may include, but not limited to death of an immediate relative, a serious illness or accident requiring medical intervention, unexpected family obligations, catastrophic loss (e.g., flood, fire, etc.), request for disability accommodation, challenges balancing work commitments or military deployments, or personal crisis.

Students who are applying for Re-Admission into a different program will have no SAP status designated. See Transfer Credit policy for more details.

Academic and Financial Support Options

CIAT provides comprehensive academic and financial support options to help students succeed and regain Satisfactory Academic Progress (SAP) compliance. Academic resources include academic tutoring, personalized advising sessions with our Student Success teams, and more. Financial consultations are available at any time throughout students' programs and provide guidance on federal aid restoration through probation or academic plans, assistance with private loan certification, and connections to employer tuition assistance or veteran benefits where applicable. Students are encouraged to promptly contact studentservicesteam@ciat.edu or schedule sessions via the student portal to leverage these resources and stay on track toward program completion.

Transfer and Readmitted Students

Transfer students from outside the institution will be evaluated qualitatively only on the work completed while at the Institute. The maximum time frame is reduced for transfer or readmitted students, based upon the remaining length of the program in which they enroll. If the student transfers in 90 hours towards a 450-hour program and therefore must complete 360 hours at the Institute, then (360/450 hours = 80%), the maximum time frame is 48 weeks (60 weeks x 80%, rounded up) x 150% or 72 weeks.

Scheduling

CIAT's Programs are designed to provide the student with the skills and knowledge that is in demand by employers. The programs are intended to sequence the student through the basics and then into more advanced topics that build upon the previous courses taken. For more information on scheduling, please see page 15, under Sequence of Classes.

Students are expected to make satisfactory academic progress (SAP). Satisfactory Academic Progress is defined as satisfactorily completing courses and programs within the agreed upon schedule.
Students must maintain a minimum of 2.0 GPA overall in the program to be considered for graduation. Instructors will monitor students online and/or classroom activity to ensure optimum scores are obtained and provide direction for improvement. Courses may be extended at the discretion of the Instructor and President.

Course Repeat Policy

Students may repeat a CIAT course for the following reasons:

1. Withdrawal from or Failure of a course.
2. Receipt of a D+ or below, if the grade results in an unsatisfactory GPA for graduation from the program.
3. Audit, Refresher or "Personal Enrichment" training after completion of a Program. No credit will be given for the course.

4. Professional Development Bootcamp courses may be repeated as desired with no limitations other than full tuition and all fees must be paid for each enrollment.

The following rules apply to repeating courses:

1. Standard tuition and fees apply to each course repeat attempt.
2. Upon failure of a course, a student will be registered in the same course, if available, the subsequent term to provide the opportunity for GPA improvement. The student must acknowledge the request to repeat the course by signing a Course Repeat form with each attempt.
3. If the repeat course is unavailable the subsequent term, the student will be registered for an alternate course that meets the program requirements.
4. If a student fails the same course after three attempts, they will be placed on a required one-term leave of absence and may be subject to administrative withdraw from the program.
5. A student may submit a written appeal for a fourth and final attempt. The written appeal must address the mitigating circumstances behind the repeat course failures and what steps the student will take to regain positive academic standing. The Student Services Director will review and approve or deny the appeal request.
6. Withdrawals (W) do not count towards the total eligible attempts.
7. A maximum of four attempts is allowed for each course within a program.
8. If a student reaches 150% of their program length, they will be administratively withdrawn from the program.

Extension Policy

A student may find the need to request an extension if unable to complete a course within the course schedule. Extensions will be given only for justifiable reasons. Under no circumstances will an extension be granted that extends the students' program length beyond 150% of the allowed length for the program.

Failure to Complete a Program

A failure to complete a program is defined as a student who does not satisfactorily complete their program within 150% of the allowed length for the program. Students who fail to complete a program will be dropped and may reapply to complete their program after six months. Upon approval by the Academic Review Board, they will be readmitted and will be required to pay an amount equal to the tuition for the remaining/additional courses they desire to take, or the full amount of any refund received upon their being dropped, whichever is greater. The tuition is subject to change.

Graduation Requirements

To graduate, students must:

1. Complete all required classes.
2. Achieve a minimum GPA of 2.0 on a 4.0 scale.
3. Maintain 80% cumulative attendance.
4. Fulfill the industry certification requirements for select programs (details below, effective for new enrollments starting from September 2024).

Industry Certifications

CIAT values industry certifications for IT career advancement. Students are encouraged to prepare for and attempt all eligible certification exams. A minimum number of earned industry certifications is required for select programs:

- Certificate in Computer Information Systems (CCIS): 1 required.
- Associate of Applied Science in Computer Information Systems (AASCIS): 2 required.
- Applied Bachelor's degree in Computer Information Systems (BACIS): 3 required.

Certification Requirement Exemptions

Students may request an exemption from the certification graduation requirement by:

- Completing job verification with the CIAT Career Services department, demonstrating employment in an eligible IT position.
- Submitting documentation of an active industry IT certification (from the list of CIAT-supported industry certifications) earned before enrollment.

Future Graduate Module

During the final course, students will be registered into the Future Graduate Module in Canvas. This 4-step process ensures a smooth transition from active student status to graduate, covering financial reviews, employment verification (if applicable), scheduling Career Services assistance, sharing feedback, and updating contact information.

Diploma or Certificate of Completion

Processing diplomas or certificates is contingent upon financial clearance for the granted program of study. Students must have a $0 balance and all financial obligations satisfied for the granted program of study before a diploma or certificate will be released.

Students with an outstanding balance will not receive their diploma or certificate until the account has been paid in full and financial clearance has been completed. Once cleared, the diploma or certificate will be submitted to Parchment for processing and delivery.

Federal Student Aid Recipients

Students using Federal Student Aid must attend an exit interview with the Financial Aid Administrator or complete exit documents sent via email or certified mail within 30 days of the graduation date.

STUDENT CONDUCT

Dismissal or Probation

Standard Code of Conduct

The following conduct shall constitute good cause for discipline, including but not limited to removal from class, written warning, probation, suspension, or termination of enrollment:

1. Cheating, plagiarism, or false representation of another's work as one's own.
2. Forgery, alteration or counterfeiting of documents.
3. Use of false identification.
4. Falsifying information/records.
5. Unauthorized use or misuse of CIAT equipment.
6. Unauthorized access, use or alteration of computer hardware, software, or data.
7. Obstruction or disruption of the educational process.
8. Engaging in, inciting, or arming someone for a public disturbance involving an assemblage of three or more persons.
9. Disturbance of the peace on CIAT premises or within the building complex that CIAT shares, including the parking lots and adjacent lawn areas.
10. Unwanted personal contact (whether physical, verbal, written, face-to-face, telephonic, electronic, or by other means that:
    a. A student knows or should know Is unwanted;
    b. Is communicated directly to one or more specific student(s), Student Group(s), faculty, or staff;
    c. Constitutes severe and/or pervasive, and objectively offensive, conduct, and
    d. Does not constitute speech protected by the First Amendment to the U.S. Constitution (e.g., speech in a public forum on a matter of public concern).
11. Assault, battery, or any threat of force or violence, physical or verbal, upon a CIAT student, staff member or visitor.
12. Theft of, or damage to, or threat of damage to, property of CIAT or a CIAT student, staff member or visitor.
13. Unauthorized entry into CIAT premises.
14. Unlawful use, possession, sale, or distribution of a controlled substance on CIAT property including attendance at CIAT or a CIAT function while under the influence of a controlled substance.
15. Unlawful use, possession, sale, or distribution of alcoholic beverages on CIAT property including attendance at CIAT or a CIAT function while under the influence of alcohol.
16. Disorderly conduct on CIAT premises, including, but not limited to, inappropriate, disrespectful, insulting, and/or obscene language, lewd, indecent, or obscene conduct.
17. Possession of any type of object that can reasonably be assumed to be a weapon or explosive device on CIAT premises.
18. Violation of any CIAT policies listed in this catalog.

Additionally, the following occurrences shall also be grounds for discipline, up to and including, termination of enrollment:

1. Non-payment of tuition
2. Expired enrollment period (if applicable)
3. Failure to complete a program
4. Lack of attendance
5. Missed Assignments

Consequences for Violations

Whenever it has been determined that good cause exists for student discipline, CIAT shall notify the student in writing and start the investigation within 14 days. The student must attend a disciplinary hearing to ensure due process rights. This hearing shall be conducted by the Campus Security Officer who shall have the right to dismiss the charge(s) of misconduct or recommend appropriate disciplinary action. The President shall review the recommended disciplinary action and then either affirm, modify or dismiss the disciplinary action within 30 days from the date of the hearing.

Disciplinary Actions

Disciplinary Actions may include:

1. Verbal warning
2. Written warning
3. Written reprimand
4. Removal by the instructor – Suspension from the class for good cause, for the remainder of the day's class and at the instructor's choice the next class meeting also. The instructor's decision is final and may not be appealed
5. Probation for a specified period of time
6. Suspension for a specified period of time
7. Termination of enrollment (expulsion) at CIAT, with or without the possibility of readmission
8. Criminal prosecution – CIAT will refer to the local authorities for prosecution any criminal activity that occurs on CIAT premises. This is in addition to any other disciplinary action taken.

Cell Phone Use Policy

CIAT is aware that students need to carry cell phones to stay in contact with family and employers. At the same time, cell phones are a distraction in a learning environment to other students in the classroom as well as the instructor. To avoid any unnecessary disruption at school, all devices must be muted and placed out of sight in all academic settings, including classrooms, and laboratories. Students may check and return messages during scheduled breaks. These devices should not be used near classroom doors or hallways while classes are in session.

This policy is intended to provide and maintain a classroom environment that is conducive to learning and respectful of others. On the unusual occasion of an emergency or anticipated emergency that requires immediate attention, the school can be notified, and we will pass along the message immediately. Disruption of class by any electronic device may result in an instructor's dismissal of the student for the remainder of the class period. Excessive disruptions will result in disciplinary action.

Intellectual Property Rights Policy

CIAT is committed to providing an environment that supports the learning, teaching, scholarship, and creative activity of its faculty, students and staff. Within this context, the Intellectual Property Rights Policy is intended to:

1. Encourage excellence and innovation in teaching, scholarship and creative activities by identifying and protecting the intellectual property rights of faculty, staff, students and CIAT,
2. Encourage the notion that creative and scholarly works produced at CIAT should advance the state of knowledge and contribute to the public good,
3. Acknowledge and preserve the traditional property rights of scholars with respect to products of their intellectual endeavors (e.g., books, articles, manuscripts, and writings),
4. Guide policy and process for commercial uses of intellectual property other than the traditional products of scholarly work.

This policy covers all types of intellectual property, including works protected by copyright, patent and trade secret laws. Students and individuals who do not comply with copyright, patent and trade secret laws are subject to the full extent of the law including fines, punishment and imprisonment. Should you have any questions, please contact your Admissions Representative or email us at: info@ciat.edu.

Computer Network and Internet Acceptable Use Policy for Students

This policy shall constitute the California Institute of Applied Technology (CIAT) Computer Network and Internet Acceptable Use Policy for students ("Policy") and applies to all students who use or access the Network. A copy of this Policy shall be provided to students. Any use of your account that violates these policies may result in your access being withdrawn and/or additional disciplinary action. Violations of these policies are considered violations of the Student Academic Honesty and Integrity policy and may result in disciplinary action up to and including suspension, expulsion, and/or referral to law enforcement. CIAT reserves the right to seek reimbursement of expenses or damages arising from student violations of these policies.

1. Reporting Misuse of the Network: In addition to following the terms of this Policy, you should report any misuse of the Network to an instructor or to an administrator at CIAT. Misuse means any violation of this policy, such as commercial use of these resources, criminal activity, inappropriate content of e-mail sent to you by someone, or any other use that is not included in this policy but has the intent or effect of harming another or another's property.
2. Term of Permitted Use: Access to the Network is a privilege, not a right, and as such it may be suspended or revoked by CIAT at any time for any reason. CIAT may also limit access depending on student and staff schedules, equipment availability, or other constraints.
3. Uses or activities that are unrelated to legitimate CIAT purposes: Users may not, during the school day, access the Internet for purposes of personal shopping, buying or selling items, connecting with a personal web site or weblog that is not part of a class project, receiving or posting messages to web sites or blogs not part of a class project, participating in any type of gaming activity, engaging in social or hobby activities during class time, engaging in or supporting any kind of business or other profit-making activity, or for general recreational web browsing unless it is during non-class time. (Examples: Amazon, eBay, Expedia, Facebook, Drudge Report, dating services, chat rooms, poker web sites, CNN, ESPN, Halo.)
4. Netiquette: All users must abide by the rules of Network etiquette. Among the uses and activities that violate Network etiquette and constitute a violation of this Policy are the following:
   a. Using inappropriate language, including swearing, vulgarities or other language that is suggestive, obscene, profane, abusive, belligerent, harassing, defamatory or threatening.
   b. Using the Network to make, distribute or redistribute jokes, stories or other material that would violate this Policy or the District's harassment or discrimination policies, including material that is based upon slurs or stereotypes relating to race, gender, ethnicity, nationality, religion, sexual orientation or other protected characteristics.
   c. Forwarding or redistributing the private message of an e-mail sender to third parties or giving the sender's e-mail address to third parties without the permission of the sender.
   d. Creating technical difficulties for others, such as sending e-mail attachments that are too large to be accommodated by the recipient's system.
   e. Attempting to reach Internet sites blocked by the software on school computers or to "hack" into other accounts or restricted information.
   f. Using the Network in a manner inconsistent with the expectations of CIAT conduct of students. When using the Network, students should remember that they are representing themselves and their school to others.
   g. Students are expected to act in a responsible, ethical and legal manner in accordance with CIAT policy, accepted rules of network etiquette, and federal and state laws.
5. Unacceptable uses: Among the uses and activities that are known to be unacceptable and constitute a violation of this Policy are the following:
   a. Offering for sale or use or soliciting the purchase or provision of any substance the possession of or use of is prohibited by law.
   b. Creating, copying, viewing, transmitting, downloading, uploading or seeking sexually explicit, obscene or pornographic materials.

c. Creating, copying, viewing, transmitting, downloading, or uploading any materials that include the design or information for the purposes of creating an explosive device, materials in furtherance of criminal activities or terrorist acts, threatening materials or any other materials that violate or encourage others to violate the law or CIAT policy.
d. Unauthorized copying, modifying, intruding, or attempts to copy, modify or intrude, into the folders, files, data, work, Networks, passwords or computers of others, or intercepting communications intended for others.
e. Copying, downloading, uploading or transmitting student information, other confidential information or trade secrets.
f. Downloading and saving music or images, unless given permission by an instructor.
g. Engaging in harassment, stalking, or other repetitive unwanted communication, or using the Internet in support of such activities
h. Engaging in or supporting any kind of business or other profit-making activity.

6. Uses or activities that cause damage to property: Among such uses or activities are the following:
   a. Uploading, downloading, creating or transmitting a computer virus, worm, Trojan horse, “hacking” software or other harmful component or corrupted data, or vandalizing the property of another. Vandalism includes any attempt to hack, alter, harm, destroy or interfere with the normal operation of software, hardware, and data of another user, other CIAT resources, or the use of the CIAT Network to do any of the same acts on the Internet or outside Networks.
   b. Uploading, downloading, copying, redistributing or republishing copyrighted materials without permission from the owner of the copyright. Even if materials on the Network are not marked with the copyright symbol, you should assume that they are protected under copyright laws unless there is explicit permission on the materials to use them.
   c. Commercial uses. At no time may the Network or the Internet be accessed (including sending e-mail) for purposes of engaging in or supporting any kind of business or other profit-making activity. You may not sell or buy anything over the Internet, and you may not solicit or advertise the sale of any goods or services (whether to one recipient or many, such as "junk e-mail").

Copyright Policy and Procedures

Legally, copyright is a form of protection provided by the laws of the United States (title 17, U.S. Code) to the authors of “original works of authorship,” including literary, dramatic, musical, artistic, and certain other intellectual works. This protection is available to both published and unpublished works. Section 106 of the 1976 Copyright Act generally gives the owner of copyright the exclusive right to do and to authorize others to do the following:

1. To reproduce the work in copies or recordings;
2. To prepare derivative works based upon the work;
3. To distribute copies or recordings of the work to the public by sale or other transfer of ownership, or by rental, lease, or lending;
4. To perform the work publicly, in the case of literary, musical, dramatic, and choreographic works, pantomimes, and motion pictures and other audiovisual works;
5. To display the copyrighted work publicly, in the case of literary, musical, dramatic, and choreographic works, pantomimes, and pictorial, graphic, or sculptural works, including the individual images of a motion picture or other audiovisual work; and
6. In the case of sound recordings, to perform the work publicly by means of a digital audio transmission.

It is illegal for anyone to violate any of the rights provided by copyright law to the owner of the copyright. These rights, however, are not unlimited in scope. Sections 107 through 121 of the 1976 Copyright Act establish limitations on these rights. In some cases, these limitations are specified exemptions from copyright liability. One major limitation is the doctrine of "fair use," which is given a statutory basis in section 107 of the 1976 Copyright Act. In other instances, the limitation takes the form of a "compulsory license" under which certain limited uses of copyrighted works are permitted upon payment of specified royalties and compliance with statutory conditions. From: US Copyright Office. Circular 1 Copyright Basics. Washington: Government Printing Office, 1999 (Circular 1). For further information about copyright, write to the Copyright Office at 101 Independence Avenue, S.E., Washington, D.C. 20559-6000.

Drug and Alcohol Abuse Prevention Program

The Drug and Alcohol Abuse Prevention Program policy applies to all students and to all employees. The unlawful possession, use, or distribution of illicit drugs, controlled substances and alcohol are strictly prohibited at CIAT Students or employees not complying with this standard will be subject to sanctions. Sanctions may include the immediate termination/probation from employment or in the case of a student, termination/probation from school.

The school will notify the student or employee in writing if the school becomes aware of any violation of this policy. The student and or employee may request a formal hearing after receiving said notice. Three members from the faculty and staff will comprise the hearing board. If the student or employee fails to request a hearing within three business days, then immediate termination will take place.

If a hearing is requested, the board will notify the student or employee of the date the hearing will take place. The student or employee has the right to be represented by legal counsel for this purpose. The hearing board will take testimony from all individuals involved in the case.

The school's administration will be notified of the board's decision. In all cases the board's decision will be final. The school's administration will notify the student or employee of the board's decision.

Drug Advising

Throughout California, drug prevention is a major concern. As a point of information, the school maintains a drug prevention program by referring those students' needing assistance to:

Vista Hill Foundation
Parent Care Family Recovery Center
4125 Alpha Street, San Diego, CA 92113
Phone: (619) 266-0166
Vista Hill Foundation Parent Care Family Recovery Center

Eating & Drinking in Classrooms

CIAT strives to keep its computers and laboratory equipment in top working condition to facilitate an environment that is conducive to learning and working. No food is permitted in any classroom or laboratory. Drinks with spill proof lids are allowed in classrooms only. Drinks with open or spillable lids are not permitted. To prevent damage to the computer equipment and allow everyone to work in a clean environment, eating and drinking (without lids) in the classrooms and labs is strictly prohibited. Those found eating or drinking (without lids) in a classroom or lab will be asked to leave. These policies, while perhaps inconvenient at times, are designed to maintain the kind of environment where students can enjoy their experience in the classroom and labs.

Non-Discrimination, Harassment & Sexual Misconduct

CIAT is an equal opportunity institution providing educational and employment opportunities, programs, and services, and therefore prohibits discrimination, harassment, and retaliation. CIAT complies with all requirements of the regulations implementing Title VI, Title IX, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination in Employment Act of 1975. This policy applies equally to all members of the CIAT community: students, faculty, administrators, staff, contract employees and visitors.

CIAT does **NOT** discriminate on the basis of race, color, religious beliefs, national origin, sex, sexual orientation, gender identity, gender expression, pregnancy, parental status, marital status, age, disability, citizenship, veteran status or any other characteristic protected by federal, state or local law.

Individuals who experience discrimination or harassment may respond to the experience in many different ways, including feeling confused, vulnerable, out of control, embarrassed, angry, or depressed. CIAT has information available in the Student Services Office on various resources to assist individuals who have experienced discrimination or harassment, to address the effects of the incident, and to help them determine whether and how to make a formal complaint about the incident. CIAT is committed to fostering and maintaining an educational environment which is safe, secure, and free from all forms of sexual misconduct. Any act involving sexual harassment, violence, coercion, and intimidation will not be tolerated. Specifically, CIAT strictly prohibits the offenses of domestic violence, sexual harassment, bias-related harassment, discrimination, dating violence, sexual assault, and stalking. Retaliating against an individual who has reported or filed a complaint alleging discrimination, harassment, and sexual misconduct or participated as a witness in such an investigation is strictly prohibited. Retaliation is a separate cause for complaint and individuals are encouraged to report such conduct in a timely manner. Individuals with supervisory duties, who disregard, fail to investigate adequately, or delay investigation of discrimination claims also violates this policy.

All reports of discrimination, harassment, sexual misconduct and/or retaliation shall be promptly made to the Title IX Coordinator. The Director of Student Services serves as the Title IX/ADA/504 Coordinator, Campus Security Authority and oversees implementation of institutional policies on Discrimination, Harassment, and Sexual Misconduct.

Taban Oglesby, Director of Student Services
401 Mile of Cars Way, Suite 100, National City, CA 91950
(619) 419-0137
email: tbustani@ciat.edu

Professional Counseling /Advising Services

CIAT does not employ professional counselors on staff; however, in the event that a student demonstrates behaviors/thoughts consistent with issues related to an emotional or psychological issue, physical or sexual abuse, or substance abuse, the student will be referred to Student Services to further explore options for local counseling and/or abuse programs. If a student believes they have been the victim of a sexual assault outside of school hours, he/she is advised to call 911.

Institutional Response to Reports of Sexual Misconduct

It is the policy of CIAT that, upon learning that an act of sexual misconduct has taken place, immediate action will be taken to address the situation. CIAT encourages the reporting of sexual misconduct that is prompt and accurate. This allows the institution to quickly respond to allegations and offer immediate support to the victim. When an incident of sexual misconduct, domestic violence, dating violence, sexual assault or stalking is reported, CIAT will provide victims with written notice of available options, resources, remedies and services available such as counseling, health, mental health, victim advocacy, legal assistance, visa and immigration assistance, and other services available in the community to victims of domestic violence, dating violence, sexual assault, and stalking. The standard of evidence used in informal or formal investigations and institutional disciplinary hearings will be the preponderance of the evidence. After an incident of sexual assault, dating violence, domestic violence, and/ or stalking the victim should consider seeking medical attention and/or law enforcement assistance as soon as possible. Although CIAT strongly encourages all members of its community to report violations of this policy to law enforcement, it is the victim's choice whether or not to make such a report.

Procedures for Disciplinary Action

The institutional disciplinary procedures will provide a fair, prompt, and impartial process from investigation to final result. The investigation and any hearing will be conducted by those who receive annual training on issues related to sexual misconduct, VAWA crimes, how to conduct an investigation, and a hearing process that protects victim safety and promotes accountability.

Academic Accommodations

CIAT is committed to ensuring the safety and well-being of the victim. A student who has been a victim of sexual misconduct may request an academic accommodation after a report of sexual misconduct. Any individual who makes a request will receive an appropriate and reasonable accommodation. Possible requests include the ability to change academic schedules or work schedules, withdraw from or retake a class without penalty and access to academic support such as tutoring services. Pursuant to Title IX, in most cases of sexual violence or sex discrimination, CIAT will endeavor, to the extent practicable, to change the schedule of the accused student prior to changing the schedule of the victim.

Retaliation

No member of the CIAT community shall retaliate, intimidate, threaten, coerce, or otherwise discriminate against a person who files a Title IX complaint, serves as a witness, or assists or participates in a Title IX proceeding in any manner. Participants who experience retaliation should report the incident to the Director of Student Services who is also the Title IX Coordinator. CIAT prohibits any form of retaliation against any individual for reporting, providing information, exercising one's rights or responsibilities under this policy, or otherwise being involved in the process of responding to, investigating, or addressing allegations of sexual assault, dating violence, domestic violence, or stalking.

Sanctions

Following a final determination of an institutional disciplinary procedure for cases discrimination, harassment or sexual misconduct including rape, acquaintance rape, dating violence, domestic violence, sexual assault or stalking, sanctions or protective measures may be imposed including SUSPENSION and/or EXPULSION from the school. Employees who violate this policy will be subject to discipline according to the applicable school policies and procedures in the Employee Handbook, up to and including TERMINATION OF EMPLOYMENT.

Smoke & Tobacco Free Campus Policy

CIAT is an entirely tobacco and smoke free environment, including all inside spaces and external grounds within 25 feet of CIAT entrance. Any form of tobacco product or surrogate tobacco product, such as cigarettes, personal vaporizers, electronic nicotine delivery systems, or smokeless tobacco is strictly prohibited. The use of smoking products of any sort is also prohibited on all school- owned and operated campus grounds both indoors and outdoors within 25 feet of CIAT entrance. This tobacco ban does not apply to public rights-of way (sidewalks, streets) on the perimeter of the campus. Littering campus with remains of smoking products is prohibited. This policy applies to all employees, students, visitors, contractors, and externally affiliated individuals. All CIAT students, faculty, staff, contractors, and visitors must comply with this policy. Individuals observed smoking on the campus will be informed of the policy. Violators may be provided education, offered a referral for smoking cessation and, if a student or employee of CIAT, may be subject to disciplinary action as indicated below. Persons engaging in smoking and/or the use of Smoking Products in violation of this policy may be subject to the following:

1. Students will be referred to the appropriate student conduct office. Violation of this policy is a violation of the Student Code of Conduct.
2. Employees will be referred to their supervisor and/or appointing authority for appropriate action.
3. Contractors will be referred to their respective employers for appropriate action.

Visitors will be required to leave the campus if they fail to conform to the policy when advised. No person who makes a complaint of a violation of this policy or who furnishes information concerning a violation of this policy shall be retaliated against in any manner.

Video / Audio Taping

CIAT routinely records classes using audio and video methods. By attending a CIAT class you are consenting to being in a recorded classroom environment which may include footage with students in it. These recordings may be used for any purpose CIAT deems appropriate including but not limited to broadcasting of classes for student use, marketing/advertising, employee training or other usages. As a student, because of the interactive nature of training at CIAT, video or audio taping of any activities, classroom or otherwise, is prohibited without written authorization of all students present at the time and CIAT management and the presenting instructor.

CIAT PROGRAMS

APPLIED BACHELOR'S DEGREE PROGRAM

Program Length

Since courses are offered as hybrid or 100% online, the length of time it takes to complete an Applied Bachelor's Degree programs length is 175 weeks (35 classes x 5 weeks). Please check the Program Length section of each program to determine the actual allocated time to complete each program.

Tuition and Fees

Tuition is charged at the rate of $660.00 per semester hour (unit) for technical courses, plus certification exams, which are optional but highly recommended. There are associated lab fees and for detail, see under Technology Fees, Page 18. The tuition for General Education courses is also $660.00 per unit. The full tuition can be up to $85,800.00 for the Applied Bachelor's Degree Program, if all courses, including GE are taken at CIAT. General Education courses may be taken concurrently with technical courses. This could increase the cost per year but will also shorten the time required to obtain your degree.

CIAT does not financially obligate a student for more than twelve (12) months (10 Terms) in any current and active enrollment period. A student may not have more than one enrollment active at any time.

Examination

Each course may have a final examination in order to receive a final letter grade, however, there is no cumulative program examination.

Externship

This program does not participate in the externship.

Flexible Start Times

CIAT's classroom, guided self-study and online programs offer flexible start opportunities. Classes begin every five weeks.
Upon enrollment, an Admissions Advisor will work with you to create a schedule that honors your work and family commitments while still achieving your educational objectives in the shortest practical timeframe. If your circumstances change for any reason, your schedule can be revised to meet your needs.

Delivery Methodology

Full Time students are expected to complete each course within a five-week period (Term). Students in hybrid format will spend 3.5 hours at least two days per week in the classroom attending lectures and getting hands-on instruction. Students in 100% Online format can expect to receive synchronous and asynchronous time in face-to-face interaction with your online instructor. Additional time will be spent each week on homework, discussion questions, projects, quizzes, exams, labs and other types of lectures. Online learning is different from classroom-delivered instruction and there are advantages and disadvantages to each. The advantages of IDL are rapidly gaining as technology enables students learning at a distance to feel more connected than ever before.

Students must be self-motivated, have an up-to-date computer, a high-speed Internet connection, and a distraction-free place to study. Faculty and student interaction will be available by online video conference, LMS discussion boards, email, phone, and chat.

CIAT classes use a combination of all or some of the following to provide quality distance learning:

- Online Video Lessons
- Online Quizzes/Exams
- Certification preparation software
- Live instructor available for conferences and personal sessions
- Online Labs
- Discussion questions

In our distance learning classes, all interaction with our instructors is via electronic means, primarily the internet, but your instructor will also exchange communications with you via email, texting and telephone. All emails, texts and voice messages will be answered no later than the next business day. Since all quizzes, tests, projects and labs are completed online, you will know your results immediately upon completion. Final course grades are posted within one week of the course completion and may be viewed on the school's Student Portal database. Students may check their progress at any time using the Student Portal. For those classes where written projects are required, such as essays for the General Education English courses, they are also submitted electronically and will be graded and returned electronically within 5 business days of submission.

CIAT's Philosophy for General Education

General education is designed to introduce students to the variety of means through which people comprehend the modern world. General education introduces the content and methodology of the major areas of knowledge. All degree programs include general education requirements. General Education courses may be taken at any time during the student's attendance at CIAT. The general education program provides the opportunity for students to develop:

1. Intellectual skills
2. Information Technology
3. Affective and creative capabilities
4. Critical thinking
5. Positive social attitudes
6. Appreciation for cultural diversity that presents effective learners and good citizens

Credential Awarded Upon Completion

- Applied Bachelor's Degree in Cloud Computing
- Applied Bachelor's Degree in Cybersecurity
- Applied Bachelor's Degree in Software Development
- Applied Bachelor's Degree in Digital Marketing
- Applied Bachelor's Degree in Health Information Management
- Applied Bachelor's Degree in Human Resource Management

Applied Bachelor's Degree in Cloud Computing (BACC)

130 Semester Hours (750 Lab Hours; 1575 Lecture Hours)
Length: 175 Weeks; SOC Code: 11-3021
Tuition: $85,800.00 Technology Fees: $1,250.00

Description

The Applied Bachelor's Degree in Cloud Computing at California Institute of Applied Technology (CIAT) is a career-focused program designed to prepare graduates to architect, deploy, secure, and manage modern cloud infrastructures across enterprise environments. This applied degree emphasizes hands-on mastery of leading platforms such as AWS, Microsoft Azure, and Google Cloud, while integrating core competencies in networking, Linux administration, automation, scripting, DevOps practices, cybersecurity, compliance, and cost optimization. Students develop real-world proficiency through lab-intensive coursework aligned to industry certifications and workforce demands, gaining experience with infrastructure as code, containerization, monitoring, identity and access management, and high-availability design. The program blends technical depth with operational governance, documentation standards, and cloud service management practices to ensure graduates are prepared to support mission-critical systems in regulated and enterprise settings. Designed for both aspiring and advancing IT professionals, the Applied Bachelor's Degree in Cloud Computing equips students with the applied technical expertise and strategic perspective required to lead cloud transformation initiatives in today's rapidly evolving digital landscape. Graduates of this program will qualify for roles such as Cloud Administrator, Cloud Infrastructure Engineer, DevOps Engineer (Associate Level), Cloud Security Analyst, Site Reliability Engineer (Associate Level), and Cloud Support Engineer.

As an Applied Bachelor's Degree, approximately 75% of the program is dedicated to technical classes with only about 25% focusing on General Education. With a more concentrated focus on these subjects, the student is more likely to succeed in a career in Information Technology when compared to Bachelor of Science degree which may require up to 50%, or more, to be dedicated to General Education.

Economic Outlook and Growth of the Industry

According to the U.S. Department of Labor statistics, the employment of Computer Network Architects is expected to grow by 12 percent from 2024 to 2034, which is much faster than the average for all occupations. Computer network architects design and implement data communication networks, including local area networks (LANs), wide area networks (WANs), and intranets. According to bls.gov in 2024, the median annual wage for Computer Network Architects was $130,390 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Computer Network Architects, at Computer Network Architects: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Program Objectives

Upon completion of the Applied Bachelor's Degree in Cloud Computing program, the graduate will be able to:

1. Design and deploy scalable cloud infrastructure using AWS, Microsoft Azure, and Google Cloud Platform
2. Configure and manage virtual networking components including VPCs, subnets, routing tables, VPNs, and load balancers
3. Implement identity and access management (IAM) using role-based access control and least-privilege principles
4. Automate infrastructure provisioning using Infrastructure as Code (IaC) tools such as Terraform or CloudFormation
5. Administer Linux and Windows cloud-based servers, including patching, hardening, and performance tuning
6. Deploy and manage containerized applications using Docker and Kubernetes
7. Implement CI/CD pipelines to support automated testing and deployment workflows
8. Monitor, log, and troubleshoot cloud environments using native and third-party observability tools.
9. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of IT security and organizational ethics to facilitate a career in the IT field.
10. Evaluate the historical definitions of technology with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the IT field.
11. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general Information Technology applications like simulation, mapping, programming, science and research.

There are many ways that the student can obtain the needed General Education units. Among them are:

- Successfully completing the course(s) at CIAT.
- Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
- CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
- ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
- Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservicesteam@ciat.edu.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Applied Bachelor's Degree in Cloud Computing, the student must successfully:

1. Complete the 12 core lower division technical courses (48 credit hours) with an overall average GPA of minimum 2.0.
2. Complete 6 core upper division technical courses (24 credit hours) with an overall average GPA of minimum 2.0.
3. Complete 7 upper division technical elective courses (28 credit hours) with an overall average GPA of minimum 2.0.
4. Complete a minimum of 30 semester hours of approved General Education courses with an overall average GPA of minimum 2.0.
5. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of 65 semester hours must be completed in this manner.
   b. Transferring credit from an accredited institution of higher learning. A maximum of 65 semester hours may be completed in this manner.
   c. Challenge Exam of up to eight courses (32 semester hours). Each successfully challenged course will be subtracted from the allowed transfer credits.
6. Maintain 80% cumulative attendance.
7. Fulfill the industry certification requirements by earning 3 industry certifications or obtaining an approved exemption.

Degree Course Plan

This page details the courses needed to complete CIAT's Applied Bachelor's Degree in Cloud Computing program.

12 Lower Division Core Courses Required
48 Semester Credits

Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
CIS100A	Computer Fundamentals	3	1	4
CIS100B	Tech+ Fundamentals	3	1	4
CIS154	Windows Fundamentals	3	1	4
CIS101A	Computer Hardware Fundamentals	3	1	4
CIS101B	Computer Operating Systems	3	1	4
CIS102A	Networking Fundamentals, Part 1	3	1	4
CIS102B	Networking Fundamentals, Part 2	3	1	4
CIS120A	Cybersecurity Fundamentals, Part 1	3	1	4
CIS120B	Cybersecurity Fundamentals, Part 2	3	1	4
CIS130	Azure Cloud Fundamentals	3	1	4
CIS131	Azure Cloud Administration	3	1	4
CIS132	AWS Foundations	3	1	4

6 Upper Division Core Courses Required
24 Semester Credits

Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
CIS230A	Introduction to Linux	3	1	4
CIS230B	Linux Administration	3	1	4
CIS270A	Cisco Networking, Part 1	3	1	4
CIS270B	Cisco Networking, Part 2	3	1	4
CIS280A	CCNA Automation, Part 1	3	1	4
CIS280B	CCNA Automation, Part 2	3	1	4

7 Upper Division Elective Courses Required
28 Semester Credits

Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
CIS133	AWS Architecting	3	1	4
CLD330	AWS Operations	3	1	4
CLD331	AWS Security Foundations	3	1	4
CLD332	Microsoft Azure Security Technologies	3	1	4
CLD334	AWS Developing	3	1	4
CLD335	Google Cloud Engineer	3	1	4
OCI200	Oracle Cloud Infrastructure and Database	3	1	4
OCI201	Oracle Cloud Solution Platform and Edge	3	1	4
OCI202	Oracle Cloud Governance and Administration	3	1	4
OCI203	Oracle Cloud Advanced Topics	3	1	4
SN200	Introduction to ServiceNow	3	1	4
SN201	ServiceNow Administration	3	1	4
CSP400	Cloud Security Senior Project	3	1	4

General Education Minimum 30 Semester Credits Required				
Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
English Language, Communication and Critical Thinking *6 Semester Credits minimum required*				
ENG200	Technical Writing	3	0	3
ENG201	Science Fiction and Technology	3	0	3

Applied Bachelor's Degree in Cybersecurity (BACS)

130 Semester Hours (750 Lab Hours; 1575 Lecture Hours)
Length: 175 Weeks; SOC Code: 11-3021
Tuition: $85,800.00 Technology Fees: $1,250.00

Description

The objective of the Applied Bachelor's Degree in Cybersecurity is to prepare graduates to protect, defend, and sustain modern enterprise environments through applied cybersecurity operations, governance, cloud security, and hands-on technical defense skills. Students develop the competencies needed to identify and mitigate threats, secure network and cloud infrastructures, implement risk-based controls, conduct vulnerability and penetration testing activities, and support organizational resilience using nationally recognized cybersecurity education standards. This program prepares students for careers in a variety of positions including Cybersecurity Analyst, Security Operations Center (SOC) Analyst, Cybersecurity Technician, Information Security Specialist, Penetration Tester, Vulnerability Analyst; Governance, Risk, and Compliance (GRC) Analyst, Cloud Security Specialist, Network Security Engineer, Identity & Access Management Analyst, Systems Administrator, IT Support Specialist, Cybersecurity Consultant, and Incident Response Technician.

As an Applied Bachelor's Degree, approximately 75% of the program is dedicated to technical classes with only about 25% focusing on General Education. With a more concentrated focus on these subjects, the student is more likely to succeed in a career in Information Technology when compared to Bachelor of Science degree which may require up to 50%, or more, to be dedicated to General Education.

Economic Outlook and Growth of the Industry

According to the U.S. Department of Labor statistics, the employment of Information Security Analysts is expected to grow by 29 percent from 2024 to 2034, which is much faster than the average for all occupations. Demand for these workers will increase as organizations continue to adopt and integrate increasingly sophisticated technologies and as the need for information security grows. Information security analysts plan and carry out security measures to protect an organization's computer networks and systems. According to bls.gov in 2024, the median annual wage for Information Security Analysts was $124,910 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Information Security Analysts, at Information Security Analysts: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Program Objectives

Upon completion of the Applied Bachelor's Degree in Cybersecurity program, the graduate will be able to:

1. Analyze system, network, and cloud architectures to identify security risks, vulnerabilities, and indicators of malicious activity.
2. Implement layered security controls, cryptographic protections, and resilience strategies to secure enterprise environments.
3. Evaluate threat intelligence, attack methodologies, and adversarial behaviors to strengthen organizational defense capabilities.
4. Design and construct secure cloud infrastructures and apply cloud-specific security controls and monitoring practices.
5. Conduct vulnerability assessments and prioritize remediation strategies using industry-standard tools and frameworks.
6. Perform penetration testing activities, including reconnaissance, enumeration, exploitation, and post-exploitation techniques.
7. Apply governance, risk management, and compliance principles to implement and maintain organizational security programs.
8. Develop and document security policies, procedures, and system security artifacts that support enterprise authorization and compliance.
9. Execute incident response processes, including detection, containment, eradication, recovery, and post-incident reporting.
10. Secure network architectures and components using modern defensive technologies, monitoring techniques, and configuration best practices.
11. Assess and mitigate vulnerabilities in software, applications, and development environments using secure coding and testing principles.
12. Demonstrate professional communication, critical thinking, ethical decision-making, and technical writing skills required for cybersecurity roles.
13. Apply logical reasoning, analytical methods, and problem-solving techniques to cybersecurity challenges across diverse technologies.
14. Integrate cybersecurity automation, scripting, and monitoring tools to enhance operational efficiency and response capabilities.
15. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of IT security and organizational ethics to facilitate a career in the IT field.
16. Evaluate the historical definitions of technology with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the IT field
17. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general Information Technology applications like simulation, programming, science, and research.

There are many ways that the student can obtain the needed General Education units. Among them are:

- Successfully completing the course(s) at CIAT.

- Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
- CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Applied Bachelor's Degree in Software Development (BASD)

130 Semester Hours (750 Lab Hours; 1575 Lecture Hours)
Length: 175 Weeks; SOC Code: 15-1132, 15-1133
Tuition: $85,800.00 Technology Fees: $1,250.00

Description

The Applied Bachelor's in Software Development Degree provides technical skills required in front-end and back-end programming, including designing, implementing, and maintaining web applications, mobile applications, and database systems. Students will learn the modern high-level programming languages (Python, C#, PHP, JavaScript, SQL, Swift, Java, and more). In addition, the students will learn software design, software methodologies, procedural programming, and object-oriented design.

This program prepares students for various positions, including Software Developer, Database Administrator, Android Engineer, iOS Engineer, Quality Assurance Engineer, Information Technology Analyst, and Data Analyst.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Software Developers are projected to grow 15 percent from 2024 – 2034, much faster than the average for all occupations. Employment of Web Developers is projected to grow 7 percent. According to bls.gov in 2024, the median annual wage for Software Developers was $131,450 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Software Developers, Quality Assurance Analysts, and Testers, at https://www.bls.gov/ooh/computer-and-information-technology/software-developers.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Applied Bachelor's Degree in Software Development program, the graduate will be able to:

1. Evaluate software development needs from gathering requirements to selecting technologies appropriate to implement for business needs.
2. Design, debug, build, test, and deploy applications for web and mobile application platforms using modern development environments.
3. Apply best practices for implementing secure software applications.
4. Apply software engineering lifecycles to successfully create basic to complex software solutions that dynamically communicate with databases.
5. Work individually and collaborate with team members to develop quality software products.
6. Utilize common data structures to leverage their efficiency to obtain desired software products.
7. Design and construct relational databases.
8. Analyze business web development needs and develop mobile solutions for those needs.
9. Demonstrate technical knowledge of one or more significant application domains.
10. Understand software project management, life cycles, and work-based schedules, deadlines, and budgets associated with software implementation projects.
11. Evaluate the project's cost, schedule, and performance to ensure feasibility with industry requirements related to the software implantation.
12. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of IT security and organizational ethics to facilitate a career in the IT field.
13. Evaluate the historical definitions of technology with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the IT field.
14. Ability to construct advanced solutions to everyday problems that positively affect people's lives to create a better, more accessible online environment.
15. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general Information Technology applications like simulation, programming, science, and research.
16. Stay up to date with the software terminology and trends needed in the emerging technology field and evolving software applications.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservicesteam@ciat.edu.

Applied Bachelor's Degree in Digital Marketing (BADM)

130 Semester Hours (750 Lab Hours; 1575 Lecture Hours)
Length: 175 Weeks; SOC Code: 11-2021
Tuition: $85,800.00 Technology Fees: $1,250.00

Description

The Applied Bachelor's Degree in Digital Marketing program prepares students with the strategic, analytical, and technical skills required to plan, implement, and optimize modern digital marketing campaigns. The program integrates marketing strategy, consumer behavior, search engine optimization (SEO), paid digital advertising, analytics, artificial intelligence applications, and e-commerce strategies to equip graduates with practical industry-relevant competencies. Students develop hands-on experience designing digital marketing strategies, optimizing customer journeys, analyzing performance data, and managing multi-channel campaigns across search, social media, mobile, and online marketplaces. The program emphasizes data-driven decision-making, ethical marketing practices, and emerging technologies that shape the future of digital marketing. This program prepares students for various positions, including Digital Marketing Specialist, Digital Marketing Manager, Search Engine Optimization (SEO) Specialist, Paid Media/Performance Marketing Specialist, Social Media Marketing Manager, Marketing Analytics Specialist, E-Commerce Marketing Manager, Content Marketing Strategist, Growth Marketing Specialist, Marketing Automation Specialist, Conversion Rate Optimization (CRO) Specialist, Digital Advertising Specialist, Customer Acquisition Manager, and Marketing Data Analyst.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Advertising, Promotions, and Marketing Managers are projected to grow 6 percent from 2024 – 2034, faster than the average for all occupations. Advertising, promotions, and marketing managers plan programs to generate interest in products or services. According to bls.gov in 2024, the median annual wage for Advertising, Promotions, and Marketing Managers was $159,660 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Advertising, Promotions, and Marketing Managers, at Advertising, Promotions, and Marketing Managers: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Program Objectives

Upon completion of the Applied Bachelor's Degree in Digital Marketing program, the graduate will be able to:

1. Develop and implement comprehensive digital marketing strategies across search engines, social media, mobile platforms, and online marketplaces.
2. Apply search engine optimization (SEO) and paid digital advertising techniques to increase online visibility, traffic, and conversions.
3. Analyze digital marketing data using analytics tools to measure campaign performance and support data-driven decision making.
4. Design and optimize digital customer experiences through conversion rate optimization (CRO), A/B testing, and user experience (UX) principles.
5. Plan and manage paid media campaigns including search advertising, social media advertising, and programmatic display advertising.
6. Develop and manage e-commerce strategies including digital storefront optimization, marketplace marketing, and revenue growth tactics.
7. Apply artificial intelligence and marketing automation tools to improve marketing efficiency, personalization, and customer engagement.
8. Evaluate influencer marketing and social media strategies to increase brand awareness, engagement, and digital growth.
9. Demonstrate professional communication, critical thinking, ethical decision-making, and technical writing skills required in digital marketing and business environments.
10. Apply analytical reasoning, problem-solving techniques, and data interpretation skills to support strategic marketing decisions.
11. Design integrated digital marketing campaigns that align business objectives, audience targeting, content strategy, and performance metrics.
12. Evaluate emerging digital marketing technologies and trends to adapt strategies in a rapidly evolving digital marketplace.
13. Develop and apply brand positioning and messaging strategies to create differentiated and consistent brand experiences across digital marketing channels.
14. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of Digital Marketing security and organizational ethics to facilitate a career in the Digital Marketing field.
15. Evaluate the historical definitions of technology with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the Digital Marketing field.
16. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general Digital Marketing applications.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.

4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservicesteam@ciat.edu.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Applied Bachelor's Degree in Digital Marketing, the student must successfully:

1. Complete the 12 core lower division technical courses (48 credit hours) with an overall average GPA of minimum 2.0.
2. Complete 6 core upper division technical courses (24 credit hours) with an overall average GPA of minimum 2.0.
3. Complete 7 upper division technical elective courses (28 credit hours) with an overall average GPA of minimum 2.0.
4. Complete a minimum of 30 semester hours of approved General Education courses with an overall average GPA of minimum 2.0.
5. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of 65 semester hours must be completed in this manner.
   b. Transferring credit from an accredited institution of higher learning. A maximum of 65 semester hours may be completed in this manner.
   c. Challenge Exam of up to eight courses (32 semester hours). Each successfully challenged course will be subtracted from the allowed transfer credits.
6. Maintain 80% cumulative attendance.

Degree Course Plan

Applied Bachelor's Degree in Health Information Management (BAHIM)

130 Semester Hours (750 Lab Hours; 1575 Lecture Hours)
Length: 175 Weeks; SOC Code: 29-2071
Tuition: $85,800.00 Technology Fees: $1,250.00

Description

The objective of the Applied Bachelor's Degree in Health Information Management is to prepare graduates to manage, analyze, and protect health information across healthcare organizations using industry-recognized standards in data governance, clinical coding, health informatics, revenue cycle management, and compliance. Students develop the competencies needed to oversee health records systems, ensure regulatory compliance with HIPAA and accreditation standards, apply data analytics to support clinical and administrative decision-making, manage revenue cycle operations, and lead quality improvement initiatives using nationally recognized HIM education standards.

Graduates of this program will qualify for roles such as Health Information Manager; Health Information Technician; Medical Records Manager; Clinical Data Analyst; Health Data Analyst; Coding Compliance Specialist; Revenue Cycle Analyst; HIM Department Supervisor; Clinical Documentation Improvement Specialist; Health Informatics Specialist; Privacy Officer; Release of Information Specialist; Cancer/Tumor Registrar; Quality Improvement Analyst; and EHR Implementation Specialist.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Medical and Health Services Managers are projected to grow 23 percent from 2024 – 2034, much faster than the average for all occupations. Medical and health services managers plan, direct, and coordinate the business activities of healthcare providers. According to bls.gov in 2024, the median annual wage for Medical and Health Services Managers was $117,960 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Medical and Health Services Managers, at Medical and Health Services Managers: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Program Objectives

Upon completion of the Applied Bachelor's Degree in Health Information Management program, the graduate will be able to:

1. Manage health information systems and apply information governance principles to ensure data integrity, accuracy, and accessibility across healthcare organizations.
2. Apply medical coding systems including ICD-10, CPT, and HCPCS to accurately classify diagnoses and procedures for reimbursement and reporting.
3. Analyze healthcare data using statistical methods and informatics tools to support clinical decision-making, quality improvement, and organizational performance.
4. Evaluate healthcare financial management principles, reimbursement methodologies, and revenue cycle processes to ensure organizational fiscal integrity.
5. Implement data governance frameworks and health information exchange protocols to manage enterprise-level healthcare data.
6. Apply compliance and privacy regulations, including HIPAA, to protect patient information.
7. Assess quality assurance methodologies and performance improvement frameworks, including Lean and Six Sigma, to enhance healthcare service delivery.
8. Evaluate the structure and function of the human body and apply pathopharmacological knowledge to support accurate clinical documentation and coding.
9. Integrate artificial intelligence applications and emerging health information technologies to enhance HIM practice and operational efficiency.
10. Design and manage healthcare information systems, including EHR governance, health information exchange, telehealth, and disaster recovery planning.
11. Demonstrate leadership, project management, and professional communication skills required for supervisory and management roles in health information services.
12. Synthesize all HIM competencies through supervised professional practice experience.
13. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of healthcare regulations and organizational ethics.
14. Evaluate perspectives on health information technology, while applying job market awareness, job search, resume writing, and job interviewing skills for demand positions in the HIM field.
15. Develop logical reasoning and mathematical analysis skills needed to create data solutions for healthcare applications including analytics, research, and information governance.
16. Students will evaluate AI technologies and apply governance, privacy, and ethical frameworks to responsible AI use in health information management practice.
17. Apply advanced privacy strategies, security frameworks, compliance life cycle management, and ethical practice to real-world health information scenarios

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.

Applied Bachelor's Degree in Human Resource Management (BAHRM)

130 Semester Hours (750 Lab Hours; 1575 Lecture Hours)
Length: 175 Weeks; SOC Code: 11-3121
Tuition: $85,800.00 Technology Fees: $1,250.00

Description

The Applied Bachelor's Degree in Human Resource Management is a comprehensive degree program designed to prepare students for a successful and impactful career in the field of human resources. This program goes beyond the fundamentals, equipping students with advanced knowledge, strategic thinking, and leadership skills required to excel in today's complex and ever-evolving HR landscape. The curriculum covers a broad range of courses that explore every dimension of human resource management — from individual employee experience to organizational strategy on a global scale.

Key topics covered in the program include talent acquisition and workforce planning, performance management, and employee engagement strategies. Organizational behavior and workplace psychology are woven throughout the curriculum, giving students insight into the human dynamics that drive team performance and company culture. Employment law and labor relations ensure students are well-versed in the legal frameworks that govern the workplace, while global HR management prepares them to work across cultures and borders in an increasingly interconnected business world.

Throughout the coursework, students will sharpen critical skills in communication, problem-solving, ethical decision-making, and strategic planning — competencies essential for HR professionals who serve as trusted advisors and advocates within their organizations. A strong emphasis on strategic alignment runs throughout the program, enabling students to connect HR initiatives directly to broader organizational goals.

The program culminates in an HRM Senior Project, where students apply their cumulative knowledge to real-world HR challenges, demonstrating their expertise and readiness to contribute from day one.

Upon completion, graduates will be prepared to pursue professional roles such as Human Resources Manager, HR Business Partner, Talent Acquisition Specialist, Employee Relations Specialist, Training and Development Manager, and HR Consultant. Graduates will also have a strong foundation for pursuing certifications such as the HRCI Professional in Human Resources (PHR) or the SHRM Certified Professional (SHRM-CP), further strengthening their credentials in the field.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Human Resources Managers are projected to grow five percent from 2024 – 2034, faster than the average for all occupations. Human resources managers plan, coordinate, and direct the administrative functions of an organization. According to bls.gov in 2024, the median annual wage for Human Resources Managers was $140,030 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Human Resources Managers, at Human Resources Managers: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Program Objectives

Upon completion of the Applied Bachelor's Degree in Human Resource Management program, the graduate will be able to:

1. Recruit and acquire talent, source, evaluate, and select qualified candidates using best practices in modern talent acquisition.
2. Onboard and develop employees, design meaningful onboarding experiences and training programs that set employees up for long-term success.
3. Manage performance, implement performance management systems that motivate employees, and align individual goals with organizational objectives.
4. Navigate employment law, apply federal and state employment law to real workplace situations, ensuring organizational compliance, and reducing legal risk.
5. Support labor relations, understand and manage the dynamics between employees, unions, and management in a fair and legally sound manner.
6. Drive employee engagement and retention, develop strategies that foster a positive workplace culture, and keep top talent invested in the organization.
7. Think and plan strategically, align HR initiatives with broader business goals to support organizational growth and effectiveness.
8. Lead through change, guide organizations through cultural shifts, restructuring, and evolving workforce demands with confidence.
9. Communicate across all levels, engage effectively with employees, managers, and executives using strong interpersonal and professional communication skills.
10. Solve complex HR challenges, apply critical thinking and data-informed decision-making to address real-world human resource issues.
11. Address workplace safety regulations, risk prevention, and employee well-being.
12. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of human resources and organizational ethics to facilitate a career in the human resource management field.
13. Evaluate the historical definitions of technology with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the Human Resource Management field.
14. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general Human Resource Management applications.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.

ASSOCIATE OF APPLIED SCIENCE PROGRAMS

Program Length

Since courses are offered as hybrid or 100% online, the length of time it takes to complete an Associate's Degree Program length is 85 weeks. Please check the Program Length section of each program to determine the actual allocated time to complete each program.

Tuition and Fees

Tuition is charged at the rate of $660.00 per semester hour (unit) for technical courses, plus certification exams, which are optional but highly recommended. There are associated lab fees and for detail see under Technology Fees, Page 17. The tuition for General Education courses is also $660.00 per unit. The full tuition can be up to $49,500.00 for the Degree Program, if all courses, including GE are taken at CIAT. General Education courses may be taken concurrently with technical courses. This could increase the cost per year but will also shorten the time required to obtain your degree.

CIAT does not financially obligate a student for more than twelve (12) months (10 Terms) in any current and active enrollment period. A student may not have more than one enrollment active at any time.

Examination

Each course may have a final examination in order to receive a final letter grade, however, there is no cumulative program examination.

CIAT's Philosophy for General Education

General education is designed to introduce students to the variety of means through which people comprehend the modern world. General education introduces the content and methodology of the major areas of knowledge. All degree programs include general education requirements. General Education courses may be taken at any time during the student's attendance at CIAT. Up to two General Education courses may be taken concurrent with technical courses.

The general education program provides the opportunity for students to develop:

- Intellectual skills
- Information Technology
- Affective and creative capabilities
- Critical thinking
- Positive social attitudes
- Appreciation for cultural diversity that present effective learners and good citizens

Credential Awarded Upon Completion

- Associate of Applied Science Degree in Computer Information Systems (AASCIS)
- Associate of Applied Science in Software Development (ASD)
- Associate of Applied Science in Business Data Analytics (AASBDA)
- Associate of Applied Science in Business Administration (AASBUS)
- Associate of Applied Science in Digital Marketing (AASDM)
- Associate of Applied Science in Healthcare Administration (AASHCA)
- Associate of Applied Science in Human Resource Management (AASHRM)
- Associate of Applied Science in Project Management (AASPM)
- Associate of Applied Science in Accounting (AASA)
- Associate of Applied Science in Health Information Technology (AHIT)

Associate of Applied Science Degree in Computer Information Systems – (AASCIS)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 15-1142
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Computer Information Systems Program provides foundational skills required to install, configure, troubleshoot, and maintain network systems in business environments. Major topics covered include hardware technologies, operating systems, networking, routing, security, and server management. This program prepares students for careers in a variety of positions including Information Security Technician, LAN Administrator, Junior Network Administrator, Technical Support Specialist, PC Technician and IT Support Team Lead.

As an Applied Science Degree, approximately 75% of the program is dedicated to technical classes with only about 25% focusing on General Education. With a more concentrated focus on these subjects, the student is more likely to succeed in a career in Information Technology when compared to an Associate of Science Degree which may require up to 50%, or more, to be dedicated to General Education.

Economic Outlook and Growth of the Industry

According to the U.S. Department of Labor statistics, employment of Computer Support Specialists is projected to experience a slight shift, decreasing 3 percent from 2024 – 2034. According to bls.gov in 2024, the median annual wage for Computer Support Specialists was $61,550. Entry requirements vary for computer support specialists. Network support specialists typically need an associate's degree. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Computer Support Specialists, at Computer Support Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Program Objectives

Upon completion of the Associate of Applied Science in Computer Information Systems Program, the graduate will be able to:

1. Discuss computer operating systems and hardware fundamentals,
2. Perform essential steps in PC installation, configuration, troubleshooting and repair,
3. Install, configure and troubleshoot basic networking hardware, protocols and services,
4. Discuss network infrastructure, cryptography, assessments and audits within networks and networking environments,
5. Perform installation, configuration and troubleshooting of various operating systems and network operating systems,
6. Demonstrate speaking, listening, writing, reading and research skills to be able to document a project scope or create a user manual for a new database in the IT field,
7. Enhance and examine human thought processes and behaviors in diverse populations, cultures, and technical IT settings,
8. Develop analytical, critical thinking, quantitative and problem-solving skills for subnetting, and probability for estimating risks of downtime/uptime.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservicesteam@ciat.edu.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Associate of Applied Science Degree in Computer Information Systems, the student must successfully:

1. Complete the 12 core technical courses (48 semester hours) with an overall average GPA of minimum 2.0.
2. Complete a minimum of 16 semester hours of approved General Education courses with an overall average GPA of minimum 2.0.
3. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of 32 semester hours must be completed in this manner.
   b. Transferring credit from an accredited institution of higher learning. A maximum of 32 semester hours may be completed in this manner.
   c. Challenge Exam of up to four courses (16 semester hours). Each successfully challenged course will be subtracted from the allowed transfer credits.
4. Maintain 80% cumulative attendance.

5. Fulfill the industry certification requirements by earning 2 industry certifications or obtaining an approved exemption.

Degree Course Plan

This page details the courses needed to complete CIAT's Associate of Applied Science in Computer Information Systems Degree Program.

12 Lower Division Core Courses Required 48 Semester Credits				
Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
CIS100A	Computer Fundamentals	3	1	4
CIS100B	Tech+ Fundamentals	3	1	4
CIS154	Windows Fundamentals	3	1	4
CIS101A	Computer Hardware Fundamentals	3	1	4
CIS101B	Computer Operating Systems	3	1	4
CIS102A	Networking Fundamentals, Part 1	3	1	4
CIS102B	Networking Fundamentals, Part 2	3	1	4
CIS120A	Cybersecurity Fundamentals, Part 1	3	1	4
CIS120B	Cybersecurity Fundamentals, Part 2	3	1	4
CIS130	Azure Cloud Fundamentals	3	1	4
CIS131	Azure Cloud Administration	3	1	4
CIS132	AWS Foundations	3	1	4

General Education Minimum 16 Semester Credits Required				
Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
English Language, Communication and Critical Thinking *3 Semester Credits minimum required*				
ENG200	Technical Writing	3	0	3
ENG201	Science Fiction and Technology	3	0	3
ENG210	Public Speaking	3	0	3
Mathematical Concepts and Quantitative Reasoning *7 Semester Hours minimum required*				
MTH105	College Algebra	3	0	3
MTH140	Statistics	3	0	3
MTH201	Pre-Calculus	4	0	4
MTH205	Calculus 1	4	0	4
MTH210	Calculus 2	4	0	4
Social and Behavioral Sciences *3 Semester Hours minimum required*				
SBS110	Introduction to Psychology	3	0	3
SBS120	Sociology	3	0	3
SBS201	Economics	3	0	3
Natural Physical Sciences *3 Semester Hours minimum required*				
SCI120	General Biology	3	0	3
SCI130	Principles of Chemistry	3	0	3
SCI140	General Physics	3	0	3

Associate of Applied Science in Software Development (ASD)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 15-1132, 15-1133
Tuition: $42,240.00 Technology Fees: $600.00

Description

The ASD program presents the fundamentals of software design and highlights the distinctions between historically significant programming paradigms. Topics covered include software design, layers of software architecture, programming languages, hardware and software, Internet architecture, app development, web development, systems development and administration, client/server architecture, data structures, data modeling, and databases.

The scope of material will range from the origins of the modern programming era to long-standing technologies which continue to be a primary force in modern operations, through to newer technologies which are in high demand. Students will be empowered to understand the ever-expanding world of software engineering technologies, their place in that world, and how best to guide themselves to their individual goals upon completion.

Successful graduates will be fully prepared and qualified for positions as software developers and fluent in the use of various technologies and computer programming languages and protocols including (dependent on course selection):

C	**Python**	**Swift**
C++	C#	Linux Bash
SQL	.NET Framework	
HTML	T-SQL	PHP
CSS	ASP.NET MVC	PowerShell
JavaScript	Java	Node JS

Depending on course selection, students will also acquire practical, hands-on knowledge of many in-demand, industry standard technologies including:

- Microsoft Visual Studio; SQL Studio
- Microsoft PowerShell
- Oracle MySQL SQ Lite; Linux; Apache
- Oracle MySQL
- Git and GitHub
- Android & Android Studio
- iOS

All premium software will be available at no charge to students through their school Microsoft Imagine account.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Software Developers are projected to grow 15 percent from 2024 – 2034, much faster than the average for all occupations. Employment of Web Developers is projected to grow 7 percent. According to bls.gov in 2024, the median annual wage for Software Developers was $131,450 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Software Developers, Quality Assurance Analysts, and Testers, at https://www.bls.gov/ooh/computer-and-information-technology/software-developers.htm (visited *November 17, 2025*).

Objectives

Upon completion of the degree in Software Development program, the graduate will be able to:

1. Analyze users' needs, then design, test, and develop software to meet those needs,
2. Recommend software upgrades for customers' existing programs and systems,
3. Design each piece of the application or system and plan how the pieces will work together,
4. Create flowcharts and other models that instruct programmers how to write the software's code,
5. Ensure that the software continues to function normally through software maintenance and testing,
6. Document every aspect of the application or system as a reference for future maintenance and upgrades,
7. Collaborate with other computer specialists to create optimum software,
8. Demonstrate speaking, listening, writing, reading and research skills to be able to document a project scope or create a user manual for a new database in the IT field,
9. Enhance and examine human thought processes and behaviors in diverse populations, cultures, and technical IT settings.
10. Develop analytical, critical thinking, quantitative and problem-solving skills for subnetting, and probability for estimating risks of downtime/uptime.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservices@ciat.edu.

Associate of Applied Science in Business Data Analytics (AASBDA)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 15-1132, 15-1133
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Business Data Analytics provides foundational skills required to extract, load, and transform (ELT) data into common formats and communicating insight from unstructured data. Students will learn the foundation of data analytics using industry standard tools including Python, SQL, Tableau, and Power BI and managing data centric project lifecycles. This program prepares students for a variety of positions including Business Analyst, Data Analyst, Data Visualization Analyst, Insights Analyst, and Program Analyst.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Management Analysts are projected to grow 9 percent from 2024 – 2034, much faster than the average for all occupations. The median annual wage for Management Analysts was $101,190 in 2024 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Management Analysts, at https://www.bls.gov/ooh/business-and-financial/management-analysts.htm (visited *November 17, 2025*).

Objectives

Upon completion of the degree in Business Data Analytics program, the graduate will be able to:

1. Understand the importance the role of data plays in the business landscape.
2. Construct databases using common data programming languages and ingest unstructured data into a data warehouse setting.
3. Successfully create basic to complex data visualizations using Tableau and Power BI to communicate insight from data sets.
4. Collaborate with other data specialists to define and design a custom software application for use in processing simple to complex data lakes.
5. Evaluate data structures and leverage tools and techniques for cleaning data in preparation for analysis.
6. Design and construct relational databases.
7. Understand data centric project management life cycles and work-based schedules associated with data analytics projects.
8. Evaluate the cost, schedule, and performance of a project to ensure compliance with industry requirements related to the project.
9. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of IT security and organizational ethics to facilitate a career in the IT field.
10. Evaluate the historical definitions of technology with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the IT field.
11. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general Information Technology applications like simulation, mapping, programming, science, and research.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

Associate of Applied Science in Business Administration (AASBUS)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 11-3012, 11-3013
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Business Administration is a comprehensive program designed to equip students with essential skills and knowledge in the field of business administration. This comprehensive degree program focuses on developing foundational skills in business computer applications, communication, accounting, and general management. The program aims to establish a strong base of knowledge in various aspects of business, empowering students to pursue successful careers in the business sector. CIAT understands the importance of staying up to date with the latest technology and current business trends, and the curriculum ensures that students gain exposure to these crucial elements. This prepares them to navigate the ever-evolving business world with confidence and effectiveness.

Throughout the program, students will have the opportunity to develop key business administration techniques, including critical-thinking and decision-making skills. These skills are seamlessly integrated with important communication skills, enabling students to effectively convey their ideas and strategies in a professional setting. To ensure practical applicability, the program incorporates hands-on experience with commonly used business computer applications such as Microsoft Word, Excel, and OneNote. This practical training enhances students' proficiency in using these tools, which are essential for success in the modern business landscape.

The curriculum covers major functional areas of business, organizational theories, and the impact of technology on organizations. Students will explore analytical reasoning and problem-solving techniques to identify and resolve common business issues. They will also gain a solid understanding of financial accounting concepts, enabling them to make informed decisions based on accounting records and financial statements. Furthermore, the program focuses on developing proficiency in data analysis and decision support. By utilizing spreadsheet software and real-world business data, students will learn how to effectively organize, analyze, and present information. This practical skill set is highly valuable in today's data-driven business environment. Students will also understand the legal aspects of employment and labor relations.

Upon completion of the program, students will possess a strong foundation of fundamental business skills, such as managing and driving organizational impact, positioning them to thrive in today's competitive business world. Students will also have the foundation for Microsoft Office Specialist Certification. The program prepares students for entry into management roles in various business settings, including positions such as Manager, Assistant General Manager, Assistant Manager, Assistant Case Manager, Assistant Store Manager, and Customer Relations Manager.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Administrative Services and Facilities Managers is projected to grow 4 percent from 2024 to 2034, about as fast as the average for all occupations. Administrative Services and Facilities Managers use computer software and skills to plan, direct, and coordinate activities that help an organization run efficiently. The median salary in 2024 for Administrative Services and Facilities Managers was $106,880 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Administrative Services and Facilities Managers, at Administrative Services and Facilities Managers : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Objectives

Upon completion of the degree in Business Administration program, the graduate will be able to:

1. Develop basic principles of management, covering topics such as planning, organizing, and leading within a business context. It explores management principles with a specific focus on management techniques and strategies.
2. Develop communication skills needed for professional success in today's digital age with documentation, writing processes and communication practices.
3. Utilize common business software applications including Microsoft Windows, Word, OneNote, Outlook, and PowerPoint.
4. Utilize spreadsheet software and data from real-world business situations to organize, analyze and present information.
5. Effectively utilize different types of presentation methods based on audience types to build presentations.
6. Develop foundational accounting principles to navigate accounting records and financial statements to make informed business decisions.
7. Analyze the legal aspects of employment and labor relations.
8. Develop and navigate interpersonal communication in today's complex workforce.
9. Assess impacts in the ever-changing environment of organizations related to communication, technology, teams, decision making processes, and leadership.
10. Evaluate organizational behavior and change management principles.
11. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of organizational ethics to facilitate a career in the Business Management field.
12. Develop logical reasoning and mathematical analysis skills needed for general Business Management applications like simulation, mapping, programming, science, and research.
13. Apply the general introduction to micro- and macroeconomics to a career in the business field. Economics concepts include the principles of economics, comparative advantage, opportunity costs, demand and supply, incentives, public sector economics, international trade, GDP, costs of production, money, unemployment, growth and inflation, and monetary and fiscal policy.

14. Create a professional business plan that synthesizes the knowledge and skills developed throughout the program, giving students an opportunity to demonstrate their expertise.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservices@ciat.edu.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Associate of Applied Science in Business Administration, the student must successfully:

1. Complete the 12 core technical courses (48 semester hours) with an overall average GPA of minimum 2.0.
2. Complete a minimum of 16 semester hours of approved General Education courses with an overall average GPA of minimum 2.0.
3. These courses may be completed by:
    a. Successfully completing the course at California Institute of Applied Technology. A minimum of 32 semester hours must be completed in this manner.
    b. Transferring credit from an accredited institution of higher learning. A maximum of 32 semester hours may be completed in this manner.
    c. Challenge Exam of up to four courses (16 semester hours). Each successfully challenged course will be subtracted from the allowed transfer credits.

Associate of Applied Science in Digital Marketing (AASDM)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 13-1161
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Digital Marketing is a specialized program designed to equip students with the essential skills and knowledge required for a successful career in the field of digital marketing. This program is specifically aligned with industry-standard methodologies and practices, ensuring that students are well-prepared to meet the demands of the marketing field in the digital age.

The program places a strong emphasis on practical application and understanding of digital marketing industry standards in various work settings. Students will have the opportunity to gain hands-on experience using industry tools such as Wix, Mailchimp, Google Ads, and Google Analytics, and develop a deep understanding of the key principles and practices of digital marketing.

Students build their expertise step by step—starting with marketing foundations and storytelling, progressing through website development, social media, search marketing, and email/CRM, and concluding with analytics. The program culminates in a final Project, where students create and present a complete digital marketing portfolio and brand presence.

By completing the Associate of Applied Science in Digital Marketing program, students will be equipped with the necessary knowledge and skills to become competent and knowledgeable digital marketing professionals. This program lays the foundation for certifications in digital marketing like HubSpot Email Marketing, Google Digital Marketing & E-Commerce, HubSpot Social Media Marketing, and HubSpot Content Marketing. They will be well-prepared to pursue rewarding careers in various marketing settings, including roles such as Digital Marketing Specialist, Social Media Manager, Content Strategist, Marketing Analyst, and Email Marketing Coordinator.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Advertising, Promotions, and Marketing Managers is projected to grow 6 percent from 2024 to 2034, faster than average occupations. Advertising, Promotions, and Marketing Managers plan programs to generate interest in products or services. The median annual wage for Advertising, Promotions, and Marketing Managers was $159,660 in 2024, with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Advertising, Promotions, and Marketing Managers, at https://www.bls.gov/ooh/management/advertising-promotions-and-marketing-managers.htm (visited *November 17, 2025*).

Objectives

Upon completion of the degree in Digital Marketing program, the graduate will be able to:

1. Develop the foundational marketing knowledge by exploring core principles, customer behavior, and digital tools, while applying the 4 Ps and multiple channels to analyze campaigns and develop an integrated marketing plan.
2. Utilize the skills to research, plan, and produce strategic content by aligning with brand identity, creating storytelling frameworks, building content calendars, producing sample materials, and evaluating effectiveness through metrics and professional presentation.
3. Develop professional websites by utilizing design principles, optimizing landing pages and sales funnels, applying UX and SEO strategies, integrating analytics and social media connections, and assessing effectiveness through data-driven evaluation and professional presentation.
4. Utilize common business software applications including Microsoft Windows, Word, OneNote, and Outlook.
5. Utilize spreadsheet software and data from real-world business situations to organize, analyze and present information.
6. Develop and manage professional social media strategies by setting up optimized accounts, creating audience personas, designing campaigns, applying consistent storytelling, utilizing management and analytics tools, assessing influencer collaborations, and demonstrating ethical digital marketing practices.
7. Effectively utilize different types of presentation methods based on audience types to build presentations.
8. Utilize successful communication through natural voice in writing and speaking with practical application of communication models.
9. Develop and apply SEO and paid advertising strategies by conducting keyword research, implementing on-page and technical SEO, designing mock ad campaigns, utilizing targeting and bidding tactics, measuring performance with analytics, and integrating results into a cohesive digital marketing plan.
10. Develop and manage professional email marketing campaigns by designing and automating workflows in Mailchimp, segmenting audiences, utilizing CRM tools, applying ethical and legal standards, integrating with broader digital strategies, analyzing key metrics, and optimizing performance through testing and data-driven improvements.
11. Develop and apply digital analytics skills by setting up and interpreting Google Analytics, tracking KPIs across channels, building dashboards in Google Data Studio, utilizing Meta Insights, calculating ROI, identifying trends, and presenting data-driven recommendations in professional reports.
12. Develop and showcase a cohesive digital marketing presence by integrating website, content, social media, SEO, paid advertising, and email/CRM strategies into unified campaigns, applying analytics to evaluate results, and presenting a professional portfolio and client-style pitch.
13. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of organizational ethics to facilitate a career in the business field.

14. Develop logical reasoning and mathematical analysis skills needed for general Project Management applications like simulation, mapping, programming, science and research.
15. Apply the general introduction to micro- and macroeconomics to a career in the business field. Economics concepts include the principles of economics, comparative advantage, opportunity costs, demand and supply, incentives, public sector economics, international trade, GDP, costs of production, money, unemployment, growth and inflation, and monetary and fiscal policy.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
1. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservices@ciat.edu.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Associate of Applied Science in Digital Marketing, the student must successfully:

1. Complete the 12 core technical courses (48 semester hours) with an overall average GPA of minimum 2.0.
2. Complete a minimum of 16 semester hours of approved General Education courses with an overall average GPA of minimum 2.0.
3. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of 32 semester hours must be completed in this manner.
   b. Transferring credit from an accredited institution of higher learning. A maximum of 32 semester hours may be completed in this manner.
   c. Challenge Exam of up to four courses (16 semester hours). Each successfully challenged course will be subtracted from the allowed transfer credits.

Associate of Applied Science in Healthcare Administration (AASHCA)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 11-9111
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Healthcare Administration is a comprehensive program specifically designed to meet the demands of medical office administration in the healthcare industry. This program equips students with the foundational skills necessary for a successful career as a medical office assistant. This program covers in detail all aspects of healthcare medical insurance plans. The program explains the ways in which HMOs, PPOs, Medicare, and Medicaid plans deliver care. The financial aspects of these healthcare insurance plans are also covered.

A key aspect of the program is the in-depth coverage of legal and ethical aspects of health information management, including compliance with the Health Insurance Portability and Accountability Act (HIPAA). Students will develop a deep understanding of the complex laws and critical ethical principles that govern health information management, ensuring they are well-equipped to handle sensitive patient data and maintain compliance within healthcare organizations.

The program provides a historical evolution of the United States health care system. Current practices in private and public healthcare are covered in detail, as well as evolving changes. The healthcare continuum is explained, including ER, rehab, and hospice services. The financial aspects of health care and its influence on health care delivery and quality are also reviewed.

The program places a strong emphasis on developing professional medical coding skills, including proficiency in CPT®, HCPCS Level II, and ICD-10-CM coding systems. Students will learn to evaluate physician and non-physician provider documentation accurately and comply with regulatory requirements. This skill set improves the revenue cycle of healthcare practices and ensures accurate coding and billing processes. Students will learn how to apply coding and documentation guidelines to enhance the financial performance of healthcare organizations, ensuring accurate billing and reimbursement processes.

Technology plays a significant role in healthcare management, and the program explores its applications in various healthcare settings. Students will gain knowledge of electronic health records and learn how to effectively manage patient health records digitally. Additionally, they will develop proficiency in essential software applications like Microsoft Windows, Word, OneNote, Outlook, and PowerPoint. They will also learn to utilize spreadsheet software to analyze real-world business data, enabling them to organize and present information effectively.

By completing the Associate of Applied Science in Healthcare Administration program, students will be equipped with the necessary knowledge and skills to become competent and knowledgeable medical office assistant professionals. They will be well-prepared to pursue rewarding careers in various healthcare settings. Students will also have the foundational knowledge to prepare for the National Center for Competency Testing (NCCT) Medical Office Assistant certification. Graduates of the program will be qualified for a range of job opportunities, including roles such as Medical Office Assistant, Medical Office Administrator, Patient Coordinator, or Patient Services Representative. These roles are critical in supporting the efficient and effective operation of healthcare organizations, ultimately contributing to the delivery of high-quality patient care.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Medical and Health Services Managers is projected to grow 23 percent from 2024 to 2034, much faster than average occupations. Medical and Health Services Managers use sophisticated computer software to plan, direct, and coordinate the business activities of healthcare providers. The median salary in 2024 for Medical and Health Services Managers was $117,960, with a bachelor's degree being the typical entry-level education for this occupation. *

* Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Medical and Health Services Managers, at https://www.bls.gov/ooh/management/medical-and-health-services-managers.htm (visited *November 17, 2025*).

Objectives

Upon completion of the degree in Healthcare Administration program, the graduate will be able to:

1. Develop a broad understanding of fundamentals of medical assisting.
2. Develop knowledge of medical terminology, essential for effective communication in the healthcare field.
3. Develop an understanding of legal and ethical aspects of Health Information Administration, focusing on the complex laws and critical ethical principles that govern health information management (HIM) and Health Insurance Portability and Accountability Act (HIPPA) compliance.
4. Gain an understanding of the different types of insurance and health plans. Be able to explain how each health care system works in delivering care.
5. Develop skills of a professional medical coder for services performed by physicians and non-physician providers. Evaluate physician/non-physician provider documentation with proficiency with CPT®, HCPCS Level II, ICD-10-CM, and compliance and regulatory requirements for physician services.
6. Develop skills to support telehealth and the systems that connect doctors with patients.
7. Explore the use of technology in healthcare administration.
8. Become familiar with the electronic management of patient health records.
9. Gain an understanding of the historical evolution of the United States healthcare system. Understand the various forms of provider models and service delivery systems found in private and public health sectors.

10. Utilize common business software applications including Microsoft Windows, Word, OneNote, Outlook, and PowerPoint.
11. Utilize spreadsheet software and data from real-world business situations to organize, analyze, and present information.
12. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of organizational ethics to facilitate a career in the Healthcare Administration field.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Associate of Applied Science in Human Resource Management (AASHRM)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 13-1071
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Human Resource Management is a specialized degree program that is tailored to prepare students for a successful career in the field of human resources. This program is designed to meet the specific needs and demands of the modern workforce, equipping students with the knowledge and skills required to excel in the dynamic field of HR. The comprehensive curriculum covers a wide range of courses that delve into different aspects of human resource management. By enrolling in this program, students will gain a deep understanding of HR principles and practices, allowing them to effectively address the challenges faced by organizations in managing their workforce.

Key topics covered in the program include effective onboarding and training, which focuses on ensuring that new employees are seamlessly integrated into the organization and provided with the necessary skills to excel in their roles. Employee retention strategies will also be explored, as it is crucial for organizations to retain top talent in order to thrive in a competitive environment. Ethical management is another important aspect covered in the program, emphasizing the importance of fairness, equity, and compliance in HR practices. Students will gain a strong understanding of employment law and its implications for HR professionals, ensuring that they are well-versed in legal requirements and can navigate potential legal challenges.

Throughout the coursework, students will develop the skills needed to overcome HR challenges and adapt to the evolving demands of the job. This includes building strong communication and interpersonal skills, as well as developing problem-solving and critical-thinking abilities. By acquiring these skills, students will be well-prepared to contribute to organizational success and effectively address human resource issues. A strategic perspective is also emphasized in the program, enabling students to make informed decisions and improve organizational effectiveness. Students will learn how to align HR strategies with broader organizational goals, ensuring that human resource decisions support the overall success of the organization.

Upon completion of the program, students will be qualified for entry-level positions in human resource management or labor relations. Students will also have the foundation for certifications like HRCI Associate Professional in Human Resources (aPHR). This includes a variety of roles such as Human Resources Coordinator, HR Operations Assistant, Human Resources Assistant, HR Administrative Assistant, Assistant HR Manager, Personnel Coordinator, and HR Recruiting Assistant. These roles play a critical function in managing and supporting the organization's workforce, contributing to employee satisfaction and organizational success.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Human Resources Specialists is projected to grow 6 percent from 2024 to 2034, faster than average occupations. Human Resources Specialists recruit, screen, and interview job applicants and place newly hired workers in jobs. They also may handle compensation and benefits, training, and employee relations. The median salary in 2024 for Human Resources Specialists was $72,910, with a bachelor's degree being the typical entry-level education for this occupation. *

Associate of Applied Science in Project Management (AASPM)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 13-1082
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Project Management is a specialized program designed to equip students with the essential skills and knowledge required for a successful career in the field of project management. This program is specifically aligned with industry-standard methodologies and practices, ensuring that students are well-prepared to meet the demands of the project management field. The program places a strong emphasis on practical application and understanding of project management industry standards in various work settings. Students will have the opportunity to gain hands-on experience and develop a deep understanding of the key principles and practices of project management.

The curriculum is carefully crafted to provide a solid foundation in project management principles, business communication, computer applications, and relevant technical skills. Through a range of courses, students will acquire the necessary knowledge and skills to effectively manage projects from start to finish.

Strong communication skills are vital for project managers, and the program focuses on developing these skills. Students will learn how to effectively communicate with stakeholders, manage teams, and ensure clear and concise project documentation. In addition to communication skills, the program also equips students with relevant technical skills. This includes training in utilizing project management software and tools commonly used in the industry. Students will gain hands-on experience with these tools, preparing them to effectively manage projects in a technologically advanced work environment.

By completing this degree program, students will gain a comprehensive understanding of project management principles and best practices. They will learn how to initiate, plan, execute, monitor, and close projects effectively, ensuring successful project outcomes. Students will be well-prepared to pursue entry-level positions in project management or related fields. Students will also have the foundation for certifications like CompTIA Project+. Graduates will be qualified for roles such as Project Manager, Project Coordinator, Assistant Project Manager, and Junior Project Manager. These positions are essential in driving successful project outcomes and ensuring the efficient execution of organizational initiatives.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Project Management Specialists is projected to grow 6 percent from 2024 to 2034, faster than average occupations. Project Management Specialists coordinate the budget, schedule, staffing, and other details of a project. The median salary in 2024 for Project Management Specialists was $100,750, with a bachelor's degree being the typical entry-level education for this occupation. *

* Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Project Management Specialists, at Project Management Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Objectives

Upon completion of the degree in Project Management program, the graduate will be able to:

1. Develop basic principles of management, covering topics such as planning, organizing, and leading within a project management context. It explores management principles with a specific focus on management techniques and strategies.
2. Analyze project management life cycles and methodologies involved in project management, including project initiation, scope definition, and stakeholder analysis.
3. Evaluate the cost, schedule, and performance of a project to ensure compliance with industry requirements related to the project.
4. Develop communication skills needed for professional success in today's digital age with documentation, writing processes and communication practices.
5. Utilize common business software applications including Microsoft Windows, Word, OneNote, Outlook, and PowerPoint.
6. Utilize spreadsheet software and data from real-world business situations to organize, analyze and present information.
7. Develop quantitative analysis methods and decision-making models used in project management, helping students make data-driven decisions and assess project risks.
8. Develop proficiency in using Microsoft Project for project planning, scheduling, and tracking progress. It builds understanding of advanced features of Microsoft Project, such as resource allocation, cost management, and reporting.
9. Assess impacts in the ever-changing environment of organizations related to communication, technology, teams, decision making processes, and leadership.
10. Analyzes change management principles and strategies, including how to identify and address resistance to change within a project environment.
11. Use Artificial Intelligence (AI) to streamline processes, anticipate risks, and optimize resources on a project.
12. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of organizational ethics to facilitate a career in the Project Management field.
13. Develop logical reasoning and mathematical analysis skills needed for general Project Management applications like simulation, mapping, programming, science, and research.
14. Apply the general introduction to micro- and macroeconomics to a career in the business field. Economics concepts include the principles of economics, comparative advantage, opportunity costs, demand and supply, incentives, public sector economics, international trade, GDP, costs of production, money, unemployment, growth and inflation, and monetary and fiscal policy.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.
4. ACE credits from your military training. Available to our veteran students, even if you are not using the GI Bill®, bring us your JST and we will evaluate it for you.
5. Transfer credits from any accredited institution of higher learning in the United States. Bring us your official transcripts and we will evaluate them for available transferrable credits.

At no charge, we will assist you in completing a credit transfer plan which will identify potential credit transfer paths to complete your general education and other requirements. To request this, contact your Admissions Representative or send an email to studentservices@ciat.edu.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Associate of Applied Science in Project Management, the student must successfully:

1. Complete the 12 core technical courses (48 semester hours) with an overall average GPA of minimum 2.0.
2. Complete a minimum of 16 semester hours of approved General Education courses with an overall average GPA of minimum 2.0.
3. These courses may be completed by:
    a. Successfully completing the course at California Institute of Applied Technology. A minimum of 32 semester hours must be completed in this manner.
    b. Transferring credit from an accredited institution of higher learning. A maximum of 32 semester hours may be completed in this manner.
    c. Challenge Exam of up to four courses (16 semester hours). Each successfully challenged course will be subtracted from the allowed transfer credits.

Degree Course Plan

This page details the courses needed to complete CIAT's Associate of Applied Science in Project Management degree program.

12 Lower Division Core Courses Required 48 Semester Credits				
Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
CIS100A	Computer Fundamentals	3	1	4
BAM102	Introduction to Spreadsheets and Understanding Data	3	1	4
BAM100A	Management Principles, Part 1	3	1	4
BAM100B	Management Principles, Part 2	3	1	4
BDA106A	Project Fundamentals, Part 1	3	1	4
BDA106B	Project Fundamentals, Part 2	3	1	4
BAM104	Business Communications	3	1	4
PJM101	Quantitative Decision Making for Project Managers	3	1	4
PJM102	AI for Project Managers	3	1	4
BAM105	Change Management	3	1	4
PJM103	Negotiation Principles for Project Managers	3	1	4
PJM104	Project Management Practices	3	1	4

General Education Minimum 16 Semester Credits Required				
Course Number	Course Name	Lecture Credits	Lab Credits	Total Credits
English Language, Communication and Critical Thinking *7 Semester Credits minimum required*				
ENG200_4	Technical Writing	4	0	4
ENG210	Public Speaking	3	0	3
Mathematical Concepts and Quantitative Reasoning *3 Semester Hours minimum required*				
MTH105	College Algebra	3	0	3
Social and Behavioral Sciences *3 Semester Hours minimum required*				
SBS110	Introduction to Psychology	3	0	3
SBS120	Sociology	3	0	3
SBS201	Economics	3	0	3
Natural Physical Sciences *3 Semester Hours minimum required*				
SCI120	General Biology	3	0	3
SCI130	Principles of Chemistry	3	0	3
SCI140	General Physics	3	0	3

Associate of Applied Science in Accounting (AASA)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 43-3031
Tuition: $42,240.00 Technology Fees: $600.00

Description

The Associate of Applied Science in Accounting is designed to provide students with foundational knowledge and practical skills in accounting, finance, and business operations. The program focuses on core accounting topics such as introductory accounting, corporate finance, payroll accounting, taxation, and auditing fundamentals. Students also develop essential business skills through coursework in management principles, business communications, change management, and data analysis using spreadsheets.

The curriculum emphasizes hands-on learning with modern accounting tools, including computerized accounting systems and spreadsheet applications. Students gain experience recording financial transactions, managing payroll processes, and analyzing financial data to support business decision-making. Courses in computer fundamentals and business communication further prepare students to work effectively in professional environments.

Throughout the program, students build critical thinking, problem-solving, and analytical skills needed to support entry-level accounting roles. The program prepares graduates for positions that involve bookkeeping, financial recordkeeping, and basic financial analysis, while providing a strong foundation for continued education or career advancement in accounting and business.

Graduates of this program will be prepared for careers in accounting and business environments, including roles such as Accounting Clerk, Bookkeeper, Payroll Specialist, Accounts Payable or Receivable Specialist, and Tax Preparer. The program develops practical skills in financial reporting, data management, and compliance to support day-to-day business operations.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Accountants and Auditors is projected to grow 5 percent from 2024 to 2034, faster than average occupations. Accountants and auditors prepare and examine financial records. The median salary in 2024 for Accountants and Auditors was $81,680, with a bachelor's degree being the typical entry-level education for this occupation. *

* Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Accountants and Auditors, at Accountants and Auditors: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Objectives

Upon completion of the Associate of Applied Science in Accounting degree program, the graduate will be able to:

1. Demonstrate proficiency in basic computer operations, operating systems, and common business software applications.
2. Explain foundational management principles, including planning, organizing, and leading within a business environment.
3. Apply management strategies to support decision-making, team coordination, and organizational effectiveness.
4. Utilize spreadsheet software to organize, analyze, and present financial and business data.
5. Demonstrate effective written and verbal communication skills appropriate for professional business environments.
6. Explain organizational change processes and apply strategies to manage change within a business setting.
7. Apply fundamental accounting principles, including the accounting equation, transaction analysis, and preparation of financial statements.
8. Explain basic corporate finance concepts, including budgeting, financial planning, and investment decision-making.
9. Utilize computerized accounting systems to record transactions and generate financial reports.
10. Apply payroll accounting and bookkeeping practices to maintain accurate financial records.
11. Explain taxation principles and apply them to basic individual and business tax scenarios.
12. Describe auditing concepts and evaluate the role of internal controls in ensuring financial accuracy.
13. Apply public speaking, critical thinking, problem solving, technical writing, and working knowledge of accounting principles and organizational ethics to facilitate a career in the accounting field.
14. Evaluate the historical definitions of accounting with their strengths and limitations, and gain understanding in the contemporary perspectives on technology that blur the boundaries of machine and human elements, while applying and analyzing job market awareness, job search, resume writing, and job interviewing for demand positions in the accounting field.
15. Develop logical reasoning and mathematical analysis skills needed to create algorithms for general accounting applications like simulation, programming, and research.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. Check it out at

https://clep.collegeboard.org/ and then ask your Admissions Representative how CIAT can assist you in obtaining CLEP credits toward your CIAT Degree.

Associate of Applied Science in Health Information Technology (AHIT)

64 Semester Hours (360 Lab Hours; 780 Lecture Hours)
Length: 85 Weeks; SOC Code: 29-9021
Tuition: $42,240.00 Technology Fees: $600.00

Description

The objective of the Associate of Applied Science in Health Information Technology program is to prepare graduates for entry-level careers in health information management by providing foundational skills in medical coding, electronic health records, healthcare data analytics, privacy and security compliance, and revenue cycle management. Students develop the competencies needed to manage health records systems, ensure data integrity and regulatory compliance with HIPAA and accreditation standards, apply coding classification systems for reimbursement, calculate healthcare statistics, and support clinical and administrative decision-making using nationally recognized HIM education standards

Graduates of this program will be qualified for roles such as Health Information Technician, Medical Records Technician, Medical Coder, Coding Specialist, Health Data Analyst, Patient Information Coordinator, Medical Billing Specialist, HIM Department Coordinator, Compliance Assistant, and EHR Specialist.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Health Information Technologists and Medical Registrars is projected to grow 15 percent from 2024 to 2034, much faster than average occupations. Health Information Technologists and Medical Registrars advise organizations on computerized healthcare systems and analyze clinical data. The median salary in 2024 for Health Information Technologists and Medical Registrars was $67,310, with an associate's degree being the typical entry-level education for this occupation. *

* Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Health Information Technologists and Medical Registrars, at Health Information Technologists and Medical Registrars: Occupational Outlook Handbook: U.S. Bureau of Labor Statistics (visited *July 6, 2026*).

Objectives

Upon completion of the Associate of Applied Science in Health Information Technology degree program, the graduate will be able to:

1. Apply health information guidelines, standards, and policies to ensure data integrity, accuracy, and accessibility across healthcare organizations.
2. Manage health records using electronic health record systems and apply information governance principles to maintain the legal health record.
3. Apply ICD-10-CM, ICD-10-PCS, CPT, and HCPCS coding systems to accurately classify diagnoses and procedures for reimbursement and reporting.
4. Apply privacy and security strategies to protect health information in compliance with HIPAA and other regulatory requirements.
5. Calculate and analyze healthcare statistics to support clinical and administrative decision-making.
6. Evaluate revenue cycle management processes, healthcare reimbursement methodologies, and compliance with regulatory requirements.
7. Utilize health information technologies, including EHR systems and informatics tools, to manage and exchange health data.
8. Apply legal processes and compliance requirements impacting health information management practice.
9. Demonstrate fundamental leadership, teamwork, and professional communication skills for health information management roles.
10. Demonstrate competence through supervised professional practice experience in authentic healthcare settings.
11. Apply medical terminology and knowledge of anatomy, physiology, and pathology to support accurate clinical documentation and coding.
12. Apply public speaking, critical thinking, problem-solving, and technical writing skills in health information management contexts.
13. Develop logical reasoning and mathematical analysis skills needed for healthcare data applications including statistics and research.
14. Evaluate career pathways in health information technology while applying job search, resume writing, and interview skills for in-demand HIT positions.

There are many ways that the student can obtain the needed General Education units. Among them are:

1. Successfully completing the course(s) at CIAT.
2. Transferring units from any of the local community colleges in the San Diego area. Please see the Transfer of Credits section under Admissions of this catalog for further information.
3. CLEP testing. The College-Level Examination Program® (CLEP) offers you the opportunity to earn qualifying scores on any of the 33 college subject examinations they offer. CERTIFICATE PROGRAMS

General Information on Certificate Programs

Program Length

Since courses are offered as hybrid or 100% online, the length of time it takes to complete any Certificate program can vary depending on the student's course load (it is based on 5 weeks per course). Please check the Program Length section of each Program to determine the actual allocated time to complete each program.

Tuition and Fees

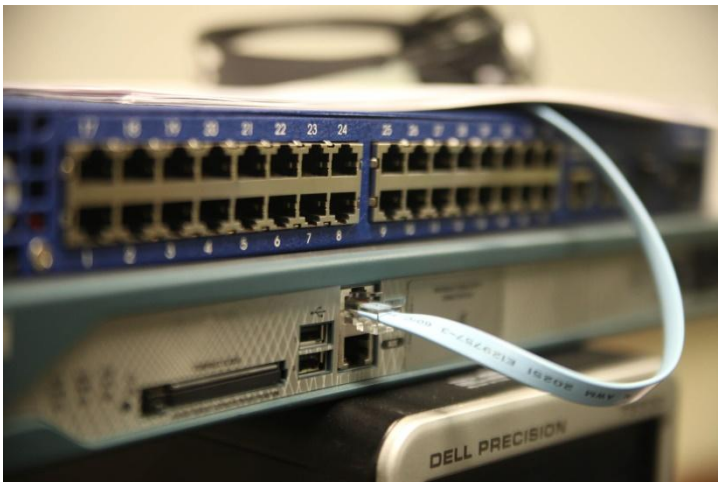

Tuition is charged at the rate of $660.00 per 1 credit hour, 15 lecture clock hour units or 30 lab clock hour units. For the Microsoft Office programs, tuition is charged at a flat rate of $1995.00 per course.

Examination

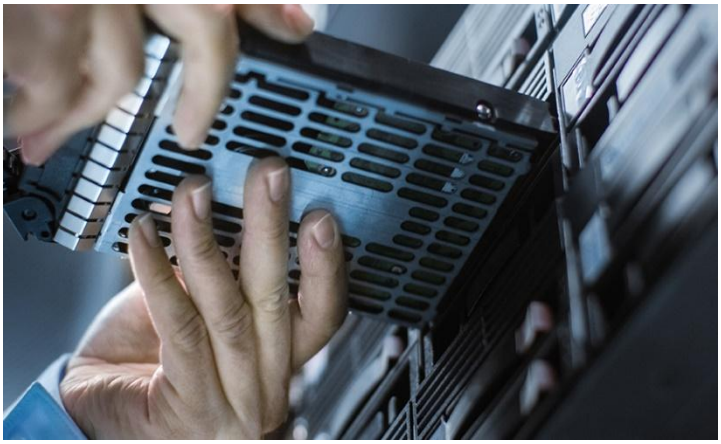

Each course may have a final examination in order to receive a final letter grade, however, there is no cumulative program examination.

Credential Awarded Upon Completion

1. Certificate in Computer Information Systems (CCIS)
2. Certificate as Cisco Networking Professional, Enterprise (CCNP-ENT)
3. Certificate as Networking Technician (CNT)
4. Certificate in Cloud Administration (CCA)
5. Certificate as Computer Technician (CCT)
6. Certificate as Cisco Certified Network Associate (CCNA)
7. Certificate in Software Development (CSD)
8. Certificate as Microsoft Office Specialist (MOS)
9. Certificate in Cybersecurity (CC)
10. Certificate in Project Management (CPM)
11. Certificate in Artificial Intelligence & Machine Learning (CAIML)
12. Certificate in Workflow Deployment (CWD)
13. Certificate in Database Administration (CDA)
14. Certificate in Cloud Infrastructure (CCI)

"Outstanding trade school!! CIAT is "second to none" when it comes to the care for their students. I highly recommend this school to everyone who is considering the technology field. The hospitality and customer service made you feel like family. They are very military friendly and that makes this school flexible for Active Duty as well as Veterans and Retirees. I've been attending for almost two years and my education plan set me up for success."

Simplicio G.

Certificate in Computer Information Systems (CCIS)

36 Semester Hours (270 Lab Hours; 405 Lecture Hours)
Length: 45 Weeks; SOC Code: 15-1142
Tuition: $23,760.00 Technology Fees: $450.00

Description

The Certificate in Computer Information Systems program provides the foundational skills required to install, configure, troubleshoot, and maintain network systems in business environments. Major topics covered include hardware technologies, operating systems, networking, routing, security, and server management. This program prepares students for careers in a variety of positions including Information Security Technician, LAN Administrator, Junior Network Administrator, Technical Support Specialist, and PC Technician.

Economic Outlook and Growth of the Industry

According to the U.S. Department of Labor statistics, employment of Computer Support Specialists is projected to experience a slight shift, decreasing 3 percent from 2024 – 2034. According to bls.gov in 2024, the median annual wage for Computer Support Specialists was $61,550. Entry requirements vary for computer support specialists. Network support specialists typically need an associate's degree. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Computer Support Specialists, at Computer Support Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Computer Information Systems, the graduate as Information Security Technician, LAN Administrator, Junior Network Administrator, Technical Support Specialist, and PC Technician will be able to:

1. Discuss computer operating systems and hardware fundamentals,
2. Perform essential steps in PC installation, configuration, troubleshooting and repair,
3. Install, Configure, and troubleshoot basic networking hardware, protocols and services,
4. Discuss network infrastructure, cryptography, assessments and audits within networks and networking environments,
5. Perform installation, configuration and troubleshooting of various operating systems and network operating systems,

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Computer Information Systems, the student must successfully:

1. Complete the nine core courses (36 Credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of three courses must be completed in this manner.
   b. Transferring credit, up to five courses (20 Semester Credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to two courses. Each successfully challenged course will be subtracted from the allowed transfer credits.
2. Maintain 80% cumulative attendance.
3. Fulfill the industry certification requirements by earning 1 industry certification or obtaining an approved exemption.

CCIS Course Plan

This table details the courses required for completion of CIAT's Certificate in Computer Information Systems:

9 Core Courses Required (36 Semester Credits)		
CIS100A	Computer Fundamentals	4
CIS100B	Tech+ Fundamentals	4
CIS154	Windows Fundamentals	4
CIS101A	Computer Hardware Fundamentals	4
CIS101B	Computer Operating Systems	4
CIS102A	Networking Fundamentals, Part 1	4
CIS102B	Networking Fundamentals, Part 2	4
CIS120A	Cybersecurity Fundamentals, Part 1	4
CIS120B	Cybersecurity Fundamentals, Part 2	4

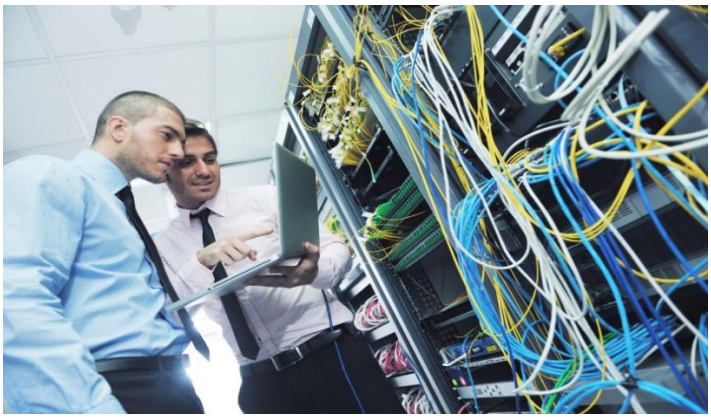

Certificate as Cisco Networking Professional – Enterprise (CCNP-ENT)

40 Semester Credit Hours (300 Lab Hours; 450 Lecture Hours)
Length: 50 Weeks; SOC Code: 15-1142
Tuition: $26,400.00 Technology Fees: $500.00

Description

Successful graduates will be fully prepared and qualified for positions as network security technicians and administrators for Cisco network systems. In addition to preparing the student for the vendor neutral Network+ certifications, this program prepares the student to achieve the Cisco Certified Network Professional (CCNP) certification by successfully passing the following Cisco certification exams:

1. Networking Fundamentals, Part 1
2. Networking Fundamentals, Part 2
3. Cisco Configuration, ICND1
4. Cisco Configuration, ICND2
5. Cisco DevNet
6. Implementing and Operating Cisco Enterprise Core Technologies (ENCOR)
7. Implementing Cisco Enterprise Routing and Services

Economic Outlook and Growth of the Industry

According to the Bureau of Labor Statistics, employment of Information Security Analysts is expected to grow by 29 percent from 2024 to 2034, which is much faster than the average for all occupations. Demand for these workers will increase as organizations continue to adopt and integrate increasingly sophisticated technologies and as the need for information security grows. According to bls.gov, the median annual wage of Information Security Analysts was $124,910 in 2024, with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Information Security Analysts, at https://www.bls.gov/ooh/computer-and-information-technology/information-security-analysts.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate as Cisco Networking Professional-Enterprise program, the graduate will be able to:

1. Describe fundamentals and theory of computer networking systems and how they are applied in various business situations,
2. Provide network security for day-to-day business operations,
3. Implement and support Cisco firewalls,
4. Implement and support Cisco Intrusion Prevention Systems,
5. Manage and administer Virtual Private Networks using Cisco components.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate as Cisco Networking Professional – Enterprise, the student must successfully:

1. Complete the ten core courses (40 Semester credit hours) an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of three courses must be completed in this manner.
   b. Transferring credit up to five courses (20 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to two courses. Each successfully challenged course will be subtracted from the allowed transfer credits.

CCNP-ENT Course Plan

This table details the courses required for completion of CIAT's Certificate as Cisco Networking Professional – Enterprise Program:

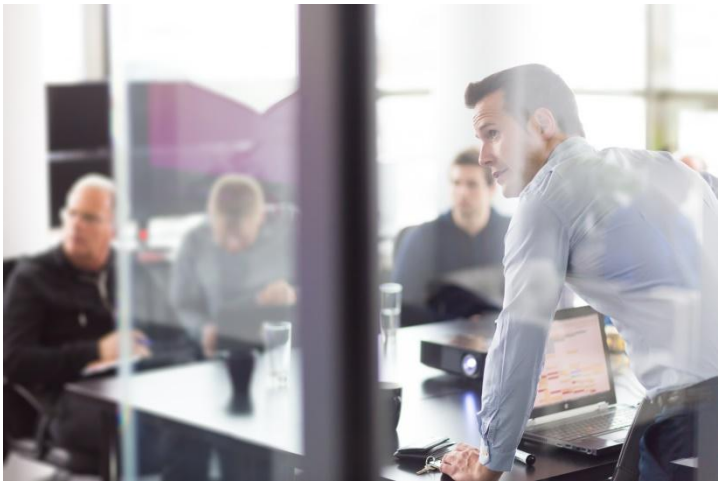

10 Courses Required (40 Semester Credits)		
CIS102A	Networking Fundamentals, Part 1	4
CIS102B	Networking Fundamentals, Part 2	4
CIS270A	Cisco Networking, Part 1	4
CIS270B	Cisco Networking, Part 2	4
CIS280A	CCNA Automation, Part 1	4
CIS280B	CCNA Automation, Part 2	4
NET381A	Implementing and Operating Cisco Enterprise Core Technologies (ENCOR), Part 1	4
NET381B	Implementing and Operating Cisco Enterprise Core Technologies (ENCOR), Part 2	4
NET383A	Implementing Cisco Enterprise Routing and Services, Part 1	4
NET383B	Implementing Cisco Enterprise Routing and Services, Part 2	4

Certificate as Networking Technician (CNT)

16 Semester Credit Hours (120 Lab Hours; 180 Lecture Hours)
Length: 20 Weeks; SOC Code: 15-1122
Tuition: $10,560.00 Technology Fees: $200.00

Description

The Certificate as Networking Technician is designed for the Computer Network Technician who wants to expand their competence into the area of computer security. It provides the foundational skills required to install, configure, troubleshoot, and maintain network systems in business environments. Major topics covered include Cisco hardware technologies, operating systems, networking, routing, local area network (LAN) security, wireless network security, and authentication, encryption and authorization techniques. This program prepares students for a career in computer security as an Information Security Technician.

Economic Outlook and Growth of the Industry

According to the U.S. Department of Labor statistics, employment of Computer Support Specialists is projected to experience a slight shift, decreasing 3 percent from 2024 – 2034. According to bls.gov in 2024, the median annual wage for Computer Support Specialists was $61,550. Entry requirements vary for computer support specialists. Network support specialists typically need an associate's degree. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Computer Support Specialists, at Computer Support Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate as Networking Technician Program, the graduate will be able to:

1. Discuss network infrastructure, cryptography, assessments and audits within networks and networking environments.
2. Perform installation, configuration and troubleshooting of various network security systems.
3. Conduct security audits and take action to correct the weaknesses discovered.
4. Advise coworkers on Social Engineering threats and defenses.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate as Networking Technician, the student must successfully:

1. Complete the four core courses (16 Semester Credit Hours) with an overall average GPA of a minimum of 2.0. These courses may be completed by:

a. Successfully completing the course at California Institute of Applied Technology. A minimum of two courses must be completed in this manner.
b. Transferring credit up to two courses (8 semester credit hours) from an accredited institution of higher learning.
c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CNT Course Plan

This table details the courses required for completion of CIAT's Certificate as Networking Technician Program:

4 Courses Required (16 Semester Credits)		
CIS102A	Networking Fundamentals, Part 1	4
CIS102B	Networking Fundamentals, Part 2	4
CIS270A	Cisco Networking, Part 1	4
CIS270B	Cisco Networking, Part 2	4

Certificate in Cloud Administration (CCA)

16 Semester Credit Hours (120 Lab Hours; 180 Lecture Hours)
Length: 20 weeks; SOC Code: 15-1152
Tuition: $10,560.00 Technology Fees: $200.00

Description

The Certificate in Cloud Administration is designed for the Computer Service Technician who wants to expand their competence into the area of computer networking on premises and in the cloud. It provides the foundational skills required to install, configure, troubleshoot, and maintain network server systems and cloud management in business environments. Major topics covered include hardware technologies, operating systems, networking, security, cloud models and cloud solutions management. This program prepares students for careers in a variety of positions including LAN Administrator, Junior Network Administrator and Technical Support Specialist.

Economic Outlook and Growth of the Industry

According to the Bureau of Labor Statistics, employment of Information Security Analysts is expected to grow by 29 percent from 2024 to 2034, which is much faster than the average for all occupations. Demand for these workers will increase as organizations continue to adopt and integrate increasingly sophisticated technologies and as the need for information security grows. *Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Information Security Analysts, at https://www.bls.gov/ooh/computer-and-information-technology/information-security-analysts.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Cloud Administration Program, the graduate will be able to:

1. Install, upgrade, and migrate Windows Server in host and compute environments on servers and workloads.
2. Install Windows Server features and roles; install and configure Windows Server Core; manage Windows Server Core installations using GUI and Windows PowerShell.
3. Create, direct, and manage Active Directory services.
4. Install and configure Hyper-V and Virtual Machines.
5. Migrate virtual servers to Microsoft Azure™ cloud.
6. Create, manage, and maintain cloud resources and services in major providers like Microsoft Azure™ and AWS™.
7. Budget expenditures for cloud products provide solutions to today's modern businesses.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Cloud Administration, the student must successfully:

1. Complete the four core courses (16 Semester Credit Hours) with an overall average GPA of a minimum of 2.0. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of one course must be completed in this manner.
   b. Transferring credit up to two courses (8 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CCA Course Plan

This table details the courses required for completion of CIAT's Certificate in Cloud Administration Program:

4 Courses Required (16 Semester Credits)		
CIS154	Windows Fundamentals	4
CIS130	Azure Cloud Fundamentals	4
CIS131	Azure Cloud Administration	4
CIS132	AWS Foundations	4

Certificate as Computer Technician (CCT)

16 Semester Credit Hours (120 Lab Hours; 180 Lecture Hours)
Length: 20 weeks; SOC Code: 15-1152
Tuition: $10,560.00 Technology Fees: $200.00

Description

The Certificate as Computer Technician program provides the foundational skills required to install, configure, troubleshoot, and maintain computer systems in business environments. Major topics covered include hardware technologies, operating systems, networking and security. This program prepares students for entry level positions as a Technical Support Specialist, Help Desk Technician or PC Technician.

Economic Outlook and Growth of the Industry

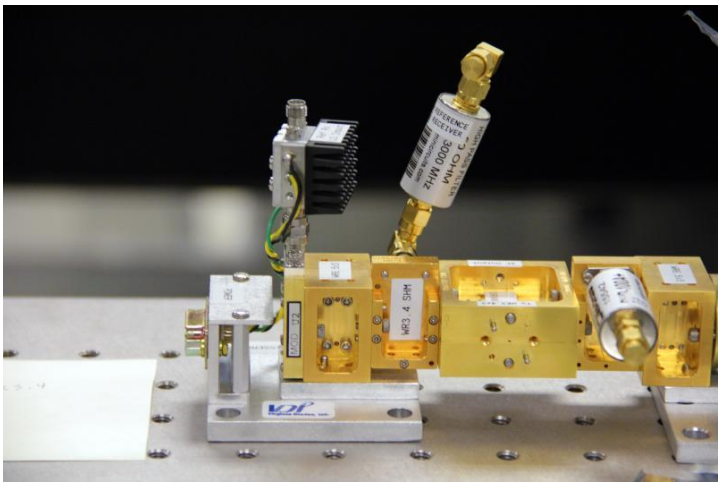

According to the U.S. Department of Labor statistics, employment of Computer Support Specialists is projected to experience a slight shift, decreasing 3 percent from 2024 – 2034. According to bls.gov in 2024, the median annual wage for Computer Support Specialists was $61,550. Entry requirements vary for computer support specialists. Network support specialists typically need an associate's degree. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Computer Support Specialists, at Computer Support Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate as Computer Technician Program, the graduate will be able to:

1. Discuss computer operating systems and hardware fundamentals
2. Perform essential steps in PC installation, configuration, troubleshooting and repair
3. Install, Configure and troubleshoot basic networking hardware, protocols and services
4. Discuss network infrastructure, cryptography, assessments and audits within networks and networking environments
5. Perform installation, configuration and troubleshooting of various operating systems and network operating systems

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate as Computer Technician, the student must successfully:

1. Complete the four core courses (16 Semester Credit Hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of one course must be completed in this manner.
   b. Transferring credit, up to two courses (8 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CCT Course Plan

This table details the courses required for completion of CIAT's Certificate as Computer Technician Program:

4 Courses Required (16 Semester Credits)		
CIS100A	Computer Fundamentals	4
CIS100B	Tech+ Fundamentals	4
CIS101A	Computer Hardware Fundamentals	4
CIS101B	Computer Operating Systems	4

Certificate as Cisco Certified Network Associate (CCNA)

150 Clock Hours (60 Lab Hours; 90 Lecture Hours)
Length: 10 Weeks; SOC Code: 15-1142
Tuition: $5,280.00 Technology Fees: $100.00

Description

Successful graduates will be fully prepared and qualified for entry level positions as network administrators for Cisco network systems. In addition to preparing the student for the vendor neutral CompTIA Network+ certification, this program prepares the student to achieve the Cisco Certified Network Associate certification by successfully passing the following Cisco certification exams:

1. Administering Cisco Solutions (200-301 CCNA) v1.1

Economic Outlook and Growth of the Industry

According to the U.S. Department of Labor statistics, employment of Computer Support Specialists is projected to experience a slight shift, decreasing 3 percent from 2024 – 2034. According to bls.gov in 2024, the median annual wage for Computer Support Specialists was $61,550. Entry requirements vary for computer support specialists. Network support specialists typically need an associate's degree. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Computer Support Specialists, at Computer Support Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate as Cisco Certified Network Associate program, the graduate will be able to:

1. Describe fundamentals and theory of computer networking systems and how they are applied in various business situations,
2. Install medium-size Cisco routed and switched networks,
3. Configure medium-size Cisco routed and switched networks,
4. Operate medium-size Cisco routed and switched networks,
5. Troubleshoot medium-size Cisco routed and switched networks,
6. Implement and verify connections to remote sites in a WAN.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate as Cisco Certified Network Associate, the student must successfully:

1. Complete the two core courses (150 clock hours) with an overall average GPA of a minimum of 2.0. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of one course must be completed in this manner.
   b. Transferring credit, up to one course (75 clock hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CCNA Course Plan

This table details the courses required for completion of CIAT's Certificate as Cisco Certified Network Associate Program:

2 Courses Required (150 Clock Hours)		
CIS270A	Cisco Networking, Part 1	75
CIS270B	Cisco Networking, Part 2	75

Certificate as Microsoft Office Specialist (MOS)

15 Semester Credit Hours (225 Lecture Hours)
Length: 25 weeks; SOC Code: 43-4199, 43-9199
Tuition: $9,975.00

Description

Successful graduates will be certified as proficient in the use of the following Microsoft Office component programs:

1. Microsoft Word
2. Microsoft Excel
3. Microsoft PowerPoint
4. Microsoft Outlook
5. Microsoft Access

Economic Outlook and Growth of the Industry

According to the Bureau of Labor Statistics, Occupational Outlook Handbook, 2024 edition, employment of Secretaries and Administrative Assistants is projected to show little or no change from 2024 to 2034. The median annual wage of Secretaries and Administrative Assistants in 2024 was $47,460. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Secretaries and Administrative Assistants, at https://www.bls.gov/ooh/office-and-administrative-support/secretaries-and-administrative-assistants.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Microsoft Office Specialist Certificate program, the graduate will be able to:

1. Create documents and correspondence utilizing Microsoft Word,
2. Create spreadsheets and graphs utilizing Microsoft Excel,
3. Create audio-visual presentations and "slideshows" utilizing Microsoft PowerPoint,
4. Manage emails, appointments and schedules utilizing Microsoft Outlook,
5. Create, maintain, and query a relational database utilizing Microsoft Access.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate as Microsoft Office Specialist, the student must successfully:

1. Complete the five core courses (15 Semester Credit Hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the course at California Institute of Applied Technology. A minimum of two courses must be completed in this manner.
   b. Transferring credit up to three courses (9 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

MOS Course Plan

This table details the courses required for completion of CIAT's Certificate as Microsoft Office Specialist:

5 Courses Required (15 Semester Credits)		
BUS101	Word Processing Fundamentals	3
BUS102	Creating and Using Spreadsheets	3
BUS103	Presentation Applications	3
BUS104	Database Management	3
BUS105	Business and Email Management	3

Certificate in Cybersecurity (CC)

32 Semester Credit Hours (240 Lab Hours; 360 Lecture Hours)
Length: 40 weeks; SOC Code: 15-1212
Tuition: $21,120.00 Technology Fees: $400.00

Description

The Certificate in Cybersecurity program is designed to equip students with foundational and advanced skills for a career in cybersecurity. The curriculum focuses on key areas such as cybersecurity fundamentals, AWS cloud security, ethical hacking, and advanced network security combining theoretical knowledge with practical real-word application.

This program provides students with the skills and knowledge required to excel in cybersecurity and cloud security, preparing them for industry certifications such as the CompTIA Security+, EC-Council Certified Ethical Hacker (CEH) and ISC2 Certified Information Systems Security Professional (CISSP), as well as advancing their careers in these rapidly evolving fields.

By completing this certificate program, students will gain a comprehensive understanding of foundational and advanced cybersecurity techniques, from securing networking to ethical hacking. They will learn to implement security measures, manage risks, and respond to cyber threats. Students will be well-prepared for roles such as Information Security Analyst, Network Security Analyst, or Incident Response Specialist in various industries.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Information Security Analysts is projected to grow 29% from 2024 to 2034, much faster than average occupations. Information Security Analysts plan and carry out security measures to protect an organization's computer networks and systems. The median salary in 2024 for Information Security Analysts was $124,910, with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Information Security Analysts, at https://www.bls.gov/ooh/computer-and-information-technology/information-security-analysts.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Cybersecurity program, the graduate will be able to:

1. Appy security protocols and standards to ensure data protection and network security across various platforms.
2. Develop skills to identify, analyze, and mitigate threats in real-world scenarios, using contemporary techniques and tools.
3. Gain proficiency in using AWS-specific security practices, understanding how to secure cloud environments and manage AWS security services.
4. Perform ethical hacking tasks, learning to think like hackers to identify and exploit vulnerabilities within a controlled and ethical framework.
5. Explore advanced network security concepts and practices, preparing for complex security challenges in network environments.
6. Develop and implement comprehensive security policies and procedures that comply with legal and ethical standards.
7. Acquire skills in incident response and crisis management, preparing them to act swiftly and effectively during security breaches.
8. Explore the ethical and legal implications of cybersecurity, ensuring they practice their skills in a professional and ethical manner.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Cybersecurity, the student must successfully:

1. Complete the eight core courses (32 semester credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the courses at California Institute of Applied Technology. A minimum of four courses must be completed in this manner.
   b. Transferring credit, up to four courses (16 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CC Course Plan

This table details the courses required for completion of CIAT's Certificate in Cybersecurity Program:

8 Courses Required (32 Semester Credits)		
CIS120A	Cybersecurity Fundamentals, Part 1	4
CIS120B	Cybersecurity Fundamentals, Part 2	4
CIS132	AWS Foundations	4
CCS101	Security Operations	4
CCS102	Governance, Risk, and Compliance	4
CCS200A	Penetration Testing, Part 1	4
CCS200B	Penetration Testing, Part 2	4
CCS201	AI Security Foundations	4

Certificate in Project Management (CPM)

24 Semester Credit Hours (180 Lab Hours; 270 Lecture Hours)
Length: 30 weeks; SOC Code: 13-1082
Tuition: $15,840.00 Technology Fees: $300.00

Description

The Certificate in Project Management offers a thorough curriculum to equip students for thriving careers as project managers in many industries. Aligned with industry's best practices, it ensures students are adept at meeting the field's demands. Emphasizing leadership and communication skills, the program also provides students with a solid understanding of business analysis and project management.

The curriculum provides a solid foundation in both predictive and agile project management methodologies. Students will grasp the impact of organizational change management practices on project results and develop the ability to proficiently handle contract and stakeholder negotiations.

By completing this certificate program, students will gain a comprehensive understanding of project management best practices. They will learn how to evaluate project costs, risks, and performance, ensuring successful project outcomes. Students will be well-prepared to pursue positions in project management or related fields. Additionally, students will be equipped with the knowledge necessary to pursue certifications such as the Project Management Institute's (PMI) PMP, CAPM, PBA, and ACP. Graduates will be qualified for roles such as Project Coordinator, Project Manager, or Business Analyst.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Project Management Specialists is projected to grow 6 percent from 2024 to 2034, faster than average occupations. Project Management Specialists coordinate the budget, schedule, staffing, and other details of a project. The median salary in 2024 for Project Management Specialists was $100,750, with a bachelor's degree being the typical entry-level education for this occupation. *

* Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Project Management Specialists, at Project Management Specialists : Occupational Outlook Handbook: : U.S. Bureau of Labor Statistics (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Project Management program, the graduate will be able to:

1. Demonstrate understanding of project management methodologies, focusing on predictive, adaptive, and hybrid approaches.
2. Initiate and lead projects through completion, managing all phases of the project management life cycle.
3. Determine which project management methodology is best suited for the organization and specific projects.
4. Effectively communicate with stakeholders, team members, and contractors to ensure project success.
5. Assess and recommend organizational changes to support the project goals, deliverables and outcomes.
6. Effectively conduct contract and stakeholder negotiations to ensure compliance with corporate, procurement and legal standards.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Project Management, the student must successfully:

1. Complete the six core courses (24 semester credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the courses at California Institute of Applied Technology. A minimum of three courses must be completed in this manner.
   b. Transferring credit, up to three courses (12 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CPM Course Plan

This table details the courses required for completion of CIAT's Certificate in Project Management Program:

6 Courses Required (24 Semester Credits)		
PJM200	Introduction to Project Management	4
PJM201	Introduction to Business Analysis	4
PJM202	Agile Project Management	4
BAM104	Business Communications	4
BAM105	Change Management	4
PJM103	Negotiation Principles for Project Managers	4

Certificate in Artificial Intelligence & Machine Learning (CAIML)

28 Semester Credit Hours (210 Lab Hours; 315 Lecture Hours)
Length: 35 weeks; SOC Code: 15-0000
Tuition: $18,480.00 Technology Fees: $350.00

Description

The Certificate in Artificial Intelligence and Machine Learning offers a thorough curriculum tailored to equip students for the growing field of AI. Students will learn how to harness the immense potential of generative AI and deep learning through hands-on projects. They will understand how to apply these skills to transform business in a wide array of fields.

The curriculum provides a solid foundation in AI programming, data processing, and model training. Students gain proficiency in machine learning frameworks. They will develop skills in deep learning, computer vision, generative AI, and prompt engineering.

By completing this AI certificate program, students will gain a comprehensive understanding of artificial intelligence solutions, including machine learning, neural networks, and AI-enabled data analysis. They will acquire the skills to develop AI solutions and apply them to real-world problems. Students will be well-prepared for roles such as AI Developer, AI Data Analyst, or AI-Technology Consultant across diverse industries.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Software Developers are projected to grow 15 percent from 2024 – 2034, much faster than the average for all occupations. Employment of Web Developers is projected to grow 7 percent. According to bls.gov in 2024, the median annual wage for Software Developers was $131,450 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Software Developers, Quality Assurance Analysts, and Testers, at https://www.bls.gov/ooh/computer-and-information-technology/software-developers.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Artificial Intelligence & Machine Learning program, the graduate will be able to:

1. Explain the fundamental concepts of artificial intelligence and machine learning, and how they apply in business.
2. Demonstrate an understanding of python language concepts and how to apply them to AI programming.
3. Demonstrate skills in programming fundamentals for working with and analyzing data for machine learning.
4. Describe the essentials of Generative AI, prompt engineering, and ChatGPT.
5. Understand how to select appropriate machine learning algorithms for a given context, programmatically implement the algorithms, and interpret their outcomes.
6. Explain how to use Amazon Web Services (AWS) AI tools to transform business processes.
7. Explain how to use Microsoft Azure AI tools to transform business processes.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Artificial Intelligence & Machine Learning, the student must successfully:

1. Complete the seven core courses (28 semester credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the courses at California Institute of Applied Technology. A minimum of three courses must be completed in this manner.
   b. Transferring credit up to three courses (12 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CAIML Course Plan

This table details the courses required for completion of CIAT's Certificate in Artificial Intelligence & Machine Learning Program:

7 Courses Required (28 Semester Credits)		
ASD101A	Python Fundamentals, Part 1	4
ASD101B	Python Fundamentals, Part 2	4
CAI101	Python for Data Science	4
CAI102	Introduction to Predictive Artificial Intelligence	4
CAI103	Natural Language Processing	4
CAI104	Introduction to Generative Artificial Intelligence	4
CAI105	Azure AI Fundamentals	4

Certificate in Workflow Deployment (CWD)

16 Semester Credit Hours (120 Lab Hours; 180 Lecture Hours)
Length: 20 weeks; SOC Code: 15-1252
Tuition: $10,560.00 Technology Fees: $200.00

Description

The Certificate in Workflow Deployment offers a comprehensive curriculum designed to prepare students for successful careers in ServiceNow administration, application development, and performance analytics. Aligned with industry best practices, this program ensures students are equipped to meet the demands of the rapidly evolving field of IT service management.

The curriculum provides a solid foundation in ServiceNow Administration, enabling students to master the essential functions and features of the ServiceNow platform. In the Application Development Fundamentals course, students will learn how to develop custom applications on the ServiceNow platform, gaining proficiency in scripting, UI development, and data management. The Performance Analytics course will equip students with the skills needed to analyze and interpret data, allowing them to make informed decisions and drive continuous improvement within their organizations.

By completing this program, students will gain a thorough understanding of ServiceNow principles and best practices. They will learn how to configure and customize the ServiceNow platform, develop robust applications, and utilize performance analytics to enhance service delivery. Students will be well-prepared to pursue positions in ServiceNow administration, development, and analytics. Additionally, they will be equipped with the knowledge necessary to pursue certifications such as ServiceNow Certified System Administrator, ServiceNow Certified Application Developer, and ServiceNow Certified Implementation Specialist. Graduates will be qualified for roles such as ServiceNow Administrator, ServiceNow Developer, and Performance Analytics Specialist.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that Software Developers are projected to grow 15 percent from 2024 – 2034, much faster than the average for all occupations. Employment of Web Developers is projected to grow 7 percent. According to bls.gov in 2024, the median annual wage for Software Developers was $131,450 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Software Developers, Quality Assurance Analysts, and Testers, at https://www.bls.gov/ooh/computer-and-information-technology/software-developers.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Workflow Deployment program, the graduate will be able to:

1. Demonstrate mastery in configuring ServiceNow applications and modules.
2. Maintain and enhance ServiceNow instances.
3. Write, test, and debug ServiceNow scripts.
4. Develop ServiceNow applications.
5. Manage performance analytics roles.
6. Leverage metrics for reporting and metric-based indicators.
7. Deploying analytics solutions, performing diagnostics, and system administration.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Workflow Deployment, the student must successfully:

1. Complete the four core courses (16 semester credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the courses at California Institute of Applied Technology. A minimum of two courses must be completed in this manner.
   b. Transferring credit up to two courses (8 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CWD Course Plan

This table details the courses required for completion of CIAT's Certificate in Workflow Deployment Program:

4 Courses Required (16 Semester Credits)		
SN200	Introduction to ServiceNow	4
SN201	ServiceNow Administration	4
SN202	ServiceNow Scripting	4
SN203	ServiceNow Application Development	4

Certificate in Database Administration (CDA)

16 Semester Credit Hours (120 Lab Hours; 180 Lecture Hours)
Length: 20 weeks; SOC Code: 15-1242
Tuition: $10,560.00 Technology Fees: $200.00

Description

The Certificate in Database Administration offers a thorough curriculum tailored to equip students for thriving careers in database administration. Aligned with the Oracle Academy courses, it ensures students are adept at meeting the field's demands. Emphasizing problem solving, collaboration, and critical thinking, the program also provides students with the skills to use structured query language (SQL).

The curriculum provides a solid foundation in both database design, data modeling, and database programming with SQL. Students will learn to analyze complex business scenarios and create data models as part of the solution. They will understand the techniques and tools used to design, build, and extract information from databases. Learners will develop skills to implement database designs by creating physical databases using SQL. Students will gain proficiency in using SQL to administer Oracle databases.

By completing this certificate program, students will gain a comprehensive understanding of Oracle database administration. Students will be well-prepared to pursue positions as an Oracle database administrator and as a SQL programmer. Additionally, students will be equipped with the knowledge necessary to pursue the Oracle Foundations Associate, Database Professional Certification. Graduates will be qualified for roles such as Oracle Database Administrator, Database Modeler, Data Analyst, Data Tester, and SQL Developer.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Database Administrators and Architects is projected to grow 4% from 2024 to 2034, about as fast as the average for all occupations. Database Administrators and Architects create or organize systems to store and secure data. The median salary in 2024 for Database Administrators and Architects was $123,100 with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Database Administrators and Architects, at https://www.bls.gov/ooh/computer-and-information-technology/database-administrators.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Database Administration program, the graduate will be able to:

1. Demonstrate an understanding of relational database and data modeling concepts, specifically building and mapping Entity Relationship Diagrams (ERDs).
2. Use Structured Query Language (SQL) to interact with a relational database and manipulate data within the database.
3. Demonstrate the skills required to build Oracle database solutions.
4. Explain the main ideas and purpose of databases, database applications, data integration, database resiliency and security, machine learning, and data management.
5. Analyze complex business scenarios and create data models that represent a conceptual representation of an organization's information.
6. Examine data requirements and design vendor-neutral relational databases and entity relationship diagram models.
7. Demonstrate an understanding of basic SQL syntax and the rules for constructing valid SQL statements to generate report-like output.
8. Describe the characteristics of PL/SQL and how it is used to extend and automate SQL to administer the Oracle database.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Database Administration, the student must successfully:

1. Complete the four core courses (16 semester credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the courses at California Institute of Applied Technology. A minimum of two courses must be completed in this manner.
   b. Transferring credit, up to two courses (8 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CDA Course Plan

This table details the courses required for completion of CIAT's Certificate in Database Administration Program:

4 Courses Required (16 Semester Credits)		
DBA200	Oracle Database Foundations	4
DBA201	Applied Oracle Database Systems	4
DBA202	Oracle Database Design	4
DBA203	Oracle Database Programming	4

Certificate in Cloud Infrastructure (CCI)

16 Semester Credit Hours (120 Lab Hours; 180 Lecture Hours)
Length: 20 weeks; SOC Code: 15-1299
Tuition: $10,560.00 Technology Fees: $200.00

Description

The Certificate in Cloud Infrastructure offers a curriculum tailored to equip students for thriving careers in the cloud environment. Learners will delve into the infrastructure of clouds, how they work with databases, and understand cloud security, administration, monitoring, and management. The program emphasizes the four primary areas of the Oracle cloud core infrastructure; namely database, solutions, platform and edge, and governance and administration.

By completing this certificate program, students will gain a comprehensive understanding of the Oracle cloud infrastructure. Students will be well-prepared to pursue positions in the Oracle Cloud environment. Additionally, students will be equipped with the knowledge necessary to pursue the Oracle Cloud Infrastructure Associate Certification. Graduates will be qualified for roles such as Oracle Cloud Administrator, Oracle Cloud Developer, and Oracle Cloud Data Engineer.

Economic Outlook and Growth of the Industry

The Bureau of Labor Statistics shows that employment of Information Security Analysts is projected to grow 29% from 2024 to 2034, much faster than average occupations. Information Security Analysts plan and carry out security measures to protect an organization's computer networks and systems. The median salary in 2024 for Information Security Analysts was $124,910, with a bachelor's degree being the typical entry-level education for this occupation. *

*Bureau of Labor Statistics, U.S. Department of Labor, *Occupational Outlook Handbook*, Information Security Analysts, at https://www.bls.gov/ooh/computer-and-information-technology/information-security-analysts.htm (visited *November 17, 2025*).

Program Objectives

Upon completion of the Certificate in Cloud Infrastructure program, the graduate will be able to:

1. Demonstrate an understanding of basic Oracle Cloud Infrastructure concepts.
2. Explain the ideas of Core Infrastructure, Database, Solutions, Platform and Edge, and Governance and Administration.
3. Explain how to secure information in the Oracle cloud.
4. Describe how to monitor and manage the Oracle cloud.
5. Explain advanced topics related to the Oracle cloud.

Graduation Requirements

In order to graduate from California Institute of Applied Technology and receive their Certificate in Cloud Infrastructure, the student must successfully:

1. Complete the four core courses (16 semester credit hours) with an overall average GPA of minimum 2.0. These courses may be completed by:
   a. Successfully completing the courses at California Institute of Applied Technology. A minimum of two courses must be completed in this manner.
   b. Transferring credit up to two courses (8 semester credit hours) from an accredited institution of higher learning.
   c. Challenge Exam of up to one course. Each successfully challenged course will be subtracted from the allowed transfer credits.

CCI Course Plan

This table details the courses required for completion of CIAT's Certificate in Cloud Infrastructure Program:

4 Courses Required (16 Semester Credits)		
OCI200	Oracle Cloud Infrastructure and Database	4
OCI201	Oracle Cloud Solution Platform and Edge	4
OCI202	Oracle Cloud Governance and Administration	4
OCI203	Oracle Cloud Advanced Topics	4

CONTINUING EDUCATION AND PROFESSIONAL DEVELOPMENT (CEPD) COURSES

40 Hours; Length: 1 week or 5 weeks
Tuition: $995.00 - $2,995.00

About CEPD Courses

CIAT Continuing Education and Professional Development (CEPD) courses are designed for working professionals seeking to earn, renew, or advance industry credentials in IT, business, and healthcare. CIAT Continuing Education and Professional Development (CEPD) courses are taught by experienced, certified instructors in a lecture and lab environment. They are designed for experienced professionals who wish to gain general knowledge, learn new skills, brush up on skills, enrich their understanding about a wide range of topics, develop personal interests and/or pass a certification exam.

Length of Courses

All courses are 40 hours in length and are conducted in a variety of formats including:

- 5-day, 8 hours/day
- 4-day, 10 hours/day (weekends)
- 10-day, 4 hours/day (evenings)

Schedule

Up to date schedules are posted on the CIAT website: Online IT Certification Bootcamps - CIAT.

Fees

Continuing Education and Professional Development courses are charged a flat rate per course. Tuition ranges from $995 - $2,995 based on the level and topic of the course. Bundle discounts for individuals and corporate partnership discounts are available. For students needing a monthly payment plan, a $100 processing fee is added to the cost of tuition. Eligible active students and alumni who have completed the corresponding coursework in a certificate, associate or bachelor's degree program may be eligible for complimentary access to enroll in CIAT's Continuing Education and Professional Development courses for added certification exam and career support.

Course & Price Listing: CEPD – IT Courses

Course ID	Course Name	Price
CEPD101	CompTIA A+ Certification Professional Development Course	$995
CEPD102	CompTIA Network+ Professional Development Course	$1,295
CEPD111	ISC2 Certified in Cybersecurity (CC) Professional Development Course	$995
CEPD112	CompTIA Security+ Professional Development Course	$1,495
CEPD113	CompTIA SecAI+ Professional Development Course	$995
CEPD121	AWS Dual Professional Development Course	$995
CEPD122	Azure Dual Professional Development Course	$995
CEPD211	CompTIA CySA+ Professional Development Course	$1,495
CEPD212	CompTIA PenTest+ Professional Development Course	$1,495
CEPD201	Cisco CCNA Professional Development Course	$1,995
CEPD311	ISC2 CISSP Professional Development Course	$2,995

Course & Price Listing: CEPD – Business Administration Courses

Course ID	Course Name	Price
CEPD231	PMI PMP Professional Development Course	$1,495

Course & Price Listing: CEPD – Healthcare Courses

Course ID	Course Name	Price
CEPD241	AAPC Certified Professional Coder (CPC) Professional Development Course	$2,495

Pre-Requisite Knowledge

Students are expected to review and adhere to the published guidelines for prior current education or related work experience, as a prerequisite for enrollment. Pre-requisites vary based on course. For some courses, such as PMI PMP and ISC2 CISSP, students are required to meet specific eligibility criteria before being eligible to schedule the exam or earn the full certification exam credential. Work experience documentation may be required.

Certification Exam Support

Students enrolled in CIAT's CEPD courses receive full CIAT certification support benefits for the corresponding course, including complimentary certification exam vouchers with unlimited attempts (*unlimited attempts eligible for most exams*). In the case of an exam failure, academic readiness steps will be required, including the completion of a minimum of 2 practice exams with scores of 90% or higher before receiving additional voucher(s).

Individual Enrollment

To enroll in CIAT's CEPD courses, a student may submit a course reservation request at https://www.ciat.edu/certification-bootcamps or email bootcamps@ciat.edu for personalized support from an Admissions Advisor.

Corporate and Government Enrollments

For support with requests for customized schedules, group training, new training course development, employer purchase orders, or other training authorization, corporate and government representatives can email bootcamps@ciat.edu.

Cancellation and Refund Policy

See the Cancellation and Refund Policy in the Tuition and Fees section of this catalog. Students may cancel up to one day before the course begins for a 100% refund, minus any non-refundable registration fees. After the start date, refunds are issued on a pro-rata basis depending on the percentage of instruction completed, with each day of class equal to 8 hours or 20% of the course; no refund is available after 60% of the course

has been delivered. If CIAT cancels a course before it begins, students may transfer to a future session or receive a full refund. All cancellations must be submitted in writing to the Admissions Office (admissions@ciat.edu), and approved refunds are processed within 45 days.

Attendance Requirements

Due to the rapid pace of our CEPD courses, students are expected to attend the full 40-hour course. If the student cannot complete the full schedule of hours, the student should notify the instructor as soon as possible, so the instructor can assign the appropriate make up work. Students who feel that they do not need the full workshop may be allowed to test out early in accordance with CIAT's test out policy located in this catalog. Permission to test out may be granted on a case-by-case basis by your instructor and administrator.

Course Completion

Upon completion of a course, students will receive a grade of Pass or No Pass. Professional Development courses are noncredit courses which are NOT directly applicable toward a degree or certificate programs. Upon completion of Professional Development course, students will earn a noncredit avocational certificate of completion.

Continuing Education Units

Continuing Education Units (CEU's) may be awarded for completion of these Professional Development courses. CEU's are awarded based on 1 CEU for each 10 hours of instructional engagement. A student will be eligible to earn 4 CEU's after the completion of each 40-hour course.

INDIVIDUAL COURSE DESCRIPTIONS

Networking

CIS100A

Computer Fundamentals

4 Semester Credits

Course Description

This foundational course equips learners with the essential study and technical skills required for success at CIAT. The curriculum covers an introduction to the educational ecosystem and offers strategic insights into effective academic practices. Students will explore the intricacies of modern computing with hands-on experience in Windows, along with practical exposure to Microsoft Word, Excel, Teams, and PowerPoint. Besides technical proficiency, the course nurtures a reflective and analytical mindset, enhancing students' ability to engage with academic materials critically. By the end of this program, students will be proficient in essential software applications and possess the educational experience needed to excel in their future coursework at CIAT.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

CIS100B

Tech+ Fundamentals

4 Semester Credits

Course Description

This course focuses on the essential IT skills and knowledge needed to perform tasks commonly performed by advanced end-users and entry-level IT professionals. This information can be applied towards your efforts to pass the CompTIA FCO-U71 Exam.

Prerequisites:

Completion of CIS100A: Computer Fundamentals.

CIS154

Windows Fundamentals

4 Semester Credits

Course Description

This course is an introduction to Microsoft's Windows operating system. Students will learn to navigate and utilize common applications and Microsoft's current web browser, navigate through the Windows directory structure, create user accounts, manage devices, understand the basics of Windows Security and configure and personalize the Windows operating system environment. Through hands-on exercises and practical assignments, students will be prepared to use Windows in both a business and personal environment.

Prerequisites:

Completion of CIS100B: Tech+ Fundamentals or equivalent experience (review the CIS100B course objectives for specific required experience).

CIS101A

Computer Hardware Fundamentals

4 Semester Credits

Course Description

This course represents the 1st half of a two-part class that focuses on a step-by-step approach for learning the fundamentals of supporting and troubleshooting computer hardware and software in a modern IT environment. This information can be applied towards your efforts to pass the CompTIA A+ Core 1 Exam.

Prerequisites:

Completion of CIS100B: Tech+ Fundamentals or equivalent experience (review the CIS100B course objectives for specific required experience) OR completion of CIS154: Windows Fundamentals or equivalent experience (review the CIS154 course objectives for specific required experience).

CIS101B

Computer Operating Systems

4 Semester Credits

Course Description

This course represents the 2nd half of a two-part course that focuses on a step-by-step approach for learning the fundamentals of supporting and troubleshooting computer hardware and software in a modern IT environment. This information can be applied towards your efforts to pass the CompTIA A+ Core 2 Exam.

Prerequisites:

Completion of CIS101A: Computer Hardware Fundamentals.

CIS102A

Networking Fundamentals, Part 1

4 Semester Credits

Course Description

This course represents the first part of a two-part class. This introductory course provides a foundational understanding of networking, covering essential topics such as Addressing, Network Infrastructure, and Documentation. Students will delve into various networking Protocols and learn about the different types of Cabling and Wireless Networking technologies. Additionally, the course will explore Network Architecture, Cloud Computing, and automation enabling participants to comprehend how various components interact within a network. Through practical exercises and theoretical insights, learners will develop the skills necessary to design and troubleshoot basic network systems, laying the groundwork for more advanced studies in the field.

Prerequisites:

Completion of CIS101A: Computer Hardware Fundamentals and CIS101B: Computer Operating Systems or equivalent technical help support experience (review the CIS101A and CIS101B course objectives for specific required experience).

CIS102B

Networking Fundamentals, Part 2

4 Semester Credits

Course Description

This course represents the second part of a two-part class. In this course, students will explore the critical components of network design and security, focusing on key areas such as Network Segmentation, Wide Area Networking, Access Control, and Risk Management. Participants will gain hands-on experience in developing robust strategies for performance optimization and recovery, ensuring the resilience of network infrastructures. Additionally, the course emphasizes the importance of thorough documentation and effective management practices to enhance organizational security and efficiency. By the end of the course, students will be equipped with the knowledge and skills necessary to design, implement, and maintain secure and efficient network systems.

Prerequisites:

Completion of CIS102A: Networking Fundamentals, Part 1.

CIS120A

Cybersecurity Fundamentals, Part 1

4 Semester Credits

Course Description

This course teaches the knowledge needed to begin a career in the rapidly expanding and changing field of Information Technology Cyber Security. After completion of this course, students will be able to identify the differences between cyber-based threats, attacks, and vulnerabilities. Differentiate between the differing types of malware and compare and contrast the various types of social engineering, application/service, and cryptographic attacks. This class will also teach students the technologies and tools associated with cyber security and use appropriate software tools to assess the security posture of an organization. Finally, this course will teach the different architecture and design concepts for network security, hardware/firmware security and operating system security.

Prerequisites:

Completion of CIS102B: Networking Fundamentals, Part 2.

CIS120B

Cybersecurity Fundamentals, Part 2

4 Semester Credits

Course Description

Building upon the concepts introduced in CIS120A – Cybersecurity Fundamentals, Part 1, this course focuses on advanced security operations and program management. Students will explore security monitoring, incident response, automation in cybersecurity, risk assessment, and compliance requirements. Key topics include security governance, third-party risk management, audits, and security awareness programs. This course equips students with the skills needed to implement, maintain, and oversee enterprise security strategies in real-world environments. This information can be applied towards your efforts to pass the CompTIA Security+ certification.

Prerequisites:

Completion of CIS120A: Cybersecurity Fundamentals, Part 1.

CIS130

Azure Cloud Fundamentals

4 Semester Credits

Course Description

This course is designed to give students a view of Azure Cloud by introducing the fundamentals of Azure cloud products, and their use in modern enterprise networks and data systems.

Prerequisites:

Completion of CIS154: Windows Fundamentals or equivalent experience (review the CIS154 course objectives for specific required experience).

CIS131

Azure Cloud Administration

4 Semester Credits

Course Description

This course is designed to guide students through mastering Azure Cloud core services and solutions. This dynamic program is designed to empower professionals with the knowledge and skills needed to navigate and harness the capabilities of Azure's diverse set of services. Students will master topics such as security, identity management, and DevOps, monitoring, integration services, governance, and cloud development in Azure.

Prerequisites:

Completion of CIS130: Azure Cloud Fundamentals.

CIS132

AWS Foundations

4 Semester Credits

Course Description

This course covers topics related to entry level Cloud users. Topics covered include the value of the AWS Cloud, security best practices, core AWS services and common uses cases.

Prerequisites:

Completion of CIS102B: Networking Fundamentals, Part 2, or equivalent experience (review the CIS102B course objectives for specific required experience).

CIS133

AWS Architecting

4 Semester Credits

Course Description

The objectives of this course are aligned to the knowledge and skills described for taking the AWS Certified Solutions Architect – Associate certification. However, this course is not designed to specifically prepare for the certification, but rather to focus on real world knowledge and experience that an AWS professional should know. Out of class study time

would reasonably be expected of the student to earn the AWS Solutions Architect Associate certification.

Prerequisites:
Completion of the CIS132: AWS Foundations or equivalent experience (review the CIS132 course objectives for specific required experience).

CIS220A

Principles of Cybersecurity, Part 1

4 Semester Credits

Course Description

This course is the first of a two-part course that covers a comprehensive range of topics designed to provide IT professionals with a deep understanding of various security threats and defenses. The course introduces essential security concepts, key terms, and the primary threats to networks, including security breaches and denial of service attacks. Students learn to assess the likelihood of attacks and compare security strategies.

The course delves into network communication, covering major protocols, network devices, and how data is transmitted over the Internet. Students learn about cybercrimes such as fraud, identity theft, cyber stalking, denial of service attacks and specific defenses against them. Topics covered include malware, spyware, and how to protect systems using antivirus and antispyware software.

In this course students explore methodologies and tools used by hackers, along with specific attack methods. Additionally, the course covers industrial espionage, its dangers, and protective measures. The course concludes with an overview of encryption basics and modern cryptographic methods, guiding students in selecting appropriate encryption for their organizations.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

CIS220B

Principles of Cybersecurity, Part 2

4 Semester Credits

Course Description

This course is the second of a two-part course that aims to provide students with practical and theoretical knowledge in protecting and managing network systems. Topics include evaluating and implementing security technologies such as scanners, firewalls, antispyware methods, intrusion detection systems, and honey pots.

This course emphasizes the importance of security policies, teaching students how to create, evaluate, and improve policies for network administration. Students learn about network and vulnerability scanning, including the use of scanning tools and evaluating security consultants. Topics include cyber terrorism and information warfare, focusing on developing cyber detective skills.

This course covers forensic principles, including making forensic copies, using forensic tools, and preparing reports while avoiding common mistakes. The course concludes with an overview on integrating basic systems engineering concepts into cybersecurity, focusing on the use of engineering tools and standards to enhance cybersecurity practices.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

CIS230A

Introduction to Linux

4 Semester Credits

Course Description

This course covers the commands and skills that a typical Linux end user will use performing IT job functions. The course includes essential topics related to file management, security, automating tasks and processes, connecting securely to Linux systems, and BASH scripting.

Prerequisites:
Completion of CIS102B or equivalent experience (review the CIS102B course objectives for specific required experience).

CIS230B

Linux Administration

4 Semester Credits

Course Description

This course covers the commands and skills that a typical Linux end user will use performing IT job functions. The course includes essential topics related to file management, security, automating tasks and processes, connecting securely to Linux systems, and BASH scripting.

Prerequisites:
Completion of CIS230A: Introduction to Linux.

CIS270A

Cisco Networking, Part 1

4 Semester Credits

Course Description

This course represents the 1st half of a two-part course for entry-level network support positions, the starting point for many successful careers in networking. Cisco professionals have the knowledge and skill to install, operate, and troubleshoot a small enterprise branch network, including basic network security. This information can be applied to your efforts to pass the Cisco Certified Network Associate Exam.

Prerequisites: Completion of CIS102B: Networking Fundamentals, Part 2, or equivalent experience (review the CIS102B course objectives for specific required experience).

CIS270B

Cisco Networking, Part 2

4 Semester Credits

Course Description

CIS270B - Cisco Networking, Part 2, represents the second of two sessions. Students will gain knowledge, skills, and comprehension. TCP/IP, network access and security, IP connectivity, IP services, routing protocols, and automation and programmability are a small part of the topics the students will cover. This information can be applied to your efforts to pass the Cisco Certified Network Associate Exam.

Prerequisites:

Completion of CIS270A: Cisco Networking, Part 1.

CIS280A

CCNA Automation, Part 1

4 Semester Credits

Course Description

This course represents the 1st half in a two-part class for the Cisco CCNA Automation certification exam: Automating Networks Using Cisco Platforms (200-901 CCNAAUTO). This course provides most of the core objectives coverage and practical preparation for the first half of the CCNA Automation certification for industry professionals including but not limited to data formats (XML, JSON, YAML), software development methods, version management with Git, exploring API's, Python language as used with Cisco platforms, and constructing code to be used with Cisco devices.

Prerequisites:

Either completion of: CIS102B: Networking Fundamentals, Part 2, or equivalent experience (review the CIS102B course objectives for specific required experience) OR ASD101B: Python Fundamentals, Part 2, or equivalent experience (review the ASD101B course objectives for specific required experience).

CIS280B

CCNA Automation, Part 2

4 Semester Credits

Course Description

This course represents the 2nd half in a two-part class for the Cisco CCNA Automation certification exam: Automating Networks Using Cisco Platforms (200-901 CCNAAUTO). This course provides most of the core objectives coverage and practical preparation for the second half of the CCNA Automation certification for industry professionals including but not limited to: Containers, Cloud computing, Jumpstart NetDevOps, Docker and Security, IoT, UCS Director, IOS-XR programmability, Edge computing, ACI Programmability, ACI CNI Plug-in for Kubernetes, Meraki Integrations, Networking, PyATS and VIRL, IOS-XR CLI, and Ansible.

Prerequisites:

Completion of CIS280A: DevNet Associate, Part 1.

CLD330

AWS Operations

4 Semester Credits

Course Description

This course covers all of the topics related to the AWS Certified SysOps Administrator Associate Exam. Topics covered include AWS monitoring, reporting, high availability and security.

Prerequisites:

Completion of CIS133: AWS Architecting or the equivalent experience (review the CIS133 course objectives for specific required experience).

CLD331

AWS Security Foundations

4 Semester Credits

Course Description

This course covers all the topics related to the AWS Certified Security – Specialty Exam. The topics covered include the AWS Identity Access Management, Logging and Monitoring, Infrastructure Security and Data Protection with VPCs.

Prerequisites:

Completion of CIS133: AWS Architecting or the equivalent experience (review the CIS133 course objectives for specific required experience).

CLD332

Microsoft Azure Security Technologies

4 Semester Credits

Course Description

This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications, and security operations. Topics include Azure Active Directory, Azure AD Identity Protection, Azure AD Privileged Identity Management, Perimeter Security, Network Security, Host Security, Container Security, Key Vault, Application Security, Storage Security, Database Security, Azure Monitor, Azure Security Center, and Azure Sentinel.

Prerequisites:

Completion of CIS131: Azure Cloud Administration or equivalent experience (review the CIS131 course objectives for specific required experience).

CLD333

AWS Databases

4 Semester Credits

Course Description

This course covers all the topics related to the AWS Certified Database – Specialty Exam. Topics covered include the AWS Database Design,

Deployment and Migration, Management and Operations, Monitoring and Troubleshooting and Database Security.

Prerequisites:
Completion of CIS133 or equivalent experience (review the CIS133 course objectives for specific required experience).

CLD334

AWS Developing

4 Semester Credits

Course Description

This course covers all the topics related to the AWS Certified Developer Associate Exam. Topics covered include the AWS Cloud API, Encryption on AWS, Deployment as Code and Serverless Compute.

This course is designed to help students gain technical expertise in development with cloud technologies. The curriculum is delivered through instructor-led or digital lectures, demos, activities, knowledge checks, and hands-on labs. Throughout the course, students will explore a scenario that provides opportunities to build a variety of infrastructures through a guided, hands-on approach. Students have access to lecture materials, online knowledge checks, hands-on labs, and a discount voucher for an AWS Certification exam.

This course helps you to prepare for the AWS Cloud Developer – Associate exam. More details about the exam are in the Bridging to Certification module.

Prerequisites:
Completion of CIS133: AWS Architecting or equivalent experience (review the CIS133 course objectives for specific required experience).

CLD335

Google Cloud Engineer

4 Semester Credits

Course Description

This course covers all of the topics related to the Google Cloud Certified Associate Cloud Engineer Exam. Topics covered include the AWS Database Design, Deployment and Migration, Management and Operations, Monitoring and Troubleshooting and Database Security.

Prerequisites:
Completion of CIS133: AWS Architecting or equivalent experience (review the CIS133 course objectives for specific required experience).

SEC340A

Certified Ethical Hacker, Part 1

4 Semester Credits

Course Description

This class will immerse the student into an interactive environment where they will be shown how to scan, test, hack and secure their own systems. The lab intensive environment gives each student in-depth knowledge and practical experience with the current essential security systems. Students will begin by understanding how perimeter defenses work and then be led into scanning and attacking their own networks. No real network is harmed. Students then learn how intruders escalate privileges and what steps can be taken to secure a system. Students will also learn about Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation.

Prerequisites:
Completion of CIS120B: Cybersecurity Fundamentals, Part 2.

SEC340B

Certified Ethical Hacker, Part 2

4 Semester Credits

Course Description

This class will immerse the student into an interactive environment where they will be shown how to scan, test, hack and secure their own systems. The lab intensive environment gives each student in-depth knowledge and practical experience with the current essential security systems. Students will begin by understanding how perimeter defenses work and then be led into scanning and attacking their own networks. No real network is harmed. Students then learn how intruders escalate privileges and what steps can be taken to secure a system. Students will also learn about Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation.

Prerequisites:
Completion of SEC340A: Certified Ethical Hacker, Part 1.

SEC350A

Advanced Network Security CISSP, Part 1

4 Semester Credits

Course Description

Network security requires an understanding of the technical concepts and the managerial concepts of cybersecurity. The Certified Information Systems Security Professional (CISSP) exam will test your technical, and managerial, knowledge in cybersecurity to meet today's demand for knowledgeable professionals. Candidates for the CISSP exam are typically network security professionals and system administrators with at least four years of direct work experience in two or more of the ten test domains. As the first ANSI ISO accredited credential in the field of information security, CISSP certification provides information security professionals with an objective measure of competence and a globally recognized standard of achievement. SEC350A is part one of a two-part course to help prepare you for the rigors of the CISSP exam and the world of advanced cybersecurity threats.

Prerequisites:
Completion of CIS120B: Cybersecurity Fundamentals, Part 2.

SEC350B

Advanced Network Security CISSP, Part 2

4 Semester Credits

Course Description

This course represents the 2nd half of a two-part course that focuses on preparing for the CISSP Certification and career of IS/IT Cyber Security management professional. The CISSP Certification is administered by the International Information Systems Security Certification Consortium or (ISC). (ISC) promotes the CISSP exam as an aid to evaluating personnel performing information security functions. Candidates for this exam are typically network security professionals and system administrators with at least five years of direct work experience in two or more of the eight test domains. As the first ANSI ISO accredited credential in the field of information security, the Certified Information Systems Security Professional (CISSP) certification provides information security professionals with not only an objective measure of competence, but a globally recognized standard of achievement. Successfully completing SEC350A and SEC350B will help candidates to prepare for this exam.

Prerequisites:

Completion of SEC350A: Advanced Network Security CISSP, Part 1.

CSP400

Cloud Security Project

4 Semester Credits

Course Description

This course provides an overview of Cloud security architecture. Students will learn the principles and concepts of Cloud security, including how to evaluate and choose cloud services for the organization. The course delves into native cloud security controls, including asset management and protection, identity and access management, vulnerability, network security, and incident response management. Students will learn how to create a Cloud security policy and be able to predict security challenges.

Prerequisites:

Cloud (CLD) Track - Completion of:

- CIS130 – Azure Cloud Fundamentals
- CIS131 – Azure Cloud Administration
- CIS132 – AWS Foundations
- CIS133 – AWS Architecting
- CLD330 – AWS Operations
- CLD331 – AWS Security Foundations
- CLD332 – Microsoft Azure Security Technologies
- CLD333 – AWS Databases
- CLD334 – AWS Developing
- CLD335 – Google Cloud Engineer

Cybersecurity (SEC) Track - Completion of:

- CIS133 – AWS Architecting
- CLD331 – AWS Security Foundations
- SEC340A – Certified Ethical Hacker, Part 1
- SEC340B – Certified Ethical Hacker, Part 2
- SEC350A – Advanced Network Security CISSP, Part 1
- SEC350B - Advanced Network Security CISSP, Part 2

CCS101

Security Operations

4 Semester Credits

Course Description

This course delves into the critical aspects of security operations, equipping students with the knowledge and skills to defend modern networks. You'll learn how to analyze system and network architectures for security vulnerabilities and identify indicators of malicious activity in various scenarios. Through hands-on exercises, you'll utilize industry-standard tools and techniques to detect and respond to threats, differentiate between threat intelligence and hunting, and implement effective vulnerability management practices. Furthermore, the course covers incident response methodologies, emphasizing preparation, handling, post-incident activities, and the crucial role of clear communication and reporting in both vulnerability and incident management. This information can be applied towards your efforts to pass the CompTIA Cybersecurity Analyst (CySA+) certification.

Prerequisites:

Completion of CIS120B: Cybersecurity Fundamentals, Part 2.

CCS102

Governance, Risk, and Compliance

4 Semester Credits

Course Description

This course provides a comprehensive overview of governance, risk management, and compliance (GRC) principles, preparing students for the Certified in Governance, Risk, and Compliance (CGRC) certification. Students will explore key topics such as security and privacy foundations, control framework implementation, risk assessment, audit processes, and continuous compliance strategies. Through practical applications and exam-focused review materials, this course equips learners with the skills to navigate regulatory requirements and implement effective risk management frameworks. By the end, students will be prepared to apply GRC best practices in real-world organizational settings. This information can be applied towards your efforts to pass the ISC2 CGRC – Governance, Risk and Compliance Certification.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

CCS200A

Penetration Testing, Part 1

4 Semester Credits

Course Description

This course covers the foundational stages of penetration testing, including pre-engagement tasks, communication protocols, and testing methodologies. Students will learn to gather and analyze information through reconnaissance, enumeration, and vulnerability discovery. Hands-on scenarios reinforce the use of tools, scripting, and reporting techniques, while also addressing physical security and remediation planning. This information can be applied towards your efforts to pass the CompTIA PenTest+ certification.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

CCS200B

Penetration Testing, Part 2

4 Semester Credits

Course Description

This course builds on foundational penetration testing skills by focusing on exploitation techniques and post-engagement activities. Students will perform network, application, cloud, wireless, and social engineering attacks using appropriate tools. The course also covers scripting for automation, persistence, lateral movement, data exfiltration, and system cleanup. Hands-on scenarios reinforce practical skills in simulating real-world attack chains. This information can be applied towards your efforts to pass the CompTIA PenTest+ certification.

Prerequisites:

Completion of CCS200A: Penetration Testing, Part 1.

CCS201

AI Security Foundations

4 Semester Credits

Course Description

This course explores the integration of artificial intelligence (AI) in cybersecurity, focusing on practical methods for threat detection, behavior analysis, and automated security solutions. Students will examine AI-driven approaches to malware detection, network intrusion analysis, and fraud prevention. Hands-on exercises and real-world case studies will provide experience in designing and implementing AI-based security solutions. By the end of the course, students will understand how to leverage AI techniques to enhance cybersecurity defenses and mitigate emerging threats. This information can also be applied to the students' efforts to pass the CompTIA SecAI+ certification.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

OCI200

Oracle Cloud Infrastructure and Database

4 Semester Credits

Course Description

This course provides in-depth understanding of how to manage the Oracle database on-premises and in the cloud. Students learn how to keep databases stable, tuned, and running. The course covers administrative tasks specific to cloud environments, including the Oracle Autonomous Database running in the Oracle Cloud Infrastructure. Topics covered include data optimization, migration, troubleshooting, and how to use tools for analytics. Upon completion of this course students gain skills as an Oracle Database administrator to support data management and cloud computing.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

OCI201

Oracle Cloud Solution Platform and Edge

4 Semester Credits

Course Description

This course is the first of a two-part course that provides the latest approach to designing, building, deploying and managing applications. Students learn how to take advantage of utility computing of the Oracle Cloud Infrastructure (OCI), emphasizing automation, elasticity, and resilience. The course teaches how to run applications efficiently and securely, and how to manage the infrastructure using native cloud services. This course covers infrastructure automation and cloud native services. It provides an understanding of container engines and kubernetes. Upon completion of this course, students will have a solid understanding of the OCI infrastructure.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

OCI202

Oracle Cloud Governance and Administration

4 Semester Credits

Course Description

This course is the second of a two-part course that provides the latest approach to designing, building, deploying and managing applications. Students learn how to take advantage of utility computing of the Oracle Cloud Infrastructure (OCI), emphasizing automation, elasticity, and resilience. The course teaches how to run applications efficiently and securely, and how to manage the infrastructure using native cloud services. This course covers securing workloads and infrastructure as well as serverless platforms and applications. It provides an understanding of devops and deployment automation. Upon completion of this course, students will have a solid understanding of the OCI infrastructure.

Prerequisites:
Completion of OCI201: Oracle Cloud Solution Platform and Edge.

OCI203

Oracle Cloud Advanced Topics

4 Semester Credits

Course Description

This course covers advanced topics on applying object-relational techniques to large-scale applications or complex schemas. Students will gain an understanding of storage of objects, XML and creating indexes on typeids or attributes. They will learn how to use both system-defined and user-defined constructors and aggregate functions. This course also covers how locators improve the performance of nested tables.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

NET381A

Implementing and Operating Cisco Enterprise Core Technologies (ENCOR), Part 1

4 Semester Credits

Course Description

This course represents the 1st half of a two-part class associated with the CCNP and CCIE Enterprise Certifications. The students will gain knowledge of Implementing Cisco Enterprise Network Core Technologies including dual stack (IPv4 and IPv6) architecture, virtualization, infrastructure, network assurance, security and automation. This course helps students to prepare for the ENCOR 350-401 exam.

Prerequisites:
Students must have skills and knowledge required from CIS270A CCNA Part 1 and CIS270B CCNA Part 2 or equivalent.

NET381B

Implementing and Operating Cisco Enterprise Core Technologies (ENCOR), Part 2

4 Semester Credits

Course Description

This course represents the 2nd half of a two-part course associated with the CCNP and CCIE Enterprise Certifications. The students will gain knowledge of Implementing Cisco Enterprise Network Core Technologies including dual stack (IPv4 and IPv6) architecture, virtualization, infrastructure, network assurance, security, and automation. This course helps students to prepare for the ENCOR 350-401 exam.

Prerequisites:
Students must have skills and knowledge required from NET381A Implementing and Operating Cisco Enterprise Core Technologies (Encore) Part 1.

NET382A

Implementing Cisco SD-WAN Solutions, Part 1

4 Semester Credits

Course Description

This course represents the 1st half of a two-part class for Implementing Cisco SD-WAN Solutions (SDWAN300) This course provides in depth training on how to design, deploy, configure, and manage your Cisco Software-Defined WAN (SD-WAN) solution in a large-scale live network, including how to migrate from legacy WAN to SD-WAN. Students will learn best practices for configuring routing protocols in the data center and the branch, as well as how to implement advanced control, data, and application-aware policies.

Prerequisites:
Students must have the skills and knowledge required from NET381A & B – Implementing Operating Cisco Enterprise Core Technologies (Encore) Part 1 and Part 2 or equivalent. In addition, students should have the following knowledge and skills before attending this course:

- Strong understanding of enterprise wide area network design.
- Strong understanding of routing protocol operation, including both interior and exterior routing protocol operation.
- Familiarity with Transport Layer Security (TLS) and IP Security (IPSec).
- General understanding of network fundamentals.
- Completion of the Cisco SD-WAN Operation and Deployment (ENSDW) course or equivalent experience.
- Knowledge of Software-Defined Networking (SDN) concepts as applied to large-scale live network deployments.
- Students must have the skills and knowledge required from CCNP ENCORE and CCNP ENARSI.

NET382B

Implementing Cisco SD-WAN Solutions, Part 2

4 Semester Credits

Course Description

This course represents the 2nd half of a two-part class for Implementing Cisco SD-WAN Solutions (SDWAN300). This course provides in-depth training on how to design, deploy, configure, and manage your Cisco Software-Defined WAN (SD-WAN) solution in a large-scale live network, including how to migrate from legacy WAN to SD-WAN. The course also covers SD-WAN deployment and migration options, placement of controllers, and how to deploy and replace edge devices, and how to configure Direct Internet Access (DIA) breakout.

Prerequisites:
Students must have the skills and knowledge required from NET382A – Implementing Cisco SD-WAN Solutions Part 1. In addition, students should have the following knowledge and skills before attending this course:

- Strong understanding of enterprise wide area network design.

- Strong understanding of routing protocol operation, including both interior and exterior routing protocol operation.
- Familiarity with Transport Layer Security (TLS) and IP Security (IPSec).
- General understanding of network fundamentals.
- Completion of the Cisco SD-WAN Operation and Deployment (ENSDW) course or equivalent experience.
- Knowledge of Software-Defined Networking (SDN) concepts as applied to large-scale live network deployments.
- Students must have the skills and knowledge required from CCNP ENCORE and CCNP ENARSI.

NET383A

Implementing Cisco Enterprise Routing & Services, Part 1

4 Semester Credits

Course Description

This course represents the 1st half of a two-part class that will focus on the implementation and troubleshooting of advanced routing technologies and services including Layer 3, VPN services, infrastructure security, infrastructure services, and infrastructure automation. This course will help prepare students to take the CCNP Enterprise and Cisco Certified Specialist - Enterprise Advanced Infrastructure Implementation certifications.

Prerequisites:

Completion of NET381: Implementing Operating Cisco Enterprise Core Technologies (Encore) and a general understanding of network fundamentals, how to manage network devices, basic knowledge of how to implement LANs, how to secure network devices, and finally, basic knowledge of network automation.

NET383B

Implementing Cisco Enterprise Routing & Services, Part 2

4 Semester Credits

Course Description

This course represents the 2nd half in a two-part class for Implementing Cisco Enterprise Routing and Services, (ENARSI 300-410). This course will focus on the implementation and troubleshooting of advanced routing technologies and services including Layer 3, VPN services, infrastructure security, infrastructure services, and infrastructure automation. This course will help prepare students to take the CCNP Enterprise and Cisco Certified Specialist - Enterprise Advanced Infrastructure Implementation certifications.

Prerequisites:

Completion of NET383A: Implementing Cisco Enterprise Routing and Services and a general understanding of network fundamentals, how to manage network devices, and how to secure network devices. Also, a basic knowledge of how to implement LANs and network automation.

NET400

NET400 Networking Senior Project

4 Semester Credits

Course Description

This course will culminate in the application of classroom knowledge and skills in computer-based technologies to solve real-world problems and to develop research and project management skills. This course focuses on high behavior of networks planning, designing, implementing, and testing. It will cover network architectures, protocols, and performance. Students will work on software and hardware, using available network devices as part of a physical network or simulating the behavior of a network on a network simulator.

NET400 has several goals: To learn about network fundamentals; to work on network designing; to incorporate various topics such as IP connectivity, Network Security fundamental and learning the process of planning a project to completion.

The objective towards meeting these goals is requiring students to design and realize a modest local area network and or Wide area Network with High level of Redundancy, Availability, and Scalability.

This course encourages student enthusiasm, understanding of network operation (on the routing and switching level), student appreciation of the need for thorough testing, initiative in cooperatively troubleshooting the network, and student success in demonstrating functioning networks. The course will integrate many technical topics that students have previously studied. The project goal of designing a network is realistic and the project is modest in terms of necessary equipment and cost.

Prerequisites:

Completion of the following courses:

- NET381A Implementing and Operating Cisco Enterprise Core Technologies (ENCOR) 1
- NET381B Implementing and Operating Cisco Enterprise Core Technologies (ENCOR) 2
- NET382A Implementing Cisco SD-WAN Solutions 1
- NET382B Implementing Cisco SD-WAN Solutions 2
- NET383A Implementing Cisco Enterprise Routing and Services 1
- NET383B Implementing Cisco Enterprise Routing and Services 2

Software Development

ADM300A

Business Programing C#, Part 1

4 Semester Credits

Course Description

This course introduces students to using Visual Studio IDE to develop Windows Forms applications, focusing on the skills for designing forms and entering code. The course covers a professional subset of the C# language, including all the skills for developing substantial applications.

That includes working with numbers, strings, and dates; coding control structures, methods, and event handlers; and working with arrays and collections. It also comprises the best techniques for handling exceptions, validating data, and debugging applications. The students will obtain professional skills for creating and using classes, focusing on the classes and methods available from the .NET platform.

Prerequisites:

Students have completed CIS280B with a satisfactory grade and have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh and understand how to download and install programs found on the Internet. Having prior coding experience with any programming language along with databases is required.

ADM300B

Business Programing C#, Part 2

4 Semester Credits

Course Description

This course is a professional subset of the C# language, including all the skills for developing substantial applications. That includes working with LINQ, database programming, entity framework, ADO.NET, DataGridView control methods, and event handlers, and working with arrays and collections. Upon completing this course, the students will obtain professional skills for creating database-driven webpages from the .NET platform.

Prerequisites:

Students have completed ADM300A with a satisfactory grade and have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh and understand how to download and install programs found on the Internet. Prerequisite ADM300A.

ADM301A

Application Development with ASP.NET Core, Part 1

4 Semester Credits

Course Description

This course material will be on key ASP.NET Core components, including MVC for HTML generation, ASP.NET Identity, MCV controllers and Views with Razor Syntax, and more including Bootstrap ASP.NET Core code for implementing business logic and data transformations. Handling configuration, routing, controllers, views, and common tasks (including posting forms and presenting data). Upon successful completion of this course the students will be able to create custom business web-applications.

Prerequisites:

Programming experience in Python or any other programming language.

ADM301B

Application Development with ASP.NET Core, Part 2

4 Semester Credits

Course Description

This course is part two over material that will be on key ASP.NET Core components, including MVC for HTML generation, ASP.NET Identity, MCV controllers and Views with Razor Syntax, and more including Bootstrap ASP.NET Core code for implementing business logic and data transformations. Handling configuration, routing, controllers, views, and common tasks (including posting forms and presenting data). Upon successful completion of this course the students will be able to create custom business web-applications.

Prerequisites:

Completion of ADM301A: Application Development with ASP.NET Core, Part 1.

ADM302A

Software Design, Part 1

4 Semester Credits

Course Description

This course is centered on software design techniques utilized in the advancement of complex software systems. The students will learn object-oriented analysis and design (OOA/D) through three iterations of two cohesive, start-to-finish case studies. These case studies introduce key skills, essential OO principles and patterns, UML notation, and best practices. Upon completing this course, the students will apply OOA/D through case studies that demonstrate key OO principles and patterns while also using the UML in their web applications.

Prerequisites:

Programming experience in Python or any other programming language.

ADM302B

Software Design, Part 2

4 Semester Credits

Course Description

This course is centered on software design techniques utilized in the advancement of complex software systems. The students will learn object-oriented analysis and design (OOA/D) through three iterations of two cohesive, start-to-finish case studies. These case studies introduce key skills, essential OO principles and patterns, UML notation, and best practices. Upon completing this course, the students will apply OOA/D through case studies that demonstrate key OO principles and patterns while also using the UML in their web applications.

Prerequisites:

Completion of ADM302A: Software Design, Part 1.

ADM400

Web Programming Senior Project

4 Semester Credits

Course Description

This course provides a hands-on approach to the systems development life cycle (SDLC) with a focus on application development. Students will learn how to plan, analyze, design, implement, and maintain data-driven solutions, aligning them with organizational goals. Key topics include data modeling, system design, maintenance and security. Upon completing this course, students will gain practical experience in building and deploying scalable, secure analytics systems, preparing them for real-world data challenges.

Prerequisites:

Completion of the following courses:

- DAP300A – Python for Data Analysis, Part 1
- DAP300B – Python for Data Analysis, Part 2
- ADM301A – Application Development with ASP.Net Core, Part 1
- ADM301B – Application Development with ASP.Net Core, Part 2
- ADM302A – Software Design, Part 1
- ADM302B – Software Design, Part 2

ASD101A

Python Fundamentals, Part 1

4 Semester Credits

Course Description

This course introduces students to basic concepts in programming and common baseline computer science topics. The focus of the course will be primarily in Python using the IDLE development environment. Students establish a foundational knowledge base and aptitude required for pursuing more advanced computer science studies. Python language concepts like data types, variables, program control, functions, dictionaries, and modules will be presented. Additional topics introduced include text editors, IDEs, compilers, program development workflows and nested loops. Upon completion of the course students will be able to understand how to create, modify, and maintain basic Python programs to provide software-based solutions.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ASD101B

Python Fundamentals, Part 2

4 Semester Credits

Course Description

This course introduces students to essential programming concepts applied to any programming language. From the previous section of this course, ASD101A students should be already familiar with Python language concepts like data types, variables, program control, and functions. This course will introduce the following topics: exceptions, lists, tuples, dictionaries, string operations, sets, classes, and Object-Oriented Programming. Upon completion of the course, students will be able to understand how to create, modify, and maintain Python programs to provide software-based solutions.

Prerequisites:

Completion of ASD101A: Python Fundamentals, Part 1.

ASD102A

Web Development with HTML, CSS, JavaScript, Part 1

4 Semester Credits

Course Description

This course provides an introduction to the fundamentals of two of the most widely adopted technologies in the world today: HTML and CSS. Topics explored include HTML structure, syntax and usage, CSS styling and layout, and website design. Upon completion of the course students will be able to understand how modern websites are built, as well as be able to write their own, and add functionality as found throughout the Internet.

Prerequisites:

Completion of ASD101B: Python Fundamentals, Part 2.

ASD102B

Web Development with JavaScript, jQuery, Part 2

4 Semester Credits

Course Description

This course covers client-side scripting, using JavaScript and jQuery, the classic JavaScript library. The students will learn jQuery skills, including creating slide shows, image swaps, carousels, accordions, and forms. The students will add to their JavaScript skills as they work with date and time objects, exceptions and regular expressions, browser objects, web storage, arrays, maps, and your own objects. In addition, the following concepts will be covered: the module pattern of JavaScript, and ES modules, using Ajax with the Fetch API and Promise objects; and be able to get started with server-side scripting using JavaScript and Node.js. Upon completing this course, the students will master the JavaScript and jQuery skills that every web developer should have.

Prerequisites:

Completion of ASD102A: Web Development with HTML, CSS, JavaScript, Part 1 and ASD101B: Python Fundamentals, Part 2.

ASD103A

Object-Oriented Data Structures Using Python, Part 1

4 Semester Credits

Course Description

This course introduces students to intermediate concepts in programming and computer science topics. The focus of the course will be primarily Python programming using an IDE. Students build on previously solidified knowledge and gain leverage for better understanding of advanced computer science studies. Python concepts like classes, linked list, stack, searching and sorting algorithms, objects, constructors, inheritance, and polymorphism will be presented. Upon completion of the course students will be able to understand how to create, modify, and maintain Python programs to provide Object-Oriented Design with an emphasis on problem-solving, theory, and software engineering principles.

Prerequisites:

Completion of ASD101B: Python Fundamentals, Part 2.

ASD103B

Object-Oriented Data Structures Using Python, Part 2

4 Semester Credits

Course Description

This course introduces students to intermediate concepts in programming and computer science topics. Students build on previously solidified knowledge and gain leverage for better understanding of advanced computer science studies. Python concepts like queue, linked list, list, trees, graph, set and dictionary will be presented. Upon completion of the course students will be able to understand how to create, modify, and maintain Python programs to provide Object-Oriented Design with an emphasis on problem-solving, theory, and software engineering principles.

Prerequisites:
Completion of ASD103A: Object-Oriented Data Structures using Python, Part 1.

ASD104A
Web Applications with PHP and MySQL, Part 1
4 Semester Credits
Course Description
This course introduces students to web development and dynamic concepts in building custom applications that implement the MVC pattern. The primary focus is on PHP and MySQL, two of today's most popular open-source tools for server-side web programming. The student will learn to build and design relational databases and MySQL syntax. Upon completion of the course, students will be able to understand how to use PHP syntax and develop, modify, and maintain PHP applications to provide solutions and apply MVC patterns.

Prerequisites:
Completion of ASD102B: Web Development with JavaScript, jQuery, Part 2.

ASD104B
Web Applications with PHP and MySQL, Part 2
4 Semester Credits
Course Description
This course offers content on developing web pages using user-defined functions, cookies, sessions, arrays, and Object-Oriented Design with an emphasis on software engineering principles and how to build dynamic database-driven websites with PHP and MySQL and take software development skills to the professional level. Upon completing this course, the students will master the PHP and MySQL skills every web developer should have.

Prerequisites:
Completion of ASD104A: Web Applications with PHP and MySQL, Part 1.

ASD105
Linux Administration and Shell Scripting
4 Semester Credits
Course Description
This course focuses on the Linux operating system. It covers such topics and skills such as overview of Linux, features, troubleshooting tools and tips, installation, editions, and settings. In addition, the students will learn about Shell Scripting for common technical tasks.

Prerequisites:
Completion of ASD101B: Python Fundamentals, Part 2.

ASD106
Windows & PowerShell
4 Semester Credits
Course Description
This course focuses on the Windows operating system. It covers such topics and skills such as Overview of Windows, features and editions, troubleshooting tools and tips, installation and upgrade process, editions, and settings. In addition, the students will learn about PowerShell language for common technical tasks.

Prerequisites:
Completion of ASD101B: Python Fundamentals, Part 2.

ASD107A
Foundations of Software Engineering, Part 1
4 Semester Credits
Course Description
This course introduces the basics of Software Engineering and how to select the most appropriate develop process model, make a selection for the most appropriate development methodology/model, understand and be able to apply the Unified Process Model, learn about the human aspects of software engineering (e.g., team concerns/issues), gathering software requirements and be able to create project documentation. In addition, students will have an opportunity to work in a team to design and implement a software application while enhancing their software development skills. Upon completion of this course, the student will be able to contribute to a custom application and organize the basics of organizing a projects development lifecycle, application of UML.

Prerequisites:
Completion of ASD104B: Web Applications with PHP and MySQL, Part 2.

ASD107B
Foundations of Software Engineering, Part 2
4 Semester Credits
Course Description
This course introduces the basics of Software Engineering related to project planning and estimation, requirements analysis, program design, construction, testing, maintenance and implementation, and software quality. Upon completion of the course the students will be able to enhance their software engineering and programming style by applying periodic reviews, documentation, thorough testing, and ease of maintenance. In addition, students will have an opportunity to work in a team to design and implement a software application while enhancing their software development skills. Upon completion of this course, the student will be able to create a custom application for their portfolio.

Prerequisites:
Completion of ASD107A: Foundations of Software Engineering, Part 1.

ASD150
Operating System Concepts
4 Semester Credits
Course Description
This course provides a thorough guided exploration of both the theoretical and practical ideas involved in the production of modern operating systems. Operating system concepts like computer system organization and architecture, system calls, process management, threads, scheduling, file systems, system I/O, and distributed systems will be presented. Upon completion of the course students will be in a position to understand how the programs they write influence and likewise are influenced by the entirety of a modern computer system.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ASD170

Front-End Development with HTML and CSS

4 Semester Credits

Course Description

This course provides an introduction to the fundamentals of two of the most widely adopted technologies in the world today: HTML and CSS. Topics explored include HTML structure, syntax, and usage, CSS styling and layout, and website design. Upon completion of the course students will be able to understand how modern websites are built, as well as be able to write their own, and add functionality as found throughout the Internet.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ASD190

Internet Architecture with PHP and other OSS

4 Semester Credits

Course Description

This course covers core and advanced skills involved in using PHP and MySQL to design and support dynamic web sites according to established standards. The scope of this course supports today's business needs and allows students to learn practical skills to create database-enabled web applications. Advanced PHP programming concepts enable web developers to implement and maintain dynamic databases and securely process web forms of various complexity using PHP programming and MySQL database environment. Moreover, the course introduces other popular Open Source Software (OSS) solutions.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ASD210

Intermediate Python

4 Semester Credits

Course Description

This course introduces core programming basics—including data types, control structures, algorithm development, and program design with functions—via the Python programming language. The course discusses the fundamental principles of Object-Oriented Programming, as well as in-depth data and information processing techniques. Students will problem solve, explore real-world software development challenges, and create practical and contemporary applications using graphical user interfaces, graphics, and network communications.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade. This prerequisite is waived for Certificate Program students.

ASD215

C# Business Programming

4 Semester Credits

Course Description

This course introduces students to how to use Visual Studio IDE to develop Windows Forms applications, focusing on the skills for designing forms and entering code. The course covers a professional subset of the C# language, including all the skills for developing substantial applications. That includes working with numbers, strings, and dates; coding control structures, methods, and event handlers; and working with arrays and collections. It also comprises the best techniques for handling exceptions, validating data, and debugging applications. The students will obtain professional skills for creating and using classes, focusing on the classes and methods available from the .NET platform.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade. This prerequisite is waived for Certificate Program students.

ASD220

Linux Administration and Shell Scripting

4 Semester Credits

Course Description

This course introduces students to Linux shell scripting. Scripting in the Linux shell is used to automate various repetitive tasks and processes, that system administrators deal with on a daily basis. Often, performing simple tasks, such as file management, can be done more quickly from the command line than from a fancy graphical interface. Students learn basic shell scripting techniques and develop scripting skills needed for Unix/Linux System Administration courses, which also include how to analyze, design, write, test, and debug shell scripts.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD225

Windows Development and Administration

4 Semester Credits

Course Description

This course introduces students' fundamentals of Windows PowerShell command line interface and scripting language—one step at a time. This is a practical, hands-on course with exercises, timesaving tips, and hands-on sample scripts for performing administrative tasks on both local and remote Windows systems.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD227

iOS Programming

4 Semester Credits

Course Description

Objective-C and iOS Programming: A Simplified Approach to Developing Apps for the Apple iPhone and iPad provides a basic foundation in the

exciting field of iOS app development. With the advent of smartphones, applications have shifted to the mobile platform, promising ease and practicality, and a huge potential for further growth. So, it makes sense for programmers to develop expertise in this area to increase their marketability. As the popularity of Apple devices continues to grow, professionals trained in iOS programming will be especially employable.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD230

Open Source Servers

4 Semester Credits

Course Description

This course introduces students to open source server technology, setup, configuration scripting, and various customization tasks for server resources and services via administrative tools and scripting.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD235

SQL Server, T-SQL, and PL/SQL

4 Semester Credits

Course Description

This course provides an in-depth treatment of Microsoft's relational database management system, SQL Server, as well as Microsoft's proprietary flavor of SQL technology, T-SQL and PL/SQL. The course material builds upon prior coursework with SQL, and explores topics including T-SQL queries, query tuning, multi-table queries, grouping, pivots, and recursive queries. Upon completion of the course students will be confident performing detailed and complex SQL and RDBMS operations in a Microsoft environment.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD247

Android App Development

4 Semester Credits

Course Description

This course introduces students to concepts in Android programming including GUI design and layout, actions, views, and other concepts central to Android apps. Students build upon the foundations provided in previous courses, developing their understanding of Android specific technologies including fragments, toasts, the asset manager, and array adapters. Upon completion of the course students will be able to understand how to create and modify production-quality Android apps.

Prerequisites:
Students must have completed ASD190 and/or ASD210 with a satisfactory grade.

ASD255

Web Development with ASP.NET

4 Semester Credits

Course Description

This course provides an introduction to Microsoft's web development technology, ASP.NET MVC. The course material focuses on MVC patterns, including models, views, and controllers, we well as navigation, URL routing, actions, and validation. Other topics include MVC website management, administration, and security. A thorough understanding of C# and the .NET framework is foundational and required for the acquisition of these more applied concepts. Upon completion of the course students will be able to plan and construct an entire ASP.NET MVC website.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD261

Application Security

4 Semester Credits

Course Description

This course will cover DoS attacks, viruses, security policy, scams, spyware, cybercrime and terrorism, and network security. The students become acquainted with the threats posed to a network, as without a realistic idea of what dangers might affect the systems, it cannot be protected effectively. The students will acquire a basic understanding of the terminology used by security professionals and those seeking to compromise security.

Prerequisites:
Programming experience in Python or any other programming language.

ASD262

Java Programming

4 Semester Credits

Course Description

Students will begin by mastering the fundamentals of Java programming, including coding, variables, control structures, and handling arithmetic operations. They'll then progress to advanced topics like coding methods, exception handling, testing, debugging, and working with classes, objects, arrays, and file input/output. The course culminates in an exploration of object-oriented programming, emphasizing inheritance and polymorphism, empowering students to design and create complex Java applications.

Prerequisites:
Programming experience in Python or any other programming language.

ASD263

SQL and Database Management

4 Semester Credits

Course Description

This course empowers students with essential SQL skills and the ability to design and manage relational databases. Beginning with an introduction

to SQL and client/server systems, the course covers data retrieval, updates, and advanced SQL skills, including working with views, scripts, stored procedures, functions, and triggers. It equips students with the knowledge and practical skills needed for effective SQL database management and efficient database design.

Prerequisites:
Programming experience in Python or any other programming language.

ASD264

Coding with AI

4 Semester Credits

Course Description
This course explores how to use GitHub Copilot in Visual Studio Code to enhance software development. Students learn to generate, edit, and refine code; apply prompt engineering techniques; validate and refactor code using doctests; and build responsive websites with HTML, CSS, and navigation. The course also covers generating and testing SQL queries, creating database schemas, and applying best practices for project organization, documentation, testing, and code quality.

Prerequisites:
Programming experience in Python or any other programming language.

ASD265

Cloud Computing with Microsoft Azure

4 Semester Credits

Course Description
This course introduces students to cloud hosting and services from the perspective of Microsoft Azure. This course is unique in that we step away from programming and focus on these technologies more from an IT perspective. Students will learn about configuration and management of Azure, web hosting, SQL in the cloud, and monitoring and diagnostics. Upon completion of the course students will be able to host and manage Microsoft Cloud Services.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

ASD290

Ruby on Rails Framework

4 Semester Credits

Course Description
This course explores Ruby and Ruby's web development framework, Ruby on Rails. Topics covered include Ruby syntax, variables, control structures, methods, classes, blocks, and DSLs. Additionally, the course focuses on Ruby on Rails topics, including static pages, layouts, models, authentication, CRUD patterns, accounts and passwords, and deployment. Upon completion of the course students will be able to design and build Ruby on Rails websites for use in production environments.

Prerequisites:
Students must have completed ASD190 with a satisfactory grade.

CAI101

Python for Data Science

4 Semester Credits

Course Description
This course provides a solid understanding of data science fundamentals using Python. Students will gain an in-depth understanding of data organization and operations on data frames, including using logical operations and pivoting. Upon completing this course, students will have a solid understanding of data science and quantitative computational methods.

Prerequisites:
Completion of ASD101A: Python Fundamentals, Part 1.

CAI102

Introduction to Predictive Artificial Intelligence

4 Semester Credits

Course Description
This course is an introduction to Artificial Intelligence (AI). Students will gain an understanding of the latest trends in artificial intelligence. The course covers the state of the art in AI research, including machine learning, natural language processing, computer vision, and robotics. The course covers emerging trends and applications that are likely to shape future AI innovations. Students will also learn practical uses for business applications and how to leverage the power of AI to create new products, services and opportunities. Students will gain an understanding of the impact of this transformative technology in our lives in the coming years.

Prerequisites:
Completion of ASD101B: Python Fundamentals, Part 2.

CAI103

Natural Language Processing and Agentic AI

4 Semester Credits

Course Description
This course covers Natural Language Processing for Artificial Intelligence (AI) applications and Agentic AI Systems. Students will learn how to train and scale large models using a Python-based deep learning library. Students will gain an understanding of how these transformers have been used to improve Google Search queries and chatbots. Students will also be introduced to Agentic AI systems, which can operate autonomously, making decisions and performing tasks to achieve specific goals without constant human intervention.

Prerequisites:
Completion of ASD101B: Python Fundamentals, Part 2.

CAI104

Introduction to Generative Artificial Intelligence

4 Semester Credits

Course Description

This course provides an in-depth understanding of Generative AI concepts. This course leverages Amazon Web Services (AWS) to apply Gen AI to various business and technical scenarios. This course covers the lifecycle of a Gen AI project, from use case definition, model selection, and fine-tuning to more advanced topics like retrieval-augmented generation, reinforcement learning from human feedback, and model quantization optimization. Upon completing this course, students will have a solid theoretical foundation and practical guidance for implementing Gen AI in real-world applications.

Prerequisites:

Completion of CAI102: Introduction to Predictive Artificial Intelligence.

CAI105

Azure AI Fundamentals

4 Semester Credits

Course Description

This course prepares learners for the Microsoft Azure AI Fundamentals certificate. Throughout the course, learners will gain a solid understanding of cloud computing and artificial intelligence (AI) concepts. They will learn about the different types of machine learning (ML) and the advantages and disadvantages of AI and ML. In addition, learners will gain insights into the principles of responsible AI.

Prerequisites:

Completion of ASD101B: Python Fundamentals, Part 2.

CAI400

Artificial Intelligence and Machine Learning Senior Project

4 Semester Credits

Course Description

This senior project course provides students with an opportunity to apply knowledge and skills gained from previous AI courses to a comprehensive, real-world project. Working individually or in teams, students will design, develop, and present an end-to-end artificial intelligence solution using techniques from data science, predictive modeling, natural language processing, and generative AI. By the end of the course, students will have produced a portfolio-ready AI application that demonstrates their ability to solve complex problems through innovative, data-driven approaches.

Prerequisites:

Completion of the following courses:

- DAP300A: Python for Data Analysis, Part 1
- DAP300B: Python for Data Analysis, Part 2
- CAI102: Introduction to Predictive Artificial Intelligence
- CAI103: Natural Language Processing
- CAI104: Introduction to Generative Artificial Intelligence
- CAI105: Azure AI Fundamentals

DAP300A

Python for Data Analysis, Part 1

4 Semester Credits

Course Description

This course is designed to introduce students to the fundamental concepts and tools of data science using Python, a powerful and versatile programming language. This course covers the essential techniques for data analysis and visualization, focusing on practical applications and hands-on experience.

Prerequisites:

Programming experience in Python or any other programming language.

DAP300B

Python for Data Analysis, Part 2

4 Semester Credits

Course Description

Building on the foundational skills acquired in Part 1, this course looks further into the advanced techniques and tools of data science using Python. Students will explore more sophisticated data manipulation, analysis, and visualization methods, as well as machine learning algorithms. The focus will be on applying these skills to real-world datasets, enabling students to tackle complex data challenges with confidence and precision.

Prerequisites:

Completion of DAP300A: Python for Data Analysis, Part 1.

DAP301A

Business Analytics, Part 1

4 Semester Credits

Course Description

This course introduces the essential concepts and tools of business analytics, focusing on how data can drive smarter decision-making. Students will learn to analyze and visualize data, understand different types of data and probability distributions, and apply statistical methods to draw meaningful insights. With hands-on exercises, the course covers everything from data wrangling and descriptive analytics to effective data visualization and foundational probability concepts. By the end, students will have the skills to interpret data accurately, make informed decisions, and present their findings clearly and effectively in a business context.

Prerequisites:

Completion of DAP300B: Python for Data Analysis, Part 2.

DAP301B

Business Analytics, Part 2

4 Semester Credits

Course Description

This course introduces the essential concepts and tools of business analytics, focusing on how data can drive smarter decision-making. Students will learn to analyze and visualize data, understand different types of data and probability distributions, and apply statistical methods to draw meaningful insights. With hands-on exercises, the course covers everything from data wrangling and descriptive analytics to effective data visualization and foundational probability concepts. By the end, students will have the skills to interpret data accurately, make informed decisions, and present their findings clearly and effectively in a business context.

Prerequisites:
Completion of DAP301A: Business Analytics, Part 1.

DAP302A

R Programming for Data Analysis, Part 1

4 Semester Credits

Course Description

This introductory course provides learners with the foundational R programming skills and essential data analysis techniques needed to work effectively with real-world datasets. In Part 1, students will become familiar with the RStudio environment, understand the core components of the R language, and apply the tidyverse toolkit for initial data exploration. Students will gain the ability to perform descriptive data analysis by creating impactful visualizations, importing and cleaning diverse data sources, and preparing datasets for further analysis. By the end of this course, learners will be able to confidently apply R programming principles and descriptive analysis methods to understand and present complex data.

Prerequisites:
Completion of DAP301B: Business Analytics, Part 2.

DAP302B

R Programming for Data Analysis, Part 2

4 Semester Credits

Course Description

Building on the foundations established in Part 1, this course deepens learners' competence in applying R programming to more advanced analytical scenarios. Students will explore hands-on case studies to strengthen their proficiency, working with real-world datasets such as polling data, wildfire statistics, and basketball shot records. Additionally, they will be introduced to the fundamentals of predictive analysis, learning how to implement linear regression and classification models to forecast future outcomes. Finally, Part 2 covers methods for transforming completed analyses into engaging presentations using R Markdown, ensuring that students can effectively communicate their insights to various audiences. Upon completion, learners will possess the practical skills required to both analyze and clearly present complex data-driven findings.

Prerequisites:
Completion of DAP302A: R Programming for Data Analysis, Part 1.

DAP400

Data Analytics Senior Project

4 Semester Credits

Course Description

This course provides a hands-on approach to the systems development life cycle (SDLC) with a focus on data analytics. Students will learn how to plan, analyze, design, implement, and maintain data-driven solutions, aligning them with organizational goals. Key topics include data modeling, system design, maintenance and security. Upon completing this course, students will gain practical experience in building and deploying scalable, secure analytics systems, preparing them for real-world data challenges.

Prerequisites:
Completion of the following courses:

- DAP300A – Python for Data Analysis, Part 1
- DAP300B – Python for Data Analysis, Part 2
- DAP301A – Business Analytics, Part 1
- DAP301B – Business Analytics, Part 2
- DAP302A – R Programming for Data Analysis, Part 1
- DAP302B – R Programming for Data Analysis, Part 2

MAP300A

Android App Development, Part 1

4 Semester Credits

Course Description

In this course, the students will learn Android tools, mobile development, and best practices needed to start building Android apps. The student will be introduced to a modern approach to object-oriented programming (OOP) and get ready to implement Android apps. Upon completing the course, students can understand Android apps' functions, variables, class implementation, and application mechanisms.

Prerequisites:
Programming experience in Python or any other programming language.

MAP300B

Android App Development, Part 2

4 Semester Credits

Course Description

In this course, the students will learn Android tools, mobile development, and best practices needed to start building Android apps. After completing the course, students can understand Android apps' functions, variables, class implementation, application mechanisms, persistent data storage, animations, and publishing apps to the Google Play Store.

Prerequisites:
Completion of MAP300A: Android App Development, Part 1.

MAP301A

iOS Programming, Part 1

4 Semester Credits

Course Description

Learn the fundamentals of Swift programming and how to write and run code using Swift Playgrounds. Apply conditional statements and logical operators to control program flow and develop debugging skills to identify and fix errors using Xcode's Interface Builder. By the end of the course, you'll build a simple interactive app with basic UI components and event handling in Swift and Xcode.

Prerequisites:
Programming experience in Python or any other programming language.

MAP301B

iOS Programming, Part 2

4 Semester Credits

Course Description

Learn the fundamentals of Swift programming and how to write and run code using Swift Playgrounds. Learn to build iOS apps with Swift! This course covers collections, UIKit, Auto Layout, optionals, and navigation to create dynamic, user-friendly applications. By the end of this course, you will be able to develop iOS applications using Swift, create user-friendly interfaces, manage data efficiently, and implement navigation for multi-screen apps.

Prerequisites:

Completion of MAP301A: iOS Programming, Part 1.

MAP302A

App Testing, Part 1

4 Semester Credits

Course Description

This course covers mobile app testing and quality assurance. Students will learn about portable test planning to automation, as well as testing while ensuring comprehensive coverage. Upon completing this course, the students will create tests that reflect future customers' needs and business models.

Prerequisites:

Programming experience in mobile applications.

MAP302B

App Testing, Part 2

4 Semester Credits

Course Description

This course will continue with mobile application techniques. The student will also develop a custom app and select and implement the best testing tools. Discover both functional and nonfunctional approaches to testing. Address mobile's rapid release cycles. Upon completing this course, the students can create a custom app and apply testing strategies learned in this course.

Prerequisites:

Completion of MAP302A: App Testing, Part 1.

Business Data Analytics

BDA101A

Data Fundamentals, Part 1

4 Semester Credits

Course Description

Data Fundamentals, Part 1 is the first in a two-part series that introduces students to the core concepts and practices of data analytics. Through a structured learning approach, students will develop essential skills in data collection, analysis, and interpretation, laying the groundwork for more advanced study. The knowledge gained in this course can be applied towards your efforts to pass the CompTIA Data+ (Exam DA0-001) certification exam and prepare you for entry-level roles in the data analytics field.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BDA101B

Data Fundamentals, Part 2

4 Semester Credits

Course Description

Data Fundamentals, Part 2 is the second in a two-part series, continuing from BDA101A to further develop students' understanding of data analytics. In this part, students will refine their analytical skills by tackling more complex data scenarios and applying advanced techniques. The course is designed to solidify your ability to confidently manage and interpret data and enhance your readiness for a professional role in data analysis. The knowledge gained can continue to be applied towards your effort to pass CompTIA Data+ (Exam DA0-001) certification exam.

Prerequisites:

Completion of BDA101A: Data Fundamentals, Part 1.

BDA102A

Introduction to Databases, Part 1

4 Semester Credits

Course Description

This course provides an initial exploration into the realm of databases. Students are introduced to the fundamentals of relational databases, the various types of databases, and the evolution of databases from file systems. They delve into the components of a database system and the main functions of a database management system (DBMS). Learners are also introduced to data modeling, the concept of business rules and their influence on database design. The course uncovers the basics of relational database models, the use of relational database operators, data redundancy, and indexing. By the end of the course, students will have a robust understanding of the basics of database structures, DBMS, and foundational elements of database design.

Prerequisites:

Completion of BDA101B: Data Fundamentals, Part 2.

BDA102B

Introduction to Databases, Part 2

4 Semester Credits

Course Description

This course introduces students to relational databases and Structured Query Language (SQL). The focus of the course will be database design concepts. Students acquire foundational understanding of databases, how they are structured, and how transactions are performed on database. SQL language concepts concerning creating, reading, updating, and deleting data will be presented. Additional topics introduced include data types, tables, keys, relationships, functions, indexes, views, stored

procedures, and optimization and replication. Upon completion of the course students will be able to understand how to create, modify, and maintain databases.

Prerequisites:
Completion of BDA102A: Introduction to Databases, Part 1.

BDA103A

Introduction to Data Visualization, Part 1

4 Semester Credits

Course Description

This course provides a comprehensive introduction to the intriguing world of data visualization. The course primarily focuses on the concepts and techniques essential for transforming raw data into insightful visual narratives. Students will gain foundational understanding of the different types of data, how to choose the most appropriate charts and graphs to represent them, and the tools and techniques used to create these visualizations.

Prerequisites:
Completion of BDA102B: Introduction to Databases, Part 2.

BDA103B

Introduction to Data Visualization, Part 2

4 Semester Credits

Course Description

This course continues from BDA103A with a comprehensive introduction to the intriguing world of data visualization. The course primarily focuses on the concepts and techniques essential for transforming raw data into insightful visual narratives. Students will gain foundational understanding of the different types of data, how to choose the most appropriate charts and graphs to represent them, and the tools and techniques used to create these visualizations.

The exploration starts with the basics of analytics and data visualization, and then ventures into the principles of design and color theory that can enhance the clarity and impact of visual presentations. We delve into pre-attentive attributes, Gestalt principles, and decluttering techniques that make visualizations more effective and easier to interpret.

As we progress, we explore how to utilize color effectively to heighten visual impact and improve interpretability. We also delve into advanced techniques to visualize variability and uncertainty in data, drawing on statistical measures and specialized charts.

At the end of the course, students will not only be able to create striking and effective data visualizations but also appreciate the importance of design decisions in conveying clear, persuasive data stories. They will have the knowledge and skills to avoid common pitfalls in visualization design and to choose appropriate visualizations for various types of data and analytical goals.

Prerequisites:
Completion of BDA103A: Introduction to Data Visualization, Part 1.

BDA104

Introduction to Tableau

4 Semester Credits

Course Description

This course introduces students to Tableau, one of the leading data visualization tools in the market. Its importance in today's data-driven world cannot be overstated. As the course progresses, students can expect to acquire valuable skills in data analysis and visualization, developing proficiency in extracting insights and presenting them compelling and intuitively.

Prerequisites:
Completion of BDA103B: Introduction to Data Visualization, Part 2.

BDA105

Introduction to Power BI

4 Semester Credits

Course Description

This course is a high-level introduction to Microsoft's Power BI, a leading tool in business intelligence. Designed to be accessible yet in-depth, the course aims to equip learners with the practical skills needed for data visualization and analytics in a business context. Recognizing data's crucial role in modern decision-making, the course delves into Power BI's functionalities that allow for self-service analytics, thereby democratizing data within an organization. By the end of the course, students can expect to be proficient in navigating the Power BI ecosystem, creating compelling visualizations, and implementing advanced interactivity features, all while understanding best practices in business intelligence. This course offers a mix of theoretical knowledge and hands-on exercises, empowering you to turn raw data into actionable insights.

Prerequisites:
Completion of BDA103B: Introduction to Data Visualization, Part 2.

BDA106A

Project Fundamentals, Part 1

4 Semester Credits

Course Description

This is the 1st part of a two-part course. Students will learn and prepare for general IT project management and prepare for the CompTIA Project+ which is ideal for IT professionals who need to manage smaller, less complex projects as part of their other job duties but still have foundational project management skills. Project+ is versatile because it covers essential project management concepts beyond the scope of just one methodology or framework. Lessons will focus on project management of IT projects with a focus on data building challenges.

Prerequisites:
Completion of BDA104: Introduction to Tableau and BDA105: Introduction to Power BI.

BDA106B

Project Fundamentals, Part 2

4 Semester Credits

Course Description

This is the 2nd part of a two-part course. Students continue learning and preparing for general IT project management and prepare for the CompTIA Project+ which is ideal for IT professionals who need to manage smaller, less complex projects as part of their other job duties but still have foundational project management skills. Project+ is versatile because it covers essential project management concepts beyond the scope of just one methodology or framework. Lessons will focus on project management of IT projects with a focus on data building challenges.

Prerequisites:

Completion of BDA106A: Project Fundamentals, Part 1.

DBA200

Oracle Database Foundations

4 Semester Credits

Course Description

This course is an overview of databases, database architecture, and data modeling. In this course, students learn the terminology of databases and the database administrator's role. They will understand the purpose of entity relationship diagrams, and how they are used to generate physical databases. This course covers how to develop relationships between database elements so that data can be effectively managed. Students will learn how and when to normalize and denormalize databases. Upon completion of this course, students will have a solid understanding of relational databases and how they are used to manage an organization's information.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DBA201

Applied Oracle Database Systems

4 Semester Credits

Course Description

This course is an overview of the Oracle database architecture. Students will learn how to produce high-performing, scalable applications that deliver correct results. This course provides an in-depth look at database features, including tables, indexes, data types, sequences, partitioning, data loading, and temporary tables. Students will learn to identify and effectively resolve application performance issues. They will understand how to architect systems that leverage the full power and feature set of Oracle’s database engine. Upon completion of this course, students will have a solid understanding of Oracle database features and architecture.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DBA202

Oracle Database Design

4 Semester Credits

Course Description

This course is an overview of data and database modeling. In this course, students learn how to create a hierarchical data model and how it maps into a relational database. They will understand the functional dependencies of relational data models, and the different normal forms. This course covers entity-relationship methodology, focusing on the cardinality of relationships in ER models. Students will learn patterns and relationships in ER diagrams. Upon completion of this course, students will have a solid understanding of how data is modeled to manage an organization's information.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DBA203

Oracle Database Programming

4 Semester Credits

Course Description

This course provides in-depth, hands-on experience with the Oracle database programming language, PL/SQL. In this course, students learn how SQL integrates with the PL/SQL language components. They learn how to use control and error handling functions to manipulate data. This course covers advanced topics of procedures and functions. Upon completion of this course, students will have a solid understanding of how to use PL/SQL programming with data in an Oracle database.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

SN200

Introduction to ServiceNow

4 Semester Credits

Course Description

This course introduces students to the core concepts and features of the ServiceNow platform. Students are introduced to navigating a ServiceNow instance and key features including lists, filters, forms, tasks, reporting and the Service Catalog.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

SN201

ServiceNow Administration

4 Semester Credits

Course Description

This course offers an in-depth understanding of the powerful controls available in the base instance, reinforced through comprehensive modules and hands-on labs. These step-by-step labs are designed to help students apply the concepts effectively.

Students will explore the fundamentals of the ServiceNow application, including its definition, application components, and the significance of application scopes and data types. The course delves into the crucial role of reporting, introducing you to development and debugging tools. Students will also analyze ServiceNow's capability to integrate with various third-party applications and data sources.

Additionally, the course covers how to utilize ServiceNow's reporting features to create and distribute reports, providing insights into the current state of instance data, such as the number of open incidents by priority. Students will learn about tools for maintaining data hygiene and the importance of system maintenance to enhance the user experience.

Prerequisites:

Completion of SN200: Introduction to ServiceNow.

SN202

ServiceNow Scripting

4 Semester Credits

Course Description

This course first introduces students to Javascript programming and then explores scripting on the ServiceNow platform. After learning the essentials of Javascript, students dive into client-side scripting, followed by server-side scripting on the ServiceNow platform.

Prerequisites:

Completion of SN200: Introduction to ServiceNow.

SN203

ServiceNow Application Development

4 Semester Credits

Course Description

The ServiceNow Application Development course provides a comprehensive introduction to building and managing applications on the ServiceNow platform. This course is designed for intermediate developers who want to gain practical knowledge and skills in application development within the ServiceNow environment.

Throughout the course, students will learn the core concepts and techniques necessary to develop robust and efficient applications. Students will explore the ServiceNow development environment, understand the key components of an application, and learn how to create, customize, and automate applications using best practices.

Prerequisites:

Completion of SN202: ServiceNow Scripting.

ACC100

Introduction to Corporate Finance

4 Semester Credits

Course Description

This course introduces students to the fundamental principles of corporate finance. Students will learn how to record, classify, and summarize financial transactions, apply the accounting cycle, and prepare basic financial statements. The course also covers key topics such as inventory methods, internal controls, and accounting for receivables and long-term assets. Emphasis is placed on understanding how accounting information is used for decision-making in business environments. This course provides a strong foundation for students pursuing an associate’s degree in accounting and entry-level accounting roles.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ACC101

Computerized Accounting Tools

4 Semester Credits

Course Description

This course introduces students to the design, implementation, and evaluation of accounting information systems. Students will explore how accounting data is collected, processed, and reported to support business decision-making and internal controls. The course covers key topics such as transaction processing, system documentation, database management, and fraud prevention. Emphasis is placed on understanding how technology and information systems support accounting functions in modern organizations. This course prepares students for roles that require knowledge of accounting systems and data management in business environments.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ACC102

Payroll Accounting and Bookkeeping

4 Semester Credits

Course Description

This course introduces students to the fundamental concepts and practices of payroll accounting, focusing on the calculation and reporting of employee earnings and deductions. Students will learn how to compute gross pay, including regular and overtime wages, and apply

federal and state withholding requirements. The course also covers payroll taxes, employer responsibilities, and record-keeping requirements. Emphasis is placed on preparing payroll registers, employee earnings records, and required payroll reports. This course provides practical skills needed to manage payroll processes accurately in a business environment.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ACC103

Fundamentals of Taxation

4 Semester Credits

Course Description

This course introduces students to the fundamental concepts of income taxation, focusing on individual taxpayers and basic tax principles. Students will learn how to determine filing status, identify taxable and nontaxable income, and apply standard deductions and credits. The course also covers gross income inclusions and exclusions, dependency rules, and an overview of tax compliance requirements. Emphasis is placed on understanding how tax laws are applied to real-world situations. This course provides a foundation for preparing basic individual income tax returns.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ACC104

Auditing Fundamentals

4 Semester Credits

Course Description

This course introduces students to the principles and practices of auditing with a focus on a risk-based approach. Students will learn how auditors assess risk, evaluate internal controls, and gather evidence to support audit opinions. The course covers audit planning, professional ethics, fraud detection, and the role of auditing in ensuring the reliability of financial statements. Additional topics include audit procedures, sampling techniques, and reporting findings. Emphasis is placed on applying auditing concepts to real-world business scenarios to support informed decision-making and compliance.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM100A

Management Principles, Part 1

4 Semester Credits

Course Description

This comprehensive course, consisting of two parts, serves as an introduction to provide students with a strong foundation in management principles. It covers six essential areas of knowledge, including general management concepts, the managerial environment, planning, organizing, leading, and controlling. Part 1 of the course delves into the first three core areas, namely management fundamentals and planning.

Throughout this course, students will gain a deep understanding of the various functions and styles of management, recognizing their profound influence on corporate culture and the external landscape. The curriculum explores the intricacies of management's planning process, goal setting, and the decision-making procedures employed by managers. By studying these topics, students will acquire the necessary skills to navigate and excel in managerial roles.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM100B

Management Principles, Part 2

4 Semester Credits

Course Description

This course serves as the second part of a two-part series, designed to provide students with exploration of fundamental management concepts across six core areas. These areas encompass general management principles, the managerial environment, planning, organizing, leading, and controlling. Part 2 of the course focuses on the final three core areas, namely organizing, leading, and controlling, delving deeper into their intricacies.

Within this course, students will develop an understanding of organizational structure and gain the necessary skills to effectively manage various aspects such as change, innovation, talent, and diversity within an organization. The curriculum then transitions to the critical topic of leadership, equipping students with strategies to motivate individuals, teams, and employees, while emphasizing the profound impact of communication on organizational dynamics.

Prerequisites:
Completion of BAM100A: Management Principles, Part 1.

BAM102

Introduction to Spreadsheets and Understanding Data

4 Semester Credits

Course Description

This course provides students with a flexible learning experience that transcends specific versions of Office, remaining relevant across platforms like Office 365, Microsoft 365, Office 2021, or Office Online. The course covers essential skills for data management in organizations.

One crucial aspect covered in the course is using Excel worksheets to easily summarize and visualize data. Students learn how to create a

worksheet with charts that represent data effectively. Specifically, they work with a budget that includes monthly estimates for income and expenses. Formulas and functions are taught to help students create dynamic worksheets.

The course also explores various topics such as using option buttons, verifying formulas, applying themes, formatting numbers and text, utilizing conditional formatting, adjusting column widths and row heights, spell checking, alternative worksheet displays and printouts, and adding page headers and footers.
Additionally, students are introduced to powerful features of Excel, including its extensive function library and the ability to answer what-if questions. They learn to work with multiple worksheets and workbooks, explore advanced formatting options for pie charts, such as exploding slices and leader lines. Importing data, sorting and querying tables, creating templates, and analyzing and interpreting data are also covered.

Overall, this course equips students with a range of techniques to enhance their ability to create effective worksheets, draw meaningful charts, and leverage Excel's capabilities for data analysis and interpretation.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM103

Effective Presentations

4 Semester Credits

Course Description
This course offers a flexible learning experience applicable across multiple Office platforms, including Office 365, Microsoft 365, Office 2021, and Office Online, focusing on essential data management skills for organizations. Students will develop valuable skills in Microsoft PowerPoint, learning to create engaging presentations through features like design ideas, text formatting, multimedia incorporation, and graphic animation. Emphasis is placed on enhancing clarity and emphasizing important details using graphics, catering to diverse audiences. The course covers customizing master layouts, collaborating on slide refinement, and effectively using tables, charts, maps, and smart art to enhance retention. By the end of the course, students will be adept at creating compelling presentations that effectively communicate ideas and captivate audiences.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM104

Business Communications

4 Semester Credits

Course Description
This comprehensive course immerses students in the diverse components and styles of business writing. Through an exploration of communication foundations, students gain a deep understanding of business communication in the digital era and cultivate professionalism by delving into team dynamics, active listening, nonverbal cues, and etiquette. By grasping these essential pillars of business communication, students recognize the significance of intercultural communication and its impact on message reception.
The course further equips students with the skills to skillfully plan and craft effective business messages. They navigate various message types, ranging from concise and digital to formal and informal, while honing their ability to construct positive, negative, and neutral communications. Additionally, students acquire valuable insights into crafting persuasive messages for sales purposes. The course culminates in an exploration of formal and informal writing techniques for business reports and proposals, enabling students to produce compelling and professional documents.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM105

Change Management

4 Semester Credits

Course Description
BAM105 provides a comprehensive overview of organization development (OD), covering its background, assumptions, strategies, models, intervention techniques, and other relevant aspects. It starts by exploring the nature of change in OD and the development process. Students will then delve into various stages of OD, including contracting, diagnosing, analyzing, intervention, and reinforcing. You will see that the course emphasizes the importance of understanding the human process and the transformative role that people and talent play in the continuous change process.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM106

Organizational Behavior for Managers

4 Semester Credits

Course Description
This course is designed to equip students with the knowledge and skills necessary to excel as effective managers. By combining contemporary management theories with timeless principles, the course provides a practical and student-centered approach to understanding organizational behavior. Through lectures, discussions, case studies, and in-class activities, students will explore the factors that influence employee motivation, job satisfaction, and performance, as well as the

dynamics of organizational culture, leadership, communication, and change. By the end of the course, students will be well-prepared to navigate the complexities of modern organizations and contribute to their success.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM107

Introduction to Accounting

4 Semester Credits

Course Description

This course provides a foundational overview of accounting principles and their application in business. Students will evaluate core concepts such as the accounting equation and the four primary financial statements. Students will be able to describe the recording process for business transactions, adjusting entries, and the importance of accrual-basis accounting. Key topics like the classification and valuation of inventories and accounts receivable will be covered.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM108

Navigating the Modern Workforce

4 Semester Credits

Course Description

This immersive course provides students with a comprehensive understanding of the profound impact of communication on our daily lives. It explores how crucial elements like diversity, equity, and inclusion shape organizations and human interactions. Through an exploration of various communication processes, students gain insights into how individuals interpret messages differently. These differences in interpretation assign meaning and perceptions that subsequently influence communication patterns and individual identity.

Building on this foundation, the course delves deeper into the importance of effective listening and explores the multifaceted dimensions of communication. Recognizing the significance of both verbal and nonverbal communication becomes crucial in a diverse workforce that encompasses multiple generations, cultures, and backgrounds.
Expanding the scope, the course then shifts its focus from individual communication to examining relationships and the dynamics within groups, teams, and organizations. Students will explore how effective communication plays a pivotal role in fostering collaboration, navigating conflicts, and promoting synergy within these contexts.

By delving into these topics, students develop a comprehensive understanding of the intricate nature of communication and its far-reaching implications for personal and professional interactions. They will gain the necessary skills to navigate diverse communication landscapes and foster meaningful relationships in various organizational settings.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM109

Fundamentals of Employment Law

4 Semester Credits

Course Description

This course provides a fundamental overview of the laws that apply to management. It explores the meaning of terms like employee and employer and emphasizes the importance of determining whether an employment relationship exists. Students will learn about employment discrimination, including its various types and the methods used to handle discrimination cases.

Furthermore, the class addresses practical aspects of managing a diverse workforce. It discusses topics such as reasonable accommodations, work-life balance, pay, benefits, safety, and injury. Finally, the course concludes with discussions on employee privacy and terminations.

By the end of the course, students will have gained a solid understanding of these topics and their relevance to human resources practices.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

BAM110

Applied Business Administration Final Project

4 Semester Credits

Course Description

In this course, students will develop a business plan that serves as the culminating experience for the Associate of Applied Science in Business Administration. The Final Project synthesizes knowledge and skills developed throughout the program, giving students an opportunity to demonstrate their expertise by producing a complete, professional business plan. The business plan will serve as a portfolio artifact that can be shared with employers. Students may select either a real or fictional business concept and will develop their plan progressively throughout their degree program via deliverable components create in each business course.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM100

Foundations of Digital Marketing

4 Semester Credits

Course Description

This course introduces the core principles of marketing and their relevance in today's digital environment. Students will examine the 4 Ps of marketing—Product, Price, Place, and Promotion—while gaining insight into the customer journey, consumer behavior, and the role of digital channels in shaping marketing strategies. By establishing a strong foundation, this course prepares students for applied projects and advanced concepts in subsequent courses.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM101

Content Strategy & Design

4 Semester Credits

Course Description

This course explores how to create meaningful brand narratives and develop content strategies that connect with target audiences. Students will learn to establish messaging pillars, build content calendars, and produce blogs, videos, and social media content that drive engagement. Emphasis is placed on audience research, consistency, and aligning storytelling with business goals to deliver authentic, effective marketing strategies.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM102

Website Design & Conversion Strategy

4 Semester Credits

Course Description

Students will design, build, and publish a professional website using Wix, applying best practices in user experience (UX) and visual design. Emphasis will be placed on developing websites that drive lead generation and sales conversions through strategically designed landing pages, clear calls-to-action, and optimized conversion paths. Students will also learn how to integrate their websites with broader digital marketing campaigns, including email, social media, and paid advertising, to ensure consistent messaging and measurable results. By the end of the course, students will demonstrate the ability to create a functional, visually appealing, and conversion-focused website that supports business objectives.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM103

Social Media Marketing

4 Semester Credits

Course Description

This course introduces the fundamentals of social media management, combining strategic and practical skills for professional use of digital platforms. Students will learn to optimize accounts, create audience personas, and apply engagement strategies across channels. Through hands-on projects, they will design campaigns, schedule posts, and use analytics to evaluate performance. Topics also include influencer partnerships, community-building, and ethical considerations. By the end, students will be able to develop a cohesive social media plan that drives traffic, builds loyalty, and supports marketing goals.

Prerequisites:

Completion of DGM101: Content Strategy & Design.

DGM104

SEO & Paid Search Strategies

4 Semester Credits

Course Description

This course introduces the fundamentals of search engine optimization (SEO) and paid advertising, focusing on strategies that drive visibility and measurable results. Students will practice keyword research, apply on-page optimization techniques, and design mock ad campaigns using Google Ads and Meta Ads Manager. Emphasis is placed on targeting, budgeting, and performance analysis to create effective, data-driven marketing strategies.

Prerequisites:

Completion of DGM102: Website Design & Conversion Strategy.

DGM105

Digital CRM & Email Engagement

4 Semester Credits

Course Description

This course introduces students to the principles of email marketing and customer relationship management (CRM). Using Mailchimp, students will design, launch, and evaluate campaigns with a focus on audience segmentation, personalization, automation, and lifecycle marketing. Emphasis is placed on integrating email with broader digital strategies, applying ethical and legal standards, and using analytics to optimize performance. By the end, students will be able to create effective, automated campaigns that drive engagement, retention, and customer loyalty.

Prerequisites:

Completion of DGM101: Content Strategy & Design.

DGM106

Marketing Insights & Analytics

4 Semester Credits

Course Description

This course equips students with the skills to measure, analyze, and optimize digital marketing performance using industry-standard tools. Students will gain hands-on experience with Google Analytics, Meta Insights, and Google Data Studio to evaluate website traffic, social media, email, and paid advertising campaigns. Emphasis is placed on identifying key performance indicators (KPIs), calculating return on investment (ROI), and presenting data through dashboards and visual reports. Students will also learn how to interpret trends, apply insights to improve campaign effectiveness, and make data-driven recommendations that align with business objectives. By the end of the course, students will be able to integrate analytics into marketing strategies to drive measurable results.

Prerequisites:

Completion of DGM103: Social Media Marketing and DGM104: SEO & Paid Search Strategies.

DGM107

Digital Portfolio & Professional Presentation

4 Semester Credits

Course Description

This Final Projects course serves as the culminating experience of the digital marketing program, allowing students to apply and integrate all prior learning into a comprehensive digital presence for a chosen brand. Students will design and launch a professional website, develop a coordinated social media campaign, create an SEO and paid advertising plan, implement an email/CRM strategy, and track performance using analytics dashboards. Emphasis is placed on building a cohesive, multi-channel strategy that demonstrates both creative execution and data-driven decision-making. The course concludes with students presenting their work as a professional portfolio and delivering a client-style pitch that simulates real-world project delivery.

Prerequisites:

Completion of DGM106: Marketing Insights & Analytics.

DGM200

Digital Consumer Behavior & Social Media Strategy

4 Semester Credits

Course Description

This course examines digital consumer psychology, decision-making processes, and social influence across online platforms. Students analyze consumer engagement patterns and develop strategies for effective social media and digital marketing campaigns using behavioral insights and data-driven approaches objectives.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM201

Paid Media Strategy & Conversion Rate Optimization

4 Semester Credits

Course Description

This course provides a comprehensive examination of paid digital advertising and conversion rate optimization (CRO) strategies used to improve digital marketing performance. Students learn how to plan and manage paid search and paid social campaigns while optimizing landing pages, marketing funnels, and customer journeys to improve conversion rates. The course covers campaign structure, audience targeting, budgeting strategies, experimentation methods, attribution models, and return-on-investment (ROI) measurement across major digital advertising platforms.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM202

SEO On and Off Site

4 Semester Credits

Course Description

This course provides an in-depth exploration of search engine optimization (SEO) strategies used to improve website visibility and organic search performance. Students learn how search engines crawl, index, and rank content, and how businesses can strategically optimize websites to appear in search results. The course covers keyword research, on-page optimization, technical SEO, content development, website architecture, and off-site authority building strategies. Students also analyze SEO analytics tools and performance metrics to evaluate optimization outcomes. By the end of the course, students will be able to design and implement comprehensive SEO strategies that improve search visibility, increase website traffic, and support long-term digital marketing growth.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM203

Marketing Analytics & Data-Driven Decision Making

4 Semester Credits

Course Description

This course focuses on marketing analytics and data-driven decision-making used to evaluate digital marketing performance. Students learn how to interpret marketing data, build dashboards, evaluate attribution models, and generate insights from analytics platforms. The course emphasizes the use of data to measure campaign effectiveness,

understand customer behavior, and optimize marketing strategy across channels. By applying analytical frameworks and visualization tools, students develop the ability to translate marketing data into actionable strategic decisions.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM204

Digital Marketing Law, Ethics, & Data Privacy

4 Semester Credits

Course Description

This course examines legal regulations and ethical issues affecting digital marketing practices. Students explore advertising laws, data privacy regulations, consumer protection policies, and ethical frameworks guiding responsible marketing decisions. Topics include digital advertising compliance, intellectual property, data collection policies, privacy protection, and regulatory standards governing online platforms. Through case studies and applied scenarios, students learn how to design marketing strategies that comply with legal requirements while maintaining ethical standards and consumer trust.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM320

AI Applications in Digital Marketing

4 Semester Credits

Course Description

This course explores the role of artificial intelligence in modern digital marketing strategy. Students examine how AI technologies are transforming customer insights, marketing automation, personalization, and predictive analytics. The course introduces AI-powered tools used for marketing research, campaign optimization, content creation, and customer engagement. Students analyze real-world applications of AI in advertising platforms, recommendation systems, chatbots, and automated marketing workflows. Emphasis is placed on understanding both the strategic opportunities and ethical considerations of AI adoption in digital marketing environments.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM321

Influencer Marketing

4 Semester Credits

Course Description

This course examines influencer marketing strategies and the growing role of the creator economy in digital marketing. Students analyze how brands collaborate with influencers to reach audiences, build brand credibility, and generate engagement across digital platforms. The course covers influencer identification, partnership strategy, campaign planning, contract negotiation, and performance measurement. Students also evaluate viral marketing strategies and social amplification techniques used to maximize brand visibility and audience reach.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM322

E-Commerce & Revenue Growth Strategies

4 Semester Credits

Course Description

This course examines digital commerce strategies used to grow online businesses and optimize digital revenue channels. Students learn how to build and manage online storefronts, develop product strategies, and improve customer acquisition and retention. The course explores marketplace platforms, digital merchandising, conversion funnels, and growth strategies used by e-commerce businesses. Students also analyze analytics tools and performance metrics used to evaluate e-commerce success.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM323

Omnichannel Marketing & Automation Systems

4 Semester Credits

Course Description

This course focuses on integrated marketing strategies across multiple digital channels using marketing automation systems. Students learn how to design customer journeys that coordinate messaging across email, social media, websites, and CRM systems. The course explores segmentation, lifecycle marketing, customer journey orchestration, and automation workflows used to improve customer engagement and marketing efficiency.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM324

Mobile Marketing & App-Based Customer Engagement

4 Semester Credits

Course Description

This course examines mobile-first marketing strategies used to engage customers through smartphones and mobile applications. Students learn how to design mobile marketing campaigns, optimize mobile user experiences, and develop strategies using SMS marketing, push notifications, location-based targeting, and mobile advertising. The course also explores mobile analytics and app engagement strategies used by modern digital businesses.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM325

Digital Branding & Positioning Strategy

4 Semester Credits

Course Description

This course focuses on developing and managing brand strategy in digital environments. Students learn how to define brand positioning, create compelling brand messaging, and build differentiated brand identities across digital channels. The course explores key concepts including brand equity, brand architecture, customer perception, storytelling, and consistent brand experiences.

Students analyze how brands compete in competitive digital markets and how effective positioning influences customer decision-making. The course also emphasizes aligning branding strategies with digital marketing channels such as social media, websites, and advertising. By the end of the course, students will be able to develop and evaluate branding strategies that support long-term growth, customer engagement, and competitive advantage.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

DGM400

Capstone Senior Project

4 Semester Credits

Course Description

This capstone course focuses on optimizing digital marketing performance across websites, search engines, social media platforms, and paid advertising campaigns. Students apply advanced marketing strategies to improve traffic, engagement, and conversion outcomes for an existing business or digital project. Rather than building new marketing assets, the course emphasizes analyzing current performance data, identifying growth opportunities, and implementing optimization strategies across digital channels.

Students evaluate website usability, SEO performance, paid advertising campaigns, social media engagement, and marketing analytics dashboards to identify areas for improvement. Through experimentation, testing, and performance analysis, students develop data-driven strategies to improve digital marketing efficiency and return on investment. The course culminates in a comprehensive digital marketing optimization report and strategic presentation.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HCA100

Fundamentals of Electronic Health Records

4 Semester Credits

Course Description

This course provides a comprehensive introduction to Electronic Health Records (EHR) and their role in modern healthcare settings. Students will explore key concepts, functionalities, and best practices for using EHR systems effectively. Topics include EHR components, data entry and management, interoperability, regulatory compliance (HIPAA, HITECH), and the impact of EHR on patient care and workflow efficiency. Hands-on exercises and real-world case studies will enhance practical understanding. By the end of the course, students will have a solid foundation in EHR usage, preparing them for roles in healthcare administration, healthcare management, clinical support, and health information technology.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HCA101

Healthcare Information Systems

4 Semester Credits

Course Description

This course explores the critical role of health information in modern healthcare delivery. Students will examine healthcare delivery models, health record content, documentation standards, and the purposes and users of health information. Key topics include legal concepts, privacy, confidentiality, data security, and compliance with federal and state laws. The course covers revenue management, reimbursement processes, and strategies to prevent fraud and abuse. Emphasis is placed on ethical decision-making and protecting organizational integrity. Students will also review data standards and how they support quality care and efficient operations. Leadership responsibilities and ethical challenges related to health information are addressed.

Prerequisites:

Completion of HCA100: Fundamentals of Electronic Health Records.

HCA102A

Medical Terminology for Health Care Professionals, Part 1

4 Semester Credits

Course Description

This course provides an in-depth introduction to medical terminology, equipping students with the essential language used in healthcare settings. Students will learn the structure of medical terms, including prefixes, suffixes, and root words, to accurately interpret and communicate medical information. The course explores terminology related to human anatomy, physiology, and pathology, with a focus on key body systems, including the skeletal, muscular, cardiovascular, lymphatic, immune, and respiratory systems. By the end of the course, students will be able to define, pronounce, and apply medical terms with confidence, enhancing their ability to understand medical records, documentation, and professional communication within the healthcare field.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HCA102B

Medical Terminology for Health Care Professionals, Part 2

4 Semester Credits

Course Description

Building upon foundational medical terminology, this course delves deeper into the language of healthcare by exploring critical body systems and their related disorders, diagnostic procedures, and treatments. Students will master terminology associated with the digestive, urinary, nervous, endocrine, reproductive, and integumentary systems, as well as the special senses of the eyes and ears. Additionally, the course covers essential medical vocabulary related to mental health, pharmacology, and complementary medicine. Through real-world applications and case studies, students will develop proficiency in interpreting medical records, communicating effectively in clinical settings, and understanding the terminology essential for healthcare documentation and patient care.

Prerequisites:

Completion of HCA102A: Medical Terminology for Health Care Professionals, Part 1, and SCI120: General Biology.

HCA103

Introduction to Medical Coding

4 Semester Credits

Course Description

Introduction to Medical Coding provides students with a strong foundation in the principles and applications of medical coding across diverse healthcare settings. The course introduces career pathways, professional associations, and the credentialing process, while emphasizing the use of ICD-10-CM, ICD-10-PCS, CPT, and HCPCS Level II coding systems. Students will develop skills in accurate diagnosis and procedure coding, applying documentation standards, and addressing complex disease conditions and injuries. The curriculum also explores healthcare reimbursement models, third-party payer systems, and the integral role of coding in revenue cycle management. By the end of the course, students will recognize the importance of precise code assignment in supporting compliance, efficient billing, and accurate healthcare reporting.

Prerequisites:

Completion of HCA102B: Medical Terminology for Health Care Professionals, Part 2, and HCA100: Fundamentals of Electronic Health Records.

HCA104

Principles of Healthcare Insurance

4 Semester Credits

Course Description

This course introduces students to the essential concepts of health insurance, billing, and reimbursement in the U.S. healthcare system. Students will learn about insurance plan types, managed care structures, coding systems, claims processing, and the regulations that guide compliance and reimbursement. The course emphasizes practical skills such as obtaining, verifying, and scanning patient insurance information; collecting payments, copayments, coinsurance, or deductibles at the time of service; explaining insurance coverage and financial responsibility; and coordinating patient referrals, benefits, and eligibility. Students will also recognize and differentiate between various commercial and government health care insurance plans, including PPOs, HMOs, Medicare, Medicaid, TRICARE, and Advantage plans. By the end of the course, students will understand how health insurance impacts healthcare delivery and be prepared to apply foundational billing and reimbursement knowledge in professional settings.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HCA105

Fundamentals of Medical Office Administration

4 Semester Credits

Course Description

This course introduces students to the core skills and responsibilities needed to manage daily operations in a healthcare office setting. Students will learn to create provider schedules, manage a variety of patient appointments, and coordinate referrals, benefits, and insurance eligibility. The course also covers welcoming and directing patients and visitors, completing admissions paperwork—including consent, HIPAA, and financial responsibility forms—and carrying out opening and closing office procedures. Administrative competencies include handling correspondence, maintaining office supplies and equipment, and managing petty cash. In addition, students will gain financial management skills such as posting payments, processing financial agreements, reconciling daily transactions, and monitoring patient statements. By the end of the course, students will be prepared to support both the

administrative and financial functions of a medical office while ensuring efficient, patient-centered operations.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HCA106

Foundations of The United States Healthcare System

4 Semester Credits

Course Description
This course introduces students to how healthcare is organized, delivered, and financed in the U.S. The course covers major components of the system, including care settings, healthcare providers, insurance and reimbursement models, and the government's role in policy and regulation. Students will learn to recognize and differentiate between commercial insurance plans such as PPOs, HMOs, and Advantage plans, as well as government programs including Medicare, Medicaid, and TRICARE. Emphasis is also placed on complying with privacy laws (HIPAA, HITECH) and reporting medical emergencies as required by law. The course addresses challenges related to access, cost, quality, and equity, while also exploring emerging trends such as telehealth and value-based care. By the end of the course, students will understand how the U.S. healthcare system functions and the vital role administrative professionals play in supporting efficient operations.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HCA107

Legal Aspects of Health Information Management

4 Semester Credits

Course Description
This course provides an in-depth examination of legal and ethical issues impacting the management of health information in a variety of healthcare settings. Students will explore federal and state regulations, including HIPAA, HITECH, and other laws governing the privacy, confidentiality, and security of patient data. Emphasis is placed on legal terminology, healthcare compliance, risk management, and the proper release of information. Through real-world case studies and practical applications, students will develop the skills necessary to navigate the legal landscape of health information management and fulfill professional responsibilities with integrity and legal awareness.

Prerequisites:
Completion of HCA101: Healthcare Information Systems.

HIM200

Anatomy & Physiology for Health Professionals

4 Semester Credits

Course Description
This course provides a foundational study of the structure and function of the human body. Students systematically examine all major organ systems, including cardiovascular, respiratory, musculoskeletal, neurological, endocrine, digestive, and reproductive, with emphasis on homeostasis and clinical relevance to healthcare practice.

Prerequisites:
Completion of HCA102B: Medical Terminology for Health Care Professionals, Part 2.

HIM201

Principles of Health Information Management

4 Semester Credits

Course Description
This course introduces the structure and management of health information services within healthcare organizations. Students examine the roles and responsibilities of HIM professionals, departmental operations, workforce planning, budgeting, and professional ethics. Special emphasis is placed on information governance principles and the application of leadership strategies to HIM practice.

Prerequisites:
Completion of HCA106: Foundations of the United States Healthcare System, HCA101: Healthcare Information Systems, and BAM105: Change Management.

HIM202A

Healthcare Data Management, Analytics, & Information Governance, Part 1

4 Semester Credits

Course Description
This course explores the principles and practices used to manage healthcare data at the enterprise level. Students examine data governance frameworks, data quality standards, interoperability protocols, and analytical methods used to support clinical and administrative decision-making.

Prerequisites:
Completion of CIS100A: Computer Fundamentals and HCA100: Fundamentals of Electronic Health Records.

HIM202B

Healthcare Data Management, Analytics, & Information Governance, Part 2

4 Semester Credits

Course Description
This course continues exploration of enterprise-level healthcare data management. Students examine advanced data governance frameworks, data quality standards, interoperability protocols, and analytical methods used to support clinical and administrative decision-making.

Prerequisites:
Completion of HIM202A: Healthcare Data Management, Analytics, & Information Governance, Part 1.

HIM203

Healthcare Statistics & Research Methods

4 Semester Credits

Course Description
This course develops students' ability to collect, calculate, interpret, and present data in healthcare settings. Topics include hospital-based statistics such as census data, length of stay, mortality rates, and bed occupancy, as well as descriptive and inferential statistical methods. Students also examine research design principles and evidence-based practice, applying spreadsheet tools to analyze and communicate findings for administrative and quality improvement purposes.

Prerequisites:
Completion of MTH140: Statistics.

HIM204

Healthcare Financial Management & Reimbursement

4 Semester Credits

Course Description
This course examines how healthcare organizations are financed and reimbursed for services rendered. Students analyze financial statements, develop departmental budgets, and evaluate major payment methodologies including prospective payment systems, value-based reimbursement, and managed care contracts. Emphasis is placed on the HIM professional's role in ensuring accurate reimbursement through complete and compliant documentation and coding practices.

Prerequisites:
Completion of HCA103: Introduction to Medical Coding.

HIM300A

Pharmacology and Diseases of the Human Body, Part 1

4 Semester Credits

Course Description
This course examines human disease processes and pharmacological treatments across all major body systems. Students apply pathopharmacological knowledge to ICD-10-CM/CPT coding, clinical documentation improvement, and health record integrity.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HIM300B

Pharmacology and Diseases of the Human Body, Part 2

4 Semester Credits

Course Description
This course continues examination of human disease processes and pharmacological treatments across all major body systems. Students apply pathopharmacological knowledge to ICD-10-CM/CPT coding, clinical documentation improvement, and health record integrity.

Prerequisites:
Completion of HIM300A: Pharmacology and Diseases of the Human Body, Part 1.

HIM301

Advanced Classification Systems

4 Semester Credits

Course Description
This course develops advanced proficiency in medical coding using ICD-10-CM, ICD-10-PCS, CPT, and HCPCS Level II coding systems. Students apply coding guidelines to complex inpatient and outpatient records across specialty areas including cardiology, orthopedics, oncology, neurology, and emergency medicine.

Prerequisites:
Completion of HCA103: Introduction to Medical Coding.

HIM302

Quality Assurance & Performance Management in Healthcare

4 Semester Credits

Course Description
This course covers the methods and frameworks used to measure and improve the quality of healthcare services. Students examine accreditation standards and apply performance improvement tools including PDCA, Lean, and Six Sigma to HIM-specific challenges such as coding accuracy, record completion, and denial management.

Prerequisites:
Completion of HIM201: Principles of Health Information Management.

HIM303

AI in Healthcare

4 Semester Credits

Course Description
This course examines AI applications in healthcare including machine learning, deep learning, and generative AI as applied to clinical data, EHRs, and health information management. Students evaluate AI governance, data privacy, bias, and ethical considerations relevant to HIM practice.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HIM304

Privacy, Security, & Compliance in Health Information Management

4 Semester Credits

Course Description

This course provides an advanced, applied examination of privacy, security, and compliance in health information management. Students progress to the design and application of privacy and security strategies, advanced legal processes, healthcare fraud and abuse prevention, and organizational compliance program development. Topics include HIPAA Security Rule safeguard framework design, health information life cycle compliance, e-discovery and legal health record obligations, the False Claims Act, Anti-Kickback Statute, consumer engagement and patient rights governance, workforce training program design, cultural competency in compliance practice, and applied professional ethics.

Prerequisites:

Completion of HCA107: Legal Aspects of Health Information Management.

HIM400

Final Project

4 Semester Credits

Course Description

This course serves as the culminating experience for students in the Health Information Management program. Students will synthesize core HIM competencies through the development of a comprehensive final project. Students will apply program learning outcomes to analyze a real-world HIM challenge and present evidence-based recommendations.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HIT100

Fundamentals of Human Anatomy and Physiology

4 Semester Credits

Course Description

This course provides a comprehensive introduction to the structure and function of the human body for health information technology students. Topics include cellular biology, tissues, and all major organ systems including skeletal, muscular, nervous, cardiovascular, respiratory, digestive, urinary, endocrine, and reproductive systems. Students develop an understanding of normal anatomy and physiology as a foundation for recognizing pathological conditions, interpreting clinical documentation, and applying accurate medical coding. The course integrates consideration of health disparities and population-level variations in disease prevalence across diverse communities.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HIT101

Basics of Medical Terminology

4 Semester Credits

Course Description

This course introduces students to the foundational principles of medical terminology used in healthcare settings. Students learn to identify, define, spell, and pronounce medical terms by analyzing word parts including prefixes, suffixes, and root words. The course covers terminology related to major body systems, diagnostic procedures, clinical conditions, and treatment methods. Emphasis is placed on building a working medical vocabulary applicable to health information management, medical coding, and clinical documentation, with attention to culturally competent communication in diverse healthcare environments.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HIT102

Essentials in Pathophysiology & Pharmacology

4 Semester Credits

Course Description

This course provides students with foundational knowledge of pathophysiology and pharmacology as they relate to health information management and medical coding. Students study disease processes, clinical manifestations, diagnostic methods, and treatment approaches including pharmacological interventions for major body systems. The course emphasizes the connection between pathological conditions, drug classifications, and their documentation in health records to support accurate coding and health information management. Attention is given to health disparities in disease burden and equitable access to pharmacological treatments across diverse populations.

Prerequisites:

Completion of HIT100: Fundamentals of Human Anatomy and Physiology and HIT101: Basics of Medical Terminology.

HIT103

Diagnostic Coding

4 Semester Credits

Course Description

This course introduces students to the fundamentals of diagnostic coding using the ICD-10-CM classification system. Students learn the structure and conventions of the ICD-10-CM code book, the Official Guidelines for Coding and Reporting, and basic code assignment principles. The course covers Alphabetic Index and Tabular List navigation, code sequencing rules, and chapter-specific coding guidelines for selected body systems. Students practice applying coding principles through case studies

and exercises emphasizing accuracy, compliance, and equitable documentation of social determinants of health.

Prerequisites:
Completion of HIT100: Fundamentals of Human Anatomy and Physiology, HIT101: Basics of Medical Terminology, and HIT102: Essentials in Pathophysiology & Pharmacology.

HIT104
Procedural Coding
4 Semester Credits
Course Description
This course introduces students to procedural coding using the Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) Level II code sets. Students learn the structure, conventions, and guidelines for assigning CPT codes across major sections including Evaluation and Management, Surgery, Radiology, Pathology, Laboratory, and Medicine. HCPCS Level II codes and modifiers are also covered. The course emphasizes accurate code assignment, documentation analysis, compliance with coding guidelines, and awareness of equitable access to procedures across diverse patient populations.

Prerequisites:
Completion of HIT103: Diagnostic Coding.

HIT105
Health Reimbursement & Revenue Cycle
4 Semester Credits
Course Description
This course examines the healthcare revenue cycle from patient registration through final reimbursement, emphasizing the role of health information in the billing and payment process. Topics include health insurance systems, managed care, government payers, prospective payment systems, claim submission, accounts receivable management, and regulatory compliance. Students analyze the impact of accurate coding and documentation on reimbursement, organizational revenue integrity, and equitable healthcare access across diverse patient populations.

Prerequisites:
Completion of HIT103: Diagnostic Coding and HIT104: Procedural Coding.

HIT106
Healthcare Data Analytics & Quality Improvement
4 Semester Credits
Course Description
This course introduces students to the principles of healthcare data analytics, informatics, and applied research methods in health information management. Topics include data governance, privacy and security, data analytics tools (Excel, MySQL, R), exploratory data analysis, data visualization, population health, comparative effectiveness research, quality measurement, and machine learning applications in healthcare. Students analyze real-world healthcare datasets to support evidence-based decision-making and organizational performance improvement, with emphasis on identifying and addressing bias and health inequities in data-driven healthcare.

Prerequisites:
Completion of MTH140: Statistics, HCA101: Healthcare Information Systems, and HIT105: Health Reimbursement & Revenue Cycle.

HIT107
Final Project
4 Semester Credits
Course Description
This capstone course integrates knowledge and skills from across the Associate of Applied Science in Health Information Technology program through comprehensive case studies and a culminating project. Students apply coding, data analytics, revenue cycle management, privacy and compliance, and health information management principles to real-world healthcare scenarios. The course emphasizes critical thinking, professional communication, DEI awareness, health equity advocacy, and the practical application of HIT competencies in preparation for entry-level positions in health information management.

Prerequisites:
Completion of:

- CIS100A: Computer Fundamentals
- HCA100: Fundamentals of Electronic Health Records
- HCA101: Healthcare Information Systems
- HCA107: Legal Aspects of Health Information Management
- HIT100: Fundamentals of Human Anatomy and Physiology
- HIT101: Basics of Medical Terminology
- HIT102: Essentials in Pathophysiology & Pharmacology
- HIT103: Diagnostic Coding and
- HIT104: Procedural Coding
- HIT105: Healthcare Reimbursement & Revenue Cycle
- HIT106: Healthcare Data Analytics & Quality Improvement

HRM100A
Human Resource Management, Part 1
4 Semester Credits
Course Description
This course is Part 1 of 2 that provides students with a comprehensive understanding of Human Resource Management in today's business environment. This course is grounded in methodologies and application from a premier credentialing organization for the human resources profession, setting the global standard for HR mastery and excellence for the past 40 years. The course provides conceptual frameworks and practical tools to facilitate easy access to essential practices. Students learn a wide range of topics, including essential skills, knowledge, and

methods that define the HR profession's best practices. It provides the latest information on strategies HR professionals can utilize to benefit their organizations and advance their profession.
The course encompasses the fundamental and best practices of the HR profession, enabling professionals to align their organizations accordingly. This comprehensive resource covers the six areas of HR functional expertise: business management and strategy, workforce planning and employment, human resource development, compensation and benefits, employee and labor relations, and risk management.
This course addresses the Core Knowledge Requirements for exams administered by the HR Certification Institute, and offers exam eligibility information, preparation tips, and more for those students looking to attempt the HRCI Associate Professional in Human Resources (aPHR) exam after completing both Human Resource Management 100A and 100B.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM100B

Human Resource Management, Part 2

4 Semester Credits

Course Description
This course is Part 2 of 2 that provides students with a comprehensive understanding of Human Resource Management in today's business environment. This course is grounded in methodologies and application from a premier credentialing organization for the human resources profession, setting the global standard for HR mastery and excellence for the past 40 years. The course provides conceptual frameworks and practical tools to facilitate easy access to essential practices. Students learn a wide range of topics, including essential skills, knowledge, and methods that define the HR profession's best practices. It provides the latest information on strategies HR professionals can utilize to benefit their organizations and advance their profession.

The course encompasses the fundamental and best practices of the HR profession, enabling professionals to align their organizations accordingly. This comprehensive resource covers the six areas of HR functional expertise: business management and strategy, workforce planning and employment, human resource development, compensation and benefits, employee and labor relations, and risk management. Part 2 focuses on compensation and benefits, employee and labor relations, and risk management.

This course addresses the Core Knowledge Requirements for exams administered by the HR Certification Institute, and offers exam eligibility information, preparation tips, and more for those students looking to attempt the HRCI Associate Professional in Human Resources (aPHR) exam.

Prerequisites:
Completion of HRM100: Human Resource Management, Part 1.

HRM102

Employee Relations

4 Semester Credits

Course Description
This course provides a foundational understanding of employee relations and its critical role in today's dynamic workplace. Students will explore strategies for building positive employer-employee relationships, resolving workplace conflict, promoting employee engagement, and ensuring compliance with employment laws and regulations. Emphasis is placed on fostering inclusive, respectful work environments that support employee well-being and organizational effectiveness. Through the analysis of mission, vision, and value statements, students will examine how organizational culture shapes the employee's experience and aligns with HR policies and procedures.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM103

Compliance and Risk

4 Semester Credits

Course Description
This course provides a comprehensive overview of the legal foundations governing the employment relationship and the role of Human Resources (HR) in ensuring workplace compliance. Students will explore key laws and regulations related to discrimination, recruitment, compensation, employee privacy, and workplace safety, gaining practical tools for identifying and mitigating risk. Through real-world applications, the course emphasizes lawful hiring practices, appropriate handling of employee data, regulatory adherence in compensation and benefits, and best practices for managing terminations and organizational changes. Designed for aspiring HR professionals, this course builds a strong foundation for navigating legal challenges and supporting organizational integrity through compliance-focused HR practices.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM104

Talent Acquisition

4 Semester Credits

Course Description
This course is divided into four parts that cover different aspects of the recruitment and selection process. Students will learn about recruiting, focusing on topics that include recruitment forecasting, pre-recruitment activities, perspectives of applicants and employers, and recruitment resources. Students will also cover interview preparation, legal

considerations, competency questions, additional types of questions, interview components, and types of employment interviews. Students will explore documentation, preemployment testing, references and background checks, social media and hiring, and the selection process. The course concludes by delving into organizational, online employee orientation, and onboarding. The course provides comprehensive coverage of recruitment, interviewing, selection, and orientation processes, preparing students for effective hiring practices.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM105

Learning and Development

4 Semester Credits

Course Description

This course explores the critical role that learning and development play in building a competitive and agile workforce. Students will examine how organizations use innovative learning strategies to improve employee performance, job satisfaction, and long-term career growth. Emphasis is placed on aligning training initiatives with business goals, leveraging knowledge management, and measuring the return on investment in human capital. Drawing on current industry practices and the latest edition of key training resources, the course offers insights from both employer and employee perspectives—highlighting how effective training adds value across the organization.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM106

Compensation and Benefits

4 Semester Credits

Course Description

This course offers an in-depth exploration of compensation and benefits as key components of an organization's total rewards strategy. Students will examine the principles and practices of compensation design, including pay structures, incentive programs, and performance-based rewards, along with the challenges of maintaining internal equity and external competitiveness. The course also covers a broad range of employee benefits—both domestic and international—and considers the legal, cultural, and strategic implications of these offerings. Emphasis is placed on evolving compensation trends, data-driven decision-making, and insights from business professionals. By the end of the course, students will possess the foundational knowledge and practical skills necessary to pursue careers in compensation and benefits management.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM200

Psychology in Talent Management

4 Semester Credits

Course Description

This course explores the psychological principles and theories that underpin effective talent management practices in today's organizations. Students will examine how human behavior, motivation, and individual differences influence key HR functions including recruitment and selection, performance management, employee development, and retention. Drawing from the foundational frameworks in applied psychology, students will gain practical insight into how organizations can leverage an understanding of human behavior to attract, develop, and retain high-performing talent. Upon completion, students will be equipped to apply psychological concepts to real-world HR challenges, making more informed, people-centered decisions in the workplace.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM201

Principles of Workforce Planning

4 Semester Credits

Course Description

Students explore workforce forecasting, labor market analysis, succession planning, and the use of HR metrics and analytics to drive data-informed decision-making. Emphasis is placed on interpreting and presenting HR data for executive audiences.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM202

Human Resources Employment Law

4 Semester Credits

Course Description

This course provides an in-depth study of employment law, regulatory frameworks, workplace investigations, and ethical decision-making in complex organizational environments. Students analyze case studies involving compliance challenges and legal risk mitigation.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM203

Performance Management

4 Semester Credits

Course Description

Students design integrated total rewards systems that align compensation, benefits, performance management, and incentive programs with organizational objectives. The course emphasizes pay equity, executive compensation, and strategic reward planning.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM204

Global Human Resource Management

4 Semester Credits

Course Description

Students examine HR practices in multinational organizations, including global staffing, cross-cultural leadership, international labor standards, expatriate management, and global compliance considerations.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM205

Talent Retention and Employee Engagement Strategies

4 Semester Credits

Course Description

This course examines the drivers of employee retention, engagement measurement tools, stay interviews, and strategies to reduce turnover in competitive labor markets.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM300

Organizational Communication

4 Semester Credits

Course Description

Effective communication is one of the most critical skills any HR professional can bring to the workplace - and this course is designed to build exactly that. Organizational Communication explores the principles and practices of professional communication in the modern workplace, with a focus on how communication shapes relationships, drives collaboration, and influences organizational outcomes. Students will examine communication across a variety of professional contexts including written correspondence, virtual meetings, interpersonal interactions, and difficult conversations. Drawing from Loos's experiential approach, students will not only learn communication frameworks but actively apply them, leaving the course with the confidence and competence to communicate effectively at every level of an organization.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM301

Organizational Culture and Change

4 Semester Credits

Course Description

This course focuses on diagnosing organizational challenges and implementing change initiatives that improve culture, performance, and employee engagement. Students learn intervention models, change frameworks, and strategies for managing resistance.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM302

Labor Relations

4 Semester Credits

Course Description

Understanding the relationship between employers, employees, and unions is a critical competency for any HR professional — and this course gives students the foundation to navigate it confidently. Labor Relations explores the dynamics of the employment relationship through the lens of three core objectives: efficiency, equity, and voice. Students will examine the history and legal framework of the U.S. labor relations system, the union organizing and collective bargaining processes, dispute resolution strategies, and the evolving challenges reshaping labor relations in today's workplace. Rather than simply learning how the system works, students will develop a deeper understanding of *why* it exists — and how to think critically about its future.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM303

Employee Training and Development

4 Semester Credits

Course Description

This course introduces students to the process of planning, creating, delivering, and evaluating employee training programs. Students will learn how organizations identify training needs, choose effective training methods, and measure whether training improves employee performance. The course covers classroom, on-the-job, and technology-based training, as well as leadership development and career growth.

Students will also explore current trends and future changes in workplace learning and development.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM304

Human Resources Challenges

4 Semester Credits

Course Description
The workplace is changing faster than ever — and HR professionals are on the front lines of navigating that change. This course takes an honest, forward-looking look at the most pressing challenges facing organizations and the people who lead them. Drawing from Jacob Morgan's research-backed framework of eight foundational laws of employee experience, students will examine where organizations have gone wrong and what future-ready workplaces are doing differently. From rethinking culture and leadership to navigating artificial intelligence, workforce expectations, and the balance between accountability and empathy, this course challenges students to think critically about the future of HR and their role in shaping it.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM305

Human Resources Safety Management

4 Semester Credits

Course Description
This course provides a comprehensive overview of Human Resource Safety Management, tracing the evolution of workplace safety and examining the causes and impacts of occupational accidents within a global context. Students explore legal frameworks such as the Occupational Safety and Health Act, along with the human factors influencing safety, including ergonomics, stress, training, and workplace violence. The course culminates in applied strategies for hazard assessment, risk prevention, and the development of a safety-first organizational culture through effective management systems, ethics, and emergency preparedness.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

HRM400

HRM Senior Project

4 Semester Credits

Course Description
The HRM Senior Project is the capstone experience of the Bachelor of Science in Human Resource Management program — and it is designed to be exactly that: an experience. This course challenges students to bring together everything they have learned across the program and apply it to real-world HR practice. Using Snell and Morris's comprehensive framework as a strategic guide, students will demonstrate their mastery of core HR competencies by completing a significant, self-directed project that reflects the full scope of human resource management. From workforce planning and talent acquisition to compensation, employee relations, and organizational strategy, students will synthesize their knowledge into a cohesive, professional-quality deliverable that showcases their readiness to contribute to any organization from day one. This is not just a course — it is the beginning of a career.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM101

Quantitative Decision Making for Project Managers

4 Semester Credits

Course Description
This course provides a comprehensive introduction to Management Science and Operations Research. It covers key concepts and terms related to management science and decision-making processes, emphasizing the roles of qualitative and quantitative approaches. The course explores the benefits of modeling in analyzing real situations, including the formulation of mathematical models for cost, revenue, and profit.
Additionally, the course delves into Linear Programming, teaching learners how to identify linear mathematical relationships, create graphs of objective functions and constraints, and interpret solutions that satisfy constraints. Participants will gain the skills to formulate and solve linear programming models, both graphically and using computer software such as Excel Solver. They will also learn about sensitivity analysis, dual values, ranges of optimality and feasibility, and interpreting reduced costs in linear programming.
Furthermore, the course explores the applications of linear programming in various fields such as marketing, finance, operations management, production planning, distribution, staffing, scheduling, and blending problems. Learners will be exposed to advanced linear programming applications including data envelopment analysis, revenue management, portfolio construction, and game theory.

Overall, this course provides a foundation in Management Science, equipping learners with the knowledge and skills to apply quantitative techniques in decision making across various domains.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM102
AI for Project Managers
4 Semester Credits
Course Description
In this course, students will learn how to use Artificial Intelligence (AI) to support them as project managers. The curriculum covers approaches on how to use generative AI tools, such as ChatGPT, in a variety of ways to support the project, such as identifying previously unknown stakeholders, to determining undiscovered risks on a project. AI can be used to assist in recruitment and onboarding. It can also be used to enhance team collaboration. This course explains how to use AI on predictive, adaptive, and hybrid projects. The course concludes with a look at various AI tools for project managers.
Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM103
Negotiation Principles for Project Managers
4 Semester Credits
Course Description
This course provides foundational principles and advanced techniques in the art and science of negotiation, focusing on interactions with various stakeholders. Students will acquire mastery of diverse strategies, encompassing both value claiming in competitive contexts and value creation through integrative approaches designed to cultivate durable professional relationships. Emphasis is placed on developing proficiency in strategic planning, ethical decision-making, and analyzing complex interpersonal communication and power dynamics across multifaceted contexts. This pedagogical experience empowers participants to reframe intractable conflicts into opportunities for synergistic outcomes, thereby optimizing strategic objectives and facilitating sustained professional development.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM104
Project Management Practices
4 Semester Credits
Course Description
In this course, students will learn the foundations of project management as defined by the Project Management Institute (PMI). The curriculum covers both predictive and adaptive project management frameworks. Students learn how to plan projects, define project work, and how to organize projects for performance. This course also covers how to measure, track, and manage uncertainty in projects, and how to tailor projects for success. This course prepares students to take the Project Management Institute (PMI) Certified Associate in Project Manager (CAPM) certification.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM200
Introduction to Project Management
4 Semester Credits
Course Description
This course is an introduction to project management. In this course students learn project management methods that create value for the organization and stakeholders. This course covers how to recognize and respond to systems that interact throughout the project life cycle. Students will learn how to adapt to changes and risks while ensuring quality and delivering value. The course delves into analyzing and tailoring methods to ensure delivery of expected outcomes. The course concludes with a look into models, methods, and artifacts used in managing projects.
Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM201
Introduction to Business Analysis
4 Semester Credits
Course Description
This course is an introduction to business analysis. In this course students learn practical approaches to project-related issues associated with requirements and business analysis. This course identifies the tasks that are performed by business analysists. Students learn the essential knowledge and skills needed to effectively perform business analysis on programs and projects.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PJM202
Agile Project Management
4 Semester Credits
Course Description
In this course, students will learn the practices of Agile, and how this approach transforms project management. They will learn to develop new ways of thinking and understand how these practices apply to managing projects. This course teaches why Agile practices are needed and how they can be adapted to fit a given situation. Students will learn how to develop an adaptive approach to project management that blends both Agile and plan-driven practices. The course teaches the potential roles that an Agile

project manager can play, and how to reshape project management skills around these roles.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

Office Productivity

BUS101

Word Processing Fundamentals

3 Semester Credits

Course Description

This course shows you how to create documents using templates; customize your document using themes, page layouts, and tables; add images and multimedia to your document; work with document revisions; and protect and finalize your document. Covered topics include:

- Navigate Basic Microsoft Office
- Create Documents
- Use the Clipboard
- Modify Fonts
- Format Paragraphs
- Format Pages
- Edit Documents
- Insert Illustrations
- Create and Format Tables
- Use Themes, Styles, and Templates
- Manage References
- Manage Headers, Footers, and Sections
- Use Office Collaboration Feature
- Use Macros

Prerequisites:
There are no required prerequisites for this course.

BUS102

Spreadsheets Fundamentals

3 Semester Credits

Course Description

In this course you will gain a fundamental understanding of the Excel environment and the ability to complete tasks independently. You will learn the correct application of the principal features of Excel. You will learn to create and edit a workbook with multiple sheets for a variety of purposes and situations. Examples include professional-looking budgets, team performance charts, sales invoices, and exercise logs. Covered topics include:

- Get Started with Office
- Custom Views and Options
- Introduction to Excel
- Create and Manage Workbooks
- Organize and Enter Data
- Change Properties and Print Worksheets
- Format Cells
- Enter Simple Formulas
- Use Advanced Functions
- Display Data in Charts
- Organize Data in Tables
- Summarize Complex Data

Prerequisites:
There are no required prerequisites for this course.

BUS103

Presentation Applications

3 Semester Credits

Course Description

This course guides students through typical PowerPoint use and shows them how to get the most out of PowerPoint features to work effectively and efficiently with templates, themes, and styles. Covered topics include:

- Get started with Office
- Work with objects
- Be introduced to PowerPoint
- Create and manage presentations
- Format textual content
- Design slides
- Use the Slide Master
- Format SmartArt and shapes
- Format tables and charts
- Format pictures and other media
- Apply animations and transitions
- Deliver presentations

Prerequisites:
There are no required prerequisites for this course.

BUS104

Database Management

3 Semester Credits

Course Description

This course guides students through two scenarios for creating databases. Initially you will create a very simple, standardized database from a template and then go on to create a customized database. Upon completion of the course, you will understand tables, relationships, queries, forms, and reports. Covered topics include:

- Discuss Computer Hardware
- Describe System Software
- Demonstrate knowledge of how MS Office basics
- Discuss and understand features of MS Access
- Define Databases management
- Discuss and apply File Management
- Design and Create Tables
- Discuss Application Software

- Use Simple Queriers
- Understand and implement Networking and User Accounts
- Create and apply Forms
- Work with Databases
- Create and apply Reports
- Discuss and apply Computer Programming concepts and features
- Understand Information Systems
- Discuss Advanced Access Features

Prerequisites:
There are no required prerequisites for this course.

BUS105
Business and Email Management
3 Semester Credits
Course Description
This course shows you how to customize the Outlook user interface, send and respond to emails and meeting requests, manage the calendar, schedule meetings and appointments, organize contacts, create and modify tasks, and use notes. Covered topics include:

- Computer Systems and the Internet
- The Windows Operating System
- File Management
- Networking and System Updates
- Computer Hardware
- Printing from Office Applications
- Getting Started with Office
- Introduction to Outlook
- Sending and Receiving Messages
- Managing Messages
- Working with the Calendar
- Managing Contacts and Group

Prerequisites:
There are no required prerequisites for this course.

General Education Courses

English Language, Communication, and Critical Thinking

ENG200
Technical Writing
3 Semester Credits
Course Description:
This course provides a general overview of the techniques and methods used to produce high-quality technical writing. Students will come to understand the various environments in which crafting clear and concise documents is paramount and how to integrate this knowledge in professional, multi-cultural settings. Additionally, they will obtain practical experience by reading, analyzing, and writing different types of technical documentation in the form of reports, procedures, and more.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ENG201
Science Fiction and Technology
3 Semester Credits
Course Description:
This course offers a comprehensive overview of the science fiction genre of literature and how it has shaped advancements in technology, as well as the morals that govern them. Students will become more familiar with the change in narrative frameworks with each literary movement and learn about the authors who created them. Along with developing an understanding of how the Writing Process can enhance writing projects, this course will guide students into utilizing literary criticism, further enhancing their knowledge of how scholars can approach scientific literature from multiple perspectives.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

ENG210
Public Speaking
3 Semester Credits
Course Description:
Provides guided practice in public speaking and metacognitive skills development. Develops capabilities in speech resource material organization, outlining, presenting, and using tools effectively to reach the audience. Gains experience in public speaking.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

Mathematical Concepts and Quantitative Reasoning

MTH105
College Algebra
3 Semester Credits
Course Description:
The topics will include, but is not limited to, exponential function, logarithmic functions, systems of linear equations, matrices, and sequences.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

MTH140

Statistics

3 Semester Credits

Course Description

This course will include, but is not limited to, the following concepts:

- Histograms
- Average and Standard Deviation
- Normal Approximation for Data
- Correlation
- Regression

Activities will include solving problems and using appropriate technological tools.

Prerequisites:

Completion of MTH105: College Algebra.

MTH201

Pre-Calculus

4 Semester Credits

Course Description:

This course prepares you to take advanced courses in Calculus. Topics include concepts of Euclidean Geometry involving points, lines, circles, and quadrilaterals. This course will also focus on the study of angles, trigonometry of angles and the practical applications of the laws of sines and cosines.

Prerequisites:

Completion of MTH105: College Algebra.

MTH205

Calculus 1

4 Semester Credits

Course Description:

The design of this course is to develop the subject of differential calculus. Topics include functions, limits, derivatives, and differentiation rules.

Prerequisites:

Completion of MTH201: Pre-Calculus.

MTH210

Calculus 2

4 Semester Credits

Course Description:

Calculus-2 is a continuation of Calculus-1, covering applications of derivatives. Topics will also include antiderivatives and definite integrals.

Prerequisites:

Completion of MTH205: Calculus 1 or equivalent prior course.

Arts and Humanities

AHS305

Technology, Society, and Culture

3 Semester Credits

Course Description:

Provides guided practice in examining concepts of the history of technology, science, and technology studies (STS) and development of technology with its impacts on gender, community, society, globalization, and interpersonal communication. Develops awareness of design, innovation, and labor in technical contexts. Concepts and theories in technology are brought to life.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

AHS310

Professional Practice in Ethics

3 Semester Credits

Course Description:

Information Technology ethics overview including users, workers, organizations, and society. The impacts of social media, Internet lawsuits, and security on Information Technology organizations and society.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

Natural Physical Sciences

SCI120

General Biology

3 Semester Credits

Course Description:

This course introduces students to the foundational concepts of biology through our accessible and comprehensive Biology course. Tailored for beginners, it aims to not only instill a solid understanding of biology's fundamental principles but also cultivate critical thinking abilities essential for confidently navigating scientific knowledge.

Prerequisites:

Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

SCI130

Principles of Chemistry

3 Semester Credits

Course Description:

This course is designed for general education purposes and for students in programs that require a chemistry background. Topics include dimensional analysis, the periodic table, atomic theory, bonding, molecules and nomenclature, solutions, chemical reactions, mass

relationships, acid–base theory, galvanic cells, and applications of modern chemistry.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

SCI140

General Physics

3 Semester Credits

Course Description:
This course introduces the student to classical and modern principles of Physics, from Mechanics and Thermodynamics to Sound, Electricity, Magnetism, Optics and Atomic physics. The students will gain a deeper understanding of the physical concepts of the world around them and are motivated and encouraged to learn of current and emerging practical applications based on the theories introduced in this course.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

Social and Behavioral Sciences

SBS110

Introduction to Psychology

3 Semester Credits

Course Description:
This course provides an overview of psychology, including the origins of psychology, research methods, lifespan development, sensation and perception, learning and memory, cognition, personality, social processes, and mental illness.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

SBS120

Sociology

3 Semester Credits

Course Description:
This course introduces the scientific study of human social behavior. Presents the latest data and insights on behaviors, beliefs, issues, and trends on national and global levels from a sociological perspective. Themes covered include diversity, the application of sociology to everyday life, the impact of media, the importance of a global perspective, and social and global change.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

SBS201

Economics

3 Semester Credits

Course Description:
Provides an overview of economic concepts and an introduction to basic economic analysis, along with its applications and implications. Topics explored include how markets work, market efficiency and market failure, firm and consumer behavior, and policy issues such as taxation and international trade.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

Personal and Professional Development

PPD300

Critical Thinking and Problem Solving

3 Semester Credits

Course Description:
Provides guided practice in the conventions of reasoning, critical thinking, and interpersonal communication. Develops essential skills in the understanding of the conceptual framework for arguments and gains awareness of how perspectives are used with the culture, values, and value systems in argumentation. Uses the nature and types of evidence in the processes of collaboration and review used in communication. Expands upon the skills of ethics and responsibility in communication.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

PPD305

Career and Technology

2 Semester Credits

Course Description:
Provides guided practice in use of technology to develop a social presence, how to gain interviews, and how to establish resumes online. Provides information to acquire current skills in resume and cover letter writing. Develops knowledge of language that demonstrates self-awareness for interview and resume. Strengthens awareness of current job market and organizations hiring for Information Technology.

Prerequisites:
Students must have experience using a keyboard and mouse in a GUI-based OS such as Microsoft Windows or Macintosh.

Continuing Education and Professional Development (CEPD) Courses

CEPD101

CompTIA A+ Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the CompTIA A+ Core 1 (220-1201) and Core 2 (220-1202) certification exams. Topics include computer hardware, operating systems, software troubleshooting, networking fundamentals, cybersecurity basics, and IT support best practices.

CEPD102

CompTIA Network+ Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the CompTIA Network+ (N10-009) certification exam. Topics include network architecture, network operations, network security, troubleshooting, wireless technologies, and emerging networking concepts.

CEPD111

ISC2 Certified in Cybersecurity (CC) Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the ISC2 Certified in Cybersecurity (CC) certification exam. Topics include security principles, business continuity, access controls, network security, and security operations.

CEPD112

CompTIA Security+ Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the CompTIA Security+ (SY0-701) certification exam. Topics include security architecture, threats and vulnerabilities, risk management, incident response, security operations, and compliance concepts.

CEPD113

CompTIA SecAI+ Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the CompTIA SecAI+ (CY0-001) certification exam. Topics include advanced security operations, cybersecurity engineering, risk management, enterprise security architecture, and the integration of artificial intelligence within cybersecurity environments.

CEPD121

AWS Dual Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for both the AWS Certified Cloud Practitioner (CLF-C02) and AWS Certified Solutions Architect – Associate (SAA-C03) certification exams. Topics include AWS core services, cloud concepts, security, architecture design principles, storage, networking, and cost optimization.

CEPD122

Azure Dual Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for both the Microsoft Azure Fundamentals (AZ-900) and Azure Administrator Associate (AZ-104) certification exams. Topics include Azure services, cloud concepts, identity and access management, governance, storage, virtual networking, and Azure administration.

CEPD201

Cisco CCNA Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the Cisco Certified Network Associate (CCNA) certification exam. Topics include network fundamentals, IP connectivity, network access, security fundamentals, automation, and programmability concepts commonly found in modern enterprise networks.

CEPD211

CompTIA CySA+ Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the CompTIA Cybersecurity Analyst (CySA+) certification exam. Topics include threat detection, vulnerability management, security monitoring, incident response, security operations center (SOC) activities, and security analytics.

CEPD212

CompTIA PenTest+ Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the CompTIA PenTest+ certification exam. Topics include penetration testing methodologies,

vulnerability assessment, reconnaissance, exploitation techniques, reporting, and compliance considerations.

CEPD231

PMI – PMP Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the Project Management Institute (PMI) Project Management Professional (PMP) certification exam. Topics include predictive, agile, and hybrid project management approaches, project leadership, stakeholder engagement, risk management, project delivery, and business environment considerations aligned with the PMP Examination Content Outline.

CEPD241

AAPC Certified Professional Coder (CPC) Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the AAPC Certified Professional Coder (CPC) certification exam. Topics include medical terminology, anatomy and physiology, ICD-10-CM, CPT, HCPCS Level II coding systems, coding guidelines, compliance requirements, and medical documentation review.

CEPD311

ISC2 CISSP Professional Development Course

40 Hours

Course Description:

This bootcamp prepares participants for the ISC2 Certified Information Systems Security Professional (CISSP) certification $2995

exam. Topics align with the eight CISSP domains, including security and risk management, asset security, security architecture, network security, identity and access management, security operations, and software development security.

ACADEMIC AND ADMINISTRATIVE LISTING

MANAGEMENT LISTING

PRESIDENT

Doyle, Jamie – President / CEO

- Certificate – Music Performance, Musicians Institute
- Pilots Licenses – PPL, SEL
- Advanced Ground Instructor
- FAA Airframe & Power Plant License- A&P
- FAA Inspection Authorization
- FCC General Radiotelephone Operators License

VICE PRESIDENTS

Barrera, Kirsten – Vice President, Strategy and Analytics

- M.S.Ed. in Learning Design and Technology, Purdue University
- B.A. in Communication, Information Technology, Santa Clara University

de Oliveira, Flavio – Vice President, People and Culture

- B.S. in Psychology, Alliant International University
- Associate degree in History, San Diego Mesa College
- Associate degree in Spanish, San Diego Mesa College
- Associate degree in Social and Behavioral Science, San Diego Mesa College
- Professional in Human Resources (PHR), HR Certification Institute
- Professional in Human Resources (SPHR), HR Certification Institute
- Professional Certificate in Human Resources Management, San Diego State University

Kingston, Melissa – Vice President, Education

- M.Ed. with a concentration in Teaching Learning, and Evaluation, University of Ottawa
- B.A. in Business Administration, Carleton University

Park, Claire – Vice President, Compliance

- M.Ed. in College Counseling and Student Development, Point Loma Nazarene University
- B.A. in Human Development and Education Studies, University of California, San Diego
- VA Certifying Official
- Member of Accrediting Council for Continuing Education and Training (ACCET) on-site team evaluator

Qopi, Bashar – Vice President, Information Technology

- B.S. in Computer Engineering, University of Baghdad
- Certifications: CCNA, CCNP, CCSI, and CWNA

DIRECTORS

Crow, Glenda – Director of Strategic Partnerships

- MBA – University of Phoenix
- B.S. in Business, University of Phoenix

Funk, Dan – Director of Marketing

- B.S. in Marketing, Florida State University
- Design Media Certificate, University of California, San Diego

Kelly, Lee – Director of Admissions

- B.S. in Business Administration, Purdue University Global

LeQuin, Beth – Head of Accounting

- M.A. in Theology & Ministry, Boston College
- MBA, Loyola College in Maryland
- B.A. in Economics, Emory University

Oglesby, Taban – Director of Student Services

- M.A. in Business Administration, Independence University
- M.A. in Education, National University
- B.A in Liberal Studies, San Diego State University

Pagani, Brandon – Director of Strategic Partnerships

- B.S. in Business Management, Colorado State University – Global Campus

Tadeo, Rosa (Ysela) – Director of Financial Aid

- A.A. in Digital Arts, The Art Institute of California

Tlapa, Margie – Director of Industry & Employer Partnerships

- Ph.D., Organizational Development and Leadership, University of the Rockies
- M.A., Organizational Management, University of Arizona – Global Campus
- B.A., Organizational Management, University of Arizona – Global Campus

Winkler, Marc – Head of Strategic Partnerships

- MCA, AI & Machine Learning Implementation, Strayer University
- Executive MBA, Organizational Leadership, Jack Welch Management Institute
- BBA, Marketing, Strayer University
- A.S., Business Administration, University of Phoenix

MANAGERS

Agustin, Loida – Admissions Manager

Alexander, Erin – Student Success Manager

Garvey, Cindy – Financial Aid Advising Manager

Handy, Mark - Admissions Manager

Loerop, Jacquelyn – Admissions Manager

Martin, Kyle – Financial Aid Coordinator Manager / SCO

Meyers, Andrea – HR Manager

Moncada, Johan – Admissions Manager

Muheim, Jean-Pierre – IT Manager

Sticka, Stephen – Registrar

Summers, Stephanie – Admissions Manager

White, Melissa – Talent and Development Manager

ADMINISTRATION LISTING

ACCOUNTING

Castro, Angelica- Accounts Receivable/Payable Clerk

Frye, Brandy – Accounts Receivable/Payable Clerk

Gigante, Rica – Accounts Receivable/Payable Clerk

Madrigal, Kikey – Junior Accountant

Pick, Madison – Accounts Receivable/Payable Clerk

Roman, Veronica – Accounts Receivable/Payable Clerk

ADMISSIONS

Ancheta, Rhea – Admissions Advisor III

Cardenas, Leonardo – Admissions Advisor

Dillon, Sasha – Admissions Advisor II

Edwards, Esther – Admissions Advisor

Ferguson, Amber – Admissions Advisor

Finney, Brooke – Admissions Advisor III

Gana, Tony – Admissions Advisor

Gardner, Alan – Admissions Advisor

Gibson, Avery – Admissions Advisor

Hancock, Joseph – Admissions Advisor III

Herrera, Monica – Admissions Advisor II

Johnson, OnTay – Admissions Advisor

Jolly, Reggie – Bootcamp Enrollment Specialist

Larson, Ryan – Admissions Advisor III

Lerma, Katherine – Admissions Advisor II

Loy, Shaun – Admissions Advisor

Malasan, Marlon – Admissions Advisor

Manus, Mandy – Admissions Advisor

Moreno, Aaron – Admissions Advisor

Morris, Michael – Admissions Advisor

Nguyen, Nancy – Admissions Advisor

Ochoa, Leslie – Admissions Advisor II

Perkins, Natalie – Admissions Advisor

Powell, Jerrell – Admissions Advisor II

Rivas, Max – Admissions Advisor II

Rojas, Trinity – Admissions Advisor

Salido, Ashley – Admissions Advisor

Scriven, Callum – Admissions Advisor

Smith, Grant – Admissions Advisor

St. Clair, Celina – Admissions Advisor

Sturdevant, Noah – Admissions Advisor II

Tamez, Miguel – Admissions Advisor

Taylor, Terrance – Admissions Advisor II

Terry, Darrell – Admissions Advisor

Thiel, Rachel – Admissions Advisor II

Thomason, Becca – Admissions Advisor II

Torres, Michel – Admissions Advisor III

Ulloa, Ruth – Admissions Advisor

Varela, Mayra – Admissions Advisor

Vasquez, Elizabeth – Admissions Advisor III

Zabnicka, Beata – Admissions Advisor

CAREER SERVICES

Burdette, Ava – Career Services Advisor

Caldera, Bitzareth – Career Services Advisor

Camarena, David – Career Services Advisor

Campbell, Rashid – Career Services Advisor

Dien, Maria – Career Services Advisor

Green, Mary – Industry Partnerships Specialist

Jose, Josie – Senior Career Services Advisor

Penner, Christina – Industry Partnerships Specialist

Perez, Paul – Industry Partnerships Specialist

Ruiz, Victor – Career Services Advisor

Young, Sydney – Career Services Advisor

COMPLIANCE

Lott, Katarina – Compliance Coordinator

Vukovich, Talia – Senior Compliance Coordinator

FINANCIAL AID

Avery, Alexandra – Financial Aid Coordinator / SCO

Collins, Summer – Financial Aid Coordinator / SCO

De Loza, Karina – Financial Aid Coordinator / SCO

Extein, Yana – Financial Aid Advisor

Faiez, Bibi – Financial Aid Advisor

Garcia, Melanie – Financial Aid Coordinator / SCO

Hadjiconstantis, Stefenia – Financial Aid Advisor

Hancock, Bryana – Financial Aid Coordinator / SCO

Hendrix, Andrea – Financial Enrollment Administrator

Jones, Isela – Financial Aid Advisor

Leon, Raul – Financial Aid Coordinator

Lopez, Gissel – Financial Enrollment Administrator

Loza, Zytlalic – Financial Aid Advisor

Luallin, Jennifer – Senior Financial Aid Coordinator / SCO

Mendez, Natasha – Financial Enrollment Coordinator

Pak, Katie – Senior Re-Entry Coordinator

Riggert, Bridget – Financial Aid Coordinator / SCO

Roman, Tony – Financial Aid Coordinator / SCO

Ruiz, Anaiah – Financial Aid Advisor

Saucedo, Kerry – Financial Aid Coordinator / SCO

Saunders, Alexia – Re-Entry Coordinator

Sibbet, Logan – Financial Aid Advisor

Sooto, Arlene – Financial Aid Advisor

HUMAN RESOURCES

Acosta, Brianna – HR Specialist

Castillo, Liz – Talent Acquisition Specialist

Delestine, Ann – Talent Acquisition Specialist

Nush, Reanna – HR Specialist

Sherlaw, Sigourney – HR Coordinator

Shook, Taylor – Senior Talent Acquisition Specialist

IT

Beck, Timothy – Web Developer

Bryan, Jason – Technical Support Coordinator

Doyle, Brennan – IT Support Analyst

Gehan, Ahmed – Data Analyst

Harper, Jim – Technical Operations Administrator

McFarland, Clayton – Software Developer

Nguyen, Kat – Data Analyst

Park, John – System Administrator

Parker, Quincy – Help Desk Technician

Ugaban, Jonathan – Logistics Specialist

MARKETING

Carter, Ashley – Paid Media Coordinator

Doyle, Rylee – Social Media & Community Specialist

Evans, Kaylee – Senior Marketing Communications Specialist

Knight, Amy – Creative Manager

Mui, Jason – Content Design Coordinator

Naoum, Nichole – Marketing Coordinator

Olivas, Gabrielle – Learning & Development Coordinator

Rumaldo, Julio – SEO Coordinator

STUDENT SERVICES

Ancheta, Camille – Student Success Advisor

Arce, Candace – Student Success Advisor

Bowman, Briana – Student Success Advisor

Brancheau, Ed – Records Specialist

Brown, Elliott – Student Success Advisor

Brunow, Cozey – Student Success Advisor

Cruz, Vianka – Enrollment Coordinator

Dominquez, Diego – Federal Work Study Student Position

Eberhart, Donald – Senior Enrollment Coordinator

Farin, Brianna – Student Success Advisor

Hunt, Christine – Records Evaluator

Lorin, Christiana – Records Evaluator

Lyons, Sarah – Student Success Advisor

Marin, Elva – Records Evaluator

Monteilh, Alayna – Enrollment Coordinator

Munoz, Daniel – Records Evaluator

Ramirez, Heather – Senior Student Success Advisor

Sardano, Serena – Student Success Advisor

Scheier, Susannah – Records Evaluator

Singer, Bianca – Student Success Advisor

Tauanuu, Norah – Senior Records Evaluator

Watson, Andrea – Senior Student Success Advisor

FULL-TIME FACULTY

Abohebeish, Eman – New Program Development Manager

- B.S. in Electrical Engineering, California State Polytechnic University
- Certifications: Project Management Professional (Project Management Institution), Scrum Master (CSM)

Alshawi, Abdullah – Associate Dean of Education, Business Programs

- DBA, Digital Marketing, Alliant International University
- MBA, Mobile & Social Media Marketing, National University
- B.A., Management Information Systems, Applied Science University

Anderson, Natasha – Associate Dean of Education – Software Development

- M.S. in Database and Web Programming, California State University, Fullerton

Behboodi, Asghar – CompTIA and Cisco Instructor

- M.S. Software Engineering, National University
- B.S. in Business Marketing with Minor in Electronics, Northeastern University
- Certifications: CompTIA A+, CCNA

Blas, Phil – Associate Dean of Education

- M.S. Information Management Systems, Kellar Graduate Schools, California
- B.S. Technical Management, DeVry University, California
- Certifications: CompTIA ITF+

Burnett, Eric – Associate Dean of Education, Cybersecurity

- M.S. in Information Systems Management, University of Phoenix
- B.S. in Information Technology, University of Phoenix
- Certifications: CompTIA Security+, CEH (EC-Council), CEI (EC-Council)

Dobrin, Laona – Curriculum Coordinator

- M.S. Chemistry, Northern Arizona University

Erakat, Nasser – CompTIA Instructor

- B.S. in Information Technology, University of Phoenix
- Certifications: CompTIA A+, Security+

Galligan, Patrick – Faculty Coordinator

- M.Ed., Loyola University Chicago
- B.A. in Broadcasting, Columbia College Chicago
- Certifications: Microsoft Office Specialist 2019 – Word, Excel, PowerPoint, Outlook, Access

Heron-Williams, Karema – Faculty Coordinator

- M.A., Educational Leadership, University of Central Florida
- BSc in Information & Library Science, University of Maine at Augusta

Kent, Bonnie – LMS / Instructional Specialist

- M.A. in Organizational Management, Ashford University
- B.A. Communication Studies, Biola University

Luallin, Brent – Senior LMS / Instructional Specialist

- M.S. in Information Systems Management, Coleman College
- B.S. in Computer Electronics Technology, Coleman College
- Certifications: MCSA, MCP and CompTIA Security+

Michel, Alain – Dean of Healthcare

- MBA, Healthcare Management, Western Governors University
- BSc, Business Administration, IT Management, Western Governors University
- Diploma, Practical Nursing, Middlesex County Technical Schools

Reyes, Francis – CompTIA Instructor

- M.S. in E-Commerce, National University
- Certifications: CompTIA Network+

Rothwell, William "Bo" – Associate Dean of Education – Cloud Computing

- B.S. in Computer Science, El Dorado College
- Certifications: CompTIA A+, Network+, Linux+, AWS Solutions Architect Associate, AWS SysOps Administrator Associate

Sanchez, Alfonso – Associate Dean of Education

- M.A. in English, Emphasis in Rhetoric, National University
- B.A. in Early Childhood Education, National University

Stark, Adam – Associate Dean of Education, Computer Information Systems

- Ph.D., Technology Leadership & Innovation, Purdue University
- Graduate Certificate, Data Science, Indiana University
- MBA, University of Florida
- B.S., Mechanical Engineering Technology, Purdue University

Sanjiv, Rema – General Education Instructor / SME

- M.S. in Computer Engineering, San Jose State University
- B.S. in Electronics and Communication, Kerala, India
- Teaching Credential in Mathematics, National University

Smith, Brad – IT Certification Program Manager

- B.A. in Political Science - University of California – Berkeley
- Certifications: CompTIA A+

Toth, Carolyn – General Education / SME

- M.S. in Psychology with Specialization in Counseling, Capella University
- B.S. in Human Services Management, University of Phoenix

Valle, Emilia – Curriculum Manager

- M.A. in Leadership, Carolina University
- MFA in Design, Academy of Art University
- M.S. in Human Resource Management, Nova Southeastern University
- B.S. in Design & Technology, Florida State University

Velazquez, Jose – CompTIA Instructor

- B.S. in Business Administration, California State Polytechnic University
- Certifications: CompTIA Network+

ADJUNCT FACULTY

Algarin, Antiono - Cybersecurity Adjunct

- M.B.A., University of Maryland Global Campus
- M.S. in Cyber Security, University of Maryland University College
- Certifications: CompTIA Security+

Allison-Aipa, Timothy – Data Analytics Adjunct

- Ph.D. in Organizational Philosophy, Alliant International University
- M.A. in Organizational Psychology, Alliant International University
- B.A. in Psychology, California State University, Fullerton

Amaro, Jose – CompTIA Adjunct

- M.S in Information Technology (Cybersecurity), California Lutheran University
- MBA, California State University, Channel Islands
- B.A. in Business Administration, California State University, Northridge
- Certifications: CompTIA ITF+

Ammann, Kenneth – Cloud Computing Adjunct

- B.A. in Economics, University of Southern California
- B.A. in East Asian Area Studies, University of Southern California
- Certifications: Microsoft Azure AI Engineer Associate, Azure Solution Expert and Azure Data Engineer Associate

Ang, Robert - CompTIA Adjunct

- B.A. in Business Economics with a Minor in Computer Programming, University of California, Los Angeles
- Certifications: CompTIA Network+, Security+

Arca, Rommel – CompTIA Adjunct

- M.S. in Human Resource Development, Villanova University
- B.A. in Political Science, MSU
- AS. In Computer Information Systems – Networking Concentration, California Institute of Arts & Technology
- Certifications: CompTIA Network+, Security+

Asis, Ace – Cybersecurity Adjunct

- M.S. in Cybersecurity, Western Governors University
- Certifications: CompTIA Security+, Network+, A+, CCNP, CCNA

Bassili, John - CompTIA Adjunct

- B.S. in Cybersecurity and Information Assurance, Western Governors University
- B.S. Biology Cum Laude, California Polytechnic University, Pomona
- Certifications: CompTIA A+

Bautista, Frances – Business Data Analytics Adjunct

- M.S. of Public Health/Healthcare Administration, National University
- B.A. of Liberal Studies/Sociology, University of California, Riverside

Bobryk-Ozaki, Terrence – Cloud Computing Adjunct

- M.S. Cybersecurity and Information Assurance, Western Governors University
- B.S. Network Systems, Western Governors University
- Certifications: AWS Certified Cloud Practitioner, AWS Certified SysOps Administrator – Associate, Linux+, Network+, Server+, Security+, Project+

Borunda, Ramon – Cloud Computing Adjunct

- MBA, California State University, San Marcos
- B.S. Computer Information Systems, California State University, San Marcos
- Certifications: AWS Cloud Practitioner

Brown, Doug – Software Development Adjunct

- M.S. in Electrical Engineering, New Mexico State University, Las Cruces
- B.S. in Physics, New Mexico State University, Las Cruces

Bruckner, Dalton – Cybersecurity Adjunct

- B.S. in Cybersecurity, American Military University
- Certifications: CompTIA Network+, Security+

Callaghan, Matthew – Cybersecurity Adjunct

- B.S. in Information Technology, University of Phoenix, San Diego
- Certifications: CompTIA Security+

Casillas, Omar - Cloud Computing Adjunct

- B.S. in Molecular, Cell, and Developmental Biology - University of California, Los Angeles
- Certifications: Microsoft Azure Administrator Associate

Cevallos, Javier – Cloud Computing Adjunct

- M.S. in Integrated Design, Business, and Technology, University of Southern California, Iovine and Young Academy
- B.S. Business Administration, San Francisco State University, San Francisco
- Certifications: Microsoft Certified Azure AI Fundamentals, DevOps Engineer Expert, Azure Administrator Associate, Solutions Associate Cloud Platform, Microsoft Specialist Architecting Azure Solutions and Implementing Azure Infrastructure Solutions

Chan, Simon – Computer Fundamentals Adjunct

- BBA Supply Chain Management, Texas A&M University
- Credentials: CompTIA Security+, Network+

Chapman, Bianca – General Education Adjunct

- M.F.A. in Creative Writing and Literature, San Diego State University
- M.A. in Organizational Leadership, University of the Rockies
- B.A in Theatre Arts and Creative Writing, Dillard University

Cherry, Henry – OS Fundamentals Adjunct

- B.S. in Management Information Systems, Azusa Pacific University
- Certifications: Microsoft Certified Systems Engineer

Chheda, Chetan – CompTIA Linux Adjunct

- B.S. in Electronic Engineering, University of Mumbai, India
- Certifications: Architecting on AWS Training

Christle, Bettina – General Education Adjunct

- B.S. in Chemistry, Karlsruhe Institute of Technology, Germany
- Postdoctoral researcher at University of California, Berkeley

Contreras, Gary – Cybersecurity Adjunct

- B.S. in Business Management, University of Phoenix
- Certifications: CISSP

Copeland, Dane – CompTIA Linux Adjunct

- B.A in Psychology, University of California, San Diego
- Certifications: CompTIA Linux+

Cox, Bryson – CompTIA Adjunct

- B.A. in Communication, California State University, San Marcos
- Certifications: CompTIA A+, Network+

Cuellar, Anita – OS Fundamentals Adjunct

- Executive MBA in Strategic Leadership and Ops Management, Quantic School of Business and Technology
- B.S. in Management Information Systems and Business Management, Menlo College, Atherton, California
- A.S. in Travel Marketing and Hospitality, Los Medanos College
- Certifications: Apple Certified Support Professional, Google IT Support Professional

Datta, Santanu – Business Data Analytics Adjunct

- B.S. in Computer Science and Engineering, University of Kalyani, India
- Certifications: ITIL, Six Sigma Green Belt, Oracle Hyperion, Data Warehouse & Business Intelligence

Diangson, James – Software Development Adjunct

- B.S. in Business Administration, San Francisco State University

Dobrin, Laona – General Education and Computer Fundamentals Adjunct

- M.S. in Chemistry, Northern Arizona University
- B.S. in Chemistry, Northern Arizona University

Duong, Nam – CompTIA Adjunct

- MBA in IT Management, Western Governors University
- B.S. Cybersecurity and Information Assurance, Western Governors University
- Certifications: CompTIA A+, Network+, Security+

Duque, Ricardo - Cisco Adjunct

- B.S. in Electronic Engineering, Universidad Nacional de Colombia
- Certifications: Cisco Certified DevNet Professional, Cisco CCNA, Cisco CCNP

Escobedo, David – CompTIA Adjunct

- B.A. Investment Economics, California State University, Stanislaus
- Certifications: CompTIA Network+, Security+, Security Analytics Professional, Cisco Certified Network Associate Routing and Switching

Fabian, Anthony – CompTIA Adjunct

- B.S. in Computer Information Technology, Point Loma Nazarene University
- A.S. in Cybersecurity, Mira Costa College, Oceanside
- Certifications: CompTIA Fundamentals, A+, Network+, Security+, AWS Cloud Practitioner

Ferrera, Michael - CompTIA Adjunct

- M.S. in Management Information Systems, Colorado Technical University
- B.S. in Information Technology, Colorado Technical University
- Certifications: CompTIA Network+, CISSP, AWS Cloud Practitioner

Fontenot, Asmar – Cloud Computing Adjunct

- B.S. Electrical Engineering, University of California, San Diego
- Certifications: Azure Administrator Associate

Fooks, Lambert – Cloud Computing Adjunct

- Ph.D. in Education, Capella University
- M.S. in Instructional Technology (eLearning), National University
- B.A. in Visual & Performing Arts (Multimedia/Audio/Video), California State University
- Certifications: Microsoft Azure Administrator Associate

Francis, Dexter – Software Development Adjunct

- Ph.D. in Information Technology, Capella University, Minneapolis
- MBA, University of Phoenix, Jacksonville
- B.S. in Electrical Engineering, University of Florida
- Certifications: Community College Teaching Certificate, California State University Dominguez Hills

Franklin, Carlee – General Education Adjunct

- M.A. English Composition & Literature, California State University, San Bernardino
- B.A. Creative Writing & Literature, University of California, Santa Barbara

Gravatt, Steve – Computer Fundamentals Adjunct

- MBA in Information Technology, Western Governors University
- B.S. in Information Technology, Western Governors University
- A.S. Health Sciences and Biology and Mechanical Design, Napa Valley College
- Certifications: CompTIA Cloud Essentials+, Network+, Project+, Security+, A+

Guzman, Esteban – OS Fundamentals Adjunct

- B.S. Business Administration, California State Polytechnic University Pomona

Hamachi, Aaron – Cisco Adjunct

- M.S Information Security and Assurance – Western Governors University
- B.S Information Technology – Network Design and Management – Western Governors University

- Certifications: Cisco Certified DevNet Associate (DEVNET Associate), Cisco Certified Network Associate (CCNA), Cisco Certified Specialist – Enterprise Core, Cisco Certified Network Professional - Security (CCNP)

Harper, Steed – CompTIA Adjunct

- M.S. in Information Systems – Coleman University
- B.S. in Digital Entertainment and Game Design – ITT Technical Institute

Hayes, Jimmy - Cloud Computing Adjunct

- B.S. in Business Administration – Information & Decision Systems - San Diego State University
- Certifications: AWS Certified Solutions Architect, AWS Certified DevOps Engineer, AWS Certified Security, AWS Certified Database, AWS Certified Data Analytics

Hemnani, Shekhar – Cloud Computing Adjunct

- M.S. in Computer Science, Networking – University of Texas
- B.S. in Computer Science - Mumbai University
- Certifications: AWS Certified Solution Architect Associate, AWS Certified SysOps Associate, AWS Certified Developer Associate, AWS Certified Advanced Security Specialty, AWS Certified Advanced Network Specialty

Hernandez, Robert – CompTIA Linux and Software Development Adjunct

- B.S. in Computer Information Systems, Chapman University

Im, Edward – Software Development Adjunct

- BA Business Economics, University of California, Riverside
- Certifications: Python Stack Black Belt, MEAN Stack Black Belt

Iqbal, Javeria – Software Development Adjunct

- P.D. in Computer Science – International University of Malaysia
- MS Computer Science – Max Planck Institute of Computer Science

Itoga, Daisuke - Cloud Computing Adjunct

- MBA, University of California, Berkeley
- Certifications: Associate Cloud Engineer, Google Cloud

Kelly, Jamario – Cybersecurity Adjunct

- M.S. in Computer Information Systems – Bellevue University
- B.S. in Software Development – Bellevue University
- Certifications: CompTIA Security+, CISSP

Kennedy, Sean – CompTIA Adjunct

- B.A. in Computer Information Technology – Point Loma Nazarene University
- Certifications: CompTIA A+, Network+, Security+

Kpaduwa, Uche – Cloud Computing Adjunct

- B.A. in Theater University of California, Riverside
- Certifications: AWS, Cisco

Lathrop, Joseph – Business Data Analytics and Cloud Computing Adjunct

- B.A. in Business Administration - University of LaVerne
- Certifications: AWS Database Specialty, AWS Solution Architect Associate, AWS Sysops Administrator Associate

Lam, Thomas – CompTIA Adjunct

- B.A.in English – University of California, Riverside
- Certifications: CompTIA A+, CompTIA Network+

Lee, Michelle – Business Data Analytics Adjunct

- BA in Economics, University of California, Irvine

Leong, Robert – Computer Fundamentals Adjunct

- B.S. Molecular, Cell, and Developmental Biology, University of California, Santa Cruz
- Certifications: CompTIA Security+, Network+

Limoges, Kevin – CompTIA Adjunct

- B.S. Information Systems and Technology, California State University, San Bernardino
- Certifications: CompTIA ITF+

Loftis, Devin – Computer Fundamentals Adjunct

- MBA, University of Memphis
- B.S. Computer Science and Mathematics, University of Memphis

Mansouri, Amin – Cloud Computing Adjunct

- M.S. Cyber Security and Information Assurance, National University
- B.S. Computer Engineering, Shiraz University
- Certifications: AWS Certified Developer Associate, AWS Certified DevOps Engineer, AWS Certified Solutions Architect Professional, AWS Certified Security Specialty

Marquez, Carl – CompTIA Adjunct

- M.S in Educational Technology, National University
- B.S. in Kinesiology, San Diego State University
- Certifications: CCNA

Martin, Michael – Cybersecurity and Cloud Computing Adjunct

- B.S. in Computer Engineering, University of Massachusetts, Dartmouth
- Certifications: CompTIA Security+, Microsoft AZ900

Mason, Steven – Cisco Adjunct

- B.S. in Information Technology – ITT Technical Institute
- Certifications: Cisco CCNA, CompTIA Network+

McGregor, Rebecca – Computer Fundamentals Adjunct

- MBA Business Intelligence, Southern New Hampshire University
- B.S. Mathematics, Oregon State University
- Certifications: CompTIA ITF

McGregor, Jaina - CompTIA Adjunct

- M.S. in Leadership Concentration: Leading and Managing Technical Projects - Northeastern University, Boston, Massachusetts

- B.S. in Business Information Systems - Oregon State University, Corvallis, Oregon
- Certifications: CompTIA IT Fundamentals

McGuire, Chris – Cybersecurity Adjunct

- B.S in Computer Science – University of California, San Diego
- Certifications: Certified Information Systems Security Professional (CISSP), EC Council- Certified Ethical Hacker (CEH), CompTIA Security+

Mendoza, Hector – CompTIA Adjunct

- M.S. Cybersecurity, California State University, San Marcos
- B.S. Information Systems, Hawaii Pacific University
- Certifications : CompTIA Network+, Security+

Miller, Natalie – CompTIA Adjunct

- B.S in Computer Science – California Polytechnic State University
- Certifications: CompTIA Security+

Miller, Phil – Cloud Computing Adjunct

- M.S. in Management Information Systems – National University
- B.S. in Computer Science – San Diego State University
- Certifications: AWS Certified Cloud Practitioner, AWS Solutions Architect- Associate, CompTIA Security+, Certified Information Systems Security Professional (CISSP)

Miller, Quentin – Software Development Adjunct

- M.A. in Business Administration – University of Phoenix
- B.S. in Operations Management – Remington College
- A.S in Computer Network Technologies – Remington College

Mohn, Daniel – General Education Adjunct

- MBA in Finance and Management, Argosy University, Seattle
- B.S. in Workforce Education and Development, Southern Illinois University

Mueller, Lance – Cybersecurity Adjunct

- M.S. in Cyber Security Operations & Leadership, University of San Diego
- B.S. in Cybersecurity & Information Assurance, Western Governors University
- Certifications: CompTIA Security+, CISSP

Mukhopadhyay, Debsankar – Software Development Adjunct

- M.S in Engineering, University of Kansas
- M.S in Computer Science, University of Missouri – Kansas City

Newsom, William – Cloud Computing Adjunct

- B.A. in Government – California State University, Sacramento
- Certifications: AWS Cloud Practitioner, AWS Solutions Architect Associate

O'Brian, Cole – Software Development Adjunct

- M.S. in Data Science, University of Alabama, Birmingham
- B.S. in Data Science, University of Alabama, Birmingham

Patino, Luis - CompTIA Adjunct

- B.S. in Cybersecurity and Information Assurance - Western Governor's University
- Certifications: CompTIA A+, CompTIA Network+, CompTIA Security+

Pellegrini, Eva – Cybersecurity Adjunct

- M.S. in Cybersecurity and Information Assurance, Western Governors University
- MBA in Accounting and Financial Management, Keller Graduate School of Management/DeVry University
- B.S. in Business, DeVry University
- Certifications: CompTIA Security+, Project+, CISSP, CISM, ISACA, CEH (EC-Council), CHFI (EC-Council)

Pena, Marcelino – Business Data Analytics Adjunct

- M.A. in Demographic and Social Analysis – University of California, Irvine
- B.A. in Mathematics – St. Olaf College

Pham, Dzung – Cloud Computing Adjunct

- B.S. in Computer Science, University of Tulsa
- Certifications: AWS Solutions Architect Professional, DevOps Engineer Professional Security Specialty, Azure Solutions Architect Expert

Popgeorgiev, Nikolay – Cisco Adjunct

- M.S. Information Technologies,
- Certifications: Cisco DevNet Professional, CCIE, CCSI, PMP

Porter, Christopher – CompTIA Adjunct

- B.S. in Business Administration, California State University, San Bernardino
- Certifications: CompTIA A+

Powers, David – Cloud Computing Adjunct

- B.S. Computer Science, California Lutheran University
- Certifications: AWS Certified Developer-Associate, AWS Certified Solutions Architect-Associate

Prestia, Vincent – CompTIA Adjunct

- M.S. in Business Administration, Nova Southeastern University
- B.S. Information Technology, Western Governors University
- Certifications: CompTIA Network+, Security+, Project+, A+

Pryor, Justin – CompTIA Adjunct

- B.S. Information Technology, Arizona State University
- Certifications: CompTIA A+, Security+, Network+

Pugh, William – Cloud Computing Adjunct

- B.S. in Military History, United States Air Force Academy
- Certifications: AWS Certified Cloud Practitioner, AWS Certified Specialty, AWS Certified Solutions Architect – Associate, AWS Certified SysOps Administrator – Associate, AWS Security Specialty, AWS Machine Learning Specialty, CompTIA Network+, Security+

Quesada, Lawrence – OS Fundamentals Adjunct

- M.S. in Business Administration, Walden University

- B.S. in Computer Applications, De La Salle University
- Certifications: CompTIA A+, Server+

Quinn, Katelynn – Cybersecurity Adjunct

- M.S. Cybersecurity, Webster University
- MBA, National University
- B.S. Environmental Science, American Military University
- Certifications: CompTIA Security+, Network+, AWS Cloud Practitioner

Rao, Nikhil – Business Data Analytics Adjunct

- M.S. in Development Practice - University of California, Berkeley
- B.S. in Environmental Economics and Policy - University of California, Berkeley

Rath, Abhisek – Cloud Computing Adjunct

- M.B.A – University of California, Los Angeles
- Certifications: AWS Certified Cloud Practitioner

Rey, Louis – Software Development Adjunct

- M.S. in Electrical Engineering – San Diego State University
- B.S. in Electrical Engineering – San Diego State University

Rivas, Jacob – Adjunct

- BS in Business Administration and Management Information Systems, California State University, San Jose

Rivera, Andres – CompTIA Adjunct

- BA in Business Administration, California State University, Fullerton
- Certifications: CompTIA A+, Network+

Robles, Jovan – CompTIA Adjunct

- B.S. Computer Science, California College San Diego
- Certifications: CompTIA Network+, Security+

Roopkumar, Samson – Computer Fundamentals Adjunct

- M.S. Computer Science, Florida State University

Saleh, Ahmed- CompTIA and Cybersecurity Adjunct

- M.S. in Computer Science – James Madison University
- Certifications: IT Fundamentals

Sammour, Maen – Cloud Computing Adjunct

- MBA Business, Western Governors University
- B.S. in Electrical Engineering, Yarmouk University, Jordan
- Certifications: Microsoft Azure Fundamentals

Sanchez, Alfonso – General Education Adjunct

- MA in English, National University
- B.A. in Early Childhood Education

Sardano, Donald – Cybersecurity Adjunct

- B.S. Cybersecurity and Information Assurance, Western Governors University
- Certifications: CompTIA Network+, Security+, A+

Sebetich, Adam – Cloud Computing Adjunct

- B.S. in Informatics and Information Assurance and Cybersecurity, University of Washington
- Certifications: Microsoft Azure Administrator Associate, DevOps Engineer Associate

Sevilla, Marcelo – General Education and Computer Fundamentals Adjunct

- M.S. in Computational Science (In Progress) – San Diego State University
- B.S. in Mathematics – San Diego State University

Shahbazian, Andy – Cloud Computing Adjunct

- M.S. in Computer Science, California State University
- B.A. in Business Management, University of California, Los Angeles
- Certifications: AWS Certified Cloud Practitioner, AWS Certified Solutions Architect, AWS Speaker Certification

Shariff, James – Cybersecurity Adjunct

- M.S. in Cybersecurity and Information Assurance, Western Governors University
- B.S. Business Finance, National University
- Certifications: Certified Ethical Hacker (EC-Council), ISC2 CISSP, CompTIA Security+

Shoe, Christopher – Software Development Adjunct

- MBA, Mid-America Christian University
- BFA, New School University,

Shorter, Mellonise – Computer Fundamentals Adjunct

- M.S. in Cybersecurity and Information Assurance, National University
- B.A. Computer Technology, California State University, Dominiguez Hills
- Certifications: CompTIA Security+

Siddeeq, Debalina – General Education Adjunct

- M.S. in Chemical Engineering, Georgia Institute of Technology
- B.S. in Chemical Engineering, Georgia Institute of Technology

Singh, Rajvinder – Software Development Adjunct

- M.S. in Information Systems and Technology, Claremont Graduate University

Smith, Taylor - Cloud Computing Adjunct

- M.B.A - University of Redlands
- M.A. in Management - University of Redlands
- B.A. in Economics - University of Minnesota
- Certifications: AWS Certified Cloud Practitioner, AWS Certified Solutions Architect

Sorace, Robert – Cisco Adjunct

- M.S. in Information Technology, Capella University

- B.S. in Information Technology, University of Phoenix
- Certifications: Cisco Certified Network Associate (CCNA), Cisco Certified DevNet Associate

Sorush, Seddiq - Programming Adjunct

- B.S. in Technology (Electronics Engineering) (BTech) - The University of Pune, India

Spear, William – CompTIA Adjunct

- B.S. in Psychology, California Lutheran University
- Certifications: CompTIA A+, Network+, Security+

Splan, Curtis – CompTIA Adjunct

- M.S. Management Information Systems, University of Florida
- B.A. Psychology, University of Nevada
- Certifications: Project+, Security+, Network+, A+

Struck, Joshua – Cloud Computing Adjunct

- M.S. in Information Systems & Assurance, University of New Mexico
- B.A. Business Administration, University of New Mexico
- Certifications: AWS Certified Solutions Architect – Associate, CompTIA Security+, ITIL V4, Certified Ethical Hacker, CASP+

Terapak, Steve - Cloud Computing Adjunct

- B.S. in Computer Science - West Virginia University
- Certifications: AWS Cloud Practitioner, Microsoft Azure Administrator

Terhorst, John - General Education Adjunct

- M.S. in Chemistry – Yale University

Thatikonda, Karthik – Cisco Adjunct

- M.S. in Electrical Engineering, Wichita State University
- Bachelor of Technology, Electronics and Communications Engineering, Jawaharlal Nehru Technological University, India
- Certifications: Cisco Certified Network Associate, Cisco Certified Network Professional, AWS Certified Solutions Architect

Toor, Forrest – Cybersecurity Adjunct

- B.S. Cybersecurity and Computer Networks
- Certifications: CompTIA Security+

Torres, Enoc - Cybersecurity Adjunct

- B.S. in Cyber Security and Information Assurance - Western Governors University
- Certifications: CompTIA Security +, CompTIA Network +

Trujillo, Meagan – Cisco Adjunct

- B.S. in Information Technology, Arizona State University
- Certifications: Cisco Certified DevNet Associate, CompTIA Cybersecurity, Security+, Network+, Linux+

Turner, Amanda – Computer Fundamentals Adjunct

- MBA, California State University, Long Beach
- BA in Communication, University of Hawaii at Manoa
- Certifications: CompTIA A+

Vara, Ricardo – Cloud Computing Adjunct

- M.S. in Applied Computer Science & Technology, Azusa Pacific University
- B.S. in Computer Information Systems, Azusa Pacific University

Varlakov, Jivko – Cybersecurity Adjunct

- B.S. in Computer Science, University of South Florida
- Certificate of Advanced Computer Security, Stanford
- Certifications: CISSP, CompTIA Security+, Network+

Velliquette, Randy - Cloud Computing Adjunct

- M.S. in Cyber Security and Information Assurance, School of Engineering and Computing - National University
- M.S in International Affairs, School of Global Policy and Strategy - University of California, San Diego
- B.S. in Political Science, cum laude - University of Maryland
- Certifications: AWS Cloud Practitioner, CompTIA Network+, CompTIA Security+

Vera, Ricardo – Cloud Computing Adjunct
